In schools boys and girls are learning foreign languages.

Do you know 1 how many languages there are in the world? There are about one thousand five hundred. English is one of the most important languages 2 because so many people use it, not only in England and America, but also in other countries 3 of the world. It is difficult 4 to say how many people are learning it. Millions (百万) of boys and girls are trying 5 to do so.

Many English children study French. French is also a very important language. Some children study German, Russian, Japanese and Chinese.

Which is the best 6 way to learn a language? We know that we all learn 7 our own language well when we were children. If we learn a second language in the same way, it won't seem so difficult. How does a small child do? He listens 8 to what people say, and he tries to guess what he hears. When he wants something, he has to ask for it. He is using the language, talking 9 in it and talking in it all the time. If people use 10 a second language all the time, they will learn it quickly.
