## TABLE OF CONTENTS

### CHAPTER I - SUMMARY

|  |   |
|--|---|
| MONITORING METHODOLOGY . . . . .       | 1 |
| MONITORING METHODS AND COSTS . . . . . | 1 |
| DATA MANAGEMENT . . . . .              | 2 |
| MONITORING DISPOSAL WELLS . . . . .    | 2 |
| ILLUSTRATIVE EXAMPLES . . . . .        | 2 |
| SELECTED BIBLIOGRAPHY . . . . .        | 3 |

### CHAPTER II - GROUNDWATER MONITORING METHODOLOGY

#### Section 1 - Introduction . . . . . 5

|   |    |
|---|----|
| BACKGROUND AND SCOPE . . . . .          | 5  |
| PURPOSE AND APPROACH . . . . .          | 5  |
| Ambient Trend Monitoring . . . . .      | 6  |
| Source Monitoring . . . . .             | 6  |
| Case Preparation Monitoring . . . . .   | 6  |
| Research Monitoring . . . . .           | 6  |
| NEEDS AND OBJECTIVES . . . . .          | 6  |
| Economic Needs and Objectives . . . . . | 6  |
| EPA Needs and Objectives . . . . .      | 8  |
| Monitoring Objectives . . . . .         | 10 |
| CONSTRAINTS . . . . .                   | 11 |

#### Section 2 - Groundwater Quality . . . . . 13

|   |    |
|---|----|
| HYDROGEOLOGIC FRAMEWORK . . . . .               | 13 |
| Geologic Formations as Aquifers . . . . .       | 14 |
| Groundwater Movement . . . . .                  | 14 |
| Natural Chemical Quality . . . . .              | 15 |
| OCCURRENCE OF GROUNDWATER POLLUTION . . . . .   | 19 |
| Definition . . . . .                            | 19 |
| Distribution of Pollutants . . . . .            | 19 |
| Mechanisms of Pollution . . . . .               | 20 |
| Attenuation of Pollution . . . . .              | 28 |
| Distribution of Pollution Underground . . . . . | 29 |
| Evaluation of Pollution Potential . . . . .     | 32 |
| Trends in Groundwater Pollution . . . . .       | 34 |

|  |    |
|--|----|
| CONSTITUENTS IN POLLUTED GROUNDWATER . . . . .         | 34 |
| Quality Categories . . . . .                           | 34 |
| Effects of Water Use . . . . .                         | 34 |
| Agricultural Uses . . . . .                            | 35 |
| Industrial Uses . . . . .                              | 38 |
| Commercial Uses . . . . .                              | 39 |
| Domestic Uses . . . . .                                | 40 |
| SOURCES AND CAUSES OF POLLUTION . . . . .              | 42 |
| Agricultural Sources and Causes . . . . .              | 42 |
| Irrigation Return Flow . . . . .                       | 42 |
| Animal Wastes . . . . .                                | 43 |
| Fertilizers . . . . .                                  | 43 |
| Crop Residues and Dead Animals . . . . .               | 43 |
| Pesticide Residues . . . . .                           | 44 |
| Municipal and Industrial Sources and Causes . . . . .  | 44 |
| Surface Disposal of Solid Wastes . . . . .             | 44 |
| Surface Disposal of Liquid Wastes . . . . .            | 45 |
| Sewer Leakage . . . . .                                | 48 |
| Tank and Pipeline Leakage . . . . .                    | 48 |
| Disposal Wells . . . . .                               | 49 |
| Injection Wells . . . . .                              | 49 |
| Stockpiles . . . . .                                   | 50 |
| Mining Activities . . . . .                            | 50 |
| Oilfield Brines . . . . .                              | 51 |
| Groundwater Basin Management . . . . .                 | 51 |
| Saline Water Intrusion . . . . .                       | 51 |
| Aquifers Interchange Through Wells . . . . .           | 52 |
| Miscellaneous . . . . .                                | 54 |
| Spills and Surface Discharges . . . . .                | 54 |
| Septic Tanks and Cesspools . . . . .                   | 54 |
| Highway Deicing . . . . .                              | 55 |
| QUALITY IN RELATION TO WATER USE . . . . .             | 55 |
| Water Quality Standards . . . . .                      | 55 |
| Drinking Water . . . . .                               | 56 |
| Irrigation Water . . . . .                             | 58 |
| Livestock Water . . . . .                              | 58 |
| <b>Section 3 - Monitoring Methodology . . . . .</b>    |    |
| CONCEPT OF A MONITORING METHODOLOGY . . . . .          | 61 |
| Implementation of a Monitoring Methodology . . . . .   | 62 |
| Step 1 - Select Area or Basin for Monitoring . . . . . | 62 |
| Administrative Considerations . . . . .                | 62 |
| Physiographic Considerations . . . . .                 | 62 |
| Priority Considerations . . . . .                      | 63 |
| Example - Basin Boundary Area . . . . .                | 63 |

