# New to Computing Essentials 2015

---

Every chapter's "Why should I read this chapter" has been dramatically revised to engage students. Every Making IT Work for You, Ethics, and Environment has been carefully reevaluated, enhanced, and/or replaced and new Privacy information has been added to each chapter. Additionally, this in-chapter content has been carefully coordinated with an end-of-chapter section titled Discussion that provides thought-provoking questions designed for in-class discussion or homework assignments. More specific new coverage includes the following.

- |           |   |
|-----------|---|
| Chapter 1 | Revision of the traditional five-part information system to include the Internet<br>Expanded coverage of Windows 8, Office 2013, and mobile devices including smartphones<br>New coverage of technology's potential impact on privacy   |
| Chapter 2 | Expanded coverage of Web 3.0 and social networking<br>Revised Making IT Work for You: Online Entertainment<br>New privacy discussion related to social networking and privacy controls within Facebook  |
| Chapter 3 | Expanded coverage of Office 2013, specialized applications, and apps<br>New privacy discussion related to the ability of some mobile phone apps to track a smartphone's precise location without the owner's knowledge  |
| Chapter 4 | Expanded coverage of Microsoft's Windows 8, Windows 8 utilities, and Apple's operating systems including OS X Mavericks<br>Revised Making IT Work for You: Windows Task Manager for Windows 8<br>New privacy discussion relating to protecting sensitive information on a lost or stolen smartphone   |
| Chapter 5 | Expanded coverage of ultrabooks, mini tablets, and Thunderbolt<br>New section of mobile devices including expanded coverage of smartphones<br>New privacy discussion on cryptoprocessors, a specialty processor devoted exclusively to protecting your privacy  |
| Chapter 6 | New coverage of 3-D printers, UPC codes, MaxiCode, and QR codes<br>Expanded coverage of display resolutions, touch-sensitive displays, flat-panel monitors, and ergonomic issues specifically related to portable computers including tablets and smartphones   |
| Chapter 7 | New coverage of hybrid solid-state storage systems and cloud storage issues related to maintenance, hardware upgrades, file-sharing collaboration, access speed, and file security<br>Revision of Making IT Work for You: Cloud Storage<br>New privacy discussion of how to securely remove sensitive information from the hard disk before selling or recycling a computer |
| Chapter 8 | Expanded coverage of 4G networks<br>New coverage on fiber-optic connection services<br>New privacy discussion about relentless attacks on government and private networks to gain unauthorized access and the resulting risk to sensitive personal information  |
| Chapter 9 | Expanded coverage of social networking risks including "tagging" by friends without an individual's knowledge or consent<br>New content on identity theft, data collection at social networking sites, big data, and the unauthorized creation of detailed personal profiles  |

**T**he 20th century brought us the dawn of the digital information age and unprecedented changes in information technology. In fact, the rate of change is clearly increasing. As we begin the 21st century, computer literacy is undoubtedly becoming a prerequisite in whatever career you choose.

The goal of *Computing Essentials* is to provide you with the basis for understanding the concepts necessary for success. *Computing Essentials* also endeavors to instill an appreciation for the effect of information technology on people, privacy, ethics, and our environment and to give you a basis for building the necessary skill set to succeed in the 21st century.

