PREFACE

The proposal to publish an Atlas of Tumor Pathology was initiated in 1947 and now, twenty years later, publication is completed with the appearance of this Index. The Atlas comprises the contributions of 46 authors assembled in 39 fascicles and a total of some 6,626 pages supplemented by 186 pages of index.

A review of the early records indicates that Milton C. Winternitz was the first to articulate the need for an Atlas and, in conversations with Raymond O. Dart in June 1947, to suggest that the Armed Forces Institute of Pathology (at that time known as the Army Institute of Pathology) should consider this as an extension of the educational function of the American Registry of Pathology. Following favorable discussions at the 4th International Congress for Cancer Research at St. Louis in September, 1947, the proposal was endorsed by a conference of specialists convened in Washington and by the Committee on Pathology of the National Research Council.

The first fascicle of the Atlas, published in 1949, was accompanied by a Foreword, signed by the Surgeons General of the Army, Navy, and Air Force, the Surgeon General of the Public Health Service, the Medical Director of the Veterans Administration, the Scientific Director of the American Cancer Society, and the Chairman of the Division of Medical Sciences, National Research Council. This formally affirmed the fact that the publication of the Atlas was a cooperative enterprise of the major medical agencies of government, the community of academic medicine, and the general public acting through the American Cancer Society.

The Foreword was followed by an Introduction outlining the origins, purpose, prospective design, operative plan, and the general division of labor in the conduct of the enterprise. The National Research Council accepted responsibility for solicitation and administration of funds and for the establishment of a Subcommittee on Oncology of the Committee on Pathology to design the format of the Atlas, to select contributors, and to provide editorial and bibliographic supervision through an editorial office. The Armed Forces Institute of Pathology provided space for the editorial office, the use of its presses for printing the fascicles, and the expert services of the staff of its Medical Illustration Service in maintaining the highest possible quality of the illustrations.

The authors, the members of the Subcommittee, and many consultants have made their individual contributions without compensation. The Director and the Staff of the Institute have provided the services indi-

cated above without cost to the project, and the expenses of the editorial office have been met from funds generously provided by a number of sponsors. As a result it has been possible to price each fascicle at the bare cost of printing of proofs by the Government Printing Office and distribution of the fascicles. This low price coupled with the sustained high quality of successive volumes have together created a much larger demand than had been anticipated, with the result that it has been necessary to raise the numbers of copies printed from 5,000 to 10,000 and then to 15,000. It is particularly satisfying to record that about one third of the published volumes have gone to subscribers from countries outside of North America. Thus an enterprise of pathologists of the United States has won international acclaim.

The names of the organizations that have contributed so generously to the support of the publication of the Atlas and of the principals who have, over the years, worked so effectively together to maintain the quality of the text and the illustrations are listed on the page following this Preface. The names of the authors and of their reviewers and collaborators will be found in the individual fascicles.

The period covered by the publication of the Atlas has been one of intense research activity in oncology. Much new knowledge has accrued and the need for extensive revision of most of the fascicles has become increasingly evident. Plans for the publication of a new series are already well underway. They are being developed under the auspices of a recently constituted consortium known as Universities Associated for Research and Education in Pathology, Incorporated. This organization assumed the former responsibilities of the National Research Council for the Atlas on January 1, 1966, and is developing its program with great zest and imagination.

The National Research Council is deeply indebted to all those who labored so long and so unselfishly in the production of the first edition, and is gratified that this important work will be carried on by capable hands. We wish to acknowledge the conscientious effort and comprehensive coverage of this index prepared by Mrs. Anne Cutler of The Williams & Wilkins Company.

