前 言

中央提出“沿海地区必须有领导、有计划、有步骤地走向国际市场，进一步参加国际交换和国际竞争，大力发展外向经济”。为了适应“不失时机地加快实现沿海地区经济发展战略，进一步扩大对外开放”的需要，向党政军机关、厂矿企业、科研、教育等事业单位及合资企业，国际投资者，广大华侨和港澳台同胞介绍沿海地区投资环境现状，我们特组织力量编制本图集。

编制本图集的目的有二：一是力求用准确的资料简洁的形象方式向广大使用本图的读者提供最有用的资料；二是给海外投资者，国内外向型企事业单位提供投资可行性的分析资料。

集中的用地图的形式阐明这样重大主题在国内尚属首次，我们期待这本图集能完成这一使命：

本图集的内容包括三部分：第一部分—沿海地区自然经济状况。比较多的图幅宏观地表示东部沿海地带自然条件、社会经济的统计分布和地理分布概况，并分省（直辖市、自治区）以地图和统计表格显示各自有关的社会经济要素的地理分布和经济指标。第二部分—沿海经济开放区、经济特区及开放城市。系以地图和文字说明显示包括长江三角洲在内的上海经济区、珠江及闽南两个三角洲、四个经济特区和十四个沿海开放城市的自然和社会经济状况，并重点阐明了它们的投资环境及有关经济指标。第三部分——中国经济状况。以全国分图的形式及统计表格显示全国自然条件及社会经济宏观的地理分布和统计分布，主要是为了以整体上提示沿海地带与内地在自然条件和社会经济上的联系和差异对比。

本图集的主要数据引自己属公开发表和出版的 1986 年的统计资料数据，在九个月内完成了整个编制出版工作。由于时间仓促，在资料的完备性内容的实用性方面一定会存在不足之处，敬请广大读者提出宝贵意见。

PREFACE

The central government of China has stipulated that 'the coastal areas must, under supervision, with proper plans and step by step, join the international market, international exchanges and international competition even further, devoting major efforts to developing an open economy'. The compilation of this atlas aims at selectively providing indicators of the natural economy, via the channel of maps, to authorities concerned as reference materials for an understanding of the state of the art of the natural condition, the economy and the environment for investment found in the coastal areas.

This atlas consists of three parts:

Part I---Situation of the natural economy in the coastal areas. Quite a few maps are devoted to giving a macroscopic view of the natural condition, the statistical distribution of the social economy and the generalization of the geographical distribution in the eastern coastal areas. There are also maps and tables showing the geographical distribution of the related social-economic elements and the economic indicators in provinces, municipalities and autonomous regions of minority nationalities respectively.

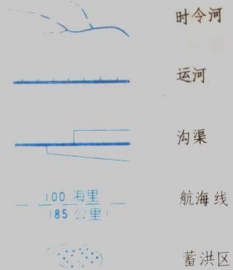

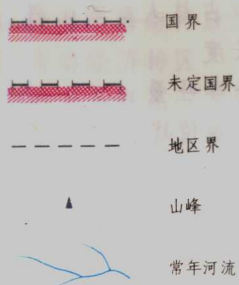

Part II---Open economic districts, special economic zones and open cities in the coastal areas. Both maps and literary explanation are available to illustrate the natural and social economic situation in Shanghai Economic District (including the Yangtze River Delta), the Pearl River and South Fujian Deltas, four special economic zones and fourteen open cities in the coastal areas. Emphasis is being laid on expounding the environment for investment which they offer and the economic indicators related.

Part III---The economic situation in China. By way of national thematic maps and statistical tables, indicated macroscopically are the geographical distribution and statistical distribution of the natural condition and social economy of the whole country, which is mainly for the integrated expression of the connection and contrast between coastal areas and inland areas shown in their natural conditions and social economies.

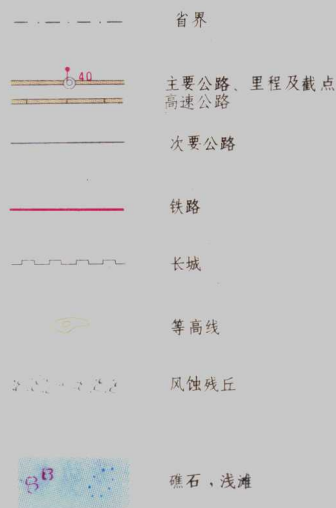

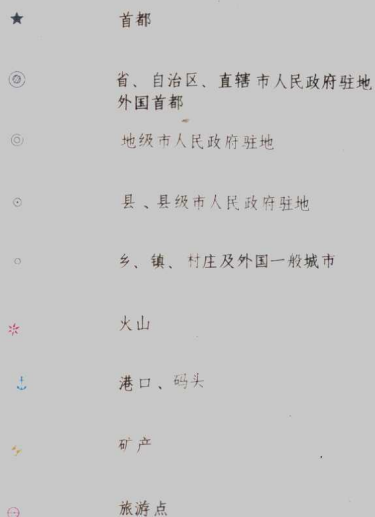

The main data in this atlas is from the 1986 statistics already published. In order to minimize the time difference and maximize the effectiveness, all efforts have been made to shorten the cycle of map compilation, which was completely finished within nine months. But this hurriedness must have affected the completeness of the data and the practicality of the content, for which comments and suggestion are invited from the circle of readers.
