前言

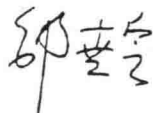

《中国道路运输集锦》(浙江分册)在全国人民学习、贯彻中共十四大精神,发展社会主义市场经济的热潮中编辑出版,她将成为大家了解浙江道路运输的良媒,值得祝贺。

浙江处在祖国的东南沿海地区,素有“七山一水二分田”之称。在改革开放方针的指引下,浙江道路运输业发展较快,为拓展沿海经济和开发山区经济发挥了重要作用。截止1994年底,全省已建成公路33170公里(其中国道和省道干线公路7011公里);高级、次高级路面11602公里、沥青路面7319公里、水泥路面4183公里;公路密度为每百平方公里33公里,97%以上的乡镇通汽车。初步形成了以国、省道为骨架,以县、乡道为补充的四通八达的公路网。全省拥有民用汽车30余万辆,其中交通部门为26292辆(包括客车14078辆、货车11663辆、专用车551辆)。道路运输市场在国有、集体、个体各种经济成份车辆一起上的激烈竞争中日趋繁荣,道路运输的旅客和货物周转量分别占整个交通运输客、货周转量的73%和28%以上。各级公路交通部门面向全行业管理,按照统筹规划、协调、指导、服务和监督检查的要求,一方面运用经济杠杆进行宏观调控,协调运力布局,解决山区人民乘车难的问题,积极发展零担货物运输;另一方面坚持“两个文明”一起抓,在搞活运输市场的同时,加强运输经营行为管理,开展文明车站和文明示范车竞赛活动,提高服务质量,解决乘车难的问题。

交通部 and 省人民政府对我省的道路运输非常重视,从资金、政策等方面给予了大力支持。特别从“七五”期以来,省人民政府为我省交通基础设施制定了“先缓解,后适应”的方针,并把一批交通基础设施列入省重点建设工程项目,按二级公路标准改建了杭州至枫泾、杭州至父子岭、杭州至宁波、金华至温州公路,建成了飞云江大桥、杭州钱江二桥等,使公路面貌有较大的改观,一些干线公路的交通拥挤状况得到初步缓解。同时,建成了杭州汽车东站等一批具有一定规模的汽车站。进入“八五”期后,省人民政府又适时给交通部门确定了“八五”期末达到进一步缓解,“九五”期末达到基本适应的奋斗目标。目前,沪杭甬高速公路等重点工程正在抓紧进行。广阔的前景,光荣的使命,将进一步调动社会各界关心和支持发展公路事业的积极性,激励从事道路运输的人们加倍努力,为浙江道路运输的美好未来,作出新的奉献。

《中国道路运输集锦》编辑部为编纂浙江分册派来编辑人员奔波采访了我省十一个市(地)交通部门,与我省各级交通部门的领导及有关人员共同努力汇集成这本册子,比较全面而又客观地反映了我省在道路运输方面的现状和未来发展的概貌。我希望这本册子的出版,能对海内外关心浙江道路运输事业的朋友们进一步了解浙江、认识浙江有所助益。

浙江省交通厅厅长

中国道路运输年鉴
CHINA ROAD TRANSPORT YEARBOOK
1995

PREFACE

At the upsurge of whole people studying and carrying out the spirit of the 14th National Congress of the Communist Party of China, and the development of socialist market economy, the (Zhejiang Volume) of 《The Highlights of China Highway Transportation》 is published, she will become a good medium for the people to know the road transportation of Zhejiang.