R. Keith Cannan
Chairman, Division of Medical Sciences
National Academy of Sciences
National Research Council

Individuals and Organizations Responsible for Preparation of the First Series

I. *Financial Sponsors*

American Cancer Society
Anna Fuller Fund
Armed Forces Institute of Pathology
Jane Coffin Childs Memorial Fund for Medical Research
National Cancer Institute, U. S. Public Health Service
United States Veterans Administration

II. *Directors, Armed Forces Institute of Pathology*

Brigadier General Raymond O. Dart, 1947-50
Brigadier General Elbert De Coursey, 1950-55
Captain William M. Silliphant, 1955-59
Colonel Frank M. Townsend, 1959-63
Major General Joe M. Blumberg, 1963-67

III. *Scientific Directors, American Registry of Pathology*

Colonel J. Earle Ash, 1947-49
Dr. Hugh G. Grady, 1949-57
Dr. F. K. Mostofi, 1957-59
Colonel Joe M. Blumberg, 1959-63
Captain Bruce H. Smith, 1963-66
Colonel Claude K. Leeper, 1966-67
Captain Robert M. Drake, 1967-present

IV. *Chiefs, Medical Illustration Service, AFIP*

Dr. Edward M. Gunn, 1947-52
Roy M. Reeve, 1952-53
Herman Van Cott, 1953-63
Morris M. Goldberg, 1963-present

V. *Chairmen, Division of Medical Sciences, NAS-NRC*

Dr. Lewis H. Weed, 1947-50
Dr. Milton C. Winternitz, 1950-53
Dr. R. Keith Cannan, 1953-65

VI. *Chairmen, Committee on Pathology*

Dr. Howard T. Karsner, 1947-57
Dr. Averill A. Liebow, 1957-62
Dr. Robert W. Wissler, 1962-65

VII. *Subcommittee on Oncology*

Dr. Shields Warren, 1947-52 (Chairman, 1947-51)
Dr. Balduin Lucké, 1947-54 (Chairman, 1951-54)
Dr. Fred W. Stewart, 1947-65
Dr. Harold L. Stewart, 1947-65
Dr. Arthur Purdy Stout, 1947-65 (Chairman, 1954-65)
Dr. Milton C. Winternitz, 1948-50
Dr. Paul E. Steiner, 1951-65
Dr. Lauren V. Ackerman, 1954-65

VIII. *Editors*

Dr. Isabella H. Perry, Editor, 1948-51
Dr. Lucia J. Dunham, Assistant Editor, 1950-51
Dr. Mary Ruth Oldt, Editor, 1950-55
Dr. May Sherman, Assistant Editor, 1951-54
Dr. Helen M. Scoville, Editor, 1955-58
Dr. Catherine W. Blumberg, Editor, 1958-65
Dr. Edwin B. Coyl, Editor, 1965-66
Dr. Harlan I. Firminger, Editor, 1966-67

LIST OF CONTRIBUTORS

The Director and Staff of the Armed Forces Institute of Pathology wish to take this opportunity to express their appreciation to the following individuals and groups for their interest in the American Registry of Pathology as expressed by their generous contributions for the purpose of completing the remaining unpublished Fascicles of the Atlas of Tumor Pathology. Sufficient funds were received early in 1966 to retain the skilled editorial staff for the continuation of the fascicle program until grant funds became available. These donations, as are all donations to the American Registry of Pathology, are tax deductible:

ORGANIZATION AND FORMAT OF INDEX

The *Subject Index* has as major entries both the anatomical sites and the types of lesions, but the most detailed information will be found under the sites.

Listed as subentries under *sites* are all of the diseases, with sub-subentries for histological variants.

Under the site, also, are all synonyms and related terms, with parenthetical cross-references to the terms preferred by the authors, with the fascicle and page number where such synonyms or related terms are listed.

Under the major entries for *disease*, the subentries indicate the anatomical sites where more detailed information and more complete pagination are to be found. These disease titles are listed alphabetically by type of tumor, by eponymic name, and, where necessary, by histological description. Disease entities that occur (and are discussed) so extensively as to make duplicate indexing impractical are given as major entries, but with the cross-reference, "see site." Disease entities that are discussed predominantly under one site are cross-referenced to that specific site with additional subentries to other minor sites.

Illustrations have been indexed in full, according to

the information in the figure legends. In general, however, no major entries have been supplied for specific names of bones or muscles, or for specific locations of skin diseases. Instead, these illustrations are listed under the titles for the appropriate organ or tissue, and also under the general titles, HEAD AND NECK, TRUNK, and EXTREMITIES.

The names of the *authors* of the fascicles, together with the titles thereof, are listed in the Subject Index.