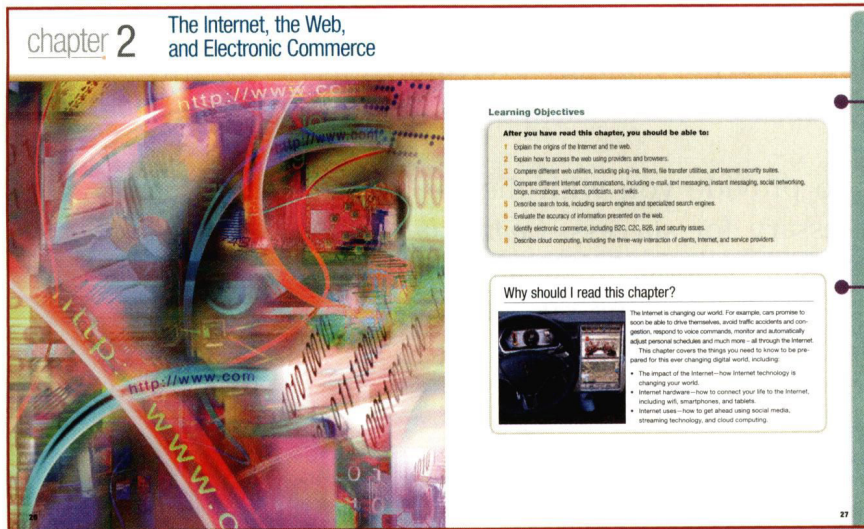

Times are changing, technology is changing, and this text is changing too. As students of today, you are different from those of yesterday. You put much effort toward the things that interest you and the things that are relevant to you. Your efforts directed at learning application programs and exploring the web seem, at times, limitless. On the other hand, it is sometimes difficult to engage in other equally important topics such as personal privacy and technological advances.

At the beginning of each chapter, we carefully layout why and how the chapter's content is relevant to your life today and critical to your future. Within each chapter, we present practical tips related to key concepts through the demonstration of interesting applications that are relevant to your lives. Topics presented focus first on outputs rather than processes. Then, we discuss the concepts and processes.

Motivation and relevance are the keys. This text has several features specifically designed to engage and demonstrate the relevance of technology in your lives. These elements are combined with a thorough coverage of the concepts and sound pedagogical devices.

# Visual Learning

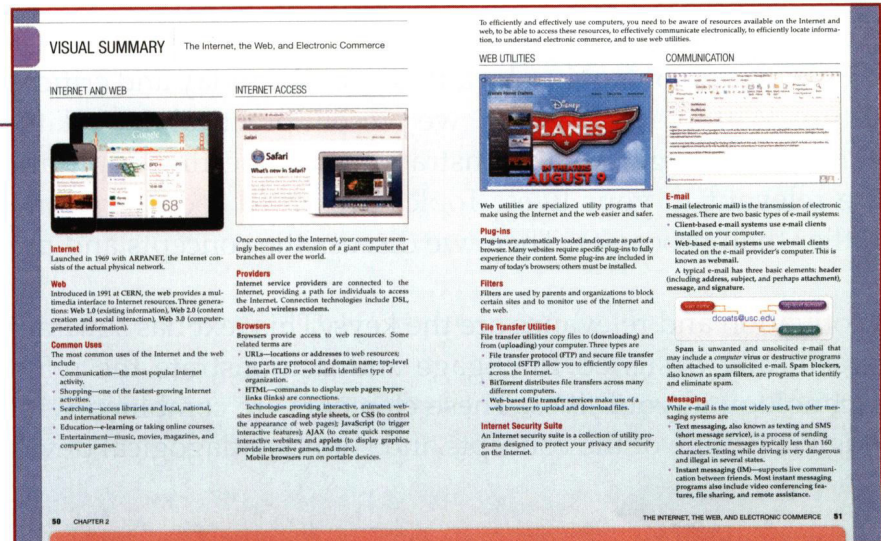

## VISUAL CHAPTER OPENERS

Each chapter begins with a list of chapter learning objectives and provides a brief introduction to what will be covered in the chapter. Additionally, the newly revised Why Should I Read This? feature presents a visually engaging and concise presentation of the chapter's relevance to the reader's current and future life in the digital world.

## VISUAL SUMMARIES

Visual summaries appear at the end of every chapter and summarize major concepts covered throughout the chapter. Like the chapter openers, these summaries use graphics to reinforce key concepts in an engaging and meaningful way.

## MAKING IT WORK FOR YOU

Making **IT** work for you

### FREE ANTIVIRUS PROGRAM

Have you or someone you know had a slower computing experience due to a spyware infection? Even worse, perhaps a malicious piece of software stole crucial, personal information or caused a total system failure. Most of these problems can be averted by having an up-to-date antivirus program running in your computer's memory at all times. This exercise shows you how to download and install a free antivirus program if your computer does not yet have one.