Zhejiang is located on the coastal area of southeast China, it is always called "70% mountain, 10% water and 20% farmland". Under the guiding principle of the reform and opening, the road transportation of Zhejiang has been developed rapidly, which plays an important role for opening up the economy of the coast and mountain area. By the end of 1991, the 30,800 km roads have been built in the province, (among which the national highway and the provincial arterial highway 6,990 kms), with 2,088 km concrete roads, 3,800 km tar roads, 140 km stone roads; and the road density of 30 km/100 km²; 94 percent of towns and townships are open to traffic, forming road network with national highway, provincial highway as its framework, the county and town road as its supplement. There are 171,900 civil vehicles, 11,300 of whom are buses and trucks of the communications department, 25,200 of whom are the individual (collective) buses and trucks. In the competition of the national, collective and private economy, the road transportation market is more flourishing. The passenger and freight circulation volume of highway transportation occupies 68 percent and 28.4 percent of that of the whole communications and transportation respectively. According to the requirements of overall planning, coordination, guiding, service and inspection, the communications departments at all levels are geared to administration of all trades; on the one side, they carry on macro-control by the economic lever, coordinate the overall arrangement of the transportation strength in order to solve the people's difficulty by taking bus in the mountain area, actively develop the LTL transportation; on the other side, they insist on "Both Material and Spiritual Civilizations", strengthen the administration of the transportation management in the invigoration of transport market, develop the activities of contest in the exemplary station and model bus, improve the quality of service, so as solve the difficulty of going by bus.

The Ministry of Communications and the provincial people's government have attached importance to the road transportation for our province, and given a great support in the aspect of money and policy. Especially since "7th Five-Year Plan" period, the provincial government has drawn up the policy of the first relaxation and then suitableness, a group of the basic installations of communications are arranged into the important projects of the province. According to the 2nd-grade highway level, we rebuilt the roads from Hangzhou to Fengjing, Hangzhou to Fuziling, Hangzhou to Ningbo, Jinhua to Wenzhou, built Feiyan River Bridge, Hangzhou Qianjiang second Bridge, the features of roads have been greatly changed, preliminarily relaxing the crowded condition in some main highways. At the same time, we have built a group of a fairly-sized bus stations, such as Hangzhou east bus-station. During the period of "8th Five-Year plan", the provincial people's government has again drawn up the aim for the communications departments to further relax the difficulty of going by bus, and we will basically reach the goal at the end of "9th Five-Year plan". At present, the important projects, such as the expressway from Shanghai to Hangzhou, and Ningbo is under construction. The broad prospects, the glorious mission will further arouse the enthusiasm of all walks of life of the society to show solicitude for and support the cause of roads, encourage the people to engage in road transportation and to make double efforts for the glorious future of road transportation of Zhejiang.

In order to compile Zhejiang volume, which will objectively and comprehensively reflects the current situation of the road transportation and general picture of the future development of our province, the editorial Department of 《The Highlights of China Highway Transportation》 sent editorial staffs to interview 11 municipal (prefectural) communications departments of our province and made joint efforts with leaders at all levels of the communications departments and people concerned. I hope that this book will help those friends both at home and abroad who care for the cause of road transportation of Zhejiang to further understand and know Zhejiang.

Head of Zhejiang Communications Department

The Highway Administration of Communications Dept. ,Zhejiang Province was founded in 1983 (the former was the Engineering Administration funded in 1978), the Highway Transportation Administration and Highway Check & Toll Collection Office were founded in 1987. With 3 signs and one leading body, the administrations (office) handle official business jointly, there have established 17 functional offices under the bureau, with a staff of 166 persons. The highway administration dept. , highway transportation dept. and highway check & toll collection dept. have been established for every city (prefecture), and the highway administration section, highway transportation administration office and highway check & toll collection office being set up for every county (city, prefecture), with handling routine work by the Highway Transportation Administration and Highway Check & Toll Collection Office of the city (prefecture), county (city) jointly. Under the managerial system of the combination of line and block and with the block as the main part, the administrations (office) of the province carry out trade management for highway construction, maintenance, highway transportation and highway traffic dues collecting and checking.

省交通设计院直属浙江省交通厅，是经国家计划委员会资质认可的甲级勘察设计事业单位。全院职工 400 余人，固定资产 1000 多万元。拥有先进的地质勘察、工程质量、土工材料试验等专业的仪器设备，建有 APOLLO 电算工作站。该院和省内外八个设计科研、施工单位建立横向联营和技术合作，初具工程集团优势。

该院设置公路工程和水运工程等专业机构 16 个，有各类专业技术人员 300 多人，其中高级职称 52 人，中级职称 140 人。能承担各类等级公路、城市道路、特大型和复杂桥梁、隧道、大型港口、航道及各种水工建筑物的规划，可行性研究、设计及勘察、试验、电算等业务。

