The popular 40-second Superman Ride was the most exciting thing about my trip to Six Flags amusement park in New England!

The ride was the best of the few hours that my friends and I spent there. We all went on the Superman Ride in pairs. I was with Val. The waiting line seemed neverending, but was actually only 15 minutes. When it was time for the ride, I felt knots (结) in my stomach and almost changed my mind!

The "drop" of 23 metres looks extremely high. The whole track is more than one mile long. The billboard (告示牌) says that you go 320 kilometres per hour on the ride. People told me it would take longer to climb the hill than the rest of the ride. I was scared to death.

Finally, I got into the car, went uphill for 20 seconds, then heard a sudden big screech(尖声喊叫). We looked straight down. We saw a faraway track and a small loop(弯曲部分). The screeching sound stopped and the car lurched (突然倾斜) forward. We rushed downhill and off our seats for one second until we got to the loop!

On the loop we were in mid-air most of the time and could hardly see anything. We could have been upside down because people sitting in the car can't tell up from down. Then we rushed through a small tunnel (隧道), fell back into the seats and were speeding up another hill. We lurched forward and down like before. After this, the ride was over.

I was so stunned (被吓晕) that I could not speak for at least 30 seconds. When I did speak, it was all about the ride!

Have you ever stayed in a hotel? Most Chinese hotels often provide guests with things like disposable (一次性的) toothbrushes, toothpaste, shampoo and slippers.

Many guests like the idea because they don't have to bring their own. But if you travel to Beijing, remember to bring your own things.

Starting from June 13, some hotels in Beijing will no longer provide guests with these disposables. Many disposable things are made of plastic. People throw them away after only using them once. It is a waste of natural resources(资源) and is very bad for the environment.

In Beijing, people throw away about 19,000 tons of plastic bags and 1,320 tons of lunch bowls every year!

Plastic can take between 100 and 400 years to break down. So the less plastic we throw out, the better.

So, wherever you travel, bring your own things and use them again and again. Back at home and school, you can also do something to make our world a better place. Try to do these things in your daily life:

Use clothe shopping bags, not plastic ones.

After using a plastic bag, wash it out and let it dry. Then you use it over and over again.

Do not use paper cups.

At your school canteen, use your own bowl and chopsticks instead of disposable ones.
