序

ニューモシスチス・カリニ肺炎 (*Pneumocystis carinii* pneumonia) は栄養不良児、先天性免疫不全児、抗癌化学療法中の患者、臓器移植後や自己免疫疾患患者に対する抗免疫療法などの経過中に発症し、高い死亡率を示す。また最近では後天性免疫不全症候群 (AIDS) の最も重要な合併症として注目されている。ところが本症の病原体であるニューモシスチス・カリニ (*Pneumocystis carinii*) に関しては、まだまだ不明な点が多く、分類学上の位置も未決定のままである。筆者らは1974年以来、本症の基礎的ならびに臨床的研究に没頭し、その間、わが国内外の文献をほぼあますところなく集め、コンピューターに入力し、各種のキーワードで検索できるようにした。この産物を私蔵せず、同学の方々に役立てたいと思いつつも、不採算のこの種出版物を引き受けるところはなかった。ところが、このたび 南山堂 鈴木正二社長ならびに河田孫一郎氏の好意と英断により出版の運びとなった。心から謝意を表したい。

本書の構成はまず、第Ⅰ部 世界の文献、第Ⅱ部 日本の文献、となっている。第Ⅰ部は外国人にも利用してもらいたいため、日本の論文を英訳して含めてある (国内学会発表分は割愛した)。第Ⅰ部はさらに第1項 著者別索引 (アルファベット順配列)、第2項 追加文献 (最新のもの)、第3項 物件別索引 (キーワードによる) に分れている。第Ⅱ部は、第1項 著者別索引 (著書および論文)、第2項 著者別索引 (学会発表)、第3項 物件別索引となっている。第Ⅰ部には1,530篇の論文が収録され、それぞれに固有の番号が付されており、物件別索引にはその番号が各キーワードの下に示されている。第Ⅱ部には学会発表も含め、日本の論文545篇が収録されており、第Ⅰ部と同様、物件別索引があとについている。

AIDS については最近、洪水のように論文数が増加し、全世界で、1985年5月現在1,600篇を数える。これらをすべて収録するのは本書の主旨ではないので、ニューモシスチス・カリニ肺炎に関連したAIDS論文に限ることとした。

本書は限られた部数で版を崩すことになろうが、ニューモシスチス・カリニは人類と共に生きつづけ人命を脅かすに違いない。この疾病と戦う人々にとって本書が少しでも裨益するところがあるなら筆者の喜びである。

吉 田 幸 雄 識

PREFACE

Pneumocystis carinii pneumonia is an important opportunistic infection in patients who are immunocompromised because of malnutrition, congenital immune deficiency, or immunosuppressive treatment for cancer, post-organ transplantation or autoimmune diseases. In addition, since 1981, the outbreak of *P. carinii* pneumonia among AIDS patients has become the object of public attention. However, there are many questions still unclear especially as to the nature of *P. carinii* itself. For instance, the taxonomic position of this organism and a sufficient system for culture and serodiagnosis remain unsettled.

During the study on *P. carinii* and *P. carinii* pneumonia, we collected almost all literature throughout the world on this subject. It is computerized so that reference can be made by use of keywords. All the data until the end of 1984 was recorded in this bibliography.

This bibliography is divided into two main parts: Part I, Literature in the world and Part II, Literature in Japan. Part I contains important Japanese original papers which were translated into English for the convenience of foreign scientists. Part I is further divided into three sections: Section 1 - Author index, Section 2 - Additions (the latest literature), and Section 3 - Subject index. Part II is also divided into three sections: Section 1 - Author index of books and original papers, Section 2 - Author index of papers published in scientific meetings, and Section 3 - Subject index.

This bibliography is comprised of 1530 research papers in Part I and 545 papers in Part II. Concerning the AIDS, only papers connected with *P. carinii* pneumonia are recorded.

We acknowledge with special thanks the cooperation of the publisher, Nanzando.

May 15, 1985

Yukio YOSHIDA

目 次

CONTENTS

第 I 部	世界の文献	1
Part I	Literature in the world	
第 1 項	著者別索引	1
Section 1	Author index	
第 2 項	追加文献	159
Section 2	Addition	
第 3 項	物件別索引	169
Section 3	Subject index	
第 II 部	日本の文献	191
Part II	Literature in Japan	
第 1 項	著者別索引 (著書および論文)	191
Section 1	Author index (Books and original papers)	
第 2 項	著者別索引 (学会発表)	205
Section 2	Author index (Papers published in scientific meetings)	
第 3 項	物件別索引	221
Section 3	Subject index
