前 言

职称英语自从实行全国统一考试以来,以其独特的题型,较高的难度要求,使得许多 考生不太适应。目前参加初级、中级和高级职称评定的同志由于种种原因,有的只是自学 过一些英语,有的学的是俄语或日语,有的在实际工作中与英语接触甚少,这使得许多同 志的英语基础较为薄弱。针对以上客观事实,我们组织工作在教学第一线的教师编写了这 套《全国专业技术人员职称英语等级考试丛书》。本套丛书根据最新考试大纲编写,具体特 点如下:

- ① 详尽列举了常考的词汇和语法考点;
- ② 剖析了各种题型的解题技巧;
- ③ 荟萃了历年优秀真题;
- ④ 列举了大量的专项练习题。

总之,这套丛书不仅是一套技巧讲解手册,更是一套词汇、语法等常考考点的记忆手册。本套丛书包括:

- ①《全国职称英语等级考试词汇30天突破》
- ②《全国职称英语等级考试30天突破(综合类)》
- ③《全国职称英语等级考试30天突破(理工类)》
- ④《全国职称英语等级考试30天突破(卫生类)》
- ⑤《全国职称英语等级考试押题试卷(综合类)》
- ⑥《全国职称英语等级考试押题试卷(理工类)》
- ⑦《全国职称英语等级考试押题试卷(卫生类)》

由于时间仓促,书中错误或疏漏之处在所难免,诚请读者斧正。

全国职称英语考试制胜全攻略

一、评价目标

全国专业技术人员职称英语等级考试重点考查应试者的阅读理解能力。考试总的评价目标是: 申报 A 级的人员在 2 小时内应完成 3000 词左右的阅读任务,并能正确理解所读材料的内容;申报 B 级的人员在2小时内应完成2600词左右的阅读任务,并能正确理解所读材料的内容;申报C级的人 员在 2 小时内应完成 2200 词左右的阅读任务,并能正确理解所读材料的内容。

为达到上述目标,考试对应试者的英语词汇量、语法知识和阅读理解能力分别提出如下要求:

考试所涉及的词汇和短语主要依据本大纲所附词汇表。对申报不同级别的应试者要求认知的词 汇量不等:

- 1. 申报 A级的人员应认知 6000 个左右的单词和一定数量的短语;
- 2. 申报 B级的人员应认知 5000 个左右的单词和一定数量的短语;
- 3. 申报 C 级的人员应认知 4000 个左右的单词和一定数量的短语;

(二)语法知识

考试不直接对应试者所掌握的语法知识进行考查,但应试者必须掌握基本的语法知识,主要包 括:

- 1. 英语句子的基本语序及其意义;
- 2. 英语句子的结构和常用句型;
- 3. 各种时、体的形式及其意义;
- 4. 各种从句的构成及其意义;
- 5. 句子中词语的所指、省略、替代、重复以及句子之间的意义关系等

思思。神传成长有两种方式,一种思作为产品。一种思作为过程。现依英语 方轴两套 3 加美

应试者应能综合运用英语语言知识和阅读技能来理解专业的或一般内容的英语书面材料。阅读 能力主要包括以下几个方面: 当前要不证据, 与自杂类市员, 变或预证准据制度不复举, 变变要素证 1. 掌握所读材料的主旨和大意; 图图 红。图中的利图陈维和语单语。从变过多形皮态现出要而。于

D三、答题及计分办法 ABI 查表音集以底表面的最单词表对面放射自不足象

考试均采用客观性试题,要求应试者从每题所给的选项中选择一个最佳答案,或根据要求选择最佳搭配。考试中,应试者应在专门设计的答题卡上作答。应试者要特别注意:做在试卷上的答案一律无效;每题只能选择一个答案;考试计分只计算答对题的数目,答错不倒扣分。

四、应试方略

"There are two basic ways to see growth; one as a product, the other as a process."这句话的意思是:看待成长有两种方式,一种是作为产品,一种是作为过程。职称英语试卷中的一句话,简单而实用。对于参加职称英语考试的莘莘学子来说,结果也许是令人惊喜的,但过程却不堪忍受。于是,我们需要改变,考试不可能被我们所改变,只有改变自己。我们不要痛苦地捱过职称英语考试的这段日子,而要让职称英语考试变成一种值得体验和回味的生活,这也就需要

