Explanations

1. Statistics contained in the present publication were prepared in conformity with the principle that the two political domains, the Empire of Manchoukuo and the Kwantung Leased Territory, form one united economic area, which will hereinafter be called the Manchurian Economic Area. This publication is, therefore, a book of economic statistics aiming at recording facts of trade activities taking place within the area delimited in accordance with the above-mentioned principle.
 2. Accordingly in the statistics concerning exports, the figures represent quantities and values of goods sent from within the Manchurian Economic Area to places outside of that Area.
 3. In the Import Statistics the same principle applies, and goods brought into the Manchurian Economic Area are accounted for as "Total" imports. At the same time, in order to make a distinction between the "Total" imports into the Manchurian Economic Area and imports into Manchoukuo only, the latter have been accounted for as "Net" imports. The "Net" imports naturally include goods brought into Manchoukuo from all places outside its political boundaries including the Kwantung Leased Territory.
 4. In the case of goods landed in bond, any entries into either the 2nd Class Bonded Warehouse or the Bonded Factories are accounted for as imports and are included in the figures thereof. Withdrawals for export from bonded warehouses and factories, in the condition of original entry, are accounted for as re-exports and are included in the figures thereof. However, when goods are exported from bond after having been processed, they are accounted for as exports and are included in the figures thereof.
 5. In the classifications by Countries, the statistics have been arranged in accordance with the following geographical sub-divisions:
 - (1) Japan:
Japan Proper; Taiwan (Formosa); Chosen (Korea);
 - (2) China:
North China, comprising the Provinces of Hopei, Shantung, Shansi, Sensi, and Kansu.
Central China, comprising the Provinces of Kiangsu, Chekiang, Anhui, Honan, Hupei, Hunan, Kiangsi, and Ssuehuan.
South China, comprising the Provinces of Fukien, Canton, Kuangsi, Kueichow, and Yunnan (Hongkong and Macao are excluded)
- N. B. (1) The following marks will be met with in the issue, reading:—
—, nil or quantities not permitting summing up,
O, too insignificant to be shown,
..., unascertainable.
- (2) Discrepancies may occur between the totals arrived at from the monthly figures and the Cumulative totals given at the last column of each returns, owing to the correction made in the monthly figures after the publication.

It is necessary to bear in mind—

- That prior to December 1937 each Collection under Export and Import Duties includes Surtax respectively.
- That each Collection also includes the Duties charged upon the Postal Parcels exported and imported, covering the whole periods.
- That the Bracketed figures show the sum of Duties actually received in Revenue Stamp beginning with December 1937.
