O'Reilly & Associates 公司介绍

O'Reilly & Associates 公司是世界上在 UNIX、X、Internet 和其他开放系统图书领域具有领导地位的出版公司，同时是联机出版的先锋。

从最畅销的*The Whole Internet User's Guide & Catalog* (被纽约公共图书馆评为 20 世纪最重要的 50 本书之一) 到 GNN (最早的 Internet 门户和商业网站)，再到 WebSite (第一个桌面 PC 的 Web 服务器软件)，O'Reilly & Associates 一直处于 Internet 发展的最前沿。

许多书店的反馈表明，O'Reilly & Associates 是最稳定的计算机图书出版商——每一本书都一版再版。与大多数计算机图书出版商相比，O'Reilly & Associates 公司具有深厚的计算机专业背景，这使得 O'Reilly & Associates 形成了一个非常不同于其他出版商的出版方针。O'Reilly & Associates 所有的编辑人员以前都是程序员，或者是顶尖级的技术专家。O'Reilly & Associates 还有许多固定的作者群体——他们本身是相关领域的技术专家、咨询专家，而现在编写著作，O'Reilly & Associates 依靠他们及时地推出图书。因为 O'Reilly & Associates 紧密地与计算机业界联系着，所以 O'Reilly & Associates 知道市场上真正需要什么图书。

出版说明

计算机网络与通信技术的成熟与广泛应用,以及 Internet 与 Web 的迅速发展,为人类的工业生产、商业活动和日常生活都带来了巨大的影响。网络与通信技术在我国的很多领域也已经广泛应用,并且取得了巨大的效益。然而,该领域的技术创新的速度之快也是有目共睹的。为了帮助国内技术人员和网络管理人员在第一时间掌握国外最新的技术,清华大学出版社引进了美国 O'Reilly & Associates 公司的一批、在计算机网络理论和 Open Source 方面代表前沿技术或者在某专项领域内享有盛名的著作,以飨读者。本套丛书采用影印版的形式,力求与国外图书“同步”出版,“原汁原味”地展现给读者各种权威技术理论和技术术语,适合于相关行业的高级技术人员、科研机构研究人员和高校教师阅读。

本批图书包括以下几种:

- 《802.11 安全手册 (影印版)》
- 《构建 Internet 防火墙 (影印版)》
- 《Java 技术手册 (影印版)》
- 《Open Sources (影印版)》
- 《WWW 信息体系结构 (影印版)》
- 《LINUX RAID 管理 (影印版)》
- 《Peer-to-Peer (影印版)》
- 《Java 实例技术手册 (影印版)》
- 《Free As In Freedom (影印版)》
- 《Unix 操作系统 (影印版)》

Preface

This book is a companion volume to my previous books *Java in a Nutshell*, *Java Foundation Classes in a Nutshell*, and *Java Enterprise in a Nutshell*. While those books are quick-references at heart, they also include accelerated introductions to various Java™ programming topics and small sets of example programs. I wrote *Java Examples in a Nutshell* to pick up where those books leave off, providing a suite of example programs for novice Java programmers and experts alike.

This book was a lot of fun to write. The first edition came about when Java 1.1 was released at more than double the size of Java 1.0. While I was busy writing additional examples for the second edition of *Java in a Nutshell*, the engineers at Sun were busy turning Java into something that could no longer quite fit in a nutshell. With its quick-reference section expanding so much, *Java in a Nutshell* could no longer hold many examples. We were able to include some examples of new Java 1.1 features, but we had to cut many more than we could include. This was a hard decision; the examples in *Java in a Nutshell* were one of its most popular features.

This book is the result of those cuts, and I am glad that we made the decision we did. Given the freedom to devote an entire book to examples, I was able to write the examples I really wanted to write. I was able to go into more depth than I ever would have before, and I found myself really enjoying the exploration and experimentation that went into developing the examples. For the second edition of the book, I had the pleasure of exploring and experimenting with new parts of the Java API: Swing™, Java 2D™, servlets, and XML. I hope you will use these examples as a starting point for your own explorations, and that you get a taste of the same excitement I felt while writing them.

