前 言

古往今来，“其地四塞，山川重阻”，壁立千仞的巴蜀地貌，曾给世人留下了多少“蜀道难”的浩叹……

凿山开洞，遇河架桥，古老的先民，曾历尽艰辛，以溜索、藤桥、石拱、栈道打通天险的阻塞，渴望走出大川，走向更广阔的地界。

世代梦想，千古绝唱，生生不息的巴蜀人，以其征服、改造大自然的雄心，改写蜀道的凝重。星移斗转，深蕴于巴蜀人身上不泯的伟力，终于使当代四川交通人，用智慧和力量，给“蜀道之难难于上青天”的浩叹，划下了历史性的句号。

改革的十年，是四川交通事业迅猛发展的十年，交通建设不仅取得了举世瞩目的成就，而且，顺应了全省经济发展的势头。在较短的时期内，全省加宽改造公路三万多公里，此举在全国影响深远；以工代赈，修建山区公路 9 0 0 0 公里，为四川贫困地区经济振兴和发展创造了条件。

1 9 8 8 - 1 9 9 2 年，天府交通是日新月异的五年。“三年变样，十年变畅”，以其启动现代化的进程，迅速从战略的高度和方位上完成新的选择，这是四川交通人对过去的承继，对现实的挑战，对未来的展望。

“公路建设大包干”，奏响了四川交通继往开来的序曲，掀开了现代化公路建设的华章：

——高等级公路实现“零的突破”，道路建设开始由数量型向质量型转化。一大批新型结构的桥梁飞越天堑。截至 1 9 9 1 年底，全省共建成公路 9. 8 万多公里；建成桥梁 1. 5 万多座，4 6. 7 万多延米。初步实现了县县通公路和 9 7. 5 % 的乡镇通公路的经济发展要求。目前，基本形成了以成渝两市为中心，以国省干线为骨架的公路网，并以大城市为中心呈辐射状。昔日“连峰去天不盈尺”，“猿猱欲度愁攀援”的巴山蜀水，如今十万坦途，舟桥如织，车马如云；与邻省相连的公路出口更多达 9 0 多个。

——公路运输，国营、集体、个体一齐上，全方位、多层次发展，客、货运量连年增长。1 9 9 1 年底，全省公路运输完成货运量达 3. 9 9 亿吨，1 5 2. 2 亿吨公里；客运 9. 2 亿人次，2 4 8. 4 亿人公里；公路客、货运量分别占社会各种运输方式的 9 1. 5 % 和 8 7 %，综合运输比重高出全国平均水平 1 0 %，乘车难，运货难已成历史。

——天府之国，江河纵横，大小河流无数。而今，以长江黄金通道为主轴，以南北辐射的金沙江、岷江、沱江、嘉陵江、乌江、渠江等支流为结线，形成了以进出川客、货运输为主体的水上通道。一江春水，千帆竞扬，江海联运，方兴未艾。

——交通工业迅速发展。在“客货并重”和“运工商并举”的经济形势下，现已初步形成以汽车制造、改装和筑养路机械为主，辅以汽车配件，汽车维修的交通工业体系和以船舶修造为主的水运工业体系。

——物质文明与精神文明共建，交通运输与科技教育同兴。“窗口形象”，塑造了四川交通人的行业新风，“两山两班”，代表着四川交通人的时代风尚。“双文明”单位犹如烂漫山花，开在万里运输线上；创优服务，恰似和煦春风，温暖着南北旅客之心。

……

历史，不会忘记给它书写凝重过去的开拓者；历史，会记住为它描绘时代新彩的继承者。江河不废，那些曾与我们同呼吸，共命运的巴蜀交通人，他们将无愧于时代的点点滴滴。

PREFACE

Of all ages, the landforms in Sichuan Province, characterised by mountains and rivers obstruct and sheer cliff, have left people a deep sign of the difficulty to walk on Sichuan road.

The ancient people went through all kinds of hardships and difficulties by digging mountains and caves, building bridges across river to get through the obstruct of the natural barrier. They were eager to go out of Sichuan to a wider world.

The Sichuan people, with many dreams for thousands of years and strong ambition to conquer and remake the nature, have rewritten the dignity of Sichuan Road. With the passage of time, the Sichuan people have changed the geographical situation which is characterised by walking on Sichuan road is much more difficult than going up the blue sky for their wisdom, power and strength.

