Transportation

GEORGE RADNOTI

- Problem solving for administrative and operational challenges
- Return on investment: Make-money, save-money solutions for business and commercial airlines
- Fuel conservation techniques
- Performance case studies and simulations
- Aircraft Maintenance: burden, scheduling, and inventory
- Covers fractional, charter, regional, and commercial aviation operations

Profit Strategies for Air Transportation

Dr. George Radnoti is one of the most intelligent and learned persons I have met in the last forty years. I worked with George at Delta Air Lines in the early 60s and I was always impressed with his rapid grasp of almost any subject especially technical subjects. In addition, he was an enjoyable person with whom to work. I am sure the readers of this book will also be impressed.

HOLLIS L. HARRIS
CHAIRMAN AND CHIEF EXECUTIVE OFFICER
WORLD AIRWAYS, INC.

Acknowledgments

Forty-four years ago, when I entered the field of airline business, I searched for a book that would serve as a guide for airline operations and economics. This inspired me over these years to produce a book about the subject.

I was lucky to work for great companies in their growing stages, like Delta and American Airlines, way back in the 50s and 60s at the dawn of the jet-age. I had the opportunity to participate in their operations and to be exposed to their vast technical expertise and professionalism. The other significant factor that enabled me to write this book was that I frequently attended courses held for airline operations at Boeing Airplane Company. I am also thankful to Boeing for permitting the usage of some of their materials to be part of this book.

Similarly, I would like to express my thanks to the editors of McGraw-Hill for their dedication and professionalism that contributed to the perfection of this work. My special thanks go to Shelly Ingram Carr, Aviation Acquisition Editor, and Daina Penikas, Editing Supervisor, for their understanding and patience.

I am also in debt to Walt Overend, James Trebes* and Gerald Elikann who were my colleagues, for their encouragement and support.

I want to express my thanks to the 15-year-old, talented cartoonist, Laura Silverstein, for her illustrations in Chapters 10 and 11 (Figs. 10.5 and 11.12).

Finally, I am grateful to my best friend, confidante, and partner, my wife, who was my best critic with a no-nonsense approach. She participated in forging each sentence and scrutinized every aspect of the book with me.

*deceased.

Contents at a Glance

Acknowledgments xix

Chapter 1. Introduction to the Economics and Operations of Airlines	1
Chapter 2. Aviation Industry	5
Chapter 3. Airline Revenues and Operating Costs	11
Chapter 4. Aircraft Economic and Performance Evaluation	55
Chapter 5. Cargo and Terminal Operations: Total-Cost Concept	147
Chapter 6. Economics of Charter Operation	197
Chapter 7. Fuel Conservation and Its Economic Impact	201
Chapter 8. Airport Load Analysis	237
Chapter 9. Trip Analysis	249
Chapter 10. Passenger Research	265
Chapter 11. Forecasting	279
Chapter 12. Scheduling	297
Chapter 13. Fleet Planning	325
Chapter 14. Scheduled Maintenance Program	343
Chapter 15. Airline Operational and Economic Comparison	353
Chapter 16. The Environment and Airline Operations	361
Chapter 17. Short Descriptions of Selected Types of Aircraft	383
Chapter 18. Performance Description and Comparison	409

Chapter 19. Evaluation of Investment	431
Chapter 20. Case Histories: Aircraft Investment Evaluations	463
Chapter 21. Airline Simulation Study	469
Chapter 22. Definitions	491
Chapter 23. Recommended Readings	497

Index	501

Chapter 1. Introduction to the Economics and Operations of Airlines	1
Chapter 2. Aviation Industry	5
2.1 Introduction	5
2.2 U.S. Major Air Carriers	5
2.3 U.S. Nationals	6
2.4 U.S. Regional Airlines	6
2.5 General Aviation	7
2.5.1 Business and Corporate Aircraft	7
2.5.2 Various General Aviation Activities	7
2.5.3 General Aviation Airframe and Engine Manufacturers and Maintenance	8
2.6 Fractional Sector of Air Transportation	8
Chapter 3. Airline Revenues and Operating Costs	11
3.1 Revenue Categories	11
3.1.1 Passengers	11
3.1.2 Freight	12
3.1.3 Excess Baggage Revenues	12
3.1.4 Other Revenues	12
3.2 Cost Categories	12
3.2.1 Historical Background of Direct-Operating-Cost (Air Transport Association) Cost Formula	12
3.2.2 Historical Background of Indirect-Operating-Cost (IOC) Formula	13
3.2.3 Present Methods for Defining Operating Costs	14
3.2.4 Methods of Cost Allocation	14
3.2.5 Flying Operations	17
3.2.6 Fuel Cost	18
3.2.7 Insurance	19
3.2.8 Block-Hours and Flight-Hours	19
3.2.9 Maintenance Cost	20
3.2.10 Maintenance-Burden Costs	27
3.2.11 Methods of Depreciation	28
3.2.12 Airplane Leasing	34