**Getting Started** First, make sure your computer does not have an antivirus or security suite running. If it does, be sure to completely uninstall that program, even if the subscription is expired. Now, follow these steps to install AVG, a popular, free antivirus program:

- 1 Visit <http://free.avg.com> and click the **Download** button. You will be asked to confirm that you want the free edition and then redirected to a download site.
- 2 Run the installation file and follow the prompts.
- 3 Select **basic protection** if you are asked which product you would like to install.
- 4 Choose **Express Install** and wait for files to be downloaded and installed.

**Using AVG** Generally speaking, your antivirus program watches your system for malware and updates itself automatically. However, you can always download updates manually, set a schedule for full-system scans, and change basic settings for various components of the software.

- 1 After installation, verify that the software is downloading updates by clicking **Update or Updating...** on the right side. Wait for all updates to be downloaded.
- 2 Click **Scan now** to run a full scan on your computer.
- 3 Just to the right of that, click the button with the three white horizontal lines to see the scan options where you can set a schedule for automated scans.
- 4 Click the **back arrow** to reach the main screen, where you can click various elements of the program to configure them. For example, clicking **Web Browsing** will allow you turn on a feature that detects cookies that may be used to track your online activity.

The web is continually changing, and some of the specifics presented in this Making IT Work for You may have changed. To learn about other ways to make information technology work for you, visit our website at [www.nhbc.com/cx2015](http://www.nhbc.com/cx2015) and select **Student Edition** and then **Making IT Work**.

10

Special-interest topics are presented in the Making IT Work for You section found within nearly every chapter. These topics include Installing a Free Antivirus Program, Online Entertainment, Google Docs, Skype, and Cloud Storage.

# Reinforcing Key Concepts

## CONCEPT CHECKS

Located at points throughout each chapter, the Concept Check cues you to note which topics have been covered and to self-test your understanding of the material presented.

### concept check

- Define data. List four common types of files.
- Define connectivity and the wireless revolution.
- What is a network? Describe the Internet, web, and cloud computing.

## KEY TERMS

3-D printers (152)  
active display area (148)  
additive manufacturing (152)  
aspect ratio (148)  
bar code (144)  
bar code reader (144)  
bar code scanner (144)  
Bluetooth (153)  
card reader (144)  
carpal tunnel syndrome (158)  
cathode-ray tube (CRT) (150)  
clarity (147)  
cloud printer (153)  
combination key (141)  
contrast ratio (148)  
cordless mouse (142)  
dance pad (143)  
digital camera (146)  
digital whiteboard (150)  
display screen (147)  
document scanner (144)  
dot pitch (148)  
dots per inch (dpi) (151)  
duplex printing (152)  
e-book reader (148)  
e-books (148)  
e-ink (148)  
e-reader (148)  
electronic books (148)  
ergonomics (157)  
flat-panel monitor (148)  
flatbed scanner (144)  
game controller (142)  
gamepads (143)  
gloves (157)  
Google Cloud Print (153)  
grayscale (151)  
handwriting recognition software (143)  
hard copy (151)  
headgear (157)  
headsets (153)  
high-definition television (HDTV) (150)  
immersive experience (157)  
inkjet printer (152)  
input (140)  
input device (140)  
interactive whiteboard (150)  
Internet telephone (154)  
Internet telephony (154)  
joystick (143)  
keyboard (140)  
laptop keyboard (141)  
laser printer (152)  
light-emitting diode (LED) (148)  
liquid crystal display (LCD) (148)  
magnetic card reader (144)  
magnetic-ink character recognition (MICR) (145)  
MaxiCode (145)  
monitor (147)  
motion-sensing device (143)  
mouse (142)  
mouse pointer (142)  
multifunction device (MFD) (154)  
multitouch screen (142)  
optical-character recognition (OCR) (145)  
optical-mark recognition (OMR) (145)  
optical mouse (142)  
optical scanner (144)  
output (147)  
output device (147)  
personal laser printer (152)  
picture element (147)  
pixel (147)  
pixel pitch (148)  
platform scanner (144)  
plotter (153)  
pointing device (142)  
portable scanner (144)  
printer (151)  
QR codes (145)  
repetitive strain injury (RSI) (158)  
resolution (147)  
RFID reader (145)  
RFID (radio-frequency identification) tag (145)  
scanner (144)  
scanning devices (144)  
shared laser printer (152)  
Skype (154)  
soft copy (147)  
speakers (153)  
stylus (143)  
technical writer (159)  
telephony (154)  
thermal printer (153)  
thumb keyboard (141)  
toggle key (141)  
touch pad (142)  
touch screen (142)  
traditional keyboard (141)  
Universal Product Code (UPC) (145)  
virtual keyboard (141)  
virtual reality (VR) (157)  
voice over IP (VoIP) (154)  
voice recognition system (146)  
wand reader (144)  
webcam (146)  
wheel button (142)  
wireless mouse (142)

