### Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

# MicroRNA in Regenerative Medicine

# Dedication

**Dedicated to my parents Dulal and Sankari Sen for  
having inspired my academic pursuit**

**Chandan K. Sen**

# Contributors

**Aamir Ahmad** Departments of Pathology, Barbara Ann Karmanos Cancer Institute, Wayne State University School of Medicine, USA

**Mir Farshid Alemdehy** Department of Hematology, Erasmus University Medical Center Cancer Institute, Rotterdam, The Netherlands

**Tyler Anderson** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**Hamdy Awad** Department of Anesthesiology, The Ohio State University Wexner Medical Center, USA

**Asha Balakrishnan** Department of Gastroenterology, Hepatology and Endocrinology, Hannover Medical School, Germany

**Mumtaz Yaseen Balkhi** Department of Molecular Virology, Immunology, and Medical Genetics, Human Cancer Genetics Program; Arthur G. James Comprehensive Cancer Center, The Ohio State University, Columbus; Division of Surgical Research, Boston University School of Medicine Roger Williams Medical Center, USA

**Laure Bally-Cuif** Team Zebrafish Neurogenetics, A. Fessard Institute of Neurobiology, Laboratory of Neurobiology and Development, France

**Jaideep Banerjee** Center for Regenerative Medicine and Cell-Based Therapies, The Ohio State University Wexner Medical Center, USA

**Bin Bao** Departments of Pathology, Barbara Ann Karmanos Cancer Institute, Wayne State University School of Medicine, USA

**Christopher Taylor Barry** Division of Solid Organ Transplant and Hepatobiliary Surgery, University of Rochester, USA

**Christophe Beclin** Aix-Marseille University, CNRS, IBDM, France

**Detlev Boison** Robert Stone Dow Neurobiology Laboratories, Legacy Research Institute, USA

**Andreas Bosio** Miltenyi Biotec GmbH, Germany

**Maria Luisa Brandi** Department of Surgery and Translational Medicine, University of Florence, Italy

**Melissa Brown** Molecular Genetics Program, College of Arts and Science, The Ohio State University, USA

**George A. Calin** Department of Experimental Therapeutics, M.D. Anderson Cancer Center, University of Texas at Houston Health Science Center, USA

- Yang Cao** Department of Chemical Pathology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China
- Maurizio C. Capogrossi** Laboratorio di Patologia Vascolare, Istituto Dermopatico dell'Immacolata-IRCCS, Italy
- Andrea Caporali** Bristol Heart Institute, University of Bristol, UK
- Christian Carulli** Department of Surgery and Translational Medicine, University of Florence, Italy
- Yuk Cheung Chan** Department of Medicine, Li Ka Shing Faculty of Medicine, University of Hong Kong, The People's Republic of China
- Pavithra L. Chavali** Cancer Research UK Cambridge Institute, University of Cambridge, UK
- Sreenivas Chavali** Medical Research Council Laboratory of Molecular Biology, Cambridge, UK
- Alex F. Chen** Department of Surgery, University of Pittsburgh Medical Center, USA
- Xiaona Chen** Department of Obstetrics and Gynaecology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China
- Charles Cook** Department of Surgery, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA
- Marion Coolen** Team Zebrafish Neurogenetics, A. Fessard Institute of Neurobiology, Laboratory of Neurobiology and Development, France
- Harold Cremer** Aix-Marseille University, CNRS, IBDM, France
- Catherine Czeisler** Center for Regenerative Medicine and Cell-Based Therapies, Department of Pathology, College of Medicine, The Ohio State University, USA
- Duaa Dakhallallah** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA
- Amitava Das** Department of Surgery, Center for Regenerative Medicine and Cell-Based Therapies and Comprehensive Wound Center, Davis Heart and Lung Research Institute, The Ohio State University Wexner Medical Center, USA
- Anne M. Delany** Center for Molecular Medicine, University of Connecticut Health Center, USA
- Dasa Dolezalova** Department of Anesthesiology, University of California San Diego, La Jolla, CA, USA; Department of Histology and Embryology, Faculty of Medicine, Masaryk University, Brno, Czech Republic
- Juan Domínguez-Bendala** Diabetes Research Institute, Leonard M. Miller School of Medicine, University of Miami, USA
- Costanza Emanuelli** Bristol Heart Institute, University of Bristol, UK
- Stefan J. Erkeland** Department of Hematology, Erasmus University Medical Center Cancer Institute, Rotterdam, The Netherlands

