内 容 摘 要

2007年上半年，我国经济继续稳健地快速增长，涉外经济快速发展，人民币汇率形成机制的改革稳步推进，汇率弹性增强，外汇市场继续发展。国际收支顺差式不平衡的问题依然十分突出，上半年，经常项目顺差1,629亿美元，资本和金融项目顺差902亿美元。到2007年6月底，我国外汇储备余额为13,326亿美元，比2006年末增加2,663亿美元。

近年来，我国外汇总储蓄率居高不下，外汇的储蓄与投资差额进一步扩大。同时，固定资产投资较快增长，制造业产能迅速扩大，在国际市场需求旺盛、内需相对不足的情况下，货物贸易顺差增加；由于经济持续较快增长，外国投资者对我国经济发展的信心增强，外商直接投资持续保持较大规模。这些是决定当前我国国际收支持续“双顺差”的基本因素。2007年上半年，经常项目、资本和金融项目顺差进一步扩大，短期因素一是企业在出口退税和关税政策调整影响下，抢先集中出口，进一步增大了货物贸易顺差；二是商业银行等金融机构受境外筹资规模下降、境内外利差、国内贷款需求上升等因素影响，重新摆布境内外外汇资产，减少对外证券投资，使得证券投资流出减缓和其他投资净流入增加；三是股票、房地产市场价格高企，对资本流入的吸引力增强。

当前，持续的国际收支顺差和较高的外汇储备规模，一方面有助于提升我国综合实力和国际竞争力，增强防范金融风险的能力；另一方面，有可能对我国经济运行产生一些不利影响。对此要保持全面、客观的认识，在把握机遇的同时，深化国内各项改革，积极应对挑战。

自2007年年初以来，国家高度重视经济运行中的突出矛盾和问题，加大了政策调整力度，出台了一系列政策措施。下半年，我国经济将保持良好的发展势头，但经济增长有可能依然偏快，物价上涨仍存在一定压力，潜在的风险不容忽

视。为此，国家已明确把防止经济由偏快转为过热作为当前宏观调控的首要任务，在加快经济结构调整、实行稳中适度从紧的货币政策、防止固定资产投资反弹、减缓贸易顺差过快增长势头、缓解流动性过剩矛盾、实现内外经济协调均衡发展等方面采取了综合措施，从而促进国际收支基本平衡。外汇管理方面将继续深化改革、进一步减少资本流出限制、严格短期资本流入和结汇管理、强化跨境资金的协调监管、大力发展外汇市场、充分发挥市场机制的作用、完善人民币汇率形成机制，为逐步实现人民币资本项目可兑换创造条件。

Abstract

In the first half of 2007, the Chinese economy continued to grow rapidly and steadily; the external economy went up significantly; the reform of the RMB exchange rate formulation mechanism was steadily advanced and exchange rate flexibility was enhanced; and the foreign exchange market continued to develop. The disequilibrium in the balance of payments is still prominent. In the first half of 2007, the current account recorded a surplus of USD 162.9 billion and the capital and financial account recorded a surplus of USD 90.2 billion. By the end of June 2007, China's foreign exchange reserves amounted to USD 1,332.6 billion, an increase of USD 266.3 billion over the end of last year.

In recent years, China has maintained a very high gross savings rate and an increasing savings-investment gap. Meanwhile, investments in fixed assets have grown rapidly, manufacturing capacity has expanded rapidly, and the surplus in goods has further increased due to the booming international demand and weak domestic demand. With rapid and sustained economic growth in China, foreign investors have greater confidence in China's economic development, leading to sustained large inflows of foreign direct investment. All of the above are fundamental factors determining China's sustained "dual surplus" in its balance of payments. In the first half of 2007, the current account surplus and the capital and financial account surplus continued to expand, which may be attributed to the following: first, influenced by the adjustment of the export rebate policy and the tariff policy, enterprises rushed to export their goods within a short period of time, which further increased the surplus goods; second, affected by such factors as the decreasing overseas fund-raising, the rising domestic-foreign interest rate spread, and the growing domestic demand for loans, commercial banks and other financial institutions reallocated their assets denominated in foreign currencies at home and abroad and reduced their overseas portfolio investments,

leading to a decrease in portfolio investment outflows and an increase in net inflows under other investments; third, the soaring prices in the stock and real estate markets also attracted more capital inflows.

