前言
Preface

针灸既是中医学一颗璀璨的明珠,也是它的一个重要组成部分。而腧穴又是学好针灸的基础,是历代针灸医家所十分重视和研究的内容。

组合穴是由两个或两个以上的腧穴或穴点组合而成的穴组。它大体上可分为如下几种:一为经穴的组合,即由两个或两个以上的经穴与经穴组合而成,如三里两穴是由手、足三里两穴组合而成,还如合谷与太冲组合成的“四关”穴等,似这般组合的还包括特定穴的组合如心募巨阙与心俞组合成的心募俞穴,肺经原穴太渊与大肠经络穴偏历组合的肺原络穴等。二为奇穴组合,如大、小骨空,手三关穴等,以及本身由多个点组合而成的奇穴组合如十宣、四缝等。三为经穴与奇穴或阿是穴的组合,如腹下三针是由中极和子宫穴组合而成,极泉中心由极泉和其上、下、左、右四个阿是穴组合而成等。总之,只要形成一个穴组,各穴或点均有明确的定位,具有共同的主治,冠以一个总的名称,并经临床验证确有疗效的,均可成为一个组合穴。

在临床实践中,有些组合穴本身就是一个小型的配方,如胁肋疼痛取阳陵泉和支沟,胃脘疼痛取中脘、内关、足三里,肩痛取肩髃、肩前、肩后等。这些小配方在临幊上用之卓有成就,因而渐渐地把它固定下来,也便成了组合穴。在众多组合穴中,类似这种例子颇多,并充分体现了原来配穴处方中的本经配穴法、前后配穴法、表里配穴法、上下配穴法、左右配穴法等法。而今组合穴的出现,对于针灸腧穴学分类来说无疑是一种突破、一种创新,它的产生实际上是腧穴学的一个新发展,也是针灸学发展的一个方向,必将有其广阔前景。

Acumoxi (Acupuncture and Moxibustion), a bright pearl in the treasure house of Traditional Chinese Medicine, is an important component part of Traditional Chinese Medicine. The acupoint the base of Acumoxi as well as the content that Acumoxi doctors through the ages have paid much attention to and made researches on.

Composed acupoint is the acupoint composed of two points or more. It has several forms as follows: First, the combination of the meridian acupoints, i. e. the group is composed of two meridian acupoints or more, such as Siguan, which is composed of Hegu and Taichong. Such combination also includes the specific points, such as Xinshumuxue which is composed of Juque, the Front-Mu Point of Heart and Xinshu, the Back-Shu Point of Heart, Feiyuanluo which is composed of Taiyuan, the Yuan-Primary Point of the Lung Meridian and Pianli, the Luo-Connecting Point of the Large Intestine Meridian, etc. Second, the combination of extraordinary acupoints, such as Daxiaogukong, Shousanguanxue, etc. and the extraordinary acupoints which are composed of multi-point themselves such as Shixuan, Sifeng, etc. and Jiquanzhongxin, which is composed of Jiquan and four Ashi points superior, inferior and lateral to it, etc. Third, the combination of meridian acupoints and extraordinary acupoints or Ashi points, such as Fuxiasanzhen, which is composed of Zhongji and Zigong. In a word, so long as there is a group of acupoints which is entitled a name, each acupoint of the group has its specific location, common indications, and the group has certain curative effect proved by clinical use, the group can be called a composed acupoint.

In the clinical use, some composed acupoints are abbreviated prescriptions themselves. For example, Yanglingquan and Zhigou can be used to treat the pain in the hypochondriac region, Zhongwan, Neiguan

and Zusani can be used to treat the gastric pain, Jianyu, Jianqian and Jianhou can be used to treat the pain in the shoulder, etc. These small prescriptions have great effect in the clinical use, therefore they have a fixed form gradually, thus the composed acupoints take shape. There are many such examples in so many composed acupoints, and they embody the methods of combination of the same meridian, combination of the anterior and the posterior, combination of the exterior and the interior, combination of the above and the subjacent and combination of the left and the right of the original selection of acupoints and prescription. The composed acupoint is a kind of breakthrough as well as a kind of innovation for the classification of the acupoints of Acumoxi. It's a new development of the study of acupoints and a direction of the development of Acumoxi, and will surely have great prospect.
