## Preface

The Editors take much pleasure in presenting the twenty-second volume of *Vitamins and Hormones*. This volume contains seven regular articles and twenty-nine articles which represent the communications delivered at an International Symposium on Vitamin B<sub>6</sub> held in New York City on July 23 and 24, 1964. This symposium was held in honor of Professor Paul György on the thirtieth anniversary of the discovery of Vitamin B<sub>6</sub>. This symposium is a sequel to those on Vitamin A and Vitamin E which were published in Volumes 18 and 20, respectively, of this series. It is especially gratifying to the Editors that publication of the proceedings of the Vitamin B<sub>6</sub> Symposium has been so rapid.

Of the regular articles, four are devoted entirely to hormones, two to vitamins, and one to both vitamins and hormones. Of the seven regular contributions to this volume one emanates from Sweden, three from the United Kingdom, and three from the United States.

The review articles in Volume 22 follow the pattern traditionally associated with *Vitamins and Hormones*. They are critical in content and personal in outlook. For the authors they represent a great investment both of effort and of time, for which the Editors are profoundly grateful.

October, 1964

ERRATA

Page 836, line 6, pyrodoxine should read: "pyridoxine"

Page 845, line 23,  $\mu\text{g}$  should read: "m $\mu\text{g}$ "

Page 847, line 28, delete: "catalyzed degradation of tryptophan to indole, pyruvic acid, and ammonia"

Page 854, line 8, *Univ. Texas Publ.* 4137, 22-26 should read *Univ. Texas Publ.* 4137, "24-26"

## Contents

CONTRIBUTORS TO VOLUME 22 . . . . .	v
PREFACE . . . . .	ix

### Biochemistry of Biotin

S. P. MISTRY AND K. DAKSHINAMURTI

I. Introduction . . . . .	1
II. Biogenesis of Biotin and Biotin Holoenzymes . . . . .	2
III. Tissue Distribution and Metabolism of Biotin . . . . .	4
IV. Structure and Specificity of Biotin . . . . .	6
V. Biotin Enzymes . . . . .	8
VI. Mechanism of Action of Enzyme-Bound Biotin . . . . .	13
VII. Indirect Effects of Biotin Deficiency . . . . .	20
References . . . . .	49

### The Biochemistry of the Inositol Lipids

J. N. HAWTHORNE

I. Introduction . . . . .	57
II. Chemical Structure . . . . .	58
III. Distribution of Inositol Lipids . . . . .	61
IV. Biosynthesis . . . . .	62
V. Enzymatic Hydrolysis of Phosphoinositides . . . . .	66
VI. Possible Physiological Roles of Phosphoinositides . . . . .	67
References . . . . .	77

### The Role of Organ Cultures in the Study of Vitamins and Hormones

HONOR B. FELL

I. Introduction . . . . .	81
II. Vitamins . . . . .	84
III. Hormones . . . . .	96
IV. Conclusion . . . . .	123
References . . . . .	124

**Therapy of Gynecological Disorders with Human Gonadotropin****CARL GEMZELL**

I. Introduction . . . . .	129
II. Human Chorionic Gonadotropin (HCG) . . . . .	130
III. Human Pituitary Gonadotropin (HPFSH) . . . . .	134
IV. Human Menopausal Gonadotropin (HMG) . . . . .	146
V. Concluding Remarks . . . . .	148
References . . . . .	149

**The Biochemistry of Progesterone****K. FOTHERBY**

I. Introduction . . . . .	153
II. Production and Metabolism of Progesterone . . . . .	154
III. Progesterone-Gonadotropin Interrelationships . . . . .	167
IV. Metabolic Effects of Progesterone . . . . .	176
V. Biochemical Effects of Progesterone on the Uterus . . . . .	181
VI. Effect of Progesterone on Enzyme Systems <i>in Vitro</i> . . . . .	193
VII. Concluding Remarks . . . . .	196
References . . . . .	197

**The Role of the Brain in the Regulation of Pituitary  
Gonadotropin Secretion****E. M. BOGDANOV**

I. Introduction . . . . .	206
II. Dependence of GTH Secretion on Hypothalamic Neurohumors . . . . .	206
III. Direct Evidence about Neurohumors Which Influence GTH Secretion . . . . .	210
IV. Gonadal Steroid Feedback . . . . .	216
V. The Role of the Brain in the Control of Ovulation . . . . .	234
VI. Summary . . . . .	251
References . . . . .	254

**Cellular and Molecular Aspects of the Antidiuretic Action of  
Vasopressins and Related Peptides****IRVING L. SCHWARTZ AND LINDA M. LIVINGSTON**

