Do you live in a city? Do you know how cities began? Long long ago, the world had only a few thousand people. These people moved from place to place. They moved over the land, hunting animals for food.

No one knows how or when those people learned about growing food. But when they did, their lives changed. They did not have to look for food any more. They could stay in one place and grow it.

People began to live near one another. And so the first villages grew. Many people came to work in the villages. These villages grew bigger and bigger.

When people had machines, life in the village changed again. Factories were built. More and more people lived near the factories. So the villages grew into cities. Some of them grew very big.

Today, some people are moving back to small towns. Can you tell why?
