新世纪的本溪市中心医院,正以改革创新的态度,奋力实施第二次创业,秉承前辈孜孜以求的敬业精神,遵从奉献健康事业,服务山城人民的宗旨,坚持以病人为中心,创优秀服务品牌,打造百姓放心医院,为实现创建“辽东名院”的美好愿景而努力奋斗。

## Brief Introduction of Benxi Central Hospital

Benxi Central Hospital was founded on April 1, 1954. Its previous name was Benxi No.2 People's Hospital. In January of 1985, the name of hospital was changed as Benxi Central Hospital.

After experienced half century of tremendous efforts, the hospital has become a largest municipal general hospital with clinical, teaching, scientific research, prevention and health care together. It is in charge of diagnosis, treatment and rescue for a population of 1.6 million residents in two counties and four districts of Benxi city. It is No. 9 clinical hospital and postgraduates teaching base of China Medical University. It won the title of "Three ranks, A Grade Hospital", also the location of Benxi Emergency Center, Benxi Cardiovascular Disease Hospital, Benxi Stomatological Hospital, Benxi Institute of Combination of Traditional Chinese and Western Medicine, and Benxi Prevention and Treatment Center for Public Nuisance Disease.

With the mergence of Benxi Women-Children Hospital and Benxi Central Hospital in December of 2001, the hospital covers an area of 43,400 m<sup>2</sup> with a floorage of 48,000 m<sup>2</sup>. It has 1016 beds, 1674 staffs in which medical staffs are 1409 including 158 with senior qualification, 423 with the title of middle rank, 88 pluralized professors of China Medical University, 11 postgraduate tutors, 37 clinical departments, 19 clinical assistant departments, 7 researching stations for postgraduates. Major clinical departments also established affiliated departments: ICU, CCU, electrocardial monitoring center, "120" first-aid station, etc. The hospital also set up prevention and treatment center for eyedisease, medical image center, laboratory center, interventional treatment center, China-America-Japan health recovery center and health evaluation center.

The hospital possesses 2400 kinds of medical equipment, including about 60 precision instruments imported from America, Germany, France and Japan. Such as 1.5T superconductive magnetic resonance image, spiral whole body CT, electro liner accelerator, large digital subtraction unit, colour Doppler, full-automatic biochemical analyser, CR digital process system, quasi-molecular laser system, ultraemulsifier, hemodialysis unit, electron fiber gastroscope, prostate evaporating exsector, thoracoscope, uteroscope, large heart monitoring system, etc. These equipment and instruments lay down a solid foundation for hospital development.

After 1990s, the hospital sped up its reform steps, introducing competitive mechanism, implementing the strategy of thriving hospital with science and technology. Those made it achieve 10 provincial level and 78 municipal level of Science and Technology Advanced Awards and nearly 100 new medical techniques. The main items are: Intracardiac surgery under extracorporeal circulation, kidney transplantation, corneal transplantation, severed palm replantation, reconstruction of stomach by ileocolon, reconstruction of vagina by sigmoid, neck esophagoplasty, implantation of cardiac pacemaker, myocardial biopsy, PTCA, stent implantation, radiofrequency ablation,

microwave intervention for liver cancer and other interventional treatments, catheter thrombolysis for acute pulmonary embolism, nasal sinus micro-operation under endoscope, ultrasonic emulsification, crust curettage for deep II° burn, and treatment of Dachuanxion oral liquid on cerebral blood stasis. Some of them supplied gaps for our city, province and nation. Now the hospital has realized computer network management.

The hospital highly value international exchanges and cooperations. It successfully sponsored 2 international academic conferences, 7 national and provincial meetings, established cooperative relations with 10 domestic and foreign hospital, which greatly raise the hospital reputation.

With these achievements gained, the hospital won nearly 100 honorable titles. Such as, "Civilization Unit of national health system", "National and Provincial Baby-love hospital", "trusted hospital by people", "Medical morality and medical style construction advanced unit in Liaoning province", "provincial best professional morality and finest image unit", "Provincial advanced unit of ideological and political affairs" and "National hospital culture advanced unit", etc.

In the new century, Benxi Central Hospital is working harder to start second creation with the spirit of reform and innovation. It carries on the revolutionary tradition of older generation, insisting on the principle of contribution to the healthy cause and serving for the Benxi people, regarding the patients' needs as the most importance, making efforts to set up a hospital trusted by people and striving for the realization of "Famous Hospital in East Liaoning".
