Unit 1

Introduction to E-business

Learning Objects

After learning this unit, you will be able to:

- Know basic characters and functions of e-business.
- Know main categories and basic types of e-business.
- Master words and expressions related to e-business.

Part I Lead-in

Think about the following questions and then discuss with your partners.

1. Bill Gates once said, “**There will be only two kinds of businesses existing: either Internet business, or out of business!**” Do you agree with that perspective? Why or why not?

2. Jack Ma said, “**If you don’t do electronic business now, five years later you will regret. Ten years later, if you don’t do e-commerce, you will do nothing about business at all.**” Do you agree with that perspective? Why or why not?

3. Do you know some Websites of e-business? What are they? What kind of business are they doing? What do you think them? Do they benefit people in some way or not?

Part II Reading

IBM defines¹ e-business as “the transformation² of key business processes through the use of Internet technologies.” Some of those e-business processes include:

- (1) buying and selling over the Internet (e-commerce).
- (2) conducting customer service in real time using Web-based tools.
- (3) communicating with suppliers³, employees and customers.
- (4) online marketing and advertising.

The greatest transformation in business practice today is the emergence⁴ of the Internet and the World Wide Web interface. It has become a powerful medium for commerce and business transactions⁵ of all kinds. The terms e-business and e-commerce are sometimes used interchangeably⁶, but the common difference is that e-commerce refers to financial⁷ transactions over the Web and e-business refers to all forms of transactions over the Web. The transforming power of this mode of business extends far beyond the obvious points of convenience for the customer and cost savings for the business. The most powerful implementations⁸ of e-business enable a complete restructuring⁹ of business models.

The meaning of electronic commerce has changed over the last 30 years. Originally, electronic commerce meant the facilitation¹⁰ of commercial transactions electronically, using technology such as Electronic Data Interchange (EDI) and Electronic Funds Transfer (EFT). These were both introduced in the late 1970s, allowing businesses to send commercial documents like purchase orders¹¹ or invoices¹² electronically. The growth and acceptance of credit cards, automatic teller machines (ATM) and telephone banking in the 1980s were also forms of electronic commerce. From the 1990s onwards, electronic commerce would additionally include enterprise¹³ resource planning systems (ERP), data mining¹⁴ and data warehousing¹⁵.

Some people find it useful to categorize electronic commerce by the types of entities¹⁶ participating in the transactions or business processes. The five general electronic commerce categories are business to consumer (or B2C), business to business (or B2B), consumer to consumer (or C2C), consumer to business (or C2B), and business to government (or B2G). The three categories that are most commonly used are:

- (1) Consumer shopping on the Web, often called business to consumer (or B2C).
- (2) Transactions conducted between businesses on the Web, often called business to business (or B2B).
- (3) Transactions and business processes in which companies, governments, and other organizations use Internet technologies to support selling and purchasing activities, often called business to government (or B2G).

To understand these categories better, consider a company that manufactures stereo¹⁷

speakers¹⁸. The company might sell its finished product to consumers on the Web, which would be B2C electronic commerce. It might also purchase the materials it uses to make the speakers from other companies on the Web, which would be B2B electronic commerce. Businesses often have entire departments devoted to negotiating purchase transactions with their suppliers. These departments are usually named supply management or **procurement**¹⁹. Thus, B2B electronic commerce is sometimes called e-procurement.

In addition to buying materials and selling speakers, the company must also **undertake**²⁰ many other activities to **convert**²¹ the purchased materials into speakers. These activities might include hiring and managing the people who make the speakers, renting or buying the **facilities**²² in which the speakers are made and stored, shipping the speakers, maintaining accounting records, purchasing insurance, developing advertising campaigns, and designing new **versions**²³ of the speakers. An increasing number of these transactions and business processes can be done on the Web. Manufacturing processes (such as the **fabrication**²⁴ of the speakers) can be controlled using Internet technologies within the business. All of these communication, control, and transaction-related activities have become an important part of electronic commerce. Some people include these activities in the B2B category; others refer to them as **underlying**²⁵ or supporting business processes.

Some researchers define a fourth category of electronic commerce, called consumer to consumer (or C2C), which includes individuals who buy and sell items among themselves. For example, C2C electronic commerce occurs when a person sells an item through a Web **auction**²⁶ site to another person. In this book C2C sales are included in the B2C category because the person selling the item acts much as a business would for purposes of the transaction.

Finally, some researchers also define a category of electronic commerce called business to government (or B2G); this category includes business transactions with government agencies, such as paying taxes and filling required reports. In this book, B2G transactions are included in our discussions of B2B electronic commerce.

Part III Translation Skills (省略法)

省略法是指在翻译时，原文有些词在译文中可以省略，不必翻译出来。通常，译文不翻译某词但是已经具有了原文这个词所表达的意思时，或者这个词在译文中的意义是不言而喻的时，可使用省略法。省略的目的在于使译文更加通顺流畅，更符合译文习惯。但需要注意的是，省略并不是把原文的某些思想内容删去，省略不能改变原文的意义。

一、从语法角度来看

(一) 省略代词

1. 省略作主语的人称代词

(1) 省略作主语的人称代词

根据汉语习惯，前句出现一个主语，后句如仍为同一主语，就不必重复出现。英语中通常每句都有主语，因此人称代词作主语往往多次出现，这种人称代词汉译时常常可以省略。

【例 1】I had many wonderful ideas, but I only put a few into practice.

我有很多绝妙的想法，但是只把少数付诸实践了。

【例 2】He was thin and haggard and he looked miserable.

他瘦弱憔悴，看上去一副可怜相。

(2) 省略泛指人称代词

英语中，泛指人称代词作主语时，即使是作第一个主语，在汉语译文中往往也可以省略。

【例 1】We live and learn. 活到老，学到老。

【例 2】The significance of a man is not in what he attained but rather in what he longs to attain.

人生的意义不在于已经获取的，而在于渴望得到什么样的东西。