For the ten-year reform, communications in Sichuan developed quickly. It has obtained remarkable achievements in the communications construction and conformed to the economic development tendency in the province. With such short period of time, 30 thousand km roads have been rebuilt and widened, which made a profound influence in the country. It provided work as a form of relief to build 9000 km mountainous roads, making a good foundation for the economic development in the poor areas of Sichuan.

From 1988 to 1992, the communications in Sichuan is becoming more developed year after year. Three-year Changes and Ten-year Clearness are the former promise, the challenge to the reality as well as the prospect in the future.

High-grade highway realised Zero Break through, it paid close attention to the number of highway construction as well as the quality of it. A large number of newly structured bridges flied across the natural moat. By the end of 1991, it has built 98 thousand km highway and 15 thousand bridges with 467 thousand running meters in the province. It realised the economic development need for roads in every county and in 97.5% towns. At present, a highway network has been formed with Chengdu, Chongqing as the center, the national and provincial main lines as frame and big cities as the centers radiating in all directions. The former Sichuan mountains and rivers have been changed into the situation where there are many bridges and cars running. There are over 90 highway exits linking with neighbour provinces.

HIGHWAY TRANSPORTATION

Passenger and freight transport volume increased year after year, with state-owned, collective and individually-owned highway transport enterprises as one. By the end of 1991, it has completed 399 million tons and 15.22 billion ton/km freight transport volume in highway transport, and 920 million persons/times, 24.84 billion persons/km passenger transport volume. The transport highway passenger and freight volumes occupy 91.5% and 87% among all kinds of transport ways. The proportion for comprehensive transport is 10% higher than the average level in the country. The time for being difficult to take bus and transport goods has gone away.

In Sichuan there are a number of big and small rivers in width and length. Nowadays, a water passageway has been constituted with the golden passage way, Yangtze River as the main, Jialing River, Wujiang River, and Qujiang River radiating in the south and north as branches. There are many boats on the rivers, and riversea cotransport businesses are constantly expanding.

Communications industry developed quickly. Under the economic situation of the stress on passenger and freight transport and also the emphasis on transport, industry and commerce, a communications industry system, with automobile manufacture, refitting and road construction and maintenance mechanics as the main and automobile parts, automobile maintenance as the auxiliary, and a water transport industry system with ships repair and manufacture as the main, have been formed.

Material Civilization and Spiritual Civilization, as well as communications transport and scientific and technological education are simultaneously established. Window Image makes a new impression for the communications people in Sichuan, Two Mountains and Two Teams symbolizes the habit of the times, Double Civilizations Units spring out in the communications lines. Good quality services, like the spring wind, warm the heart of customers in the south and north.

History would not forget those pioneers who have written the serious past for it; history would remember those successors who have described the splendiddness of the times for it. Rivers would not vanish, the Sichuan communications people once sharing a common fate with us, would have a clear conscience for the passage of the times.

四川省交通稽查征费局于1987年全国道路体制改革时成立。该局一开始便着重抓队伍的自身建设，使全局工作很快走上了正规化、制度化、标准化的轨道，保证了稽征工作的健康发展。在“三费”（公路养路费、车辆购置附加费、货运车辆附加费）征收过程中，认真贯彻“应征不漏、应免不征”的原则，充分把握了工作的政策性、时间性、强制性三大特点，做到了“用政策管费，用制度管人”，保证了“三费”征收工作的顺利进行。从1987年到1993年，全省公路养路费的征收，每年递增达一亿元左右。

全省交通稽征系统“两个文明”建设结出了丰硕成果。目前，已有70%以上的单位被评为省、地、市级文明单位，有6个处被评为省级文明单位；有23个处、所被当地政府命名为“最佳文明单位”。这支队伍为四川公路建设和经济发展作出了应有的贡献。

It was established in 1987 when the national highway system was reformed. From the very beginning, it paid particular attention to the self-construction of the team, making the work of the bureau go fastly in a formal, systematic and standard way. As a result, the good development of the checking work has been guaranteed. In the collection of road toll, additional fees for automobile purchase and freight cars, seriously carried out the principle that the regulated fees must be collected, the non-regulated fees can not be collected. It fully grasped the policy, time and forceness of the work, managing the fees with policy, and the people with system, to guarantee the smooth progress of the three fees collection. From 1987 to 1993, the highway road tolls of the province increased 100 million yuan progressively.

