Unit 1 College Life

Leading In

Going to college is one of our great dreams, after having studied hard for many years, this dream comes true at last. Now you are a college student, happy and proud! But if you want to fully enjoy your college life and prepare yourself for a bright future, you have to plan your college life and make yourself cool at college!

First, please discuss and answer the following questions.

- 1. What are the differences between college life and high school life?*
- 2. What's your purpose of going to college?*
- 3. What's the college life you want?*
- 4. Do you think studying hard is the most important thing at college? Why?*

Text A

College Life

When you become a college student, it means you begin to lead another new life, and learn to support yourself. You need to be used to the new surroundings. You must try everything by yourself. You must learn to stand on your feet with no walking stick.

College is just like a small society. Living under the same sun, we need to be sociable. So it is necessary for us to communicate with others. Social communication is not easier to learn than other skills. If you can keep smiling, others will also be more ready to help you. Speaking also plays an important role in communication. “Handle them carefully, for words have more power than atom bombs,” said one wise man.

As a small society, college is of course full of competition. As a college student, you will face hunting for your job very soon. College students try to exercise before entering the big society. The purpose is to test both their knowledge and ability. When you see them working hard to get good academic scores and taking part in all sorts of activities to sharpen their ability, how can you stand in the same place? Some students even find some part-time jobs to practice themselves and get more and more social experiences.

What can we do? We must get more and more knowledge and learn techniques to deal with the new situation. “Time and tide wait for no man!” We must treasure every minute of our college life. If you want to be successful in the near future, you should get involved not only in school subjects but also in outside class activities.

College is a mountain of treasures. If you pay attention to your college life, you will pick up a lot of precious stones named knowledge, good sense, cooperative spirit and determination.

Fun Activities to Try during College

College is a unique experience filled with many great opportunities to try something new and expand your horizons. At this time in your life, new experiences are essential, both for personal growth and creating lifelong memories. Below, I have put together a list of 5 fun activities to try while you're a college student.

1. Attend a Midnight Movie Premiere Midnight movie premieres are definitely something you should experience at least once during your college career! A midnight movie premiere is a great chance to experience the excitement of a hot new film and a fun event to attend with friends.

2. Do a Charity Walk or Run If you've never done a charity walk or run, college is the perfect time! You can go individually, or get a team of friends to all go together. I personally think going in a group is more fun and you can work together for fundraising!

3. Join a Club Joining a club is a huge part of the college experience. As we talked about in our guide to getting involved on campus, there are hundreds of types of clubs to

join, and you can try as many as you want. (Just be sure not to over-extend yourself or take on too much!) Not only is joining a club fun and good for your resume, but it's also a great way to make new friends with similar interests. It's a win-win!

4. Volunteer Not only is volunteering extremely fulfilling and fun, it also teaches you to put others before yourself. You may not have as much time to volunteer once you graduate and get a 9-5, so college is the perfect time to make a difference. Volunteering is great because there are so many ways to do it. Bring friends or go alone! Spend a day or a weekend! You can find places to volunteer by either searching volunteer databases or through people and organizations you know.

5. Take a Road Trip Sometimes college can get stressful and tedious, so it's important that you take time to simply get away. Load up the car, make an awesome playlist, grab some of your closest friends, and drive! You don't have to go far if you don't have much time, but just spending a day traveling can be a great experience. Make sure to bring a camera and document it all!