Currently, the sustained surplus in the balance of payments and large-scale foreign exchange reserves may help enhance China's overall strength, international competitiveness, and its ability to prevent financial risks on the one hand, but may also have some unfavorable influences on China's economic performance on the other hand. Therefore, we should obtain a comprehensive and objective understanding of the situation, so that we can deepen the reform in various respects and actively deal with the challenges while grasping the opportunities.

Since 2007, the state has attached great importance to outstanding problems in economic development, strengthened policy adjustments, and introduced a series of policy measures. In the second half of 2007, the Chinese economy will continue to maintain a good momentum. However, economic growth may continue to be rapid and pressures on price inflation may continue to exist, leading to great underlying risks that cannot be ignored. Therefore, the state must decide to give top priority to preventing rapid economic growth from becoming overheated growth in the current round of macro-control, speed up economic restructuring and implement prudent monetary policies, prevent fixed-asset investment from rebounding, avoid excessive growth of the trade surplus, ease the problem of excessive liquidity, realize a balanced and harmonized development of the domestic and external economies, and adopt comprehensive measures to promote an equilibrium in the balance of payments. The foreign exchange administration will continue to deepen the reform, further relax controls on capital outflows, strengthen management of short-term capital inflows and sale of foreign exchange, intensify coordinated supervision of cross-border capital flows, greatly develop the foreign exchange market, bring the role of the market mechanism into full play, and create conditions to realize capital account convertibility of the RMB step by step.

中国 国 际 收 支 报 告

一、国际收支概况

2007年上半年，我国经济保持增长较快、效益较好、运行较稳的基本态势，国际收支继续保持“双顺差”格局。经常项目顺差1,629亿美元，较上年同期增长78%。其中，货物贸易顺差1,357亿美元，增长70%；服务贸易逆差31亿美元，下降44%；收益顺差129亿美元，增长253%；经常转移顺差174亿美元，增长28%。资本和金融项目顺差902亿美元，增长132%。其中，直接投资顺差509亿美元，增长64%；证券投资逆差48亿美元，下降83%；其他投资顺差426亿美元，增长21%。2007年6月末国家外汇储备余额比2006年末增加2,663亿美元，达到13,326亿美元。

（一）国际收支主要特点

1. 国际收支顺差增幅较大

2007年上半年，经常项目顺差同比增长78%，增幅较上年同期提高了42个百分点。资本和金融项目顺差同比增长1.3倍，改变了2006年资本和金融项目顺差下降的局面。

2. 货物贸易顺差再创历史新高

2007年上半年，国家通过一系列政策、措施促进贸易平衡，但国内储蓄率高的局面短期内难以改变，投资增长带来产能过剩和进口替代能力增强，加上部分企业在出口退税调整、对部分产品加征出口关税等政策执行前抢先出口，货物贸易顺差进一步扩大。按国际收支统计口径，货物贸易出口5,472亿美元，进口4,115亿美元，分别较上年同期增长28%和18%；顺差1,357亿美元，增长70%。

3. 收益项目顺差显著增加

随着我国海外务工人员的增多，劳务收入有所增加，加上我国对外资产规模持续扩大，利润、利息等投资收益不断增长。2007年上半年，收益项目顺差129亿美元，同比增长2.5倍。其中，职工报酬净流入17亿美元，增长1.1倍；投资收益净流入112亿美元，增长2.9倍。

4. 外国来华直接投资持续增长，我国对外直接投资继续增加

当前，我国经济基本面良好，生产要素价格较低，国内市场发展迅速，外商在我国市场投资的热情不减。按国际收支统计口径，2007年上半年，外国来华直接投