历年来，该院勘察设计完成高速公路和各类等级公路 3000 多公里；特大桥和大桥 100 余座；山岭和水底隧道 10 多座；航道及港区地形测量 2500 多公里；港口及航道等水运工程设计 200 多项；地质勘探总进尺 10 万多米。其中，多项工程项目分别获得国家优秀设计奖、全国科学大会奖等。

The Provincial Communications Design Institute is directly subordinate to the Communications Department of Zhejiang Province. It is the institution with the grade A qualification certificate for reconnaissance and designs issued by the State Planning Committee. There are over 400 staff and workers and fixed assets of more than RMB ¥ 10 million. It has advanced instruments for geological prospecting, project survey, the experiments of civil engineering materials, etc. It has built APOLLO working station of electric calculation. And it has built lateral joint operation business and cooperation in technology with eight desing & scientific research and construction units from inside and outside the province, and has begun to take project superiority of the group.

It has set up 16 professional units, such as the highway engineering and water transport engineering, etc. With all kinds of professional technicians over 300 people in the institute, among them, 52 people have senior title, and 140 people have mdeium title. They can undertake such tasks as planning, feasibility research, design, prospecting, experiments, and electric calculation for all kinds of grade highway, urban road, special large and complicated bridge, tunnel, large port, channel and buildings of water engineering, etc.

For these years, it has projected, designed and completed expressway and all kinds of grade highway over 3,000kms; more than 100 special large and large bridges; over 10 moutain and submarine tunnels; and over 2,500km channel and topographic surveying of harbour, and it still has designed over 200 water transport projects of port and channel, with total footage of geological prospecting over 100 thousand meters. Among them, many projects have respectively won the prize of China national "Excellent Design" and the prize of China National Science Meeting.

Established in 1958, the Communications School, which is affiliated to the Communications Department of Zhejiang Province, is a technical secondary school of communications of full-time and multi-subject. It was confirmed as a key secondary vocational school of national level by China National Education Commission in 1994.

There are 4 major specialized courses (long-distance), such as ocean ship pilotage, turbine management of seagoing vessel, highway & bridge engineering, motor handling engineering and 12 specialized courses (short-distance) which are offered in the school, and the school has co-established with Zhejiang Engineering College and Shanghai Ocean Shipping College for offering the junior classes, like highway & bridge engineering, water transport management and ocean ship pilotage, and undertaken correspondence course of regular college course and other social training class with Tongji University, Xi'an Highway College and Changsha Communications Institute. In 1994, China National Education Commission authorized that the school was qualified for running school.

With an area of more than 100 thousand m^2 , the school has 400 staff members, including over 130 persons who have the title of lecturer, and more than 2000 students, and there are such facilities as over 60 thousand m^2 of teaching, daily-use houses, 400 m^2 of athletic field, standard swimming pool, diving pool, one 5000 t teaching practice ship, 24 labs of all kinds, total value of 7.8 million yuan of instrumental equipment, and a library of 124 thousand copies of books.

创建于1958年的浙江省交通学校，是一所全日制多科性交通中专学校，隶属浙江省交通厅。1994年，被国家教委确定为国家级重点中等专业学校。

该校设有海洋船舶驾驶、海船轮机管理、公路与桥梁工程、汽车运用工程等4个长线主干专业和12个短线专业，

并与浙江工学院、上海海运学院合办了公路桥梁工程、水运管理和海洋船舶驾驶大专班，承办了同济大学、西安公路学院、长沙交通学院本科函授及其他各类社会培训任务。1994年，国家教委批准该校具有高等职教办学资质。

学校占地面积10万多平方米，教职员工400人，其中讲师以上职称的有130余人，在校学生2000人，有教学、生活用房6万余平方米，有400米田径场、标准游泳池、跳水池等设施，有5000吨级教学实习船一艘，拥有各类实验室24个，仪器设备总值达780万元，图书馆藏书12.4万册。