A separate *Reference Index* is provided and contains an alphabetical listing of each senior author cited as a bibliographic reference in the Fascicles, showing the pages where he is cited in the text and the pages where he is listed as a reference. Included in this Reference Index are also the names of persons who have contributed case material and illustrations.

The *format* of the indexes is the following: Major entries are printed in capital and small capital letters. Subentries are printed in lower-case letters. Fascicle numbers are printed in boldface type followed by a colon, text pages are in lightface roman; and illustrations are indicated by italicized page numbers. A semicolon is used to separate fascicles. Inclusive pages are given throughout.

SUBJECT INDEX

A

ABDOMEN

intraabdominal tumors (see specific organ; also **SOFT TISSUES; BONE AND CARTILAGE; BLOOD VESSELS; HEMATOPOIETIC SYSTEM**)

skin tumors (see **SKIN; TRUNK**)

ABDOMINAL WALL

fibrosarcoma, 5: 68

myositis ossificans, 4: 336, 339

ABRIKOSOFF'S TUMOR, 5: 39

ABSCCESS, BONE, 4: 84

ABT-LETTERER-SIWE DISEASE, 8: 63

ACANTHOMA

oral cavity, 10b: 13, 155, 271

skin (see **SKIN**)

subepidermal, 2: 246

ACANTHOMA ADENOIDES CYSTICUM, 2: 77

ACANTHOSIS

skin (see **SKIN**)

upper respiratory tract, 12: 17-18

ACANTHOSIS NIGRICANS

adult, malignant, 2: 58-59

juvenile, 2: 58, 62

ACANTHOSIS VERRUCOSA SEBORRHEICA, 2: 40

ACINIC CELL ADENOCARCINOMA, 11: 120-128

ACKERMAN, L. V.: Tumors of the retroperitoneum, mesentery, and peritoneum, 24: 1-135

ACKERMAN, L. V., AND SPJUT, H. J.: Tumors of bone and cartilage, 4: 1-347

ACOUSTIC NERVE TUMOR (see also **NEURILEMOMA**), 6: 15; 10b: 34; 13: 245

ACROMEGALY (see **PITUITARY GLAND AND INFUNDIBULUM**)

ACTINIC TUMORS (see **SKIN**)

ACTINOMYCOSIS, oral, 10b: 80

ADAMANTINE TISSUES (see **ODONTOGENIC APPARATUS AND JAWS; BONE AND CARTILAGE**)

ADAMANTINOMA (see also **AMELOBLASTOMA**)

bone, 4: 252-253, 254-260

odontogenic apparatus, 10a: 25-32

pituitary, 36: 58, 60, 66-74

ADAMANTOBLASTOMA, 10a: 25

ADDISON'S DISEASE, 29: 60

ADENOACANTHOMA (see also **adenocarcinoma**, under specific site)

anus, 22: 211

cervix, 33(II): 143

endometrium, 33(II): 186

esophagus, 20: 72-76, 74, 77

large intestine, 22: 188-189

ovary, 33(III): 114

palates, 10b: 162

small intestine, 22: 62

urinary bladder, 31: 52

ADENOAMELOBLASTOMA, 10a: 33, 40-42

ADENOCARCINOID, 22: 188

ADENOCARCINOMA (see site)

ADENOCHONDROMA (see also **SALIVARY GLANDS, MAJOR; MIXED TUMORS**)

bronchi and lungs, 17: 139

skin, 5: 60, 61

ADENOCYSTOMA

papillary, thyroid, 14: 36

teratoid, mediastinal, 18: 49

ADENOCYSTOSARCOMA, breast, 34: 68

ADENOENDOTHELIOMA, pleural, 17: 176

ADENOFIBROLIPOCHONDROMYXOMA, bronchi and lungs, 17: 139

ADENOFIBROMA

breast, 34: 105

extrahepatic bile ducts, 26: 91

intraduodenal bile duct, 26: 130

ovary, 33(III): 77

testicular appendages, 32: 127

ADENOFIBROMYOMA

fallopian tube, 33(III): 164

testicular appendages, 32: 127

ADENOFIBROSIS

breast, 34: 88

ADENOID CYSTIC CARCINOMA

breast, 34: 12, 58, 60

lacrimal gland, 38: 179, 182-186

upper respiratory tract, 12: 151, 160-161, 168, 172

ADENOKANKROID, 22: 188

ADENOLYMPHOMA, 11: 129, 137, 145

ADENOMA (see site or histological variant)