3.2.13 Interest Costs	34
3.2.14 Financing Cost	35
3.2.15 Landing Charges and Navigation Fees	35
3.2.16 Station Costs	36
3.2.17 Systems Overhead	38
3.3 Startup Costs	38
3.4 Aircraft Commonality and Economics	40
3.5 Stockage Level	43
3.6 Spares Policy	43
3.7 Spares Availability	44
3.8 Spares Commonality	46
3.9 Ground Support Equipment	47
3.10 Marginal Cost	47
3.11 Facilities	48
3.12 Cost Savings by Volume	49
3.13 Cost Escalation—Inflation	50
3.14 Foreign Currency Exchange	50
3.15 Graphic Presentation of Direct Operating Costs	50
3.16 Revenue and Cost versus Time	51
Chapter 4. Aircraft Economic and Performance Evaluation	55
4.1 Introduction	55
4.2 Aircraft Operational Weights Presentation	56
4.3 Load	56
4.4 Passenger Load	56
4.5 Cargo Load	56
4.6 Required Data for Conducting Aircraft Economic and Operational Studies	58
4.7 Introduction to Payload versus Range Curve	62
4.8 Payload Range Curve for Regional and General Aviation Aircraft	68
4.9 Range Consideration for Regional and General Aviation Aircraft	69
4.10 Large Aircraft Payload versus Range Curve	71
4.11 Airplane Range Capabilities Presentation	80
4.12 Airplane Fuel Burn Characteristics	83
4.13 Aircraft Engines	85
4.14 Direct Operating Costs in Dollar per Statute Mile or Nautical Mile versus Range	86
4.15 Direct Operating Costs in Cents per Passenger-Mile and/or in Cents/Ton-Mile versus Range	88
4.16 Cargo Density	89
4.17 Cargo Operations in Cents per Ton-Mile versus Density	93
4.18 Density versus Range	93
4.19 Partial Load Presentation as a Function of Range	93
4.20 Airplane Load Factor Definitions	99
4.21 Breakeven and Operating Load Factor	99
4.22 Breakeven Passenger Numbers, Load Factor, and Profit—Passenger Operations	101
4.23 Breakeven Load, Load Factor, and Profit—Cargo Operations	104
4.24 Lower-Lobe Cargo Effect on Breakeven Load—Passenger Operations	106
4.25 Revenue and Cost Presentations	108

4.26 Airplane Performance Information	111
4.27 Airplane Weight Ratios	112
4.28 Airplane Fuel Burn Comparison	114
4.29 Airplane Productivity	124
4.30 Airplane Profit Potential	127
4.31 Economic Evaluation of Selected Trips	132
4.32 Time Effect on Profit	142
Chapter 5. Cargo and Terminal Operations: Total-Cost Concept	147
5.1 Air Cargo Market and Cargo Operations	147
5.2 Future of Air Cargo	150
5.3 Cargo Market	152
5.4 Cargo Characteristics	155
5.5 Cargo Seasonality	155
5.6 Cargo Airplanes	156
5.7 Short Historical Background of Cargo Loading and Equipment	157
5.8 Development and Description of Airborne Pallets, Igloos, Containers	158
5.8.1 Pallets	158
5.8.2 Igloos	159
5.8.3 Containers	160
5.8.4 Lower-Lobe Containers	160
5.9 Tare Weight Effect on Payload versus Range Curve	162
5.10 Terminal Loading Equipment	162
5.10.1 Passenger Loading and Equipment	162
5.10.2 Cargo Loading and Equipment	164
5.11 Cargo Systems Elements	168
5.12 Development of the Container System: Intermodal Transportation	170
5.13 Heavy Lifting Devices	176
5.14 Odd-Sized Loads	178
5.15 Loading Efficiency	178
5.16 Cargo Door Loadability	178
5.17 Loading Time	179
5.18 Weighing Airplanes	181
5.19 New Trend in Cargo Handling	181
5.20 Loading Doors	182
5.21 Oversized Airplane Capability	183
5.22 Freight-Handling Terminals	183
5.23 Airplane Conversion (Passenger to/from Cargo)	185
5.24 Animal Passengers	186
5.25 Cargo Distribution Costs	188
5.26 Shipping Time and Shipment Cost Comparison	190
5.27 Sample Analysis Comparing Ocean versus Air Shipping: Case History	193
5.27.1 Basis for the Analysis	193
5.27.2 General Observations	193
5.27.3 Method Applied	193
5.27.4 Application of Basic Data	194
5.27.5 Door-to-Door Transportation Cost: Summary	195
5.27.6 Cost of Capital Investment While Goods in Transit	195
5.28 Sample Analysis for Reduced-Inventory Cost Calculation	195

