# Table of Contents

<b>Disorders of Esophageal Motor Functions.</b> By FRANZ J. INGELFINGER, <i>Evans Memorial and Massachusetts Memorial Hospitals, and Department of Medicine, Boston University School of Medicine, Boston</i> . . . . .	11
Anatomy and Definitions . . . . .	11
Normal Swallowing . . . . .	12
Cardiospasm . . . . .	14
Lower Esophageal Ring . . . . .	22
Curling, Spasms, and "Dysrhythmia" . . . . .	24
Gastroesophageal Reflux: Normal Upper Digestive Tract . . . . .	26
Gastroesophageal Reflux: Diaphragmatic Hernia . . . . .	30
Gastroesophageal Reflux: Chaliasia . . . . .	32
Reflux, Heartburn, and Peptic Esophagitis . . . . .	34
Conclusion: Caveat Lector . . . . .	36
References . . . . .	37
 <b>Peptic Ulcer: Review of Recent Literature Pertaining to Etiology, Pathogenesis, and Certain Clinical Aspects.</b> By JOSEPH B. KIRSNER, ROBERT S. KASSRIEL, and WALTER L. PALMER, <i>Department of Medicine, University of Chicago, Chicago</i> . . . . .	41
General Considerations . . . . .	41
Role of Hydrochloric Acid . . . . .	45
Gastric, Urinary, and Blood Pepsinogen . . . . .	64
Tissue Resistance . . . . .	67
Ulcer Pain . . . . .	71
Massive Hemorrhage . . . . .	73
Gastric Ulcer . . . . .	82
Medical Treatment of Peptic Ulcer . . . . .	85
Surgical Treatment of Peptic Ulcer . . . . .	94
References . . . . .	98

<b>Digitalis and Potassium.</b> <i>By</i> BERNARD LOWN, <i>The Medical Clinics of the Peter Bent Brigham Hospital, Boston</i> . . . . .	125
Potassium Metabolism . . . . .	126
Increase in Body Potassium . . . . .	126
Potassium Depletion in Animals . . . . .	127
Potassium Depletion in Patients on Digitalis . . . . .	129
Shifts in Body Potassium . . . . .	130
Serum vs. Cellular Potassium . . . . .	137
Potassium Metabolism in Heart Failure . . . . .	138
Paroxysmal Auricular Tachycardia with Block . . . . .	139
Role of Digitalis . . . . .	140
Clinical Features of PAT with Block . . . . .	142
Prognosis . . . . .	143
Electrocardiographic Features . . . . .	143
Treatment . . . . .	145
Underlying Mechanism of PAT with Block . . . . .	146
Effect of Digitalis on Myocardial Potassium Concentration . . . . .	147
Calcium-Potassium-Digitalis Interrelations . . . . .	149
References . . . . .	151
 <b>Aldosterone.</b> <i>By</i> JOHN A. LUETSCHER, JR., <i>Department of Medicine, Stanford University School of Medicine, San Francisco</i> . . . . .	155
Isolation and Identification of Aldosterone in Adrenal Extracts and Body Fluids . . . . .	155
Pharmacologic Actions . . . . .	156
Extraction and Measurement of Aldosterone in Biologic Fluids . . . . .	158
Effects of Administered Aldosterone in Man . . . . .	164
Relation of Aldosterone in Urine to Electrolyte Balance in Man . . . . .	168
Physiologic Control of Aldosterone Output . . . . .	170
Edema Associated with High Aldosterone Output . . . . .	176
Disorders of Endocrine Glands, Including Congenital Adrenal Hyperplasia . . . . .	183
Adrenal Tumors Secreting Mineralocorticoids Predominantly ("Primary Aldosteronism," "Potassium-Losing Nephritis"). . . . .	185
References . . . . .	192

