A Synchronic and Diachronic Study of Negative Polarity Items in English

上海交通大学出版社
SHANGHAI JIAO TONG UNIVERSITY PRESS

内容提要

本书在生成语法最简方案理论框架下研究否定极性项的句法生成机制和历史演变。本书基于 Chomsky(2000, 2001, 2007, 2013) 的理论, 运用否定特征和焦点特征, 确立了否定句、条件句、比较句、一般疑问句、定语从句等环境中 NPI 的句法生成机制。在解决各种环境中 NPI 句法问题的同时, 验证了本书提出的 NPI 句法生成机制的合理性和必要性。另外, 本书运用英语历史语料库 YCOE, PPCME2, PPCEME 对 any 的 NPI 用法和相关现象进行了数据收集和分析, 并从历史语言学的角度提出了英语史中各时期 NPI 的句法生成机制和叶氏周期的第二阶段(即 ne 和 not 共同出现表示否定的阶段)的句法生成机制。本书运用了最简方案理论、历时研究方法以及英语历史资料和语料库, 是对英语否定极性项的句法和历史演变的创新型研究, 适合形式语言学和历史语言学方向的研究生以及对否定极性项和叶氏周期等感兴趣的读者参阅。

前言

本书是在生成语法最简方案理论下的对否定极性项(Negative Polarity Item, NPI)的允准机制和历史演变的研究。现代英语中的 NPI, 比如 any, ever, budge an inch 等, 除了出现在否定句中, 也出现在条件句、比较句、一般疑问句等语言环境中。对于 NPI 允准机制的分析是理论语言学研究中的热门话题, 有一些相对成熟的分析法, 比如下方含义、逆行一致和否定呼应等。这些方法既有独到见解, 也存在一些问题, 因此对 NPI 的系统研究仍具有极大的必要性和学术价值。

本书运用 Chomsky (2000, 2001) 的一致系统创建了否定句中 NPI 的允准机制, 并提出了在条件句、比较句、疑问句、定语从句等环境中 NPI 的允准机制。在解决各种环境中 NPI 允准问题的同时, 本书所提出的运用否定特征和焦点特征分析 NPI 允准机制的合理性和必要性也得到了验证。另外本书通过分析运用历史语料库 YCOE, PPCME2, PPCME 收集的 NPI any 和相关现象的数据, 从历史语言学的角度提出了英语史中各时期 NPI 的允准机制和叶氏周期的第二阶段(即 ne 和 not 共同出现表示否定的阶段)的否定允准机制。本书还考查了英语史中 NPI 出现在主语里的时期和特征, 提出在伊丽莎白时期的英语中存在的 NPI 出现在主语里的现象的消失是由同时期 V-to-T 移位的消失引起的。

本书利用英语的历史语料库提取数据并描述了英语 NPI 的相关现象, 全面地展示了英语 NPI 的起源、演变和各个时期的相对频率。通过对英语 NPI 历史演变的研究验证和发展了语言演变理论, 着重发掘和阐释了 NPI 演变的规律以及 NPI 与否定的相互作用关系, 进而有助于明辨语言发展演

变的诱因,丰富了叶氏周期、特征秩序、语言演变的参数变化等理论。同时,本书合理地运用了生成语法最简方案理论、历时研究方法和语料库,是对NPI历史演变和允准机制的创新型研究。

本书主要为从事理论语言学,特别是生成语法研究的学者和研究生以及对否定极性项和历时语言学感兴趣的研究者提供参考,希望能帮助读者了解NPI的研究前沿,对完成相关研究课题,深入研究NPI有所启发。

在此感谢“十三·五”浙江省一流学科项目、宁波大学学科建设重点培育学科点项目、外国语言文化与宁波国际化发展战略研究中心项目的资助。感谢从笔者学习语言学以来学习工作访问过的大学的老师、同学、同事给予的启发和帮助。对日本名古屋大学的大室刚志教授、田中智之教授、日本中部大学的大门正幸教授、美国麻省理工学院的宫川繁教授的指导表示衷心的感谢。本书的出版得益于笔者的工作单位宁波大学屠国元教授、王松林教授、杨成虎教授、林立红教授、苗丽霞教授的关心和支持,在此表示我真挚的谢意。最后,感谢家人长期以来对我学习工作的支持与鼓励。

