13. When, in a large collection, the number of EDITIONS of a single work exceeds or is likely to exceed 9, the different editions may be distinguished by adding the year of publication (usually of the first volume, if there are more than one instead of a number 2, 3, or 4.

E. g., Paradise lost, ed. of 1667 M64 P. 1667; reprint of same ed. M64 P. 1667 2; ed. of 1732 M64 P. 1732; ed. of 1754 M64 P. 1954; Paradise regained M64 R.

14. If a COMMENTARY on any work is to be kept immediately after the work add to the work-mark a capital Y and (if necessary) the initial of the commentator. For dictionaries and concordances add Z followed by the compiler's initial.

E. g., Frehe's Wörterbuch zu Reuter's sämtlichen Werken would be R31 Z; Clarke's Shakspeare concordance (in a library which has no special mark for Shakspeare) SH1 Zc.

For a fuller explanation see Cutter's Expansive classifications, pt. 1, pp 139-160. This includes a way to mark a large collection of Greek and Latin classics, such as would be found in a college library, first published in *Library Journal*, 11: 280'-289. See also my full scheme for marking a Shakespeare collection, *Library Journal*, 9: 137-139.
