Information Highlighting in Advanced Learner English

Pragmatics & Beyond New Series (P&BNS)

Pragmatics & Beyond New Series is a continuation of *Pragmatics & Beyond* and its Companion Series. The New Series offers a selection of high quality work covering the full richness of Pragmatics as an interdisciplinary field, within language sciences.

Preface

The present book is the revised version of my PhD thesis that I submitted and defended in 2006 at Philipps-University Marburg. First and foremost, I wish to express my deep gratitude to my dissertation director Rüdiger Zimmermann for interesting me in the topic and supervising this dissertation, but also for his academic teaching, support and encouragement throughout the years. Next, I would like to thank my co-director Richard Young for being my sponsor during my research scholarship at the University of Wisconsin-Madison. His constructive criticism and challenging comments have proved to be essential for carrying this project forward. Thanks also to his family for their hospitality. I also want to thank Ingo Plag for hiring me as a student assistant years ago, and for initiating my interest in empirical linguistic research in the first place.

A number of people have provided very helpful (e-mail) comments, suggestions, and advice at various stages of this project: Betty Birner, Mia Boström Aronsson, Monika Doherty, Paul Hopper, Gunther Kaltenböck, Terence Odlin, Clive Perdue, Paul Rayson, David Smith, and Gregory Ward. I also acknowledge the valuable and insightful comments of two anonymous reviewers for John Benjamins. I am grateful to all of them for letting me benefit from their expertise. Of course, they are not responsible for any errors and shortcomings of this work.

Furthermore, I'd like to thank Sabine Arndt-Lappe and Maria Braun for their help with collecting data at the University of Siegen, and all my participants in Madison, Marburg and Siegen for their time and efforts in taking part in the project.

I presented proposals and preliminary results of this research at various conferences and colloquia: International Conference on Foreign and Second Language Acquisition, Szczyrk/Poland, 2002; Conference on the Pragmatics of Interlanguage English (ConPILE), Münster/Germany, 2002; International Conference of the European Second Language Association (EUROSLA 12), Basel/Switzerland, 2002; Linguistics Colloquium, Department of Foreign Languages and Linguistics, University of Wisconsin-Milwaukee/USA, 2003; Second Language Acquisition Talk Series, University of Wisconsin-Madison/USA, 2003; Annual Meeting of the British Association of Applied Linguistics, Kings College London/UK, 2004. I am

indebted to the audiences for their constructive comments. I should especially like to thank Edith Moravcsik and Fred Eckman for having me in Milwaukee.

Special thanks go to the organizers and participants of the highly stimulating summer school “Learner Corpus Research: Theory and Applications” held in Louvain-la-Neuve in September 2004. In particular, I would like to thank Sylviane Granger and her team for their help and generous support with the learner and native speaker corpora.

I acknowledge financial support by the German Academic Exchange Service (DAAD) who granted a research scholarship which enabled me to pursue my studies at the University of Wisconsin-Madison. I am also grateful to the Department of English and American Studies at the University of Marburg for various travel grants.

On a more personal note, I would like to thank my former colleagues at the University of Marburg, Christian Uffmann, Michael Waltisberg, and Wolfram Keller, for talking linguistics and other stuff. To all my friends, old and new, I wish to express my appreciation for cheering me on and distracting me from the peculiarities and petty things of linguistic research. Marcus Kostka and family deserve special mentioning for teaching me Cockney Rhyming Slang, and Chris Sieck for his companionship, support and kind hospitality during my time in Madison.

Thank you Mikael and DT for sharing my *Hours Passed in Exile*. We have become good friends over the last years. Very special thanks go to Martin and Anna Engelhardt, and Katharina, Yara, Lilly and Christian Hugo for their friendship and support during a difficult phase of my life.

Finally, and most importantly, I wish to express my deep gratitude to my family for their love, encouragement, support and understanding. Without you I would never have been able to get this far.

Table of contents

Abbreviations	IX
List of tables	XI
List of figures	XV
Preface	XVII
CHAPTER 1	
Introduction	1
CHAPTER 2	
Information highlighting in English	9
2.1 General functional principles of discourse organization	10
2.1.1 Major concepts of information structure	13
2.1.1.1 Sentence position and information status	13
2.1.1.2 Syntactic weight	17
2.1.1.3 Topic and focus	19
2.1.1.4 Cases of emphasis: Intensification and contrast	21
2.2 Means of information highlighting in English	24
2.2.1 Lexico-grammatical means	24
2.2.1.1 Emphatic <i>do</i>	24
2.2.1.2 Focus particles	26
2.2.1.3 Pragmatic markers	29
2.2.2 Focus constructions	31
2.2.2.1 Inversion	32
2.2.2.2 Preposing	36
2.2.2.3 Clefts	40
2.2.2.4 Extraposition	47
2.2.2.5 Frequency and register variation	51
2.2.2.6 The markedness of focus constructions	53
CHAPTER 3	
Information structure and information highlighting in English and German	59
3.1 Basic word order in English and German and its impact on information structure	59