由于著者知识水平有限,本书在内容上存在的疏漏甚至错误之处,敬请读者批评指正。

著 者

List of Abbreviations

ACC	accusative case
adj	adjective
ASP	aspect
c/ca.	circa
Cen.	century
C(P)	complementizer (phrase)
D(P)	determiner (phrase)
F	feature/function/functional head/focus
Fin	finite
Foc	focus
IMP	imperfect
Int(P)	Interrogative (phrase)
I(P)	inflectional (phrase)
MASC	masculine
neg	negative (marker)
Neg(P)	negative (phrase)
N(P)	noun (phrase)
NOM	nominative case
Op	operator
Part (P)	participle (phrase)
PAST	past tense

pl	plural
Q	question (marker)
S	sentence
sg	singular
SN	sentential negation
Spec	specifier
Top	topic
T(P)	tense (phrase)
VGP	verb group
V(P)	verb (phrase)
<i>v</i> (P)	little/small verb (phrase)
2	second person
3	third person

Contents

Chapter 1 Introduction 1

- 1.1 Introduction to Negative Polarity Items /1
- 1.2 Problems with Analyses from a Semantic Perspective /4
 - 1.2.1 NPIs in Restrictions of Quantifiers /5
 - 1.2.2 NPIs in *Yes-no* Questions /6
 - 1.2.3 NPIs in Modals and Other Non-DE Environments /8
 - 1.2.4 Summary of Section 1.2 /9
- 1.3 Affective Environments /11
- 1.4 Syntactic Categorization of Affective Environments /13
- 1.5 Aim and Organization of the Book /15
- Notes to Chapter 1 /17

Chapter 2 NPIs in Negatives 21

- 2.1 Introduction /21
- 2.2 Previous Studies /22
 - 2.2.1 Zeijlstra (2004) /22

- 2.2.2 Roberts (2007) /24
- 2.3 The Licensing of NPIs /27
- 2.4 Diachronic Perspectives /30
 - 2.4.1 The Development of NPIs /31
 - 2.4.2 A Feature-based Analysis of the Development of NPIs /32
- 2.5 Consequence: Focus Features and Jespersen's Cycle /34
 - 2.5.1 Basic Facts on Jespersen's Cycle /35
 - 2.5.2 The Relation between NPIs and Stage Two *Ne* /37
 - 2.5.3 A Feature-based Analysis of Jespersen's Cycle /43
- 2.6 Conclusion /44
- Notes to Chapter 2 /45

Chapter 3 NPIs in Conditionals, Comparatives, and Interrogatives 55

- 3.1 Introduction /55
- 3.2 NPIs in Conditionals /59
 - 3.2.1 Facts /59
 - 3.2.2 The Position of *If* and the Structure of an Adverbial Clause /61
 - 3.2.3 An Agree-based Analysis of *If*: the Issue of NPI Licensing /67
 - 3.2.4 An Agree-based Analysis of *If*: the Issue of Focalization /67
 - 3.2.5 Conclusion to Section 3.2 /84
- 3.3 NPIs in Comparatives /84

3.3.1	Facts /84
3.3.2	The Feature Specification of Comparatives and NPI Licensing /88
3.3.3	Independent Evidence of the Analysis /90
3.3.4	Consequences /91
3.3.5	Conclusion to Section 3.3 /93
3.4	NPIs in Interrogatives /93
3.4.1	Facts /93
3.4.2	Analysis /96
3.4.3	An Apparent Problem — Multiple <i>Wh</i> -questions and Multiple NPI Structures /102
3.4.4	Conclusion to Section 3.4 /104
3.5	NPIs in Other Environments of Type A /104
3.5.1	Outline /104
3.5.2	NPIs in Adversatives /105
3.5.3	NPIs in Exclamative Constructions with a Negative Implication /107
3.5.4	NPIs in Result Clauses Dependent on <i>too</i> /108
3.6	Conclusion /109
	Notes to Chapter 3 /111

Chapter 4 NPIs in Restrictives, Restrictive Relatives Modifying Universals, and Superlatives

116

4.1	Introduction /116
-----	-------------------

- 4.2 Theoretical Background /118
 - 4.2.1 Characteristic of NPI Licensing of Type B /118
 - 4.2.2 A Derivational Theory of Binding /122
- 4.3 The Structure of Relative Clauses /126
- 4.4 Analysis /127
 - 4.4.1 NPIs in Restrictives /127
 - 4.4.2 NPIs in Restrictive Relatives Modifying Universals /129
 - 4.4.3 NPIs in Superlatives /130
- 4.5 Conclusion /132
- Notes to Chapter 4 /132