## KEY TERMS

Throughout the text, the most important terms are presented in **bold** and are defined within the text. You will also find a list of key terms at the end of each chapter and in the glossary at the end of the book.

## MULTIPLE CHOICE

Circle the letter of the correct answer.

- The keyboard, mouse, display, and system unit are:  
a. hardware  
b. output devices  
c. storage devices  
d. software
- Programs that coordinate computer resources, provide an interface, and run applications are known as:  
a. application programs  
b. operating systems  
c. storage systems  
d. utility programs
- A browser is an example of a:  
a. general-purpose application  
b. specialized program  
c. system application  
d. utility program
- Although not as powerful as a supercomputer, this type of computer is capable of great processing speeds and data storage:  
a. mainframe  
b. midrange  
c. laptop  
d. tablet
- The smallest type of personal computer:  
a. mobile device  
b. midrange  
c. laptop  
d. tablet
- RAM is a type of:  
a. computer  
b. memory  
c. network  
d. secondary storage
- Unlike memory, this type of storage holds data and programs even after electric power to the computer system has been turned off.  
a. primary  
b. RAM  
c. ROM  
d. secondary
- The type of file created by word processors to save, for example, memos, term papers, and letters.  
a. database  
b. document  
c. presentation  
d. worksheet
- Uses the Internet and the web to shift many computer activities from a user's computer to computers on the Internet.  
a. cloud computing  
b. high definition  
c. network  
d. solid-state storage
- The largest network in the world is [the]:  
a. Facebook  
b. Internet  
c. supercomputer  
d. web

For an interactive multiple-choice practice test, visit our website at [www.mhhe.com/ce2015](http://www.mhhe.com/ce2015), select **Student Edition** and choose **Chapter 1** and then **Multiple Choice**.

## CHAPTER REVIEW

Following the Visual Summary, the chapter review includes material designed to review and reinforce chapter content. It includes a key terms list that reiterates the terms presented in the chapter, multiple-choice questions to help test your understanding of information presented in the chapter, matching exercises to test your recall of terminology presented in the chapter, and open-ended questions or statements to help review your understanding of the key concepts presented in the chapter.

- **File servers**—dedicated computers with very large storage capacities that provide users access to fast storage and retrieval of data.
- **Network attached storage (NAS)**—similar to a file server except simpler and less expensive; widely used for home and small business storage needs.
- **Raid systems**—larger versions of the specialized devices discussed earlier in this chapter that enhance organizational security by constantly making backup copies of files moving across the organization's networks.
- **Organizational cloud storage**—high-speed Internet connection to a dedicated remote storage facility. These facilities contain banks of file servers to offer enormous amounts of storage.

### Storage Area Network

A recent mass storage development is **storage area network (SAN)** systems. SAN is an architecture to link remote computer storage devices, such as enterprise storage systems, to computer networks so they are available as locally attached disk drives. In a SAN system, the user's computer provides the file system for storing data, but the SAN provides the disk space for data.