- Michael Ezzie** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA
- Pasquale Fasanaro** Laboratorio di Patologia Vascolare, Istituto Dermopatico dell'Immacolata-IRCCS, Italy
- Ariana Foinquinos** Institute of Molecular and Translational Therapeutic Strategies (IMTTS), IFB-Tx, Hannover Medical School, Germany
- Tiziana Franceschetti** Center for Molecular Medicine, University of Connecticut Health Center, USA
- Roberto Gambari** Department of Life Sciences and Biotechnology, University of Ferrara, Section of Biochemistry and Molecular Biology, Italy
- Shazia Ahmad** Boston University Medical Center, Boston, USA
- Subhadip Ghatak** Center for Regenerative Medicine and Cell-Based Therapies, Davis Heart and Lung Research Institute, The Ohio State University Wexner Medical Center, USA
- Le Luo Guan** Department of Agricultural, Food and Nutritional Science, University of Alberta, USA
- Denis C. Guttridge** Department of Molecular Virology, Immunology, and Medical Genetics, Human Cancer Genetics Program; Arthur G. James Comprehensive Cancer Center, The Ohio State University, Columbus, USA
- Patrick Edwin Gygli** Center for Regenerative Medicine and Cell-Based Therapies, Department of Pathology, College of Medicine, The Ohio State University, USA
- Khawaja H. Haider** Department of Pathology, University of Cincinnati, USA
- Aleš Hampl** Department of Histology and Embryology, Faculty of Medicine, Masaryk University, Brno, Czech Republic; International Clinical Research Center, St. Anne's University Hospital, Brno, Czech Republic
- Martin C. Harmsen** University of Groningen, University Medical Center Groningen, Department of Pathology and Medical Biology, Cardiovascular Regenerative Medicine Research Group (CAVAREM), The Netherlands
- Yoshinori Hasegawa** Department of Respiratory Medicine, Nagoya University Graduate School of Medicine, Japan
- Robert Hindges** MRC Centre for Developmental Neurobiology, King's College, UK
- Myron Hinsdale** Department of Physiological Sciences, Oklahoma State University, USA
- John D. Houlié** Department of Neurobiology and Anatomy, Spinal Cord Research Center, Drexel University College of Medicine, USA
- Lynsey Howard** Bristol Heart Institute, University of Bristol, UK
- Derryn Xin Hui Chan** Institute of Medical Biology, Agency for Science, Technology and Research (A\*STAR), Singapore
- Shunsuke Ichi** Department of Neurosurgery, Jikei University School of Medicine, Japan

**Massimo Innocenti** Department of Surgery and Translational Medicine, University of Florence, Italy

**Jared Jagdeo** Department of Dermatology, State University of New York Downstate Medical Center, USA

**Dominique A. Kagele** Department of Pathology, University of Utah School of Medicine, USA

**Mahmood Khan** Department of Emergency Medicine, Davis Heart and Lung Research Institute, College of Medicine, The Ohio State University Wexner Medical Center, USA

**Dagmar Klein** Diabetes Research Institute, Leonard M. Miller School of Medicine, University of Miami, USA

**Tatsuya Kobayashi** Endocrine Unit, Department of Medicine, Massachusetts General Hospital and Harvard Medical School, USA

**Dejuan Kong** Departments of Pathology, Barbara Ann Karmanos Cancer Institute, Wayne State University School of Medicine, USA

**Guido Krenning** University of Groningen, University Medical Center Groningen, Department of Pathology and Medical Biology, Cardiovascular Regenerative Medicine Research Group (CAVAREM), The Netherlands

