New York, 1982

NOTE

Symbols of United Nations documents are composed of capital letters combined with figures. Mention of such a symbol indicates a reference to a United Nations document.

The *Yearbook of National Accounts Statistics, 1980* consists of two volumes. The volumes are not sold separately.

The first 14 editions of the *Yearbook* were issued without series symbols.

INTRODUCTION

This is the twenty-fourth issue of the *Yearbook of National Accounts Statistics*.^{1/} Like the first 23 issues, it has been prepared by the Statistical Office of the United Nations with the generous co-operation of national statistical services. It is issued in accordance with the request of the Statistical Commission^{2/} that the latest available data on national accounts for as many countries and areas as possible be published regularly.

The present *Yearbook* is issued in two volumes. Volume I (Parts I and II) "Individual country data", shows in "III Country tables", detailed national accounts estimates for 155 countries and areas.

Volume II, "International tables", contains the following: table 1 (A, B, C) shows for 157 countries and areas estimates of total and *per capita* gross domestic product, national income, and national disposable income expressed in United States dollars for the years 1960, 1970, 1975, 1977, 1978 and 1979. Table 2 (A, B) and table 3 show the percentage distribution of gross domestic product and net material product by type of final expenditure and use and the percentage distribution of gross domestic product and net material product by kind of economic activity, respectively, for some or all of the years 1960-1979. Table 4 shows the percentage distribution of gross domestic product by cost-structure for some or all of the years 1960-1979. Table 5 shows the percentage distribution of the cost structure of national income and national disposable income for some or all of the years 1960-1979. Table 6 (A, B) shows in semi-matrix forms average annual rates of growth of real gross domestic product and net material product by type of expenditure and use and by kind of economic activity between any two years within the period 1960 to 1979, where available. Tables 7 and 8 (A, B) show world and regional index numbers of real gross domestic product by type of expenditure and by kind of economic activity, respectively, for the period 1960-1979 (base year: 1975 = 100). Table 9 shows index numbers of total and *per capita* real product for the period 1960-1979 (base year: 1975 = 100). Table 10 (A, B, C) shows implicit price deflator index numbers of gross domestic product by expenditure and by kind of economic activity, and of gross fixed capital formation by kind of economic activity of owner, respectively, for the period 1960-1979 (base year: 1975 = 100). Tables 11 and 12 show the finance of gross capital formation and saving as percentage of disposable income and by percentage distribution by institutional sector, respectively, for some or all of the years 1960-1979. Table 13 shows principal aggregates and their interrelationships for 158 countries and areas; these are time series, for some or all of the years 1960-1979.

SCOPE OF PUBLICATION

The form and concepts of the statistical tables in the present volume generally agree, for the countries with market economies, with the recommendations in *A System of National Accounts*, Studies in Methods, Series F, No. 2 Rev. 3.^{3/} For the countries with centrally planned

economies, the form and concepts generally agree with the recommendations in *Basic Principles of the System of Balances of the National Economy*, Studies in Methods, Series F, No. 17.^{4/} A summary of the conceptual framework of both systems, their classifications and definitions of transaction items, is provided in chapters I and II.

COLLECTION AND PRESENTATION OF DATA

To collect this sizable body of national accounts material, the Statistical Office of the United Nations each year sends to countries or areas with market economies a national accounts questionnaire; those with centrally planned economies receive a material balances questionnaire. The recipients of the questionnaires are also requested to indicate where the scope and coverage of the country estimates differ for conceptual or statistical reasons from the definitions and classifications recommended in SNA or in the System of Material Product Balances. Data obtained from these replies are supplemented by information obtained from correspondence with the national statistical services and from national source publications.

In the tables of volume II, except tables 2B, 6B, 10A, 10B, 10C and 13, regions and countries within the regions are listed in alphabetical order. In tables 2B, 6B, 10A, 10B, 10C and 13, countries or areas are listed in alphabetical order without regional classification.

Unless otherwise stated, the data in the *Yearbook* tables relate to the calendar year against which they are shown.

The data which relate to the Federal Republic of Germany and the German Democratic Republic include the relevant data relating to Berlin for which separate data have not been supplied. This is without prejudice to any question of status which may be involved.

COMPARABILITY OF THE NATIONAL ESTIMATES

Every effort has been made to present the estimates of the various countries or areas in a form designed to facilitate international comparability. To this end, important differences in concept, scope, coverage and classification have been described in the notes which accompany the tables. Such differences should be taken into account if misleading comparisons among countries or areas are to be avoided.

REVISIONS

The figures shown are the most recent estimates and revisions available at the time of compilation. In general, figures for the latest year are to be regarded as provisional.

EXPLANATION OF SYMBOLS

The following symbols have been employed:

Data not available
Category not applicable.....

Magnitude nil or less than half of the unit
employed..... —
Decimal figures are always preceded by a period.. (.)

delimitation of its frontiers or boundaries.

Where the designation “country or area” appears in the headings of tables, it covers countries, territories, cities or areas. In prior issues of this publication, where the designation “country” appears in the headings of tables, it should be interpreted to cover countries, territories, cities or areas.

In some tables, the designation “developed” and “developing” economies is intended for statistical convenience and does not, necessarily, express a judgement about the stage reached by a particular country or area in the development process.

Details and percentages in tables do not necessarily add to totals shown because of rounding.

GENERAL DISCLAIMER

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the

// United Nations publications.