The key to a SAN is a high-speed network connecting individual computers to mass storage devices. Specialized software prevents simultaneous users from interfering with each other. SANs provide the ability to house data in remote locations and still allow efficient and secure access.

### concept check

- Define mass storage and list four mass storage devices.
- What is an enterprise storage system?
- What is a storage area network system?

---

## Careers in IT

**How can you harness distant recovery strategies to protect your data after a disaster strikes an office recovery capability?**

### Disaster recovery specialists

Disaster recovery specialists are responsible for recovering systems and data after a disaster strikes an organization. In addition, they often create plans to prevent and prepare for such disasters. A critical part of that plan is selecting storage devices and media in order to ensure that all company data is backed up and, in some cases, stored off-site.

Employees typically look for candidates with a bachelor's or associate's degree in information systems or computer science. Experience in this field is usually required, and additional skills in the areas of networking, security, and database administration are desirable. Disaster recovery specialists should possess good communication skills and be able to handle high-stress situations.

Disaster recovery specialists can expect to earn an annual salary of \$70,000 to \$120,000. Opportunities for advancement typically include upper-management positions. With so many types of threats facing organizations today and for these types of specialists is expected to grow. To learn about other careers in information technology, visit us at [www.mhhe.com/cert2015](http://www.mhhe.com/cert2015) and see **Student Edition** and then **Careers**.

Some of the fastest-growing career opportunities are in information technology. Each chapter highlights one of the most promising careers in IT by presenting job titles, responsibilities, educational requirements, and salary ranges. Among the careers covered are webmaster, software engineer, and database administrator. You will learn how the material you are studying relates directly to a potential career path.

Each chapter concludes with a brief discussion of a recent technological advancement related to the chapter material, reinforcing the importance of staying informed.

Each chapter concludes with a brief discussion of a recent technological advancement related to the chapter material, reinforcing the importance of staying informed.

# A BOOK TO THE FUTURE

---

## Isuing and Understanding Information Technology

The purpose of this book is to help you use and understand information technology. We want to help you become professors and students who use information technology in your teaching and learning. You can understand how technology is being used today and anticipate how technology will be used in the future. This will enable you to benefit from an important information technology development.

## The Internet and the Web

The Internet and the web are central ways to meet to be the best most important technology for the 21st century. Understanding how to effectively use the Internet to browse, connect, and locate information are essential skills. These issues are presented in Chapter 2. The Internet, the Web, and

## Powerful Software

The software that is now available can do an extraordinary number of tasks and help you in an endless number of ways. You can create professional-looking documents, analyze massive amounts of data, create dynamic multimedia web pages, and much more. Today's computers are providing the people they live to do in effective and efficient ways a variety of different types of software. General purpose, specialized, and mobile applications are presented in Chapter 3. Special software is presented as

## Personal Computers

Personal computers are now much more powerful than they used to be. Smartphones, tablets, and communications devices are all connected to network resources, and the way to connect to other computers, networks, and the Internet is becoming simpler. Despite the many advances, their essential features remain unchanged. To become effective and efficient users, you should know these features. Chapters 5 through 8 explain what you need to

know about them. For those considering the purchase of a computer, an appendix: "The Computer Buyer's Guide" is provided at the end of this book. This appendix is a very concise comparison of desktops, laptops, tablets, and smartphones.

## Privacy, Security, and Ethics

What about privacy? Suppose that you are a society most be careful about the potential of technology to negatively affect us. In fact, sometimes we need to be aware of how technology can impact our personal and/or our environment. Also, we need to understand the use and the importance of organizational and personal ethics. These critical issues are discussed in every chapter of this book and will be extensively reviewed in Chapter 8.

## Organizations

Almost all organizations rely on the quality and flexibility of their information systems. In any computerized firm, a member or employee of an organization, you will undoubtedly be required to use information systems. In order to make decisions, identify, and maintain these systems, you need to understand the basic concepts of information systems and know how to solve, efficiently, and effectively use computers. These concepts are covered throughout this book.