**Yiwei Li** Departments of Pathology, Barbara Ann Karmanos Cancer Institute, Wayne State University School of Medicine, USA

**Kenneth W. Liechty** Children's Hospital Colorado, Department of Surgery University of Colorado School of Medicine; The Sanford Burnham Medical Research Institute, USA

**Thomas Lisse** Endocrine Unit, Department of Medicine, Massachusetts General Hospital and Harvard Medical School, USA

**Lin Liu** Department of Physiological Sciences, Oklahoma State University, USA

**Pamela Lloyd** Department of Physiological Sciences, Oklahoma State University, USA

**Leina Lu** Department of Chemical Pathology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China

**Theresa A. Lusardi** Robert Stone Dow Neurobiology Laboratories, Legacy Research Institute, USA

**Ettore Luzi** Department of Surgery and Translational Medicine, University of Florence, Italy

**Armando Macera** Department of Surgery and Translational Medicine, University of Florence, Italy

**Alessandra Magenta** Laboratorio di Patologia Vascolare, Istituto Dermopatico dell'Immacolata-IRCCS, Italy

**Nicola Antonio Maiorano** MRC Centre for Developmental Neurobiology, King's College, UK

**Obaid Malik** Department of Anesthesiology, The Ohio State University Wexner Medical Center, USA

**Andrew Mamalis** Department of Dermatology, University of California–Davis; Dermatology Service, Sacramento VA Medical Center, USA

**Barbara Mania-Farnell** Department of Biological Sciences, Purdue University–Calumet, USA

**Clay B. Marsh** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**C. Shekhar Mayanil** Developmental Biology Program, Stanley Manne Children’s Research Institute, Department of Pediatric Neurosurgery, Ann & Robert H. Lurie Children’s Hospital of Chicago; Feinberg School of Medicine, Northwestern University, USA

**David McLone** Department of Pediatric Neurosurgery, Ann & Robert H. Lurie Children’s Hospital of Chicago; Feinberg School of Medicine, Northwestern University, USA

**Selina Möbus** Cluster of Excellence REBIRTH, Hannover Medical School, Germany

**Peter J. Mohler** Department of Internal Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**Leni Moldovan** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**Paloma del C. Monroig** Department of Experimental Therapeutics, M.D. Anderson Cancer Center, University of Texas at Houston Health Science Center, USA

**Marek Mraz** Central European Institute of Technology, Center of Molecular Medicine, Masaryk University; Department of Hematology, Oncology and Internal Medicine, University Hospital Brno; Faculty of Medicine, Masaryk University, Czech Republic

**S. Patrick Nana-Sinkam** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**Laurent Nguyen** GIGA-Neurosciences; Interdisciplinary Cluster for Applied Genoproteomics (GIGA-R), University of Liège; Walloon Excellence in Lifesciences and Biotechnology (WELBIO), Belgium

**Ryan M. O’Connell** Department of Pathology, University of Utah School of Medicine, USA

**José Javier Otero** Department of Pathology, College of Medicine, The Ohio State University, USA

**Durba Pal** Center for Regenerative Medicine and Cell-Based Therapies, Davis Heart and Lung Research Institute, The Ohio State University Wexner Medical Center, USA

