American Schools

American schools begin in September after a summer holiday. There are two terms (学期) in a school year, the first term is from September to January, and the second is from February to June. Most American children begin to go to school when they are five years old. Most children are seventeen or eighteen years old when they finish high school (中学毕业). High school students study only four or five subjects each term. They usually go to the same classes every day, and they have homework for every class. After class they do many interesting things.

After high school, many students go to college (上大学). They can go to a small or a large one. They usually have to give a lot of money. So many college students work after class to get the money for their studies.

American Families' Education (教育)

Most American families are smaller than the families in other countries. Most American families have one or two children each.

When children are about eighteen or nineteen they leave their parents' home. They often go to a different city, because they want to find good jobs. They often write to their parents, send e-mails or phone them. Sometimes they only visit their parents two or three times a year.

Parents usually let their children choose (选择) their jobs. Americans think it is important (重要的) for young people to decide (决定) on their lives by themselves.

Parents usually ask their children to do housework around their house. And in many families, parents give money for their work. In this way, the children can learn how to make money for their own use.

根据短文内容判断下列句子的正(T)误(F)。

- () 1. Generally speaking (一般来说), American families are small.

Sea Turtles (海龟)

Turtles can live in the sea and they can also live in fresh water (淡水) on the land. All turtles have thick shells (壳). The shell is a turtle's home.

Male (雄性的) sea turtles never leave the sea. Female (雌性的) sea turtles crawl (爬) onto land and find a place to lay their eggs (下蛋). Sometimes the place is very far from the sea. The female sea turtle dig (挖) a hole in the sand with her back feet. She lays about two hundred eggs at one time. Then she covers the hole up with sand. After all this, the female sea turtle walks back into the sea and never comes back to see the baby sea turtles.

After the baby sea turtles come out from the eggs, they know where the sea is. So they hurry into the sea.