## Changing Times

One thing is changing any faster than you ever hear! Almost everything that exists, whether the Internet, a computer, or a cell phone, is in a fast-paced age. The Information Age is changing rapidly at the end of the book tracks the most recent developments in computer technology. After reading this book, you will be in a very fortunate position compared with many other people in society today. You will be able to use the most current technology, the Internet, and the web to do all the most current things. You will see and use these tools to your advantage.

17

Beginning in Chapter 10 and continuing through Chapter 13, *Using IT at DVD Direct—A Case Study* of a fictitious organization provides an up-close look at what you might expect to find on the job in the real world. You will follow Alice, a recent college graduate hired as a marketing analyst, as she navigates her way through accounting, marketing, production, human resources, and research, gathering and processing data to help manage and accelerate the growth of the three-year-old company.

Beginning in Chapter 10 and continuing through Chapter 13, *Using IT at DVD Direct—A Case Study* of a fictitious organization provides an up-close look at what you might expect to find on the job in the real world. You will follow Alice, a recent college graduate hired as a marketing analyst, as she navigates her way through accounting, marketing, production, human resources, and research, gathering and processing data to help manage and accelerate the growth of the three-year-old company.

# Unique End-of-Chapter Discussion Materials

## MAKING IT WORK FOR YOU

Making IT Work for You discussion questions are carefully integrated with the chapter's Making IT Work for You topics. The questions facilitate in-class discussion or written assignments focusing on applying specific technologies into a student's day-to-day life. They are designed to expand a student's awareness of technology applications.

## PRIVACY

Privacy discussion questions are carefully integrated with the chapter's marginal Privacy box. The questions facilitate in-class discussion or written assignments focusing on critical privacy issues. They are designed to develop a student's ability to think critically and communicate effectively.

### DISCUSSION

Respond to each of the following questions.

#### 1 Making IT Work for You: ONLINE ENTERTAINMENT

Review the Making IT Work for You: Online Entertainment on pages 30 and 31, and then respond to the following: (a) Do you currently have a subscription to Netflix, Hulu Plus, or another service that allows you to stream movies and TV shows? If so, which ones? If not, do you plan on using one in the future? Why or why not? (b) What device do you use most often to watch video content from the web? Would you consider purchasing a dedicated streaming device such as the Roku? Why or why not? (c) Could ever see yourself canceling or "cutting the cord" from your current cable or satellite service? Why or why not?

#### 2 Privacy: SOCIAL NETWORKING

When a Facebook friend posts a picture, video, or text that includes you, who can view that post? Review the Privacy box on page 40, and respond to the following: (a) Who should be responsible for ensuring privacy on social networking sites? Defend your position. (b) Do you think that most people are aware of their privacy settings on Facebook? Have you ever checked your settings? Why or why not? (c) Investigate and then summarize the default security settings for a social networking website such as Facebook or Google+.

#### 3 Ethics: FILTERING AND MONITORING

Parents can use content filters and monitoring software to restrict or monitor their child's Internet behavior. Review the Ethics box on page 35, and respond to the following: (a) Is it ethical for parents to filter or monitor Internet content for their children? Does your answer depend on the age of the child? Defend your position. (b) Should parents inform their children that Internet activity is being filtered or monitored? Why or why not? (c) Do you feel that filtering or monitoring software is the best way to protect children? Defend your position.

#### 4 Environment: E-MAIL

Review the Environment box on page 37, and then respond to the following: (a) When it comes to sending letters, holiday cards, and invitations to friends and family, do you mostly use e-mail or postal mail? What are your reasons for choosing one over the other? (b) Are there any situations where you feel that using e-mail would be inappropriate? (c) Have you signed up for paperless billing from your financial institutions and utility companies? Why or why not? (d) Go through all the paper mail you have received in the last week or two. Is there anything there that you could receive via e-mail or view on the web? List a few examples.

### DISCUSSION

Respond to each of the following questions.