ADENOMA HYDROADENOIDES, 2: 99

ADENOMA LYMPHOMATOSUM, 11: 145

ADENOMA PSEUDOSARCOMATODES, 34: 68

ADENOMA TUBULARE CARCINOMATOSUM, 33(III): 33

ADENOMA TUBULARE TESTICULARE OVARII, 33(III): 33

ADENOMATOID TUMORS (see specific site or tumor)

ADENOMATOSIS (see site)

ADENOMATOUS TUMORS (see site)

ADENOMETRITIS, 33(II): 224

ADENOMYOCARCINOMA, endometrium, 33(II): 180, 207

ADENOMYOEPITHELIOMA

oral cavity, 10b: 157

upper respiratory tract, 12: 160

ADENOMYOHYPERPLASIA, fallopian tube, 33(III): 154

ADENOMYOMA

extrahepatic bile ducts, 26: 91

fallopian tube, 33(III): 164

gallbladder, 26: 14

pancreas, 27: 11

testicular appendages, 32: 127

uterus, 33(II): 224

vagina, 33(II): 64

ADENOMYOMATOSIS, uterus, 33(II): 224

ADENOMYOMATOUS HYPERPLASIA, gallbladder, 26: 14-15, 16-18

ADENOMYOSALPINGITIS, 33(III): 154

ADENOMYOSARCOMA, renal, 30: 78

Subject Index

ADENOMYOSIS

- fallopian tube, 33(III): 154
- uterus, 33(II): 224-230, 226-228, 256
- vagina, 33(II): 64

ADENOMYOSITIS, uterus, 33(II): 224

ADENOMYXOCHONDROSARCOMA, 5: 60

ADENOMYXOMA, breast, 34: 68

ADENOPAPILLOCYSTOMA, ovary, 33(III): 77

ADENOPAPILLOMA, small intestine, 22: 23

ADENOSALPINGITIS, 33(III): 154

ADENOSARCOMA

- breast, 34: 59, 68
- esophagus, 20: 87
- immature renal parenchyma, 30: 78
- urinary bladder, 31: 58, 70

ADENOSIS

- breast, 34: 88-99, 90-96
- vagina, 33(II): 56-57

ADENOSIS SCLEROTISANS MAMMAE, 34: 88

ADENOSQUAMOUS CELL CARCINOMA (see GALLBLADDER)

ADENOSUM FIBROSUM MAMMAE, 34: 105

ADRENAL GLANDS, 29: 1-60

- accessory adrenal (see also cortical nodule), 29: 6
- Addison's disease, 29: 60
- adenocarcinoma, metastatic, 29: 57-58
- adenoma
 - benign (see also cortical nodule), 29: 6
 - cortical (see also cortical nodule), 29: 6, 7, 12, 13-18, 16, 21, 23-26
 - adrenogenital syndrome associated with, 29: 13
 - and cortical nodule, differential diagnosis, 29: 7
 - hormonal phenomena associated with, 29: 13-16
 - with macrogenitosomia precox, 29: 21
 - medullary (see also pheochromocytoma), 6: 46; 18: 32; 29: 41
- adenoma substantiae corticalis suprarenalis (see also adenoma, cortical), 29: 13
- adrenal rest (see also cortical nodule), 29: 6
- adrenal-medullary syndrome, associated with pheochromocytoma, 29: 41
- adrenal-sympathetic syndrome, associated with pheochromocytoma, 29: 41
- adrenogenital syndrome, associated with cortical adenoma, 29: 13
- black tumor (see also melanoma), 29: 55
- bone, developmental disturbances of, associated with adrenal gland dysfunction, 29: 14
- bone marrow
 - ectopic (see also myelolipoma), 29: 6, 7
 - metaplastic (see also myelolipoma), 29: 7
- carcinoma
 - anaplastic, 29: 5
 - and adenoma, differential diagnosis, 29: 17
 - cortical, 24: 28; 29: 18-20, 18, 21-26
 - in retroperitoneum, 24: 13; 28, 27: 145
 - kidney displacement by, 29: 23
 - with hypoglycemia, 27: 145
 - with macrogenitosomia precox, 29: 21-22
 - metastasis, bilateral, 29: 54
 - metastatic, 25: 76; 29: 59
 - from liver, 25: 76
 - from lung, 17: 92

