# 前言

人口老龄化正在成为中国社会发展中的一个重要问题。根据 1990 年第四次人口普查资料,中国 60 岁以上老年人已达 9697 万,约占世界当年 60 岁以上老年人口 4.8 亿的五分之一。如此众多的老年人群,怎样解决好他们的供养问题,成为举世瞩目的大事。

作为研究中国老龄问题的专门机构,中国老龄科学研究中心在联合国人口基金的援助下,从 1991 年开始,以中国老年人供养体系为课题进行研究,为适应改革开放形势,在中国建立包括老年人个人、家庭、社区和国家相结合的,具有中国特色的供养模式提供对策依据。

本专题研究是在收集 1980—1990 年全国各省、市老年人口 73 份调查资料的基础上,根据项目研究需要,决定在全国部分地区开展老年人供养体系的专题调查。在国际专家的帮助下,由中国老龄科学研究中心研究人员进行了调查方案和调查问卷的设计工作,并于 1991 年 8 月在全国十个省、市城乡各抽一个点进行了试调查。于 1992 年 1 月开始,对省级调查骨干进行培训,随后,分别在北京、天津、上海、浙江、江苏、黑龙江、山西、陕西、四川、广西、贵州、湖北等 12 个省、自治区、直辖市进行正式调查,样本量达 20083 人。

应当说,研究中国老年人供养体系的需要,在中国进行这样大规模的老年人供养体系调查为数不多。从调查方案,问卷设计到实施调查工作,我们十分注意讲求科学性和严密的组织性。根据调查结果,可以说,调查资料的可信度是很高的。这次调查内容包括老年人基本特征、经济收入、社会活动、心理状态、访问印象等五大部分,就其内容来说可以较全面地了解城乡老年人供养状况。我们把这第一手反映老年人的国情资料、信息奉献给学术界和政府有关部门,为研究制定中国老年人供养体系提出科学的对策建议。

这本数据汇编只是调查后的初步汇总,研究成果有待于对资料的开发利用。它是中国老龄科学研究中心和实际老龄工作部门共同合作的结晶。

研究中国人口老龄化所带来的问题及其对策是全社会都应关注的工作。我们热切地希望这项调查所提供的数据能够得到人口学界、社会学界、经济学界和老龄工作决策部门的重视。同时,为了便于国外专家也能参与中国人口老龄化问题研究,我们把资料译成英文,便于各国关心和支持中国老龄事业的专家、学者等友好人士们使用。同时,我们将向一切关心中国老龄事业的研究人员使用资料提供方便,使这次调查成果能够得到充分开发利用,更好地发挥资料的社会价值。

由于我们在组织这样大规模的专题调查中经验和水平有限,工作中也会存在某些缺点,诚恳地希望各界在使用这些资料时,能提出批评和改进的意见,以便把今后的调查工作做得更好。

参加本次调查方案设计、数据处理和资料汇编的主要人员:(按姓氏笔划排列)王高、王珣、刘小治、肖振禹、陈志杰、张恺悌、郭平、罗亚杰、洪国栋、陶立群、徐勤、原野、麻凤利、童增。

# PREFACE

Population aging is becoming one of the critical issues in China's social and economic development. According to the Population Census of 1990 the aged population over 60 years old was 96.97 million, approximately accounting for one fifth of the world's total 480 million aged population. Therefore, how to effectively deal with the support problems for the elderly has become the focus of worldwide attention in the context of such a large number of aged population.

With assistance of UNFPA, the China Research Center on Aging (CRCA), a special organization engaged in research on China's aging issues, began to undertake research on China's support problems of the elderly since 1991 to provide policy-making evidence and scientific basis for establishing a China support system for elderly which includes the elderly, family, community and the state in the context of the reform and opening to the outside world.

This research project is based on the data related to the aged support, collected from all provinces and cities throughout the country during 1980—1990. The survey on support system for elderly was decided to conduct in selected areas in China according to the project requirements. With the help of international experts, the researchers from CRCA worked out survey scheme and designed the questionnaire and conducted the pre-test survey in the 10 selected units drawn out from the 10 provinces, in either rural or urban areas in 1992. According to the tabulated data obtained from the pre-test the expert meetings were internationally or internally organized to further evaluate, discuss and modify the questionnaires. January, 1992 we begun the training program for the core enumerators at provincial level and shortly after that, the formal national survey was conducted in 12 provinces autonomous regions and municipalities including Beijing, Tianjin, Shanghai, Zhejiang, Jiangsu, Heilongjiang, Shanxi, Shaanxi, Sichuan, Guangxi, Guizhou and Hubei, with a total sample size of 20083 persons.

Generally speaking, such large scale survey on the support system for the elderly was quite few in China for the needs of research on China support system for elderly. It was well organized and operated scientifically throughout the whole process from the formulation of survey scheme to field operations. The final results have showed that the data has a high reliability. The survey covers five major topics of the basic characteristics of the elderly, income, social activities, psychological status and interview impressions, primarily reflecting the support situation of the elderly in rural and urban China. Here we present the first hand information reflecting the basic situation of the elderly to the academic circles and governments departments and agencies concerned so as to provide scientific recommendations in their study and policy-making in respect with the establishment of China support system for the elderly.

This data compilation merely offers the results of preliminary tabulation. these data need to be developed and utilized so that research findings can be turned out. It is the fruit of the collaboration between CRCA and practical departments on aging.

The research on China's aging issue and its countermeasures is of social concern. We earnestly hope that the data obtained from the survey can get attention from academic circles such

as demography, sociology and economics and decision — making agencies on the aged. Meanwhile, considering that the international experts can have easy access to the data, we have translated it into English to meet the research needs of foreign experts and specialists who is concerned about China's aging issues. Further more, we extensively provide the survey data for all researchers who concern about the aging issues in China so that they can be fully developed and used to make contributions to the society.

There, however, may also exist short comings and deficiencies with the data due to our limited experiences and technical skills in organizing such a large scale survey. We welcome users' criticism, comments and suggestions for improvements so as to do a better job in future survey.