#### 1 Making IT Work for You: WINDOWS TASK MANAGER

Have you ever been working with a program when it simply stopped working and would not respond to you? Review the Making IT Work for You: Windows Task Manager on pages 96 and 97, and open Task Manager using a Windows-based computer. Then respond to the following: (a) List the top three processes in terms of memory usage. (b) List three processes that are using your CPU, even if it is only for a second or two as you look at that dialog box. (c) Find one process that you do not recognize. Using your favorite search engine, determine what the process does. Write down the name of the process, its description or purpose, and the URL of the website you used to research it.

#### 2 Privacy: OPERATING SYSTEM SECURITY

Did you know that your computer or mobile device can provide others access to your personal information? Review the Privacy box on page 93, and respond to the following: (a) Have you ever lost a personal computer or mobile device? If so, what personal information was stored on it? If not, what personal information is stored on your current computer and/or mobile device? (b) Are you doing anything now that would make it difficult for someone to access personal information from your computing devices? If you are, discuss what that you are doing. If not, what could/should you be doing? Be specific. (c) Investigate the privacy setting on your devices and describe them. (d) Do you think computer manufacturers have a responsibility to provide better security and privacy features? Why or why not.

#### 3 Ethics: VIRUS PROTECTION SCAMS

Everyone should be concerned about viruses infecting computer systems. Some report that this fear is being used to manipulate users into purchasing new or upgraded antivirus programs. Some even report specific antivirus scams. Review the Ethics box on page 101, and then respond to the following: (a) Have you ever been offered a free virus alert program? If so, describe the offer and whether you accepted the offer. (b) Almost all legitimate antivirus software manufacturers issue new virus alerts. Do you think these alerts are motivated by greed or by good consumer service? Why or why not? (c) Is this an ethical issue for antivirus software manufacturers? If so, create some ethical guidelines for antivirus software manufacturers to follow when issuing virus alerts. (d) What can users do to protect themselves against antivirus scams and against unethical manufacturers of antivirus programs? Be specific and defend your suggestions.

#### 4 Environment: OS POWER MANAGEMENT

Did you know that some operating systems help protect the environment? Review the Environment box on page 90, and then respond to the following: (a) In what ways do operating systems help the environment? (b) Do you leave your desktop or laptop computer on all day? Do you use sleep or hibernate modes? Explain the reasons behind your decision. (c) Find the power management options for your operating system. List a few options that you would consider adjusting in order to reduce your computer's energy consumption.

## ETHICS

Ethics discussion questions are carefully integrated with the chapter's marginal Ethics boxes. The questions facilitate in-class discussion or written assignments focusing on ethical issues relating to technology. They are designed to develop a student's ability to think critically and communicate effectively.

## ENVIRONMENT

Environment discussion questions are carefully integrated with the chapter's marginal Environment boxes. The questions facilitate in-class discussion or written assignments focusing on environmental issues relating to technology. They are designed to develop a student's ability to think critically and communicate effectively.

The Instructor's Manual offers lecture outlines with teaching notes and figure references. It provides definitions of key terms and solutions to the end-of-chapter material, including multiple-choice, matching, and open-ended questions.

The PowerPoint slides are designed to provide instructors with a comprehensive resource for lecture use. The slides include a review of key terms and topics, as well as artwork taken from the text to further explain concepts covered in each chapter.

The testbank contains over 2,200 questions categorized by level of learning (definition, concept, and application). This is the same learning scheme that is introduced in the text to provide a valuable testing and reinforcement tool. Text page references have been provided for all questions, including a level-of-difficulty rating. The testbank is offered in Word files, as well as in EZ Test format.

The instructor support materials can be downloaded at [www.mhhe.com/ce2015](http://www.mhhe.com/ce2015).

Students can access materials by going to [www.mhhe.com/ce2015](http://www.mhhe.com/ce2015) and selecting **Student Edition**. Students can find a host of additional resources on the website, including animations of key concepts and in-depth coverage of select topics.