- Garyfallia Papaioannou** Endocrine Unit, Department of Medicine, Massachusetts General Hospital and Harvard Medical School, USA
- Ricardo L. Pastori** Diabetes Research Institute, Leonard M. Miller School of Medicine, University of Miami, USA
- Melissa G. Piper** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA
- Sophie Pirotte** GIGA-Neurosciences; Interdisciplinary Cluster for Applied Genoproteomics (GIGA-R), University of Liège, Belgium
- Giulio Pompilio** Laboratorio Biologia Vascolare e Medicina Rigenerativa, Centro Cardiologico Monzino IRCCS, Italy
- Srinivas Ramsamy** Institute of Medical Biology, Agency for Science, Technology and Research (A\*STAR), Singapore
- Josue Moura Romao** Department of Agricultural, Food and Nutritional Science, University of Alberta, USA
- Alessandra Rossini** Dipartimento di Scienze Cliniche e di Comunità, Università degli Studi di Milano, Italy
- Sashwati Roy** Department of Surgery, Center for Regenerative Medicine and Cell-Based Therapies and Comprehensive Wound Center, Davis Heart and Lung Research Institute, The Ohio State University Wexner Medical Center, USA
- Prabha Sampath** Institute of Medical Biology, Agency for Science, Technology and Research (A\*STAR), Singapore; Department of Biochemistry, Yong Loo Lin School of Medicine, National University of Singapore; Program in Cancer and Stem Cell Biology, Duke-NUS Graduate Medical School, USA
- Fazlul H. Sarkar** Departments of Pathology, Barbara Ann Karmanos Cancer Institute, Wayne State University School of Medicine, USA
- Mitsuo Sato** Department of Respiratory Medicine, Nagoya University Graduate School of Medicine, Japan
- Chandan K. Sen** Center for Regenerative Medicine and Cell-Based Therapies, The Ohio State University Wexner Medical Center, USA
- David S. Shames** Oncology Diagnostics, Genentech Inc., USA
- Saran Shantikumar** Bristol Heart Institute, University of Bristol, USA
- Amar Deep Sharma** Cluster of Excellence REBIRTH, Department of Gastroenterology, Hepatology and Endocrinology, Hannover Medical School, Germany
- M. Rizwan Siddiqui** Developmental Biology Program, Stanley Manne Children's Research Institute, Department of Pediatric Neurosurgery, Ann & Robert H. Lurie Children's Hospital of Chicago; Feinberg School of Medicine, Northwestern University, USA
- Mithun Sinha** Center for Regenerative Medicine and Cell-Based Therapies, The Ohio State University Wexner Medical Center, USA

**Hao Sun** Department of Chemical Pathology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China

**Yeqing Sun** Institute of Environmental Systems Biology, Dalian Maritime University, The People's Republic of China

**Hidetoshi Tahara** Department of Cellular and Molecular Biology, Graduate School of Biomedical Science, Hiroshima University, Japan

**Thomas Thum** Institute of Molecular and Translational Therapeutic Strategies (IMTTS), IFB-Tx, Hannover Medical School; National Heart and Lung Institute, Imperial College London, UK

**Esmerina Tili** Department of Molecular Virology, Immunology, and Medical Genetics, The Ohio State University Wexner Medical Center, USA

**Tadanori Tomita** Department of Pediatric Neurosurgery, Ann & Robert H. Lurie Children's Hospital of Chicago; Feinberg School of Medicine, Northwestern University, USA

**Joanne Trgovich** Department of Surgery, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**Janika Viereck** Institute of Molecular and Translational Therapeutic Strategies (IMTTS), IFB-Tx, Hannover Medical School, Germany

**Marie-Laure Volvert** GIGA-Neurosciences; Interdisciplinary Cluster for Applied Genoproteomics (GIGA-R), University of Liège, Belgium

**Jie-Mei Wang** Department of Surgery, University of Pittsburgh Medical Center, USA

**Lijun Wang** Department of Obstetrics and Gynaecology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China

**Huating Wang** Department of Obstetrics and Gynaecology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China

**Yijie Wang** Division of Pulmonary, Allergy, Critical Care, and Sleep Medicine, Davis Heart and Lung Research Institute and College of Medicine, The Ohio State University, USA

**Dan Xu** Institute of Environmental Systems Biology, Dalian Maritime University; Department of Cellular and Molecular Biology, Graduate School of Biomedical Science, Hiroshima University, Japan

**Junwang Xu** Children's Hospital Colorado, Department of Surgery, University of Colorado School of Medicine; The Sanford Burnham Medical Research Institute, USA

**Dakai Yang** Cluster of Excellence REBIRTH, Hannover Medical School, Germany

**Marina E. Zambrotta** Department of Neurobiology and Anatomy, Spinal Cord Research Center, Drexel University College of Medicine, USA

