阿庐古洞

阿庐古洞风景区地处滇东南,位于云南省红河州泸西县城西2公里处。

阿庐古洞是一组规模宏大,结构奇特的典型喀斯特地貌溶洞群,是云南三十七蛮部“阿庐部落”的穴居点,是亚州最壮观、秀丽的天然奇观,有“云南第一洞”之称,地下园林宫殿之誉。已开发开放了3个旱洞、1个水洞组成的全长3000余米的游程。有数百个景点,上下三层贯通,泸源洞、玉柱洞、碧玉洞造型风格各异,峡谷、厅堂、宫殿相融其间,一步一景、步步是景,洞中钟乳悬积,石笋林立,色若碧玉、瑰丽透明、沿河交融、发育丰富,“洞中有洞、洞中有河、洞中有天、洞外有泉”,“天然奇石洞,造化夺神工”堪为世界一绝,使其具有“古、朴、绝、奇”等独特风格。特别是全长800余米的玉笋河水平如镜,清澈见底,珍稀鱼类“透明鱼”遨游其中,举世罕见。河中泛舟,人在画中,如入仙境,令你留连忘返。

阿庐古洞的历史可以追溯到数亿年前。当滇黔古海上升为陆地后,海中含钙质的大量物质沉积为石灰岩,经过数十万年甚至数百万年,含有二氧化碳雨水的浸蚀和长期岩溶蚀出一个个落水洞和漏斗地穴,又被溶蚀而形成今天这样的洞中奇观。

THE ALU ANCIENT CAVES

The Alu Ancient Cave scenic spot is located in the southeast of Yunnan Province, two kilometers from the west of Luxi County, Honghe Prefecture, Yunnan Province. Alu Ancient Cave is a group of karst caves with large scale and unique karst topography structures, and one of the most magnificent natural caves in Asia. With the fame of "The First Cave in Yunnan Province", its three-dimensional sightseeing area contains underground caves, underground rivers, outside parks and cable cars. Currently, three dry-caves, one water-cave, and ten halls have been developed, which forms a 3000-meter tour course with almost one hundred linked scenic spots. The Luyuan Cave, the Yuzhu Cave and the Biyu Cave have different styles, consisting of valleys, halls and palaces. Along the rivers inside the caves, there are the forests of stalactite, green and charming. With the features of "caves containing caves, rivers inside and springs outside" and "unique natural stones", the Alu Ancient Cave is a miracle in the world. Especially the 800-meter-long Yusun River, it has clean and fresh water, in which the rare "Transparent Fish" swims freely. Go floating on the rivers, freeing yourself in the dreaming land and enjoying the beauty of nature, you may even forget to return.