|  |     |
|--|-----|
| Step 2 - Identify Pollution Sources, Causes, and Methods<br>of Waste Disposal . . . . .    | 65  |
| Municipal . . . . .  | 65  |
| Agricultural . . . . .   | 67  |
| Industrial . . . . .   | 68  |
| Oilfield Wastes . . . . .  | 68  |
| Mining Wastes . . . . .  | 69  |
| Miscellaneous . . . . .  | 69  |
| Step 3 - Identify Potential Pollutants . . . . .   | 69  |
| Municipal . . . . .  | 72  |
| Agricultural . . . . .   | 73  |
| Industrial . . . . .   | 74  |
| Oilfield Wastes . . . . .  | 75  |
| Mining Wastes . . . . .  | 75  |
| Miscellaneous . . . . .  | 76  |
| Step 4 - Define Groundwater Usage . . . . .  | 76  |
| Municipal Use . . . . .  | 76  |
| Industrial Use . . . . .   | 76  |
| Agricultural Use . . . . .   | 77  |
| Rural Use . . . . .  | 77  |
| Step 5 - Define Hydrogeologic Situation . . . . .  | 78  |
| Step 6 - Study Existing Groundwater Quality . . . . .                                      |     |
| Step 7 - Evaluate Infiltration Potential of Wastes<br>at the Land Surface . . . . .        | 85  |
| Step 8 - Evaluate Mobility of Pollutants from the Land Surface<br>to Water Table . . . . . | 87  |
| Dilution . . . . .   | 88  |
| Filtration . . . . .   | 88  |
| Sorptions . . . . .  | 89  |
| Buffering . . . . .  | 90  |
| Chemical Precipitation . . . . .   | 90  |
| Oxidation and Reduction . . . . .  | 90  |
| Volatilization . . . . .   | 91  |
| Biologic Degradation and Assimilation . . . . .  | 91  |
| Radio Active Decay . . . . .   | 91  |
| Step 9 - Evaluate Attenuation of Pollutants in the Saturated Zone . . . . .                | 92  |
| Processes Other Than Dilution . . . . .  | 92  |
| Dilution and Related Factors . . . . .   | 92  |
| Step 10 - Prioritize Sources and Causes . . . . .  | 94  |
| Step 11 - Evaluate Existing Monitoring Programs . . . . .                                  | 96  |
| Step 12 - Establish Alternative Monitoring Approaches . . . . .                            | 97  |
| Selection of Portion of System to be Monitored . . . . .                                   | 98  |
| Selection of Nonsampling Methods . . . . .   | 98  |
| Determination of Required Analyses . . . . .   | 99  |
| Determination of Sampling Frequencies . . . . .  | 100 |
| Step 13 - Select and Implement the Monitoring Program . . . . .                            | 101 |
| Step 14 - Review and Interpret Monitoring Results . . . . .                                | 102 |
| Step 15 - Summarize and Transmit Monitoring Information . . . . .                          | 102 |
| SELECTED BIBLIOGRAPHY . . . . .  | 120 |

