广州，一个古老而又年轻的城市。

在它的老城区，旧与新的碰撞与对比随处发生着，展现了这个城市悠久的历史与现今的勃勃生机。

对于古老的街区，我们拒绝平庸的模仿，我们要用全新的建筑来表达对于古老的尊重，来表达这个城市街区如今的生机与活力。

水滴状的建筑，隐寓了珠江水，宛如一汪清泉，为古老的城市街区注入生机与活力，新颖的建筑形象象征了旧城区城市机能的更新。

光洁的金属与玻璃表面映衬了古老城市的影子。古与今、旧与新的对话奇妙地发生着。

光洁的表面反射着天空与云彩，建筑的体量感消融于天际，减轻街区的拥塞，带来奇幻的轻盈。

建筑间的玻璃连廊宛如时光隧道，隐寓着传统与现代的共存与穿梭。

建筑以一个点的姿态出现于城市环境中，它是景观与空间的高潮所在，强调的是提升而不是延续，隐寓了大东门在旧城格局中交汇点的作用。

Guangzhou is a city with a long history, but it is also a young metropolis full of vitality.

In its old city areas, the collision and comparison between the old and the new are ubiquitous, which demonstrate the history and vitality of the city.

With regard to the old streets, we refuse the bourgeois imitation. We aim to express our respect to the old with absolutely new constructions, and to show the vitality and energy of the streets in the contemporary time.

The buildings with tear shape imply that Pearl River water is a stream of limpid spring, which infuses vigor and vitality to the ancient city. The novel architecture visual is the symbol of the function renovating of the old urban area.

The shadow of the ancient city maps on the glabrous metal and surfaces of glass. The conversation among the ancient and the modern, the old and the new is taking place rummily.

The bright surfaces reflect the sky and the clouds; the volume of the buildings dissolves into the horizon as well, and the graceful image mitigates the congestion of the blocks, followed by fantastic lightness.

The glass corridors among the buildings seem as the times tunnel and imply the coexistence and shuttle of the traditional and the modern.

The building shows itself to the city in a point stance, where is the location of climax of the sight and the space. The elevation is stressed instead of continuity, signifying the intersection role of the east gate in the layout of old city.

构思草图 CONCEPTION SKETCH

重庆科技馆包括天文馆、水族馆、火箭馆、电影院，一个儿童城的永久展厅，几个临时展厅，大型会议室和宾馆服务区。

位于市中心长江口岸渝中半岛的西北，是城市十大主要公共设施之一。科技城不仅带动了周围地块的发展，也促进了整个城市的进步，与周围环境和谐统一，成为城市不可缺少的一部分。其建筑格调融入了科技创新的现代理念。其建筑构思通过运用各种建筑手法力图使重庆科技馆成为重庆市的象征。

为了满足可持续发展的要求，科技馆的设计和建造也考虑到节能和环保的特点。

Chongqing Science & Technology Museum includes the planetarium, aquarium, rocket museum, cinemas, a permanent exhibition hall of children's city, a variety of temporary exhibition halls, large meeting rooms and hotel service regions.

It locates at the northwest of Yuzhong Peninsula of Yangtzi River port at the centre of city, the Chongqing Science & Technology Museum is one of the ten major public facilities of the city. The city of science & technology not only brings about the development of the blocks around, but also promotes the advancement of the whole city, which is in harmony with the environment around and becomes an indispensable part of the city. The architectural style absorbs the modern concept of science and technology innovation, and the construction is also a combination of various representative skills to make it be the symbol of Chongqing City.

To meet the requirements of sustainable development, the design and construction of Chongqing Science & Technology Museum also takes the features of energy saving and environment protection into consideration.

为适应综合性发展的需要，项目涵盖商业、酒店、办公、会议中心、住宅等功能。

在金融区中，它作为商务贸易的一部分，提供智能的服务设施、顶级的运作环境、商业办公、购物、餐饮等配套设施及城市生活空间。因此我们将项目设计为“一站式”金融贸易服务区，这种核心规划结构，构成城市整体规划的交汇点。

在地块东侧，会展中心与双塔的基座交相辉映。中心涵盖了不同类型的会议厅和会议室，可以同时服务办公租户及沈阳 CBD 地区的用户。地块北侧为三栋 200 ~ 250 米高的公寓楼，其中酒店式公寓位于北半部，私人住宅在南半部，同时延续着街景立面的城市比例。另外一栋高约 200 米的公寓楼略与这两栋建筑分离，形成错落的布局，可以拥有最好的日照，使总平面变得多样化。地块南侧还有三栋高 70 ~ 110 米不等的公寓楼，与街道成一线，矗立在首层的花园之上。这些公寓建筑高矮各异，形态不拘一格，使整个规划的综合布局更加多元化。

同样重要的中央商业文化广场很好地融合在景观中，在此可以举行各种商业的、文化的活动，以满足当代人们日益增长的需求。

To fit for the comprehensive development, the project covers the functions of business, hotel, official business, meeting center, dwelling house and so on.

In the financial zone, as a part of business and trade it provides the supporting facilities such as intelligent service facilities, the best operating environments, commercial business, shopping and restaurants, etc. and urban life space. Therefore, the project is designed as finance & trade service zone in mode of "all-in-one", the core planning structure composes the joint point of the general planning of the city.

In east of the block, the exhibition center and the pedestal of twin towers enhance each other's beauty. The center contains a variety of meeting halls and meeting rooms, and could meet the needs of business for offices and users in CBD zone in Shenyang. In north of the block, there are three apartment buildings of 200 to 250 meters, and the apartment with hotel-styled services is located to the north, while the private residences are to the south, extending the proportion of the landscape facade of the street. Another building is 200 meters high which is detached from the two slightly, and forms the whole layout being strew at random with the best sunlight. Then the master plan is being diversity. There are three apartment buildings of 70 to 110 meters in height in south of the land, the three ones sit in the same line with the street and stand on top of the garden of the first floor. These buildings are irregular in heights and the shapes are not stick to one pattern, which takes the effect of diversification in the deployment of the whole planning.

What is of the same importance is that the central business culture square fits into the sight perfectly, where a lot of commercial or cultural activities could be held to satisfy the growing needs of the modern people.

总平面图 MASTER PLAN

会展建筑综合体呈V字形，向南打开，由轴线东西两个鱼形的大展厅和在中轴线上的会议中心组成。无论从江面城市体验轴，还是从东部新城都主导着城市空间和展岛的形式。

从东部新城到会展岛上的中轴线，即福峡路尽头结束于会展广场，“和谐相聚广场”。V字形的会展综合体把广场空间一分为三，这样就形成了无可替代的梯形主广场空间特征。

城市空间上，两个展厅、会议中心和北面的两个宾馆5个建筑体组成了无可替代的城市雕塑。

The Conference & Exhibition Building Complex opens to the south in the V-shaped, which is composed of two pisciform large exhibition halls at the east and west of the axial line and conference centre on the central axial line. The forms of urban space and conference & exhibition island are predominated either from the river surface city experience axial line or from the eastern new town. The place which is from the eastern new town to the central axis of the conference & exhibition island, namely the end of Fuxia Road disappeared by conference & exhibition plaza, is also called "Harmonious Gathering Plaza". The conference & exhibition complex in V-shaped divides the plaza space from one into three, and then the irreplaceable space feature of trapezoidal main plaza was born. With respect to the urban space, two exhibition halls, a conference centre and two hotels in the north have constituted the irreplaceable city sculpture.