## O'LEARY SERIES

The O'Leary Application Series for Microsoft® Office is available separately or packaged with *Computing Essentials*. The O'Leary Application Series offers a step-by-step case approach to learning computer applications.

## SIMNET ONLINE TRAINING AND ASSESSMENT FOR OFFICE APPLICATIONS

SIMnet™ Online provides a way for you to test students' software skills in a simulated environment. SIMnet provides flexibility for you in your applications course by offering:

- Pretesting options
- Posttesting options
- Course placement testing
- Diagnostic capabilities to reinforce skills
- Web delivery of tests
- Learning verification reports

For more information on skills assessment software, please contact your local sales representative, or visit us at [www.simnetkeepitsimple.com](http://www.simnetkeepitsimple.com).

# Acknowledgments

A special thank-you goes to the professors who took time out of their busy schedules to provide us with the feedback necessary to develop the 2015 edition of this text. The following professors offered valuable suggestions on revising the text:

**Kurt Kominek**

*Northeast State Community College*

**Bernice Eng**

*Brookdale Community College*

**Mary Ann Zlotow**

*College of DuPage*

**Ronald Conway**

*Bowling Green State University*

**Hyo Joo Han**

*Georgia Southern University*

**Natalie Cooper**

*Madisonville Community College*

**Mark Jackson**

*Columbus State Community College*

**Candice Spangler**

*Columbus State Community College*

**Terri Holly**

*Indian River State College*

**Michael DeMaio**

*Brookdale Community College*

**Colin Gabriel Onita**

*University of Akron*

**Paulette Comet**

*Community College of Baltimore County*

**Diane Stark**

*Phoenix College*

**Terry Rigsby**

*Hill College*

**Lindsey Moore**

*Wiregrass Georgia Technical College*

**Paul Yaroslaski**

*Dodge City Community College*

**Laurence Hitterdale**

*Glendale Community College*

**Jean Insinga**

*Antonelli College*

**Cynthia Rumney**

*Middle Georgia Technical College*

**Lana LaBruyere**

*Mineral Area College*

**Diane Smith**

*Henry Ford Community College*

**Sandra Tavegia**

*The Community College of Baltimore County*

**Tahir Aziz**

*Long Beach City College*

**David Trimble**

*Park University at Fort Bliss*

**Brenda Nickel**

*Moraine Park Technical College*

**Gene Cabonaro**

*Long Beach City College*

**Russell Dulaney**

*Rasmussen College*

Our sincere thanks also go to Laurie Zouharis at Suffolk College for revising probes for LearnSmart; to Brenda Nielsen at Mesa Community College for revising the Instructor's Manual, and online quizzes; to Rose Marie Kuebbing for revising the testbank; and to Rachelle Hall at Glendale Community College for revising the PowerPoint presentations to accompany this text.

# About the Authors

---

Tim and Linda O'Leary live in the American Southwest and spend much of their time engaging instructors and students in conversation about learning. In fact, they have been talking about learning for over 25 years. Something in those early conversations convinced them to write a book, to bring their interest in the learning process to the printed page. Now, they are joined by their son Dan O'Leary as a coauthor. Dan is completing his PhD in Electrical Engineering with significant experience in teaching and consulting in information technology.

The O'Leary's form a unique team blending experience and youth. Tim has taught courses at Stark Technical College in Canton, Ohio, and at Rochester Institute of Technology in upstate New York, and is currently a professor emeritus at Arizona State University. Linda offered her expertise at ASU for several years as an academic advisor. She also presented and developed materials for major corporations such as Motorola, Intel, Honeywell, and AT&T, as well as various community colleges in the Phoenix area. Dan has taught at the University of California at Santa Cruz, developed energy-related labs at NASA, and worked as a database administrator and as a consultant in information systems.

Tim, Linda, and Dan have talked to and taught numerous students, all of them with a desire to learn something about computers and applications that make their lives easier, more interesting, and more productive.

Each new edition of an O'Leary text, supplement, or learning aid has benefited from these students and their instructors who daily stand in front of them (or over their shoulders).