As its name implies, this book teaches by example, which is how many people learn best. There is not a lot of hand-holding, nor will you find detailed documentation of the exact syntax and behavior of Java statements. This book is designed to work in tandem with *Java in a Nutshell*, *Java Foundation Classes in a Nutshell*, and *Java Enterprise in a Nutshell*. You'll probably find those volumes quite useful while studying the examples here. You may also be interested in the other books in the O'Reilly Java series. Those books are listed at <http://java.oreilly.com>.

This book is organized into three parts. Chapters 1 through 9 cover the core non-graphical parts of the Java API. The APIs covered in these chapters are documented in *Java in a Nutshell*. Chapters 10 through 15 form the second part of the book. These chapters demonstrate Java's graphics and graphical user interface APIs, which are documented in *Java Foundation Classes in a Nutshell*. Finally, Chapters 16 through 19 contain examples of Java enterprise APIs and complement the book *Java Enterprise in a Nutshell*.

You can read the chapters in this book in more or less whatever order they strike your interest. There are some interdependencies between the chapters, however, and some chapters really ought to be read in the order they are presented. For example, it is important to read Chapter 3, *Input/Output*, before you read Chapter 5, *Networking*. Chapter 1, *Java Basics*, and Chapter 2, *Objects, Classes, and Interfaces*, are aimed at programmers just starting out with Java. Seasoned Java programmers will probably want to skip them.

Java Examples Online

The examples in this book are available online, so you don't have to type them all in yourself! You can download them from the author's web site, <http://www.davidflanagan.com/javaexamples2>, or from the publisher's site, <http://www.oreilly.com/catalog/jenut2>. As typos and bugs are reported, you will also find an errata list at the publisher's site. The examples are free for noncommercial use. If you want to use them commercially, however, I ask that you pay a nominal commercial licensing fee. Visit <http://www.davidflanagan.com/javaexamples2> for licensing details.

Related Books from O'Reilly

O'Reilly publishes an entire series of books on Java. These books include *Java in a Nutshell*, *Java Foundation Classes in a Nutshell*, and *Java Enterprise in a Nutshell*, which, as mentioned earlier, are companions to this book.

A related reference work is the *Java Power Reference*. It is an electronic Java quick reference on CD-ROM that uses the *Java in a Nutshell* style. But since it is designed for viewing in a web browser, it is fully hyperlinked and includes a powerful search engine. It is wider in scope but narrower in depth than the *Java in a Nutshell* books. The *Java Power Reference* covers all the APIs of the Java 2 platform, plus the APIs of many standard extensions. But it does not include tutorial chapters on the various APIs, nor does it include descriptions of the individual classes.

You can find a complete list of Java books from O'Reilly at <http://java.oreilly.com>. Individual chapters in this book refer to specific books that may help you understand that material in more detail.

Conventions Used in This Book

The following formatting conventions are used in this book:

Italic

Used for emphasis and to signify the first use of a term. Italic is also used for commands, email addresses, web sites, FTP sites, file and directory names, and newsgroups.

Bold

Occasionally used to refer to particular keys on a computer keyboard or to portions of a user interface, such as the **Back** button or the **Options** menu.

Letter Gothic

Used in all Java code and generally for anything that you would type literally when programming, including keywords, data types, constants, method names, variables, class names, and interface names. Also used for command lines and options that should be typed verbatim on the screen, as well as tags that might appear in an HTML document.

Letter Gothic Oblique

Used for the names of method parameters and generally as a placeholder to indicate an item that should be replaced with an actual value in your program. Also used for variable expressions in command-line options.