ADRENAL GLANDS—continued

- choristoma, 29: 6
- chromaffin cell tumor (see also pheochromocytoma), 29: 41
- chromaffinoblastoma (see also pheochromoblastoma), 29: 46
- chromaffinoma (see also pheochromocytoma), 29: 41
 - malignant (see also pheochromoblastoma), 29: 46
- chromatophoroma (see also melanoma), 29: 55
- chromophile tumor (see also pheochromocytoma), 29: 41
- cortical dysfunction, clinical features, 29: 13-16
- cortical functions, 29: 16
- cortical nodule, 29: 6, 9-12
- cortical tumor, 29: 13-19
 - carcinomatous, with "infant Hercules" musculature, 29: 12
 - functioning (see also adenoma, cortical), 29: 13
- Cushing's syndrome, adrenal dysfunction and, 29: 15
- cystic medullary struma (see struma, cystic medullary)
- cysts, 29: 5
- dysfunction, acne associated with, 29: 14
- ectopic adrenal (see also cortical nodule), 29: 6
- ectopic bone marrow (see bone marrow, ectopic)
- Esser-Herwig disease, 29: 28
- Esser-Herwig type sympathicogonioma (see sympathicogonioma, Esser-Herwig type)
- fibroma, 29: 5
- fibrosarcoma, 29: 5
 - with hypoglycemia, 27: 145
- gangliocytoma (see also ganglioneuroma, malignant), 29: 31
- gangliocytoneuroma, 29: 30
- ganglioma, 29: 30
- ganglion cell tumor, 29: 30
- ganglioneuroblastoma (see also ganglioneuroma, malignant), 29: 30, 31
- ganglioneuroblastoma immaturum (Fischer), 29: 31
- ganglioneuroblastoma sympathicum, 29: 30
- ganglioneuroma, 29: 27, 30-32, 39
 - diffuse type, 29: 31
 - discrete type, 29: 31
 - immature, 29: 31
 - malignant, 29: 31-32, 39-40
 - metastasizing, 29: 31
 - partly differentiated, 29: 31
- ganglioneuroma imperfectum (Fischer), 29: 31
- ganglioneuroma malignum (see ganglioneuroma, malignant)
- ganglioneuroma simplex, 29: 30
- ganglioneuroma telangiectaticum cysticum, 29: 30
- ganglioneurosarcoma (see also ganglioneuroma, malignant), 29: 31
- gangliosympathicoblastoma (see also sympathicoblastoma; ganglioneuroma, malignant), 29: 30, 31
- granular cell tumor, cortical (see also adenoma, cortical), 29: 13
- hamartoma, 29: 6

