Congratulatory Letter

Please accept my sincere congratulation. I wish the meeting success.

Science and technology are foremost part of the productive forces. Our economic construction must turn to reliance upon scientific progress and quality improving of labours. The Party and Government leaders at different level must pay great attention to the promotion of scientific and technological achievements. They should creat favourable conditions to set up gradually the system available to the achievement promotion, so that the promotion might become active in increasing economic results and working efficiency in industry, agriculture and some other fields.

Premier of the P.R.C.

前言

科学技术是生产力发展的重要动力,是人类社会进步的重要标志,科学技术进步有力地促进了经济发展,并改变了世界面貌和人类生活。我国正处在民族振兴的关键时期,科学技术发展和科技成果推广应用是民族振兴的重要因素。党中央制定了“经济建设必须依靠科学技术,科学技术工作必须面向经济建设”的科技方针,科技成果推广成为科技工作面向经济建设主战场的重要任务和关键环节。在党中央、国务院的关怀下,国家科委组织实施了“国家科技成果重点推广计划。”旨在努力为科技成果向生产力的转移创造良好的环境和条件,有组织、有计划地将一大批先进、成熟的科技成果推入国民经济建设主战场,动员成千上万科技工作者和全社会力量在广大农村、工矿企业大面积大范围组织实施,尽快形成规模效益,为国民经济发展和社会进步作出贡献。实施五年来,一批先进、成熟、覆盖面广的科技成果通过“推广计划”迅速进入国民经济的各个方面,转化为现实生产力,取得了显著的社会经济效益。

今年是“国家科技成果重点推广计划”出台五周年。结合宣传科技成果推广工作和科技成果而编印的这本画册,从一个侧面反映了“国家科技成果重点推广计划”的成就和所列项目的技术水平。相信通过这本画册,大家对“成果推广计划”将有更多的了解,使更多的人理解和支持成果推广工作,这将会使广大的科技推广工作者和为本画册付出辛勤劳动的所有同志感到由衷的欣慰。

PREFACE

Science and technology, a major driving force for the development of productive forces, is one of the most noticeable marks of the progress of human society. Scientific and technological advances greatly boost up the economy, and thus changing the world's face and rationalizing human life. China is now in a crucial period for the nation's vigorous rise, which will rely in good part on the development of science and technology and the extensive application of scientific and technological achievements. As Party's Central Committee has formulated the nation's science and technology policy — "Economic construction must rely on science and technology and scientific and technological work must be oriented to serving economic construction," the promotion of research results of science and technology becomes an important task and a key link in the endeavour of gearing scientific and technological work toward the primary battle field of economic construction. Under the care of the party's Central Committee and the State Council, the State Commission of Science and Technology has organized the implementation of "The State Key Scientific and Technological Achievements promotion Plan," to create necessary conditions and a favourable environment for turning scientific and technological achievements into productive forces, mobilize tens of thousands of scientific workers and forces of all sectors of the society to promote and apply in a planned and organized way numerous advanced and mature scientific and technological achievements in the primary battle field of economic construction — extensively in factories, mining enterprises and the rural areas — to produce "scale economic results" as quick as possible, and thus contribute to the development of national economy and the progress of the society. In the past five years of the implementation of the promotion plan, a large number of advanced, mature and widely applicable scientific and technological achievements have been put to use in a quite fast pace in various areas of our national economy and transformed to actual productive forces, which have yielded remarkable social economic returns.

Marking the fifth anniversary of the implementation of the promotion plan, this picture album of scientific and technological achievements represents from one aspect the success in the promotion work and the technology level of the projects concerned. We hope that readers will find in this book some useful information relative to the achievements promotion plan, and that the promotion work will enjoy wider understanding and support — this will certainly give tremendous gratification to all those who are engaged in the promotion work and those who have put in quite a lot of hard work in making possible the publication of this book.