Abundant fruits have been made in the two civilizations construction in the provincial communications checking system. At present, 70 percent of the enterprises are rated as Civilized Units in the province, prefecture and city, 6 departments are rated as the Provincial Civilized Units, 23 departments and posts rated as the Best Civilized Unit by the government. This team made contributions to the highway construction and economic development in Sichuan.

四川省公路规划勘察设计院始建于1953年，现有530余名职工中，有专业技术人员395名，其中具有高级技术职称的56人，有中级技术职称的151人。生产专业门类配套齐全，技术设备先进。设备中，有美国的APOLLO工作台3套，ES-1225十二道增强型地震仪、2029工程复印机、核子密度仪各一台，施乐1027复印机10台；瑞士的红外测距仪9台、经纬仪12台；日本的PC1500计算机95台等。主要承担各种等级公路、各种类型桥梁、隧道、工业民用建筑的可行性研究、勘察、设计、科研试验、施工管理、工程监理、水文地质、环境保护、技术咨询、测设施工总承包等业务。该院持有国家甲级测绘、勘察、设计、监理证书，乙级工业民用建筑设计等证书。

40年来，该院勘察设计公路54435公里，其中列等级公路18000公里。80年代以来，主要承担成渝公路、德（阳）绵（阳）公路、大件运输公路、内（江）自（贡）公路、成（都）新（津）公

路、大（方）纳（溪）公路等高等级公路1300余公里的勘察设计。测设大桥和特大桥208座，计89595延米。还先后到十二个国家承担和参与了36个公路工程项目的测设施工。在已建的工程项目中，获省、部级优秀设计和科技进步奖46项，获国家科技进步一等奖1项，国家优秀设计金奖2项，国家优质工程银质奖1项。

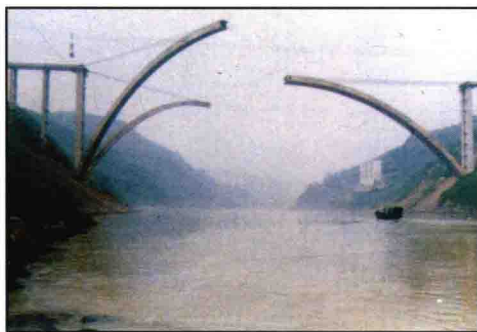

Established in 1953, it has 530 staff including 395 technical persons. Among them there are 56 persons with senior technical titles and 151 persons with middle technical titles. It has complete sets of production type and advanced technical equipments such as 3 Apollo working tables of America, ES-1225 12 reinforced seismometer, 2029 project duplicators, 9 infrared distance surveying instruments, 12 theodolites, and 95 PC1500 computers of Japan. It mainly undertakes the feasibility study of various grade highway, bridges, tunnels, industrial civil construction, prospecting design, scientific research experiment, construction management, project supervision and management, hydrology geology, environment protection, technical consultation, and the turnkey contract of surveying construction. It obtained the national A-grade mapping, prospecting, design, supervision and management certificate and B-grade industrial civil construction design certificate.

For the 40 years, it's prospected and designed 54435 km highway including 18000km grade highway. In the 80's, it's mainly engaged in over 1300-km grade highway prospecting design of Cheng yu Highway, Demian Highway, Dajian

Transport Highway, Neigong Highway, Cheng xin Highway and Dana Highway. It also surveyed and designed 208 large and especially large bridges with 89595 running meters. It participated in the 36 projects surveying and construction in 12 countries. There are 46 projects which won Excellent Design and Scientific and Technical Advance Prizes of the province and department. One of them won the First Prize For National Scientific and Technical Advance Prize. One project won the First Prize For the National Excellent Design and one won the Silver Quality Prize For the National Excellent Quality Project.

- 1.5. 施工中正常通车、通航的转体桥
2. 院长: 黄志忠
3. 广东高明桥(获交通部优秀设计二等奖)
4. 成渝公路(山重区一级四车道)
6. 电子计算机室