<b>Adrenalectomy and Hypophysectomy in the Treatment of Advanced Cancer.</b> <i>By</i> OLOF H. PEARSON, <i>Division of Clinical Investigation, Sloan-Kettering Institute and the Department of Medicine, Memorial Center, New York</i> . . . . .	205
Adrenalectomy . . . . .	206
Hypophysectomy . . . . .	215
Summary . . . . .	218
References . . . . .	218
 <b>Chemotherapy of Tuberculosis.</b> <i>By</i> WILLIAM F. RUSSELL, JR., SIDNEY H. DRESSLER, and GARDNER MIDDLEBROOK, <i>National Jewish Hospital at Denver, and the University of Colorado School of Medicine</i> . . . . .	221
Nature of Antimicrobial Action of Available Drugs . . . . .	223
Physiologic Susceptibility of the Parasite . . . . .	224
Microbial Drug Resistance . . . . .	225
Definition of Adequate Dosage . . . . .	228
Distribution and Metabolic Disposition of Drugs . . . . .	230
Combined-Drug Treatment . . . . .	233
Results of Drug Regimens Including Isoniazid . . . . .	233
Rate of Bacterial Multiplication in Open Cavities . . . . .	237
Previously Established Modes of Treatment . . . . .	238
Measures for Preventing Relapse . . . . .	239
Management of Drug Treatment Failures . . . . .	243
Isoniazid Resistance . . . . .	244
Practical Aspects of Treatment . . . . .	247
Schedules of Dosage . . . . .	249
Conclusions . . . . .	250
References . . . . .	251
 <b>Trace Metals and Chronic Diseases.</b> <i>By</i> HENRY A. SCHROEDER, <i>Hypertension Division, Department of Internal Medicine, Washington University School of Medicine, and Barnes Hospital, St. Louis</i> . . . . .	259
Concentrations of Essential Trace Metals in Man . . . . .	260
Concentrations of Abnormal Trace Metals in Man . . . . .	262

Trace Metals and Metalloenzymes . . . . .	268
Sources and Turnover of Essential Metals . . . . .	270
Sources of Abnormal Metals . . . . .	275
Possible Competitions Between Abnormal and Essential Trace Metals . . . . .	278
Metal-Binding and Chelating Agents . . . . .	281
Trace Metals and Chronic Disease . . . . .	286
Summary . . . . .	298
References . . . . .	299
 <b>Hemoglobins and Disease.</b> <i>By R. JANET WATSON, Associate Pro-</i> <i>fessor of Pediatrics, State University of New York College</i> <i>of Medicine, Brooklyn</i> . . . . .	
Biochemistry . . . . .	305
Genetics . . . . .	308
Clinical Aspects . . . . .	312
Fetal (F) Hemoglobin . . . . .	312
Hemoglobin S . . . . .	313
Hemoglobin C (42) . . . . .	321
Hemoglobin D . . . . .	322
Hemoglobin E . . . . .	322
Hemoglobin G . . . . .	323
Hemoglobin H . . . . .	324
Hemoglobin I . . . . .	324
Hemoglobin J . . . . .	324
Thalassemia (Hereditary Leptocytosis) . . . . .	325
Discussion . . . . .	327
Conclusions . . . . .	329
References . . . . .	329

# ADVANCES IN INTERNAL MEDICINE

## VOLUMES I and II (out of print)

## VOLUME III

- USE OF ANTI-LEWISITE (BAL) IN TREATMENT OF POISONING BY ARSENIC, MERCURY AND OTHER METALS, *by W. T. Longcope and J. A. Luetscher, Jr.*
- CURRENT CONCEPTS OF HEMOLYTIC ANEMIAS, *by S. Estren*
- HOST, DRUG AND PARASITE FACTORS THAT MODIFY THE THERAPEUTIC ACTIVITY OF PENICILLIN, *by H. Eagle*
- STREPTOMYCIN: DEVELOPMENT AND STATUS OF ITS USE IN THE TREATMENT OF TUBERCULOSIS, *by H. C. Hinshaw and W. H. Feldman*
- HISTOPLASMOSIS, *by H. Pinkerton*
- TREATMENT OF HYPERTHYROIDISM WITH ANTITHYROID COMPOUNDS, *by E. B. Astwood*
- DIAGNOSIS OF DISEASE BY ENZYMIC METHODS, *by C. Huggins and P. Talalay*
- PLASMA FRACTIONATION, *by C. A. Janeway*
- THE MECHANISM OF ACCLIMATIZATION TO HEAT, *by J. W. Conn*
- MODERN THERAPEUTIC AGENTS IN NEUROLOGIC CONDITIONS, *by H. H. Merritt*