**Carlos Zgheib** Children's Hospital Colorado, Department of Surgery, University of Colorado School of Medicine; The Sanford Burnham Medical Research Institute, USA

**Yu Zhao** Department of Obstetrics and Gynaecology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China

**Liang Zhou** Department of Obstetrics and Gynaecology, Li Ka Shing Institute of Health Sciences, Prince of Wales Hospital, The Chinese University of Hong Kong, The People's Republic of China

-------------------	------

## Part 1 Stem Cells

<b>CHAPTER 1</b> MicroRNA Biogenesis in Regenerative Medicine .....	3
<i>Subhadip Ghatak, Chandan K. Sen</i>	
Glossary.....	4
1.1 Introduction .....	5
1.2 Macro Impact of miRNAs .....	8
1.3 miRNA Biogenesis: Different Paths to the Same Destination .....	9
1.3.1 Canonical Pathways .....	10
1.3.2 Noncanonical Pathways .....	13
1.4 Mechanisms of miRNA-Induced Translational Repression ..	15
1.5 miRNA Regulation .....	17
1.5.1 Transcriptional Regulation .....	17
1.5.2 Post-Transcriptional Regulation .....	17
1.5.3 miRNA Turnover .....	18
1.6 Methods for miRNA Profiling .....	20
1.6.1 Microarray-Based Screening .....	20
1.6.2 High-Throughput Sequencing-by-Synthesis Technology .....	21
1.7 Bioinformatics Analysis of miRNAs .....	23
1.7.1 miRNA Databases and Targets .....	23
1.7.2 Algorithms and Tools for Identifying miRNAs and their Targets .....	23
1.7.3 Elucidating miRNA Sequences by Direct Analysis of Next-Generation Sequencing Data .....	26
1.8 miRNA Applications in Regenerative Medicine .....	27
1.9 miRNAs and Stem Cells .....	28
1.9.1 Effect of Global Disruption of Mature miRNAs on Stem Cells .....	30

1.9.2 miRNA Regulation of ESC Proliferation .....	30
1.9.3 miRNA Regulation of ESC Differentiation .....	32
1.9.4 miRNA Regulation of Stem Cell Pluripotency .....	33
1.10 Conclusions and Future Perspectives .....	34
Chapter Questions .....	35
Essay .....	35
Short-Answer .....	35
Acronyms and Abbreviations .....	36
References .....	36
Further Reading .....	46
<b>CHAPTER 2</b> Control of Pluripotency and Reprogramming .....	47
<i>Catherine Czeisler, Patrick Edwin Gygli, José Javier Otero</i>	
Glossary .....	47
2.1 Introduction .....	50
2.2 Basic Properties of Stem Cells .....	50
2.3 Pluripotency .....	51
2.3.1 Control of Pluripotency by Intrinsic Stemness Factors .....	51
2.3.2 Control of Pluripotency by Extrinsic Stemness Factors .....	57
2.4 Nuclear Reprogramming .....	62
2.4.1 Induction of Pluripotency .....	62
2.4.2 Nuclear Reprogramming and miRNAs .....	64
2.5 Conclusions .....	65
Chapter Questions .....	67
Essay .....	67
Acronyms and Abbreviations .....	67
References .....	67
Further Reading .....	75
<b>CHAPTER 3</b> Epigenetic Modification of MicroRNAs .....	77
<i>Durba Pal, Subhadip Ghatak, Chandan K. Sen</i>	
Glossary .....	78
3.1 Introduction .....	80
3.2 The Epigenetic Landscape of a Healthy Cell .....	80
3.2.1 Post-Translational Histone Modification .....	80
3.2.2 DNA Methylation .....	82
3.2.3 RNA-Associated Silencing .....	84
3.3 miRNAs and Epigenetic Regulation .....	88
3.3.1 miRNA Control of Epigenetics .....	88
3.3.2 Epigenetic Control of miRNA Expression .....	89