3.2 Focusing devices in English and German 66

3.2.1 Topicalization vs. preposing 66

3.2.2 Inversion 68

3.2.3 Clefts 69

3.2.4 Lexico-grammatical means 77

3.2.5 Summary 77

CHAPTER 4

Pragmatics and information highlighting in SLA research 79

4.1 Pragmatics in SLA 79

4.1.1 The syntax-pragmatics interface in language acquisition 85

4.2 Information structure and focusing devices in SLA research 89

4.2.1 Information structure in early and advanced SLA 89

4.2.2 Lexical intensifiers and focus particles 96

4.2.3 Pragmatic markers 99

4.2.4 Focus constructions 100

4.2.5 Summary 104

4.3 Language universals, markedness and crosslinguistic influence in SLA 106

4.3.1 Language universals, language typology and SLA: Universal Grammar vs. the functional-typological approach 106

4.3.2 Typological markedness and its interplay with crosslinguistic influence 108

4.4 Research hypotheses 111

CHAPTER 5

Research design 115

5.1 Assessing L2 proficiency: Defining the advanced learner 115

5.2 Research instruments 117

5.2.1 Experimental study 118

5.2.1.1 Production: Discourse completion 120

5.2.1.2 Metapragmatic assessment: Pragmalinguistic judgments 123

5.2.1.3 Introspection: Retrospective interviews 126

5.2.2 Learner-corpus study 127

5.3 Procedures of data analysis 129

5.3.1 Experimental data 129

5.3.2 Corpus data 133

CHAPTER 6

Experimental study 135

6.1 Elicited production 135

6.1.1 Native speakers vs. learners 135

6.1.1.1 Syntactic means	141
6.1.1.2 Lexico-grammatical means	145
6.1.2 Learners' L1 vs. L2	147
6.1.2.1 Syntactic means	151
6.1.2.2 Lexico-grammatical means	156
6.2 Metapragmatic assessment	158
6.3 Introspection	164
6.4 Summary	177
CHAPTER 7	
Learner-corpus study	181
7.1 Syntactic means	181
7.1.1 Clefts	181
7.1.2 Preposing	194
7.1.3 Inversion	195
7.1.4 Extraposition	198
7.1.5 <i>There</i> -sentences: Existentials and presentationals	201
7.2 Lexico-grammatical means	202
7.3 Summary	204
CHAPTER 8	
Discussion and conclusion	207
8.1 Interpretation of findings	207
8.2 Methodological problems and limitations of the study	213
8.3 Pedagogical implications	215
8.4 Suggestions for further research	219

Index	291

Introduction

In recent years, the field of second language acquisition (SLA) research has seen an increasing interest in advanced stages of acquisition and questions of near-native competence, or what is considered as the successful acquisition of a foreign/second language (L2). However, there are still relatively few studies of advanced learners compared to learners at early and intermediate stages of the learning process. It has been a matter of controversy to what extent adult L2 speakers achieve native-like proficiency.¹ Moreover, while in many European countries the ultimate goal of foreign language teaching at the advanced level is for the students to achieve a near-native command of the target language, it is often left unspecified what native-like proficiency exactly means (de Haan 1997:55).

Despite the growing interest in what has also been called the advanced learner variety (ALV), the field is still struggling with both a definition and clarification of the concepts 'advanced learner' and 'nativeness', and an in-depth description of the ALV, especially when it comes to learners' acquisition of optional and highly L2-specific phenomena in all linguistic subsystems. Advanced learners have typically mastered the L2 rules of morphosyntax, and their written production is mainly free from grave grammatical errors. However, their writing often sounds unidiomatic and shows subtle differences to texts produced by native speakers (NSs). It seems difficult to pin down the exact reasons for this non-nativeness or foreign-soundingness of learner writing, and therefore it is frequently explained by using vague cover terms such as 'unidiomaticity' or 'style'.

In the last 15 years or so, corpus-based research into learner language has yielded substantial empirical evidence that texts produced by advanced learners and native speakers differ in terms of frequencies of certain words, phrases and syntactic structures.² In a recent overview of the field, Granger (2004:135) defines

1. See Birdsong (1999) and the recent special issue of the *International Review of Applied Linguistics in Language Teaching* (IRAL) (43:4, 2005) for studies that investigate advanced learners' success in areas such as phonology, grammar and discourse.

2. See Hinkel (2005) for a review of research on second language writers' texts. Hinkel (2002) provides a comprehensive and detailed analysis of English native speakers' and second language writers' texts. Studies that focus on specific linguistic features are for example Lorenz (1998,