6. 句子中词语的所指、省略、替

第一、心态放松

有的同学越到考试越烦,吃也吃不下睡也睡不香,这是正常现象,是进入状态的表现。可是只要改变心态,就会进入一种良性循环,成绩也会提高。不仅仅体验学习,更是体验生活,品味孤独。"寂寞让你如此美丽,孤独让你如此强大!"职称英语如火如荼的季节,正是初冬的时候,"冬天都已经到了,春天还会远吗?"夜深时,周围升起一层薄雾,在通宵的灯光照耀之下,有一种朦胧的感觉。这种美

2

丽平时很难感觉到,但在长时间的投入学习之后,当你从书堆中抬起头来,就会不自觉地感动于大自 然的美。

心态是一种主观能动性。人的主观能动性将对客观存在产生作用。是好的变化还是坏的结果。 将依赖于你自己的心态。Enjoy yourself, just do it! 让我们不断地调整心态,忘我地投入一次吧!!

第二、学习重点分明

茫茫英语学海,从何学起?很多职称英语考生都把第一着眼点和大量时间放在了背单词记语法 上面,但是职称英语考试着重考的并不是词汇量,而是实际运用英语的能力,阅读占去了大部分的分 值就是一个明证,所以整个职称英语考试的重点在于阅读,大家一定要合理安排自己的学习重点,要 记住:词汇和语法是基础,阅读是核心,所有的词汇记忆都是为提高自己实际的阅读能力的。所以只 要把大纲要求的语法知识以及高频词汇弄熟就完全可以了,要把更多的时间和精力放到阅读上来。

虽然敌人只有一个——统一的职称英语试题,但是,每个职称英语考生都有自己不同的弱项,于 是我们得知己知彼,然后改变自己的答题思路去适应出题者的出题思路,我们需要——。

第三、对历年真题和教材高度重视

很多同学在职称英语的复习过程中,从一开始就热衷于做模拟题,这其实是一种得不偿失的复习 方法。我们认为,作为复习的第一步,首先要把近几年的真题搞透。真题的价值是无法估量的,任何 模拟题目都不能与之相比。提倡大家复习真题,不是为了押题,而是为了从真题中间找出出题的规律 和做题的规律。只有从真题中总结出来的规律才是最有价值的,而规律又来源于题目考查知识点的 重复性。职称英语经过这么多年的发展,出题具有一定的重复性。总结真题的特点和规律对于正确 做题有莫大的帮助。作为职称英语考试复习的第一步,大家一定要充分地利用和挖掘真题的价值,一 定要在搞透真题的基础上再考虑其他的复习资料。另外还要注意,我们说要把真题"搞透",并不是说 大家把历年的真题做几遍就行了。所谓搞透,就是不仅要知道正确的答案还要知道错误的答案,不仅 要把题目搞透还要把文章搞透。事实上,虽然每年的题目不会重复,但是考点是经常重复的,所以我 们在复习的过程中一定要全面和细致。

第四、改变考试方式

至 2 報分、阅读判断(第16~22题,每题1分 当有了一定实力、了解了一些技巧之后考试方式就将发生改变——变被动地应考为主动地应考。 如在阅读中,文章类型的选取不拘一格,但出题者可以把它分成四类型:信息传播型(Imparting Information Pattern)、分析论说型(Opinion-Reason Pattern)、事实证明型(Substantiated-Facts Pattern)、问 题解答型(Question Answer Pattern)。为什么第一次提出这种分类呢?原书是这么说的:"每个作者 都有自己的写作目的,为了达到目的,他们往往会采用不同的方式来表达他们的意思,而读者一旦掌 握了这些特点,就能对文章内容和结构作出预测,增强对作者意图的理解和对内容的记忆。"那么我们 这种改变的关键就是掌握出题者选文的类型,变被动的阅读过程为主动过程,主动预测后文,从而提 高阅读效率。

"We hire talent"

Those are the words of Rod Franz, a civil service computer technology director, responding to the question of opportunities for women who are interested in pursuing careers as computer technicians.

On at least one of three shifts in his operation, the male-female ratio is 50-50. That is not surprising because government and educational institutes are required by the law to make every effort to open hiring opportunities to women and minority workers.