浙江公路机械厂

ZHEJIANG HIGHWAY MACHINERY PLANT

地址: 杭州市江干区复兴里街余家荡 67 号 邮编: 310008 电话: 653620

浙江公路机械厂是交通部定点生产轻型汽车的重点专业厂,是浙江公路管理局直属的国有企业。该厂建于 1955 年,现有职工 300 多人,固定资产达 420 万元,主要设备 80 多台。1979 年开始生产轻型汽车,已积累了丰富的技术、工艺、制作经验,并形成了车架、总装生产线,配制了完善的检测设备,连续数年通过中汽公司和机电部国家级抽检,列入全国汽车和农用运输车生产目录。该厂商标“飞碟”,企业代号“FD”。

该厂现生产品种有:FD3040 自卸运料车,FD1040 平板运料车,FD1040S 双排座运料车,FD6600DP 小客车底盘,FD6500 轻型客车和 FD2415 农用运输车等,其中 FD2415 农用运输车被选为全国推荐车型,现已向全国 8 省 25 个农用车制造厂转让了技术,1992 年获消费者信得过国产车银奖。

The Zhejiang Highway Machinery Plant is a key professional plant, designated to produce mini cars by the Ministry of Communications. It is the state-owned enterprise affiliated to the Highway Administrative Bureau of Zhejiang Province. Established in 1955, it has at present over 300 staff and workers, a fixed assets of RMB ¥4.2 million, 80 sets of major equipments. Since 1979, the plant has accumulated a wealth of experiences of technology, manufacture, and formed the production line of frame, general assembly, made up complete equipments of examination, gone through the national spot check of China Automobile Company and the Mechanical & Electrical Ministry for several years. and was listed in the Catalogue of China National Automobile and the Agricultural Transport Vehicle Production. The trademark of the plant is "Feidie", the codename of the enterprise is "FD".

The major products are; FD3040 dump truck, FD1040 flatruck, FD1040s feed truck with double-seat, FD6600DP chassis of minicar, FD6500 minibus and FD2415 agricultural transport vehicles, among them, FD2415 agricultural transport vehicle has been elected as the national recommendable model, and the technology has been transferred to 25 agricultural vehicle manufacturers in 8 provinces. In 1992, it won the silver prize of the customer trusted home-made vehicle.

浙江省公路职工莫干山休养所

MOGAN MOUNTAIN SANATORIUM OF ZHEJIANG

HIGHWAY STAFF & WORKERS 地址:德清县莫干山 125 号 邮编:313205 电话:33563

休养所地处浙江德清县境内,距风景旅游名城杭州约 60 多公里。盛夏季节,莫干山凉爽如秋,是我国四大避暑胜地之一。莫干山风景秀丽,以“天下雅秀”闻名于世。

休养所属省公路局领导的事业单位,直接为全省公路系统的广大职工服务,接待休养,培训和各种专业会议等任务,还对外开放。每年接待 2 万人次以上。历年被评为莫干山管理局的卫生先进单位。

休养所建于 1979 年,建筑面积 3500 平方米,休养所主楼是五层仿古式块石结构。内设 65 套标准客房。卫生设施齐全,住宿舒畅、方便,空气新鲜,环境优美。并设有大、中、小会议室和文娱活动室,可随时接待百人左右的各种会议。

The sanatorium lies in Deqing county of Zhejiang province. It is only 60 kms to the scenic spot from Hangzhou. In summer, Mogan Mountain is as cool as autumn, it is one of 4 summer resorts, Mogan Mountain is world famous for its scenic beauty.

The sanatorium is an institution affiliated to the Provincial Highway Bureau, and directly serves the staff and workers of the provincial highway system, receives the convalescent persons, accepts training and all kinds of professional meetings and is open to the outside world, with annual receiving volume of 20 thousand persons/times, The sanatorium is appraised as the advanced health unit by Mogan Mountain Administrative Bureau every year.

The sanatorium was established in 1979, with a floorage of 3,500 square meters. The main building with five storeys is stone structure in the style of the ancients, there are 65 suits of standard guest rooms, with complete sanitary installations, easy, convenient and comfortable lodgings, fresh air and fine environment. There have set up large, medium and small-size meeting rooms and the rooms for recreational activities, that can receive about 100 people for all kinds of meetings at any time.