## VOLUME IV

- NITROGEN MUSTARDS IN THE TREATMENT OF NEOPLASTIC DISEASE, *by D. A. Karnofsky*
- USE OF RADIOACTIVE ISOTOPES IN MEDICINE, *by L. R. Wasserman and R. Loevinger*
- BRUCELLOSIS, *by A. I. Braude and W. W. Spink*
- ADVANCES IN NEUROMUSCULAR DISORDERS, *by D. McEachern and R. Rabino-  
vitch*
- USE OF SODIUM DEPLETION IN THERAPY, *by W. Dock*
- CLINICAL USE OF ANTICOAGULANTS, *by J. E. Estes and E. V. Allen*
- HEPATITIS AND CIRRHOSIS OF THE LIVER, *by A. J. Patek, Jr.*
- HEPATIC TESTS, *by H. Popper and F. Schaffner*
- THE VASCULAR PHYSIOLOGY OF HYPERTENSION, *by G. W. Pickering*

## VOLUME V

- DISEASES OF THE PREGNANT WOMAN AFFECTING THE OFFSPRING, *by M. H. Bass*
- CATHETERIZATION OF THE HEART, *by R. J. Bing*
- PORTAL HYPERTENSION AND ITS TREATMENT, *by A. H. Blakemore*
- THE ANEMIA OF INFECTION: XVII. A REVIEW, *by G. E. Cartwright and M. M. Wintrobe*
- GOUT, A DERANGEMENT OF PURINE METABOLISM, *by A. B. Gutman and T. F. Yü*

CLINICAL ASPECTS OF GANGLIONIC AND ADRENERGIC BLOCKING AGENTS, *by*  
*R. H. Lyons and V. L. Love*

ASPECTS OF THE INFLUENZA PROBLEM, *by* *J. Mulder*

EXPERIENCES WITH ADRENOCORTICOTROPIC HORMONE (ACTH) AND CORTI-  
sone, *by* *C. Ragan*

ABNORMAL PROTEINS IN MYELOMA, *by* *J. Waldenström*

## VOLUME VI

UROPEPSIN, *by* *D. C. Balfour, Jr.*

GLUCAGON, THE HYPERGLYCEMIC-GLYCOGENOLYTIC HORMONE OF THE PAN-  
CREAS, *by* *P. P. Fodà*

DIAGNOSIS OF CANCER OF INTERNAL ORGANS BY PAPANICOLAOU TECHNIC, *by*  
*R. M. Graham*

SPATIAL VECTORCARDIOGRAPHY, *by* *A. Grishman*

THE L.E. CELL PHENOMENON, *by* *M. M. Hargraves*

BIOPSY STUDIES OF THE LIVER AND KIDNEY, *by* *P. Iversen, M. Bjørneboe, and*  
*N. B. Krarup*

THROMBOTIC THROMBOCYTOPENIC PURPURA, *by* *K. Singer*

PORPHYRIA, *by* *C. J. Watson*

DIAPHRAGMATIC HERNIA, *by* *S. Weintraub*

THE DETERMINATION OF INSULIN IN BLOOD, *by* *A. F. Willebrands and J. Groen*

## VOLUME VII

PATHOGENESIS AND TREATMENT OF RENAL LITHIASIS, *by* *A. J. Butt*

HEPATIC COMA, *by* *C. S. Davidson*

THE PATHOPHYSIOLOGY OF THE PANCREAS, *by* *D. A. Dreiling and H. D.*  
*JANOWITZ*

CLINICAL SIGNIFICANCE OF SERUM MUCOPROTEINS, *by* *E. M. Greenspan*

ADVANCES IN PHYSIOLOGY OF CLINICAL DISORDERS OF THE ADRENAL CORTEX,  
*by* *J. W. Jailer*

DISEASES OF THE PERICARDIUM, *by* *V. A. McKusick and A. McGehee Harvey*

THE NEPHROTIC SYNDROME, *by* *J. B. Squire*

APPLIED PULMONARY PHYSIOLOGY, *by* *D. J. Stone*