Request for Comments

The information in this book has been tested and verified, but you may find that features have changed (or even find mistakes!). You can send any errors you find, as well as suggestions for future editions, to:

O'Reilly & Associates, Inc.
101 Morris Street
Sebastopol, CA 95472
(800) 998-9938 (in the United States or Canada)
(707) 829-0515 (international/local)
(707) 829-0104 (fax)

You can also send messages electronically. To be put on the mailing list or request a catalog, send email to:

info@oreilly.com

To ask technical questions or comment on the book, send email to:

bookquestions@oreilly.com

There is a web site for the book, where examples, errata, and any plans for future editions are listed. Before sending a bug report, you may want to check the errata list to see if the bug has already been submitted. You can access this page at:

<http://www.oreilly.com/catalog/jenut2>

For more information about our books, conferences, software, Resource Centers, and the O'Reilly Network, see our web site at:

<http://www.oreilly.com>

Acknowledgments

My thanks, as always, to my editor Paula Ferguson for pulling everything together into one coherent book and for putting up with my repeated schedule slippages. Thanks also to Frank Willison and Tim O'Reilly for being willing and enthusiastic to try this all-example book format.

I've had the help of a number of O'Reilly's other Java authors with this book. Jonathan Knudsen, author of several Java books from O'Reilly, reviewed the graphics and the printing chapters. Bob Eckstein, coauthor of *Java Swing*, reviewed the Swing chapter. Jason Hunter, author of *Java Servlet Programming*, reviewed the servlets chapter. Hans Bergsten, author of a forthcoming book on *JavaServer Pages™*, also reviewed the servlets chapter but focused his review on the JSP examples in particular. Brett McLaughlin, author of *Java and XML*, reviewed the XML chapter. George Reese, author of *Database Programming with JDBC and Java*, was kind enough to look over the database chapter. Jim Farley, author of *Java Distributed Computing* and coauthor of *Java Enterprise in a Nutshell*, reviewed the RMI examples. The expertise contributed by these reviewers has dramatically improved the quality of my examples. I am indebted to them all and recommend their books highly!

The production team at O'Reilly & Associates has again done a great job of turning the manuscript I submitted into a honest-to-goodness book. As usual, I am grateful to and awestruck by them.

Finally, I want to thank Christie, for reasons too numerous to list here.

David Flanagan

July 2000

Table of Contents

<i>Preface</i>	<i>xv</i>
----------------------	-----------

Part I: Core Java APIs

<i>Chapter 1 — Java Basics</i>	<i>3</i>
Hello World	3
FizzBuzz	7
The Fibonacci Series	10
Using Command-Line Arguments	10
Echo in Reverse	11
FizzBuzz Switched	12
Computing Factorials	13
Recursive Factorials	14
Caching Factorials	15
Computing Big Factorials	16
Handling Exceptions	17
Interactive Input	18
Using a StringBuffer	19
Sorting Numbers	21
Computing Primes	22
Exercises	23

Chapter 2 — Objects, Classes, and Interfaces	24
A Rectangle Class	25
Testing the Rect Class	26
A Rect Subclass	27
Another Subclass	27
Complex Numbers	28
Computing Pseudo-Random Numbers	30
Computing Statistics	32
A Linked List Class	33
Advanced Sorting	36
Exercises	42
 Chapter 3 — Input/Output	 44
Files and Streams	44
Working with Files	48
Copying File Contents	49
Reading and Displaying Text Files	52
Listing Directory and File Information	55
Compressing Files and Directories	60
Filtering Character Streams	62
Filtering Lines of Text	64
A Custom HTML Output Stream	65
Exercises	68
 Chapter 4 — Threads	 70
Thread Basics	71
Threads and Thread Groups	72
Deadlock	75
Timers	77
Exercises	82
 Chapter 5 — Networking	 84
Downloading the Contents of a URL	84
Using a URLConnection	86
Sending Email Through a URLConnection	87
Connecting to a Web Server	89
A Simple Web Server	91
A Proxy Server	93
Networking with Applets	96
A Generic Client	99