Chapter 6. Economics of Charter Operation	197
6.1 Introduction	197
6.2 Direct Operating Cost Comparison	197
6.2.1 Flight Operations	197
6.2.2 Fuel Cost	197
6.2.3 Depreciation	197
6.3 Indirect Operating Cost	198
6.4 Seating Capacity	198
6.5 Overhead	199
6.6 Load Factor	199
Chapter 7. Fuel Conservation and Its Economic Impact	201
7.1 Flight Department Fuel Conservation	201
7.1.1 Flight Operations	201
7.1.2 Takeoff Procedure Effect on Fuel Burn	204
7.1.3 Climb Speed	204
7.1.4 Cruise	206
7.1.5 Mach Number's Effect on Trip Fuel and Trip Time	207
7.1.6 Cruise Altitude	208
7.1.7 High Mach Number	209
7.1.8 Minimum-Cost Mach Number	209
7.1.9 Long-Range Cruise	212
7.1.10 Nonoptimal Cruise Altitude Penalties	213
7.1.11 Optimal Cruise Procedure	214
7.1.12 Two- versus Three-Pack Operation	214
7.1.13 Descent	215
7.1.14 Landing	215
7.1.15 Holding	216
7.1.16 Flight Planning	216
7.1.17 Ground Rollout and Taxi	217
7.1.18 Ground Operations	217
7.1.19 Center of Gravity	219
7.1.20 One-Stop versus Nonstop Flights	219
7.1.21 Fuel Tankering	219
7.1.22 Fuel Dumping	220
7.1.23 Fuel Penalty from Carrying Excess Weight and/or Fuel	220
7.1.24 Reserve Fuel	221
7.1.25 Domestic Reserve Fuel	222
7.1.26 International Reserve Fuel	223
7.1.27 Redispach or Reclearance Procedure and Its Revenue Potential	223
7.1.28 Weight Reductions	226
7.1.29 Short-Trip Cruise Speed	227
7.1.30 Enroute Temperature Effect	227
7.1.31 Engine Fuel Consumption Effect	228
7.1.32 Mach Meter Accuracy	228
7.1.33 Derated Takeoff	228
7.1.34 Derated Climb	230
7.1.35 Fuel Savings in Action	230
7.2 Maintenance Department Fuel Conservation	231
7.2.1 Location of High Fuel Consumption	232
7.2.2 Instrumentation	233
7.2.3 Seal Leakage	233
7.2.4 Surface Irregularities	233
7.2.5 Control Surface Rigging	234
7.2.6 Auxiliary Power Unit (APU) Fuel Penalties	235

Chapter 8. Airport Load Analysis	237
8.1 Introduction	237
8.2 Airport Analysis	237
8.3 Takeoff Criteria	238
8.4 Landing Criteria	239
8.5 Required Airport Data	240
8.6 Airport Load Analysis Presentation	241
8.7 Definitions	244
8.7.1 Maximum Ramp Weight	244
8.7.2 Maximum Structural Weight	244
8.7.3 Maximum Takeoff Weight	244
8.7.4 Maximum Landing Weight	245
8.7.5 Maximum Zero-Fuel Weight	246
8.7.6 Operating Weight Empty	246
8.7.7 Manufacturer's Weight Empty	247
8.7.8 Maximum Structural Payload	247
8.7.9 Maximum Seating Capacity	247
8.7.10 Maximum Cargo Volume	247
8.7.11 Usable Fuel Capacity	247
8.7.12 Maximum Airport Elevation	248
8.7.13 Maximum Airport Temperature	248
8.7.14 Maximum Tailwind Limit	248
 Chapter 9. Trip Analysis	 249
9.1 Introduction	249
9.2 Basic Requirement of Trip Analysis	249
9.3 Basic Data for Trip Analysis	249
9.4 Trip Analysis	251
9.5 Financial Report	255
9.6 Departmental Use of Simulation Report	257
9.7 Sample Calculation of Trip Analysis	259
9.8 Trip Elements Definitions	262
 Chapter 10. Passenger Research	 265
10.1 Introduction	265
10.2 The Significance (if Any) of the Gompertz Curve	266
10.3 Objective of Passenger Research	266
10.4 Data Collection on Passenger Preferences	267
10.5 Passenger Motivation	268
10.6 Demographics and Income	271
10.7 Passenger Comfort	274
10.8 Passenger Economics	276
 Chapter 11. Forecasting	 279
11.1 Introduction	279
11.2 The Purpose of Preparing Forecasts	279
11.3 Types of Forecasts	280
11.4 Time Range of Forecasts	281
11.5 Forecast Models	281