ADRENAL GLANDS—*continued*

- hemangioblastoma, 29: 5
- hemangioma, 29: 5, 6
- hemangiosarcoma, 8: 368
- heterotopic hematopoietic tissues, tumors of, 29: 60
- Hodgkin's disease, 29: 60
- hormonal functions, 29: 16
- hormonal phenomena associated with cortical adenoma, 29: 13-16
- Hutchison type sympathicogonioma (see sympathicogonioma, Hutchison type)
- hypernephroma, adrenal (see also adenoma, cortical), 29: 13
- "infant Hercules" musculature, associated with carcinomatous cortical tumor, 29: 12, 14
- leukemia, lymphoid, 29: 60
- lipoma, 29: 5
- lymphangioma, 29: 5, 6
- lymphoma, metastatic, 29: 60
- lymphosarcoma, metastatic, 29: 60
- macrogonitosomia precox, 29: 21-23
- Marchand nodule (see also cortical nodule), 29: 6
- medullary tumors, 29: 27-54
 - functioning, 18: 32
- melanoblastoma (see also melanoma), 29: 55
- melanocarcinoma (see also melanoma), 29: 55
- melanocytoblastoma (see also melanoma), 29: 55
- melanoepithelioma (see also melanoma), 29: 55
- melanoma, 29: 55-56
 - metastatic, 29: 57, 60
 - primary, 29: 56
- melanosarcoma (see also melanoma), 29: 55
- metabolic changes, associated with adrenal dysfunction, 29: 15
- myelolipoma, 29: 6, 7-8, 11
- myoma, 29: 5
- myxosarcoma, 29: 5
- neuroblastoma (see also sympathicoblastoma), 29: 27, 30
 - and embryonal sympathetic ganglia, comparison, 29: 37
 - metastasis to liver, 25: 181
- neurocytoma (see also sympathicoblastoma), 29: 30
- neurofibroma, 29: 5
- neurofibroma ganglionare (see also ganglioneuroma), 29: 30
- neuroganglioma myelinicum verum (see also ganglioneuroma), 29: 30
- neuroma
 - ganglionic (see also ganglioneuroma), 29: 30
 - sympathetic (see also ganglioneuroma, malignant), 29: 31
- neuroma gangliocellulare (see also ganglioneuroma), 29: 30
 - myelinated, 29: 30
- neuroma gangliocellulare amyelinicum, 29: 30
- neuroma gangliocellulare benignum, 29: 30
- neuroma gangliocellulare malignum, 29: 31
- neuroma verum amyelinicum gangliosum, 29: 30
- neuroma verum gangliosum amyelinicum, 29: 30
- neurosarcoma (see also sympathicoblastoma), 29: 30
- nevocarcinoma (see also melanoma), 29: 55

ADRENAL GLANDS—*continued*

- nodule, cortical (see cortical nodule)
- noduli substantiae corticalis suprarenalis (see also cortical nodule), 29: 6
- osteoma, 29: 5
- paraganglioma (see also pheochromocytoma), 29: 41
- Pepper type sympathicogonioma (see sympathicogonioma, Pepper type)
- pheochromoblastoma, 29: 27, 46-47, 52
- pheochromocytoma, 29: 27, 41-46, 44, 49-53
 - and adenoma, differential diagnosis, 29: 17
 - benign, 29: 42
 - malignant (see also pheochromoblastoma), 29: 42, 46
 - pulse and blood pressure in (chart), 29: 49
 - vascular, 29: 52
- progonoma, 29: 6
- pseudocyst, 29: 5
- pseudohermaphroditism, female, 29: 13
- sarcoma (see also sympathicoblastoma), 29: 30
 - giant cell, 29: 5
 - reticulum cell, metastatic, 29: 60
 - round cell (see also sympathicoblastoma), 29: 5, 30
 - spindle cell, 29: 5
 - metastatic, 29: 58
- secondary tumors, 29: 59-60
- sexual disturbances, 29: 13-14
- struma, cystic medullary (see also pheochromocytoma), 6: 46; 18: 32; 29: 41
- struma suprarenalis (see also cortical nodule), 29: 6, 11
- sympathicoblastoma (see also NERVOUS SYSTEM, PERIPHERAL), 6: 10, 31, 38, 41-43; 29: 27-30, 31, 40
- sympathicocytoma (see also sympathicogonioma; ganglioneuroma), 29: 27, 30
- sympathicogonioma, 29: 5, 27-30, 34-38
 - Esser-Herwig type, 29: 28
 - Hutchison type, 29: 28
 - Pepper type, 29: 28
 - metastatic, 29: 60
 - to cranium, 29: 34-35
- sympathicogonioma purum, 29: 27, 29
- sympathicogonioma tenuifibrillare, 29: 27, 29
- sympathoblastoma (see sympathicoblastoma)
- sympathogonioma (see sympathicogonioma)
- sympathoma (see also sympathicoblastoma), 29: 30
- sympathoma embryonale (see also sympathicoblastoma), 29: 30
- tumor-like lesions, 29: 6
- ADRENAL REST, 29: 6
 - in kidney, 30: 22-23
 - in mesosalpinx, 33(III): 126
- ADRENAL REST CARCINOMA, liver, 25: 105
- ADRENAL REST TUMOR
 - liver, 25: 28-29, 30, 105
 - ovary, 33(III): 121-123, 126
- ADRENAL-MEDULLARY SYNDROME, 29: 41
- ADRENAL-SYMPATHETIC SYNDROME, 29: 41
- "AFRICAN" LYMPHOMA (see LYMPHOMA, BURKITT'S)
- ALBRIGHT'S SYNDROME, 3: 28