Chapter 5 NPIs in Subjects in the History of English

134

- 5.1 Introduction /134
- 5.2 Previous Studies /136
 - 5.2.1 De Swart (1998, 2010) /136
 - 5.2.2 Mazzon (2004) /137
- 5.3 Corpus Search /138
 - 5.3.1 Old English /139
 - 5.3.2 Early Modern English /142
- 5.4 Theoretical Background /143
 - 5.4.1 Neg C-commands an NPI at S-structure /143
 - 5.4.2 V-to-T Movement in the History of English /146
 - 5.4.3 Bare Phrase Structure /148
 - 5.4.4 [+NEG] /148

5.5 Analysis /149

5.5.1 The Derivation Process /149

5.5.2 Possible Problem /153

5.6 Conclusion /154

Notes to Chapter 5 /154

Chapter 6 Conclusion 160

Chapter 1

Introduction

1.1 Introduction to Negative Polarity Items

There exist a group of words and expressions in natural languages which appear to be considerably curious. These forms can only occur in a positive or negative environment, viz. they are *polarity-sensitive*. Forms that can only occur in a positive environment are termed positive polarity items (henceforth, PPIs; see [1] below), while forms that can merely occur in a negative environment are termed negative polarity items (henceforth, NPIs; see [2] below). We can recognize examples in [1a] and [2a] as ungrammatical (indicated by an asterisk).

- [1] a. *I'm not *pretty* pleased with it.

(PPI in a negative sentence)

- b. I am *pretty* pleased with it.

(PPI in a positive sentence)

(Linebarger, 1980: 7)

- [2] a. *I think I could *ever* trust you.

(NPI in a positive sentence)

- b. I don't think I could *ever* trust you.

(NPI in a negative sentence)

(cf. Hoeksema, 2000: 115)

It is widely recognized in the literature that these forms exist crosslinguistically. As far as I know, no researchers have ever claimed the existence of languages whereby no PPIs or NPIs are attested. Nevertheless, PPIs and NPIs are not found in artificial languages, like a programming language. In this sense, PPIs and NPIs are not logically necessary. Therefore, research on PPIs and NPIs may reveal the nature of natural languages.

There are a large variety of NPIs in English. I will introduce the classification of NPIs in a simple fashion for reasons of space. NPIs vary in part of speech¹ and length (from one word to several words). Zwarts (1997) and van der Wouden (1997), among others, classify NPIs according to the elements that license them, as illustrated in [3].

[3] a. Superstrong NPIs

licensed only by anti-morphic contexts (overt/sentential negation),
e.g. *until*, *either*, and *in* + indefinite time expression.

b. Strong NPIs

licensed by anti-morphic and anti-additive² contexts (expressions like
nobody, *never*, and *without*),
e.g. *lift a finger* and *give a damn*.

c. Weak NPIs

licensed by anti-morphic, anti-additive, and monotone decreasing
contexts,
e.g. *ever*, *at all*, *any*.

Another classification of NPIs is pointed out by Giannakidou (2011), as shown in the diagram in [4].

- [4] A. Narrower NPIs (with a narrow distribution in only negatives)
- B. Broader NPIs (with a broad distribution in negative, downward entailing (hereafter, DE), and nonveridical environments)
 - a. Non-scalar NPIs
 - b. Scalar NPIs
 - a) Narrower NPIs (including minimizers),
e.g. *in* + indefinite time expression.
 - b) Broader NPIs,
e.g. *any*.

A number of NPIs will be discussed in this monograph. Among them, *any* will be the most discussed one. In some analyses below, *any* is the only representative of all NPIs or all weak/broader NPIs. However, in some cases, *any* just represents itself.

Note that *any* is not used as an NPI in all contexts. In some contexts, *any* denotes free choice. If *any* appears in an environment where no negation or other elements can license NPIs, it has a free choice reading. On the other hand, when *any* appears in an environment in which it can be licensed, say, negatives, the sentences are generally ambiguous, allowing both an NPI reading and a free choice reading.³

Despite the complexity of ambiguity, some characteristics enable us to distinguish them in most cases. Roberts (2007: 73) suggests that the free choice *any* can be modified by *just*⁴, *almost*, or *absolutely*, while the NPI *any* cannot. If *any* precedes numeral-and-noun constructions (e.g. *any five books*), it has a free choice reading. If *any* combines with *old* to