A Generic Multithreaded Server	101
A Multithreaded Proxy Server	113
Sending Datagrams	116
Receiving Datagrams	117
Exercises	119
<i>Chapter 6 — Security and Cryptography</i>	121
Running Untrusted Code	122
Loading Untrusted Code	123
Message Digests and Digital Signatures	128
Cryptography	136
Exercises	139
<i>Chapter 7 — Internationalization</i>	141
A Word About Locales	141
Unicode	142
Character Encodings	146
Handling Local Customs	148
Localizing User-Visible Messages	151
Formatted Messages	156
Exercises	159
<i>Chapter 8 — Reflection</i>	161
Obtaining Class and Member Information	161
Invoking a Named Method	164
Exercises	168
<i>Chapter 9 — Object Serialization</i>	169
Simple Serialization	169
Custom Serialization	172
Externalizable Classes	174
Serialization and Class Versioning	176
Serialized Applets	177
Exercises	178

Part II: Graphics and GUIs

<i>Chapter 10 — Graphical User Interfaces</i>	181
Components	183
Containers	189
Layout Management	190
Event Handling	203
A Complete GUI	217
Actions and Reflection	221
Custom Dialogs	222
Displaying Tables	227
Displaying Trees	230
A Simple Web Browser	234
Describing GUIs with Properties	242
Themes and the Metal Look-and-Feel	253
Custom Components	257
Exercises	263
 <i>Chapter 11 — Graphics</i>	 266
Graphics Before Java 1.2	267
The Java 2D API	276
Drawing and Filling Shapes	277
Transforms	279
Line Styles with BasicStroke	281
Stroking Lines	283
Filling Shapes with Paint	284
Antialiasing	287
Combining Colors with AlphaComposite	289
Image Processing	292
A Custom Shape	295
Custom Strokes	299
Custom Paint	303
Advanced Animation	305
Displaying Graphics Examples	308
Exercises	312

Chapter 12 — Printing	314
Printing with the Java 1.1 API	314
Printing with the Java 1.2 API	316
Printing Multipage Text Documents	319
Printing Swing Documents	327
Exercises	333
 Chapter 13 — Data Transfer	 334
Data Transfer Architecture	334
Simple Copy-and-Paste	335
A Transferable Data Type	338
Cutting and Pasting Scribbles	344
Dragging and Dropping Scribbles	347
Exercises	353
 Chapter 14 — JavaBeans	 354
Bean Basics	355
A Simple Bean	356
A More Complex Bean	360
Custom Events	364
Specifying Bean Information	365
Defining a Simple Property Editor	367
Defining a Complex Property Editor	369
Defining a Bean Customizer	371
Exercises	374
 Chapter 15 — Applets	 375
Introduction to Applets	375
A First Applet	377
A Clock Applet	378
Applets and the Java 1.0 Event Model	380
Java 1.0 Event Details	383
Reading Applet Parameters	385
Images and Sounds	387
JAR Files	391
Exercises	392

Part III: Enterprise Java

<i>Chapter 16 — Remote Method Invocation</i>	395
Remote Banking	396
A Bank Server	400
A Multiuser Domain	404
Remote MUD Interfaces	405
The MUD Server	408
The MudPlace Class	411
The MudPerson Class	418
A MUD Client	420
Advanced RMI	428
Exercises	429
<i>Chapter 17 — Database Access with SQL</i>	431
Accessing a Database	432
Using Database Metadata	438
Building a Database	441
Using the API Database	446
Atomic Transactions	450
Exercises	456
<i>Chapter 18 — Servlets and JSP</i>	458
Servlet Setup	458
A Hello World Servlet	461
Servlet Initialization and Persistence: A Counter Servlet	463
Database Access with Servlets	467
A Login Screen with JSP	471
Request Forwarding	476
JSP Pages and JavaBeans	477
Ending a User Session	482
Custom Tags	483
Deploying a Web Application	488
Exercises	492
<i>Chapter 19 — XML</i>	494
Parsing with JAXP and SAX 1	494
Parsing with SAX 2	499
Parsing and Manipulating with JAXP and DOM	502
Traversing a DOM Tree	506

Traversing a Document with DOM Level 2	508
The JDOM API	512
Exercises	514
<i>Chapter 20 — Example Index</i>	516
<i>Index</i>	535