I. Introduction . . . . .	261
II. Nomenclature . . . . .	266

III. Assay and Standardization . . . . .	268
IV. Structure-Activity Relationships of the Neurohypophyseal Hormones . . . . .	270
V. Mechanism of Antidiuresis: Facts and Theories . . . . .	342
References . . . . .	349

## International Symposium on Vitamin B<sub>6</sub> in Honor of Professor Paul György

### The History of Vitamin B<sub>6</sub>. Introductory Remarks

PAUL GYÖRGY

Text . . . . .	361
References . . . . .	365

### Synthesis and Labeling of the Vitamin B<sub>6</sub> Group

J. M. OSBOND

I. Introduction . . . . .	367
II. Syntheses of Pyridoxine . . . . .	369
III. C <sup>14</sup> -Labeled Pyridoxine . . . . .	386
IV. Pyridoxine 5-Phosphate . . . . .	387
V. Pyridoxal . . . . .	388
VI. Pyridoxal 5-Phosphate (Codecarboxylase) . . . . .	389
VII. Pyridoxamine . . . . .	391
VIII. N <sup>15</sup> -Labeled Pyridoxamine . . . . .	392
IX. Pyridoxamine 5-Phosphate . . . . .	393
X. Summary . . . . .	393
References . . . . .	393

### Phosphorylase and Related Enzymes of Glycogen Metabolism

EDWIN G. KREBS AND EDMOND H. FISCHER

I. Introduction . . . . .	399
II. Pathways of Glycogenesis and Glycogenolysis . . . . .	400
III. Interconversion of the Two Forms of Glycogen Phosphorylase . . . . .	401
IV. The Structure and Properties of Glycogen Phosphorylase . . . . .	402
V. Vitamin B <sub>6</sub> Deficiency and Carbohydrate Metabolism . . . . .	405
VI. Muscle Phosphorylase as a Repository for Vitamin B <sub>6</sub> in the Animal . . . . .	407
References . . . . .	409

**Comparative Studies on Glutamic-Oxalacetic Transaminases from the Mitochondrial and Soluble Fractions of Mammalian Tissues**

HIROSHI WADA AND YOSHIMASA MORINO

I. Introduction . . . . .	411
II. Pyridoxamine Transaminase . . . . .	412
III. Identity of Pyridoxamine-Oxalacetic Transaminase with the Apoprotein of Glutamic-Oxalacetic Transaminase . . . . .	414
IV. Glutamic-Oxalacetic Transaminases from Mitochondrial and Soluble Fractions of Mammalian Tissues . . . . .	419
V. Concluding Remarks . . . . .	441
References . . . . .	443

**Amino Acid Decarboxylation Steps in the Biosynthesis of Norepinephrine, Serotonin, and Histamine**

SIDNEY UDENFRIEND

I. Introduction . . . . .	445
II. Norepinephrine . . . . .	445
III. Serotonin . . . . .	447
IV. Histamine . . . . .	448
V. Summary . . . . .	449
References . . . . .	449

**Binding and Reactions of the Vitamin B<sub>6</sub> Coenzyme in the Catalytic Center of Aspartate Transaminase**

ALEXANDER E. BRAUNSTEIN

I. Introduction . . . . .	451
II. The Linkage of Coenzyme and Apoenzyme in the Catalytic Center of Aspartate Transaminase . . . . .	452
III. Reactions of Substrates and Inhibitors with the Coenzyme in the Catalytic Center . . . . .	457
IV. Spectropolarimetric Investigation of Aspartate Transaminase . . . . .	468
V. Concluding Remarks . . . . .	479
References . . . . .	481
Addenda . . . . .	482

**Summary of Session I and Some Notes on the Metabolism of Vitamin B<sub>6</sub>**

ESMOND E. SNELL

I. Observations Relevant to the Preceding Papers . . . . .	485
II. Pyridoxal Kinase in Vitamin B <sub>6</sub> Metabolism . . . . .	490

III. Concluding Remarks . . . . .	493
References . . . . .	493

### Biochemical Pathology of Vitamin B<sub>6</sub> Deficiency

OSWALD WISS AND FRITZ WEBER

I. Introduction . . . . .	495
II. Activities of Pyridoxal Phosphate Enzymes in Progressive Vitamin B <sub>6</sub> Deficiency . . . . .	495
III. Metabolic Alterations in the Vitamin B <sub>6</sub> Deficiency State . . . . .	497
IV. Summary . . . . .	500
References . . . . .	500

### $\gamma$ -Aminobutyric Acid ( $\gamma$ ABA), Vitamin B<sub>6</sub>, and Neuronal Function—A Speculative Synthesis

EUGENE ROBERTS, JOHN WEIN, AND DAISY G. SIMONSEN

I. Introduction . . . . .	504