What may be even more interesting to young women is that, according to Franz, private industry is hiring women and minorities away from us. And, since private industry pays more, it succeeds.

Managers in the rapidly growing computer service field are quick to agree. They strongly encourage women to train for technician jobs, and they actively recruit female technicians across the country. They believe that this career field offers a wealth of possibility for women.

A recent study by the Devry Institute of Technology that involved 100 employment managers in the Chicago area showed, too, that the number of women entering the field of computer science is on the rise, and that those already in the field are moving up. A significant increase in the number of women in technical positions over the past five years was reported by 68 percent of the managers. Overall, companies reported a 20 percent increase in the number of women hired.

The Devry study showed a strong willingness on the part of employment managers to hire qualified women. In jobs traditionally considered male positions, the stereotype is quickly being eroded. Compa-

nies want to hire well-qualified people, people who know what they are doing, according to the study. Personnel(人事部门) managers interviewed ranked specific skills and education as the primary qualifications for employment and, of the two, skills were clearly preferred.

"We hire talent" are three key words. Employers want workers who are skilled and experienced on the particular equipment or in the specific area of work where their need is. It has miot smiots and bear

A Brief Introduction of Hurricanes(龙卷风)

- 1. Did you know that before 1950, hurricanes had no names? They were simply given numbers. The first names were simply Alpha, Bravo, Charlie, etc. But in 1953, female names were given because of the unpredictability(不可预知) factor of the storms. In 1979, realizing the sexist(性别歧视的) nature of such names, the lists were expanded to include both men and women.
- 2. Hurricanes and typhoons(台风) are the same things. If they form in the Atlantic, we call these strong storms hurricanes, from the west Indian word hurricane, meaning "big wind". And if they are Pacific storms, they are called typhoons from the Chinese taifun, meaning "great wind". To be classified as a hurricane, the storm must have maximum winds of at least 75 mph. 第一篇 Pessimism Increases Risk of Early Death

and A 70-year study of personality suggests that pessimism (悲观主义) is a risk factor for early death, especially among men. "brief are a great wind," brief are called the control of the c

The study results also indicate that pessimism can be linked to increased risk for sudden death from accidents or violence, according to the report published in the March issue of *Psychological Science*.

Christopher Peterson of the University of Michigan and his colleagues analyzed data from the Terman Life-Cycle Study, which began by studying California public-school children with high IQs in 1921 and followed them through their life. Most of the 1528 children were preadolescents (少年) when the study began. Those still living are now in their 80s. In 1936 and 1940, participants were asked to complete a questionnaire designed to obtain information about difficult life events and their effect on overall outlook. One such question was, "What do you regard as your most serious fault of personality or character?" was asked to work work and their effect on overall life events and their effect on overall outlook.

Pessimists were defined as fatalistic (宿命论的) people who tend to blame themselves when things go wrong and who believe that one bad event can ruin the rest of their life. They also tend to expect bad

things to happen to them and feel that they have little or no ability to change their situation.

Males were more likely than females to be classified as pessimistic. Compared with individuals with a more cheerful and optimistic outlook, pessimists were more likely to die from accidents and violence (including suicide).

A pessimistic personality may lead to poor problem-solving ability, social difficulties and risky decision-making. Taken together, these variables put the pessimist at higher risk of untimely (禾适时的) death, say the researchers. Such a person is less likely to avoid or escape potentially dangerous situations, the researchers concluded. "A pessimistic way of thinking in which people worry too much about bad events, foreshadows (预示) untimely death decades later," according to Peterson.

Her Tiny Heart

Cheyenne Pyle became famous, and the best part is that she'll never remember a bit of it. Early Sunday the 3.4-kg girl was born at a children's hospital. Ninety minutes later, she was undergone surgery to replace her underdeveloped heart, and operation that restored her heart and made her the world's youngest heart taker.

Even before Cheyenne was delivered, doctors knew she was in for a rough ride. Ultrasound revealed a deformity in the left side of her heart, she would need either a series of procedures to correct the defect or a simple operation to replace the organ. Her parents chose the transplant.

Doctors tissue-typed Cheyenne while she was still in the womb, placed her on a heart-transplant waiting list and put a team of surgeons, nurses and transport coordinators on call. Ten days later, during the 36th week of gestation, word arrived that a baby had died during or shortly after birth and the par-