3.3.3 Epigenetically Regulated miRNAs .....	92
3.3.4 miRNAs That Regulate Epigenetic Pathway Genes ...	95
3.4 A Generalized Model for Epigenetic Regulation of miRNAs in Determining Cell Fate .....	97
3.5 Epigenetic Modifications and Regenerative Medicine .....	98
3.6 Epigenetic Modifying Drugs .....	100
3.7 The Clinical Relevance of miRNAs and Epigenetic Modifying Drugs .....	100
3.8 Conclusions and Future Perspectives .....	101
Chapter Questions .....	102
Essay .....	102
Short-Answer .....	102
Abbreviations .....	103
References .....	103
Further Reading .....	109

## CHAPTER 4 miRNAs in Bone Marrow–Derived Mesenchymal Stem Cells ..... 111

*Junwang Xu, Carlos Zgheib, Kenneth W. Liechty*

4.1 Introduction .....	111
4.1.1 Mesenchymal Stem Cells .....	112
4.1.2 Applications in Wound Healing and Regeneration ...	113
4.2 Mechanisms of MSC Correction .....	115
4.2.1 Epithelialization .....	115
4.2.2 Neovascularization .....	116
4.2.3 Inflammation .....	117
4.2.4 ECM Production/Degradation .....	117
4.3 miRNAs in General and in Wound Healing .....	118
4.3.1 miRNA Regulation of Inflammatory Response .....	120
4.3.2 miRNA Modulation of Reepithelialization .....	121
4.3.3 miRNA Regulation of Angiogenesis .....	121
4.3.4 miRNA Regulation of ECM Remodeling .....	122
4.4 MSCs in miR-146A Expression: Attenuation of Inflammatory Response in Diabetic Wounds .....	123
4.5 Conclusions and Future Perspectives .....	129
Chapter Questions .....	130
Short-Answer .....	130
References .....	131

## CHAPTER 5 miRNAs in Cancer Stem Cells ..... 137

*Yiwei Li, Dejuan Kong, Aamir Ahmad, Bin Bao,  
Fazlul H. Sarkar*

5.1 Introduction .....	138
5.2 miRNA Regulation of Normal Stem Cells .....	142

5.2.1 miRNA Regulation of Cell-Signaling Pathways in Normal Stem Cells .....	142
5.2.2 miRNA Regulation of Embryonic, Hematopoietic, and Adult Stem Cells .....	144
5.3 miRNA Regulation of Cancer Stem Cells .....	146
5.3.1 miRNAs in the Regulation of CSC Phenotypes and Signaling Pathways .....	147
5.3.2 miRNAs That Promote CSCs in Various Cancers ....	148
5.3.3 miRNAs That Inhibit CSC Growth in Various Cancers .....	149
5.4 Regulation of miRNAs to Inhibit Cancer Stem Cells .....	151
5.4.1 Sense or Antisense Oligonucleotide Delivery for CSC Inhibition .....	152
5.4.2 Synthesized Agents for CSC Inhibition .....	152
5.4.3 Natural Agents in miRNA Regulation of CSC Inhibition .....	153
5.5 Conclusions and Future Perspectives .....	154
Chapter Questions .....	156
Essay .....	156
Short-Answer .....	156
Acknowledgments .....	156
References .....	157
Further Reading .....	161
<b>CHAPTER 6</b> MicroRNAs in Neural Stem Cells .....	163
<i>Christophe Beclin, Andreas Bosio, Harold Cremer</i>	
Glossary .....	163
6.1 Introduction .....	164
6.2 First Insights: Dicer-Knockout Mice .....	165
6.3 miRNA Control of NSC Status and Progression along Differentiation .....	167
6.3.1 Is NSC Maintenance miRNA Independent? .....	167
6.3.2 Induction of Differentiation .....	168
6.4 miRNAs as Neuronal Fate Determinants .....	172
6.4.1 Boundary Formation in the Spinal Cord .....	172
6.4.2 Neurotransmitter Phenotype Determination in the Forebrain .....	173
6.5 Conclusions and Future Perspectives .....	175
Chapter Questions .....	176
Short-Answer .....	176
References .....	177
Online Resources .....	181
Further Reading .....	182