Subject Index

 ANGIOMYOLIPOMATOUS TUMORS, genitourinary organs,
 31: 61
 ANGIOMYOMA
 fallopian tube, 33(III): 164
 kidney, 30: 133, 138
 ANGIOMYOMATOUS TUMORS, urinary bladder, 31: 61
 ANGIOMYONEUROMA, 18: 43
 ANGIOMYOSARCOMA, breast, 34: 75
 ANGIONEUROFIBROMA, 6: 15
 mediastinum, 18: 12
 tongue, 10b: 34
 ANGIONEUROMA, 5: 47; 18: 43
 ANGIONEUROMYOMA, 5: 47; 18: 43
 ANGIORETICULOMA, 38: 141
 ANGIORETICULOXANTHOMA, 38: 141
 ANGIOSARCOMA, 5: 101; 7: 101-103; 104-110, 114
 adrenal cortex, 29: 18
 bone, 4: 236, 242-244
 breast, 34: 68, 75, 78-80
 colon, 7: 120
 heart, 7: 25
 hematopoietic tissues, 8: 360
 intestinal tract, 22: 116-117
 lesions confused with, 7: 114-115, 120-122
 liver, 7: 106-108; 25: 116
 lung, 7: 108, 120
 perithelial, 5: 101
 pulmonary vessel, 7: 108
 retroperitoneum, 24: 29
 thigh, 7: 104, 110
 upper respiratory tract, 12: 140, 148
 ANGIOSARCOMA CAROTICUM, 16: 14
 ANGIOSARCOMA MULTIPLEX, 5: 106
 ANGIOSARCOMATOSIS, 5: 99-106
 hematopoietic tissues, 8: 360
 ANGIOSEBACEOPHAKOMA CUTIS FACIEI, 2: 132
 ANIMAL TUMORS (see also TRANSPLANTABLE AND
 TRANSMISSIBLE TUMORS OF ANIMALS)
 actinic tumor of skin, experimental production, 2:
 155
 adenoma, chromophobe, experimental production,
 36: 12
 carcinoma
 prostate, 32: 12-13
 skin, tar-induced, experimental, 2: 191
 fibrosarcoma, esophageal, in dog, 20: 83
 interstitial cell tumor, testicular, 32: 114
 jaagsiekte, of sheep, and bronchiolar carcinoma, sim-
 ilarity, 17: 54
 melanocytoma
 dermal, 3: 104
 epidermal, malignant, 3: 9
 melanoma, malignant, skin, 3: 9
 mesothelioma, peritoneal, in cow, 24: 102-104
 nephroblastoma, 30: 81
 neurilemoma, in pancreas of cow, 27: 35
 pituitary tumors, experimental production, 36: 11-12
 roentgen ray tumors, experimental, 2: 177-178

ANIMAL TUMORS—*continued*

- sarcoma
 - in irradiated bone of rat's extremity, 4: 144
 - osteogenic, in esophagus of dog, 20: 83
- Sertoli cell tumor, in dog testis, 32: 104
- teratoma
 - avian, 9: 12
 - testicular, in horse, 9: 14, 40