## CHAPTER III - GROUNDWATER MONITORING METHODS AND COSTS

|  |     |
|--|-----|
| Section 1 - Introduction . . . . .                   | 129 |
| PURPOSE . . . . .                                    | 129 |
| SCOPE . . . . .                                      | 129 |
| HYDROGEOLOGICAL FRAMEWORK . . . . .                  | 130 |
| GROUNDWATER MONITORING METHODS . . . . .             | 131 |
| TYPES OF COST . . . . .                              | 132 |
| Updating Cost Data . . . . .                         | 132 |
| Effects of Scale on Costs . . . . .                  | 135 |
| In-House Versus Out-of-House Costs . . . . .         | 135 |
| Accuracy and Costs . . . . .                         | 136 |
| Section 2 - Monitoring at the Land Surface . . . . . | 137 |
| INTRODUCTION . . . . .                               | 137 |
| NONSAMPLING METHODS . . . . .                        | 137 |
| Waste-Load Inventory . . . . .                       | 137 |
| Calculation of Leaching Potential . . . . .          | 137 |
| Pipeline and Tank Tests . . . . .                    | 138 |
| Testing Artificial Liners for Leakage . . . . .      | 139 |
| Aerial Surveillance . . . . .                        | 140 |
| Notification Procedures . . . . .                    | 141 |
| Emergency Procedures . . . . .                       | 147 |
| SAMPLING METHODS . . . . .                           | 149 |
| Surface Water Bodies . . . . .                       | 149 |
| Wastewater . . . . .                                 | 150 |
| Solid Wastes . . . . .                               | 151 |
| Section 3 - Monitoring in the Vadose Zone . . . . .  | 152 |
| INTRODUCTION . . . . .                               | 152 |
| Topsoil . . . . .                                    | 152 |
| Vadose Zone . . . . .                                | 152 |
| Monitoring Techniques . . . . .                      | 152 |
| Water Content . . . . .                              | 152 |
| Water Flow . . . . .                                 | 153 |
| Chemical Changes . . . . .                           | 153 |
| SOIL SAMPLING AND WELL DRILLING . . . . .            | 153 |
| Shallow Wells . . . . .                              | 154 |
| Deeper Wells . . . . .                               | 154 |

|   |     |
|---|-----|
| DETERMINATION OF WATER CONTENT . . . . .                          | 154 |
| Neutron Moderation or Moisture Logging . . . . .                  | 155 |
| Tensiometers . . . . .  | 159 |
| Electric Resistance Blocks . . . . .                              | 160 |
| Calculation of Water Content . . . . .                            | 160 |
| DETERMINATION OF WATER MOVEMENT . . . . .                         | 163 |
| Infiltration Across the Soil Surface . . . . .                    | 163 |
| Movement in Perched Water Tables . . . . .                        | 163 |
| Piezometers . . . . .   | 163 |
| Observation Wells . . . . .                                       | 164 |
| WATER MOVEMENT IN THE UNSATURATED STATE . . . . .                 | 164 |
| Tensiometers . . . . .  | 164 |
| Psychrometers . . . . .   | 165 |
| Neutron Moisture Logging . . . . .                                | 166 |
| Moisture Blocks . . . . .   | 166 |
| Quantification of Flux in Unsaturated Media . . . . .             | 166 |
| Relating Water Content Changes to Flux . . . . .                  | 166 |
| Expressions for Flux and Hydraulic Conductivity . . . . .         | 167 |
| Direct Measurement of Flux . . . . .                              | 167 |

## LIST OF ILLUSTRATIONS

| <u>Figure</u> |  | <u>Page</u> |
|---------------|--|-------------|
| 2-1           | Unconfined and confined aquifers (Todd, 1959) . . . . .  | 14          |
| 2-2           | Cumulative curves showing the frequency distribution of various constituents in potable water (modified after Davis and DeWiest, 1966) . . . . .   | 16          |
| 2-3           | A hypothetical drainage basin in a humid region in plan view the distribution of zones of polluted water in the upper part of the zone of saturation. Line AA' shows profile view across basin. At disposal sites 1 and 5 pollutants extend through zone of aeration and cause a polluted zone beneath the water table. Disposal sites 2, 3, 4, and 6 do not pollute the groundwater (modified after LeGrand, 1965b) . . . . . | 20          |
| 2-4           | Disposal of household wastes through a conventional septic tank system (modified after Miller et al, 1974) . . . . .   | 21          |
| 2-5           | Diagram showing percolation of pollutants from a disposal pit to a water table aquifer (modified after Deutsch, 1963). . . . .   | 22          |
| 2-6           | Diagram showing the horizontal movement of pollutants beneath a disposal pit as a result of clay lenses in the vadose zone above the water table. . . . .  | 22          |
| 2-7           | Illustration of a line source of groundwater pollution caused by a leaking sewer. The water table is situated below the sewer and is assumed to be horizontal. . . . .   | 23          |
| 2-8           | Diagram showing pollution of an aquifer by leaching of surface solids (modified after Deutsch, 1963) . . . . .   | 23          |
| 2-9           | Diagram showing how polluted water can be induced to flow from a surface stream to a well (modified after Deutsch, 1963) . . . . .   | 24          |
| 2-10          | Diagram showing floodwater entering a well through an improperly sealed gravel pack (modified after Deutsch, 1963) . . . . .   | 24          |
| 2-11          | Diagram showing movement of pollutants from a recharge well to a nearby pumping well (modified after Deutsch, 1963). . . . .   | 25          |
| 2-12          | Diagrams showing spread of pollutants injected through wells into water table and artesian aquifers (modified after Deutsch, 1963) . . . . .   | 26          |
