### Illustrations

### **PLATES**

| I    | 'Youth', by Kritios. About 480 B.C. frontisp              | iece |
|------|---|------|
| II   | X-ray diffraction picture of the myoglobin molecule.      |      |
|      | facing pag  | e 72 |
| Ш    | Model of the myoglobin molecule.                          | 72   |
| IV   | X-ray diffraction picture of haem.                        | 73   |
| V    | Asymmetrical units of haemoglobin compared with the       |      |
|      | entire myoglobin molecule.                                | 88   |
| VI   | Model of the haemoglobin molecule.                        | 88   |
| VII  | Electron-micrograph of a group of cilia.                  | 89   |
| VIII | Electron-micrograph of cilia cut in section.              | 89   |
| IX   | Electron-micrographs of a cilium cut at several different |      |
|      | levels.   | 112  |
| X    | Low power electron-micrograph of a section of skeletal    |      |
|      | muscle. following page                                    | 112  |
| XI   | More powerful electron-micrograph of a section of         |      |
|      | skeletal muscle.  | 112  |
| XII  | High power electron-micrograph of a section of skeletal   |      |
|      | muscle. facing page                                       | 113  |
| XIII | Very high power electron-micrograph of a section of       |      |
|      | skeletal muscle.  | 120  |
| XIV  | Electron-micrograph of collagen fibres.                   | 121  |
| XV   | Arrangement of collagen fibres in the cornea of a fish.   | 136  |
| XVI  | Arrangement of collagen fibres in the cornea of a tad-    |      |
|      | pole.   | 136  |
| XVII | Section through the head of a femur.                      | 137  |
| IIIV | Myelin.   | 137  |
| XIX  | Electron-micrograph of a cell from the intestine of a     |      |
|      | mouse.  | 138  |

| 24   | Information transfer in the living cell               | 101      |

### ILLUSTRATIONS

| 25 | The Portuguese Man-o'-War.                               | page 199 |
|----|--|----------|
| 26 | The structure of the human epidermis.                    | 203      |
| 27 | The growth of a hair.                                    | 204      |
| 28 | The air passages of a sheep's lung.                      | 213      |
| 29 | Section through a kidney.                                | 218      |
| 30 | Diagram of a nephric unit.                               | 219      |
| 31 | The function of the pituitary gland.                     | 223      |
| 32 | Nerve cells.   | 227      |
| 33 | Regeneration and memory in flatworms.                    | 239      |
|    | FIGURES  |          |
| 1  | Simple discharge tube.                                   | page 35  |
| 2  | Thomson's 'currant-bun' atom.                            | 37       |
| 3  | Rutherford's apparatus.                                  | 38       |
| 4  | Symbolic diagram of Bohr's atom.                         | 43       |
| 5  | Bohr's atom sliced in two.                               | 45       |
| 6  | Structure of a hydrogen atom.                            | 46       |
| 7  | Structure of a helium atom.                              | 47       |
| 8  | Structure of a lithium atom.                             | 48       |
| 9  | Structure of a sodium atom.                              | 49       |
| 10 | The reaction of sodium with chlorine.                    | 51       |
| 11 | Electronic configuration of the carbon tetrachloride     |          |
|    | molecule.  | 52       |
| 12 | The electronic orbit around a hydrogen molecule.         | 53       |
| 13 | Symbolic diagram of three amino-acids.                   | 64       |
| 14 | Diagram to show how amino-acids connect 'head-to-        |          |
|    | tail' to form a polypeptide.                             | 64       |
| 15 | Formation of a monopeptide.                              | 66       |
| 16 | Formation of a disaccharide.                             | 85       |
| 17 | Schematic diagram of a triglyceride.                     | 90       |
| 18 | Paramecium.  | 95       |
| 19 | The $\alpha$ - and $\beta$ - forms of a fibrous protein. | 97       |
| 20 | Diagrammatic cross-section of a cilium.                  | 98       |
| 21 | Segment of a flagellum.                                  | 98       |
| 22 | Diagram to show the order in which the internal          | l        |
|    | fibres of a flagellum might contract.                    | 99       |
| 23 | Diagrammatic cross-section of a cilium with the          |          |
|    | internal fibres numbered.                                | 102      |
| 24 | The biceps muscle and its attachments.                   | 106      |
| 25 | A small piece of skeletal muscle teased apart at its tip | 106      |