11.6 Historical, Industry, Passenger, and Cargo Data	285
11.7 Market Share	287
11.8 Methods of Forecasting	291
11.8.1 Consensus Method or the Delphi Technique	291
11.8.2 Market Research	291
11.8.3 Managerial Judgment	292
11.8.4 City-Pair Method	292
11.8.5 City-Pair Systems Average	292
11.8.6 Systems Growth Rate	292
11.8.7 Growth-Rate Estimate	292
11.8.8 Deflated or Inflated Growth Rate	293
11.8.9 Database Correction	293
11.8.10 Traffic Seasonality Options	293
11.8.11 Exponential Smoothing	293
11.8.12 Least-Squares Method	293
11.8.13 Geometric Progression	294
11.8.14 Multilinear Regression	294
11.8.15 Polynomial Regression	294
11.9 Econometric Forecasting	294
11.10 Accuracy of Forecasting Methods	294
Chapter 12. Scheduling	297
12.1 Introduction	297
12.2 The Scheduling Department	297
12.3 Aircraft Rotation Schedule	299
12.4 Equipment Routing	299
12.5 Schedule by Revenue Requirements	302
12.6 Time Zones	303
12.7 Departure Time Distribution for Passenger Operations	303
12.8 Departure Time Distribution for Freight Operations	304
12.9 Schedule Requirements Based on Airline Operational Constraints	306
12.10 Crew Scheduling	307
12.11 Environmental and Operational Limitations	307
12.12 Station Schedule	309
12.13 Linear Route Systems	310
12.14 Hub and Spoke Operations and the Role of Regional Airlines	310
12.15 Selected-Stops Operation	313
12.16 Routing	313
12.17 Traffic Flow Distribution	313
12.18 Frequency versus Load Factor	314
12.19 The Effect of Changing Departure Time	315
12.20 Airplane Ground Time Activities	317
12.21 Schedule Development	318
12.22 Curfew	318
12.23 Limitation of Station Personnel	321
12.24 Connections	321
12.25 Gate Availability	321
12.26 Short Summary of Schedule Activities	321
12.27 Maintenance Scheduling	323

Chapter 13. Fleet Planning	325
13.1 Introduction	325
13.2 Elements of Fleet Planning	325
13.3 Macro Fleet Planning (Systems Approach)	326
13.4 Micro Fleet Planning Approach	327
13.5 Aircraft Economic Comparison	328
13.6 Fleet Planning Case History	329
13.6.1 Introduction	329
13.6.2 Fleet Requirement and Marketing Analysis	329
13.6.3 Aircraft Productivity Analysis	330
13.6.4 Domestic Market Forecast	334
13.6.5 Economic Indicators	334
13.6.6 Growth Pattern for Selected Cities	335
13.6.7 City-Pair Market Forecast	337
13.6.8 Conclusion	340
Chapter 14. Scheduled Maintenance Program	343
14.1 Introduction	343
14.2 General Description of Various Maintenance Checks	344
14.3 Hard Time Limit	345
14.4 Time Between Overhauls (TBO)	345
14.5 Condition Monitoring (CM)	345
14.6 On Condition (OC) Maintenance	346
14.7 Structurally Significant (SS) Items	346
14.8 Engine Maintenance	346
14.9 Airplane Checks (Example)	347
14.10 Engine Checks (Example)	347
14.11 Maintenance Location	349
14.12 Inventory Management	351
Chapter 15. Airline Operational and Economic Comparison	353
15.1 Introduction	353
15.2 Flight Operations	353
15.3 Maintenance and Burden	354
15.4 Depreciation and Amortization	354
15.5 Relationship Between Various Direct Operating Cost (DOC) Factors	354
15.6 Indirect Operating Cost	355
15.7 Miscellaneous Comparisons	356
Chapter 16. The Environment and Airline Operations	361
16.1 Introduction	361
16.2 Noise Impact and the Environment	361
16.3 Definition of Noise	362
16.4 Typical Noise Levels	362
16.5 Airplane Noise Regulations	362
16.6 Airplane Noise Measurement	364

