THE HIGHLIGHTS OF
CHINA HIGHWAY TRANSPORTATION

前言

福建位于中国东南部、太平洋西岸,全省陆地面积 12.38 万平方公里。境内山岭、丘陵连绵起伏,河谷盆地错综其间,山地与丘陵占全省面积 90%。江河密布,流域面积达 88000 平方公里。沿海海岸曲折,岛屿众多,形成许多天然良港。由于地处亚热带,气候温和,四季常青,风景秀丽,旅游资源丰富。并且华侨众多,仅在东南亚的闽籍华侨就有 700 万人。与台湾仅一衣带水之隔,在台湾同胞中约 80% 的祖籍在福建,血缘相亲,语言相通。福建拥有的人文地理优势,为经济发展和改革开放创造了优越的条件。

新中国成立四十多年来,福建交通得到了长足的发展,仅公路建设 1994 年通车里程就比解放初期增长了 47.2 倍,达 44608 公里(解放前夕全省公路仅有 945 公里),其中等级公路里程达 34286 公里,拥有高级、次高级路面里程为 8571 公里,桥梁 8311 座,243453 延米。拥有汽车达 210404 辆(其中 30% 为个体联户汽车)。年汽车客运周转量达 195 亿人公里,货物周转量达 139 亿吨公里。同时近年来出租汽车发展迅速,到目前为止全省已拥有出租汽车近一万辆。道路运输市场十分活跃,形成了“人便于行,货不滞运”的局面。

为了进一步加快福建的交通建设,福建人民大兴修路之风,对境内五条国道,一条省道及若干繁忙公路路段进行拓宽改造,喻为“先行工程”。计划用八年时间投资 240 亿元,完成 4000 公里二级以上标准公路的改造建设。同时兴建福、厦、漳、诏高速公路。到 2000 年后,福建道路交通将形成路网齐全、开放畅通、快速安全的阡陌大通道,福建经济也将随之而迅速腾飞。

福建省交通厅厅长

申学光

PREFACE

With mountains and hills rolling one after another, and rivers valleys, basins located among them, Fujian Province is situated at the southeast part of China, the west bank of the Pacific Ocean, with a land area of 120.38 thousand km², of which mountainous regions and hills make up 90% of the total area of the province. The numerous rivers flow through a drainage area of 88 thousand km², the winding coasts with multitudinous islands form good natural harbors. Due to its subtropical temperate climate, it's evergreen all the year round, and beautiful in scenery with rich tourist resources. Besides, there are many overseas Chinese, of them Fujian overseas Chinese only in southeast Asia number 7 million. It's only a narrow strip of water with Taiwan, with close blood relation and common language, and 80% ancestral homes among the compatriots in Taiwan are from Fujian. The human and geographical advantages bring about favourable conditions for the economic development and opening to the outside world.

Since the establishment of New China for over 40 years, rapid progress has been made in communications of Fujian, the mileage in highway open to traffic only in highway construction up to 1994 was 47.2 times what it was against the initial stage of liberation, it reached 44608 km (only 945 km of highway of the province on the eve of liberation), including 34286 km of mileage in grade highway, there are 8571 km of high-grade, secondary high-grade surface, 8311 bridges, with 243453 running meters, and 210404 automobiles (30% of which belong to individual households), with annual motor passenger circulation volume of 195 billion person/km, while the freight circulation volume of 139 billion ton/km. Meanwhile, it also has rapid development in taxicabs in recent years, there are about 10 thousand taxicabs in the province at present, the highway transportation market is very brisk, with such situations as "people traveling conveniently", goods transported smoothly".

In order to further speed up communications construction of Fujian, the people energetically encourage the practice of conducting highway construction, e. g. to widen or rebuild 5 national highways, one provincial highway and the busy sections of highways in the territory, it's called "forerunning project". And it's planned to accomplish the reconstruction of 4000 km highways with over grade—2 within a period of 8 years and making an investment of 240 billion yuan, and to build Fu—Xia—Zhang—Zhao express highways. The crisscross highways with complete road network, and open, unblocked, fast and safety road surface will be formed after 2000, along with the rapid rising of economy of Fujian.