ANLAGE TUMOR

- bronchial, 17: 26
- retinal, 10a: 33
- salivary gland type, 2: 97

ANUS AND ANAL REGION (see also RECTUM; INTESTINE, LARGE), 22: 199-226

- adenocanthoma (see also adenocarcinoma), 22: 211
- adenocarcinoma, 22: 211-217
 - atypical, 22: 211
- adenoma
 - apocrine glands, 22: 199
 - polypoid, 22: 130, 132, 142
 - sweat gland (see also adenoma, apocrine glands), 22: 199
- adnexal cutaneous tumor (see also adenoma, apocrine glands), 22: 199
- anal ducts, histological section, 22: 214, 218
- Bowenoid type carcinoma (see carcinoma, intraepidermal, Bowenoid type)
- carcinoma, 22: 200-226, 204-208, 212-214, 218-220, 224
 - anal duct (see also adenocarcinoma), 22: 211, 218-220
 - anal fistula, 22: 217
 - basal cell, 22: 214
 - and basaloid squamous cell, differentiation, 22: 210-211
 - with keratinization (see also carcinoma, basaloid squamous cell), 22: 203
 - basaloid small cell (see also carcinoma, basaloid squamous cell), 22: 203
 - basaloid squamous cell, 22: 203-211
 - basosquamous cell (see also carcinoma, basaloid squamous cell), 22: 203
 - epidermoid (see also carcinoma, squamous cell), 22: 202
 - epidermotropic, 22: 217, 222
 - intraepidermal, Bowenoid type, 22: 201-202
 - mucocoeptidermoid (see also adenocarcinoma), 22: 211
 - mucoid of anal fistula origin (see also adenocarcinoma), 22: 211, 217-218
 - multiple synchronous, 22: 226
 - preinvasive (see also carcinoma, intraepidermal, Bowenoid type), 22: 201
 - squamous cell, 22: 202-203, 204-208, 214
 - mucocutaneous junction, 2: 254
 - resembling basal cell carcinoma, 2: 254
 - transitional cell (see also carcinoma, squamous cell), 2: 254; 22: 202, 220
- carcinoma in situ (see also carcinoma, intraepidermal, Bowenoid type), 22: 201
- squamous cell, 22: 196, 208
- condyloma acuminatum, 22: 200
- cylindroma (see also adenocarcinoma), 22: 211

ANUS AND ANAL REGION—*continued*

- dermatosis
 - Pagetoid (see also carcinoma, epidermotropic), 22: 217
 - roentgen ray, chronic, 2: 184
- epithelial tumors, 22: 199-226
 - benign, 22: 199-200
 - malignant, 22: 200-226
- epithelioma
 - basal cell (see also carcinoma, basaloid squamous cell), 22: 203
 - basaloid squamous cell (see also carcinoma, basaloid squamous cell), 22: 203
- hidradenoma (see also adenoma, apocrine glands), 22: 199
- hidradenoma papilliferum (see also adenoma, apocrine glands), 22: 199
- hyperplasia
 - inflammatory, anorectal tonsil (see also hyperplasia, polypoid lymphomatous), 22: 92
 - polypoid lymphomatous, 22: 92-93, 94
- leiomyoma, 22: 111
- leiomyosarcoma, 22: 111
- lymphoma, malignant, 22: 101
- lymphosarcoma, 22: 101-110, 102-108, 112-114
- melanocarcinoma, 22: 222-226, 224
 - with adenocarcinoma of colon, 22: 224
- melanoma, malignant (see also melanocarcinoma), 22: 222
- nevocarcinoma (see also melanocarcinoma), 22: 222
- Paget's disease (see also carcinoma, epidermotropic), 22: 212, 217, 220, 222; 33(II): 24
- papilloma, 22: 199-200
- polyp
 - juvenile, 22: 149
 - lymphoid, 22: 94
- syringocystadenoma (see also adenoma, apocrine glands), 22: 199
- syringoma (see also adenoma, apocrine glands), 22: 199
- verruca, viral (see also condyloma acuminatum), 22: 200
- wart
 - anal (see also condyloma acuminatum), 22: 200
 - venereal (see also condyloma acuminatum), 22: 200

AORTA

- aneurysm, 18: 86
- carcinoma, embryonal, metastatic from testis, 32: 76
- rhabdomyosarcoma, 7: 38

AORTIC ARCH ANEURYSM, 18: 86

AORTIC BODY (see also CHEMORECEPTOR SYSTEM)

- anatomy, 16: 7-8, 12
- granular cell myoblastoma, 16: 32
- tumors of, 16: 14, 32, 34; 18: 32

APOCRINE SWEAT GLANDS, TUMORS OF (see SKIN)

APPENDIX VERMIFORMIS (see also INTESTINE, LARGE)

- adenocarcinoma, 22: 177, 190-192, 242
- appendicitis, and lymphosarcoma, relation, 22: 101
- carcinoid tumor, 22: 74, 75, 80, 88
- endocrine tumor (see also carcinoid tumor), 22: 73
- fibroplastic inflammation, 22: 246
- ganglioneuroma, 22: 57