16.7	Airport Noise Restrictions	368
16.8	Night Curfews	368
16.9	Preferential Runways	368
16.10	Preferential Treatment of Quieter Airplanes	369
16.11	Airport Noise Monitoring Stations	369
16.12	Noise-Abatement Procedures	369
16.13	Engine Retrofits and Engine Noise Suppressors	370
16.14	Airplane Noise Contour	371
16.15	Airport Noise and Effects	372
16.16	Jet Engine Exhaust	372
16.17	Engine Smoke Emissions	373
16.18	Ozone Distribution	375
16.19	Smoke Emission Improvement At and Around the Airport	375
16.20	Bird Strikes	376
16.21	Airplane Damage due to Bird Strikes	377
16.22	Airport Pavement	378
16.23	Airport Soil Management	380
16.24	Airport Waste Management	380
16.25	Volcanic Ash	380
16.26	Wind Shear	381
Chapter 17. Short Descriptions of Selected Types of Aircraft		383
17.1	The B747-400 Aircraft	383
17.1.1	Introduction	383
17.1.2	Weight Statements	383
17.1.3	Aircraft Configuration	383
17.1.4	Airplane Conversion Time	394
17.1.5	Airplane Ground Time	396
17.2	The DC-10 Aircraft	397
17.2.1	Introduction	397
17.2.2	Passenger Configuration	398
17.2.3	Cargo Configuration	400
17.2.4	Mixed Cargo-Passenger Operations	401
17.2.5	Payload versus Range for Passenger and Freighter Operation	404
17.2.6	Community Noise and the Environment	405
17.2.7	Pavement Strength Requirements	406
17.3	MD-11 Aircraft	407
17.3.1	Introduction	407
17.3.2	Some Improved Features of the MD-11 versus DC-10 Aircraft	407
Chapter 18. Performance Description and Comparison		409
18.1	Short Description of the B747-400 Aircraft Performance Capabilities	409
18.1.1	The B747-400's Capabilities	409
18.1.2	Takeoff Field Requirements	409
18.1.3	Payload/Range	409
18.2	Economic Comparison: DC-10 versus DC-8-63	413
18.2.1	Introduction	413
18.2.2	Aircraft Weight Statements	413
18.2.3	Volume and Tare Weight Summary	413
18.2.4	Economic Assumptions	414
18.2.5	Direct Operating Cost Comparison	414

18.2.6 Comparison of Selected Trips	414
18.2.7 Conclusion and Profit Picture	418
18.3 Economic Comparison of a Large and Medium-sized Cargo Aircraft	418
18.3.1 Introduction	418
18.3.2 Ground Rules and Economic Assumptions	419
18.3.3 Fuel Analysis	419
18.3.4 Block to Flight Time Ratio (JFK-LHR-JFK)	420
18.3.5 Maintenance Cost	420
18.3.6 Depreciation Schedule	420
18.3.7 Insurance Cost	421
18.3.8 Direct and Indirect Operating Costs and Revenues	422
18.3.9 Economic Comparison	423
18.4 Economic Comparison for a Group of Different-Sized Airplanes and Equal Lifts Comparison	424
18.4.1 Introduction	424
18.4.2 Economic Ground Rules and Assumptions	424
18.4.3 Defining Direct Operating Cost	424
18.4.4 Defining Indirect Operating Cost	424
18.4.5 Total System Revenue, Costs, and Profit	424
18.4.6 Equal Lift Study	427
18.4.7 Operating Cost	427
18.4.8 Equal Lift Summary	428
18.4.9 Profit and Rate of Return on Investment	428
Chapter 19. Evaluation of Investment	431
19.1 Introduction	431
19.2 Time Value of Money	432
19.3 Revenue and Costs	433
19.4 Tax Shield	433
19.5 Investments and Resale Value	433
19.6 Timing	433
19.7 Interest	433
19.8 Various Evaluation Methods	433
19.8.1 Payback Period	433
19.8.2 Lifetime Profit Generated	434
19.8.3 Per Dollar Investment	434
19.8.4 Average Annual Proceeds	434
19.8.5 Annual Average Proceeds per Dollar Invested	435
19.8.6 Average Annual Return on Average Book Value	435
19.9 Concept of Present Value of Future Sum and the Future Value of Present Sum	435
19.10 Cash-Flow Analysis	439
19.11 Internal Rate of Return Method (IRR)	439
19.12 Present-Value Method	440
19.13 Graphic Presentation of Internal Rate and Present-Value Methods	441
19.14 Nominal Rate and Effective Rate of Interest	443
19.15 Financial Model: Return on Investment	444
19.15.1 Introduction	444
19.15.2 Source and Application of Funds	445
19.15.3 Airline Debt Structure	446
19.15.4 Predelivery Payments	446
19.15.5 Project Financing	447
19.15.6 Capitalized Interest	447