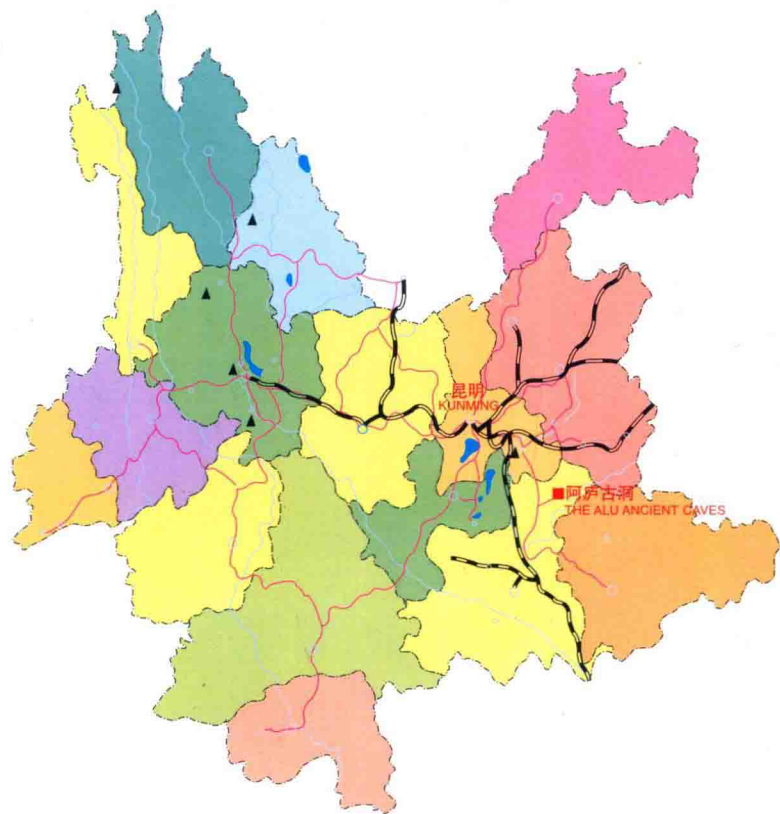

The history of Alu Ancient Cave can be traced back to several hundred million years ago. When the ancient sea of Yunnan and Guizhou ascended and became lands, plenty of sea substance containing calcium deposited and became lime rocks. Having been soaked in and corroded by the rains containing carbon dioxide for thousands of years, or even millions years, a great amount water dripped into caves and holes emerged, which then changed into marvelous spectacle that we found today.

Guide to Alu Ancient Caves

阿庐古洞导游

Guide to Alu Ancient Caves

被称为“云南第一洞”的泸西阿庐古洞，是一组规模宏大、结构奇特的溶洞群：洞中有洞，洞下有河，旱洞水洞，各呈奇姿。旱洞有泸源洞；玉笋河，即地下暗河，乘舟而入，真象水晶龙宫。整个洞区游程约三公里，四洞游览观光，大约需2至3小时。每一个洞都有数不清的奇石美景，著名的景点四洞总计就有百多处。

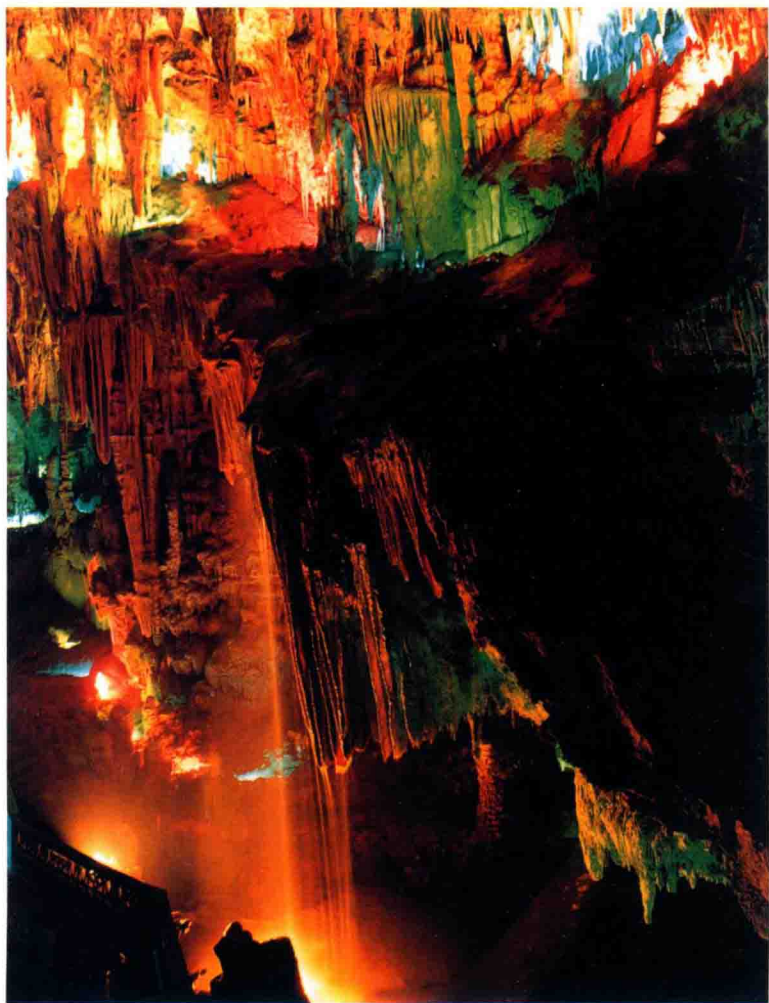

Known as the "First Cave in Yunnan Province", the Alu Ancient Caves of Luxi is a group of karst caves with queer structure and large-scale. Inside the caves, there are another caves and rivers under them. Luyuan Cave is a dry cave and the Yusun River is an underground river, floating on which, you can indulge yourself in a gorgeous crystal palace. The whole tour course in caves is about three kilometers and it will take you approximately three hours to complete the entire sightseeing. Every cave contains numberless unique stones and attractive scenery, the famous sightseeing spots in four main caves total over one hundred.
