试 卷 一

Part I Listening Comprehension (20 minutes)

Section A

Directions: In this section, you will hear 10 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question there will be a pause. During the pause, you must read the four choices marked A), B), C) and D), and decide which is the best answer. Then mark the corresponding letter on the Answer Sheet with a single line through the centre.

Example: You will hear:

You will read: A) At the office.

C) At the airport.

B) In the waiting room.

D) In a restaurant.

From the conversation we know that the two were talking about some work they had to finish in the evening. This is most likely to have taken place at the office. Therefore, A) "At the office" is the best answer. You should choose [A] on the Answer Sheet and mark it with a single line through the centre.

Sample Answer [A][B][C][D]

19. A) The underground oil resources have not been affected.
- B) Most of the desert animals and plants have managed to survive.
 - C) The oil lakes soon dried up and stopped evaporating.
 - D) The underground water resources have not been polluted.
20. A) To restore the normal production of the oil wells.
- B) To estimate the losses caused by the fires.
 - C) To remove the oil left in the desert.
 - D) To use the oil left in the oil lakes.

Part II Reading Comprehension(35 minutes)

Directions: There are 4 passages in this part. Each passage is followed by some questions or unfinished statements. For each of them there are four choices marked A), B), C) and D). You should decide on the best choice and mark the corresponding letter on the Answer Sheet with a single line through the centre.

Passage One

Questions 21 to 25 are based on the following passage:

Unless we spend money to spot and prevent *asteroids* (小行星) now, one might crash into Earth and destroy life as we know it, say some scientists.

Asteroids are bigger versions of the *meteoroids* (流星) that race across the night sky. Most orbit the sun far from Earth and don't threaten us. But there are also thousands of asteroids whose orbits put them on a collision course with Earth.

Buy \$ 50 million worth of new telescopes rith now. Then spend \$ 10 million a year for the next 25 years to locate most of the space rocks. By the time we spot a fatal one, the scientists say, we'll have a way to change its course.

Some scientists favor pushing asteroids off course with nuclear weapons. But the cost wouldn't be cheap.

Is it worth it? Two things experts consider when judging any risk are: 1) How likely the event is; and 2) How bad the consequences if the event occurs. Experts think an asteroid big enough to destroy lots of life might strike Earth once every 500,000 years. Sounds pretty rare — but if one did fall, it would be the end of the world. "If we don't take care of these big asteroids, they'll take care of us." says one scientist. "It's that simple."

The cure, though, might be worse than the disease. Do we really want fleets of nuclear weapons sitting around on Earth? "The world has less to fear from *doomsday* (毁灭性的) rocks than from a great nuclear fleet set against them," said a New York Times article.

21. What does the passage say about asteroids and meteoroids?

- A) They are heavenly bodies different in composition.
- B) They are heavenly bodies similar in nature.

- C) There are more asteroids than meteoroids.
D) Asteroids are more mysterious than meteoroids.
22. What do scientists say about the collision of an asteroid with Earth?
A) It is very unlikely but the danger exists.
B) Such a collision might occur once every 25 years.
C) Collisions of smaller asteroids with Earth occur more often than expected.
D) It's still too early to say whether such a collision might occur.
23. What do people think of the suggestion of using nuclear weapons to alter the course of asteroids?
A) It sounds practical but it may not solve the problem.
B) It may create more problems than it might solve.
C) It is a waste of money because a collision of asteroids with Earth is very unlikely.
D) Further research should be done before it is proved applicable.
24. We can conclude from the passage that _____.
A) while pushing asteroids off course nuclear weapons would destroy the world
B) asteroids racing across the night sky are likely to hit Earth in the near future
C) the worry about asteroids can be left to future generations since it is unlikely to happen in our lifetime
D) workable solutions still have to be found to prevent a collision of asteroids with Earth
25. Which of the following best describes the author's tone in this passage?
A) Optimistic. C) Objective.
B) Critical. D) Arbitrary.

Passage Two

Questions 26 to 30 are based on the following passage:

Believe it or not, optical *illusion* (错觉) can cut highway crashes.

Japan is a case in point. It has reduced automobile crashes on some roads by nearly 75 percent using a simple optical illusion. Bent stripes, called *chevrons* (人字形), painted on the roads make drivers think that they are driving faster than they really are, and thus drivers slow down.

Now the American Automobile Association Foundation for Traffic Safety in Washington D. C. is planning to repeat Japan's success. Starting next year, the foundation will paint chevrons and other patterns of stripes on selected roads around the country to test how well the patterns reduce highway crashes.

Excessive speed plays a major role in as much as one fifth of all fatal traffic accidents, according to the foundation. To help reduce those accidents, the foundation will conduct its tests in areas where speed-related hazards are the greatest — curves, exit slopes, traffic circles, and bridges.

Some studies suggest that straight, horizontal bars painted across roads can initially cut the average speed of drivers in half. However, traffic often returns to full speed within months as drivers become used to seeing the painted bars.

Chevrons, scientists say, not only give drivers the impression that they are driving faster than they really are but also make a lane appear to be narrower. The result is a longer lasting reduction in highway speed and the number of traffic accidents.

26. The passage mainly discusses _____.
A) a new way of highway speed control C) a new approach to training drivers
B) a new pattern for painting highways D) a new type of optical illusion
27. On roads painted with chevrons, drivers tend to feel that _____.
A) they should avoid speed-related hazards
B) they are driving in the wrong lane
C) they should slow down their speed
D) they are approaching the speed limit
28. The advantage of chevrons over straight, horizontal bars is that the former _____.
A) can keep drivers awake C) will have a longer effect on drivers
B) can cut road accidents in half D) will look more attractive
29. The American Automobile Association Foundation for Traffic Safety plans to _____.
A) try out the Japanese method in certain areas
B) change the road signs across the country
C) replace straight, horizontal bars with chevrons
D) repeat the Japanese road patterns
30. What does the author say about straight, horizontal bars painted across roads?
A) They are falling out of use in the United States.
B) They tend to be ignored by drivers in a short period of time.
C) They are applicable only on broad roads.
D) They cannot be applied successfully to traffic circles.

Passage Three

Questions 31 to 35 are based on the following passage:

Amtrak (美国铁路客运公司) was experiencing a downswing in *ridership* (客运量) along the lines comprising its rail system. Of major concern to Amtrak and its advertising agency DDB Needham, were the long-distance western routes where ridership had been declining significantly.

At one time, trains were the only practical way to cross the vast areas of the west. Trains were fast, very luxurious, and quite convenient compared to other forms of transportation existing at the time. However, times change and the automobile became America's standard of convenience. Also, air travel had easily established itself as the fastest method of traveling great distances. Therefore, the task for DDB Needham was to encourage consumers to consider other aspects of train travel in order to change their attitudes and increase the likelihood that trains would be considered for travel in the west.

Two portions of the total market were targeted: 1) anxious fliers — those concerned with safety, relaxation, and cleanliness and 2) travel-lovers — those viewing themselves as relaxed, casual, and interested in the travel experience as part of their vacation. The agency then developed a campaign that focused on travel experiences such as freedom, escape, relaxation, and enjoyment of the great western outdoors. It stressed experiences gained by using the trains and portrayed western train trips as wonderful adventures.

Advertisements showed pictures of the beautiful scenery that could be enjoyed along some of the more famous western routes and emphasized the romantic names of some of these trains (*Empire Builder*, etc.). These ads were strategically placed among family-oriented TV shows and programs in-

volving nature and America in order to most effectively reach target audiences. Results were impressive. The Empire Builder, which was focused on in one ad, enjoyed a 15 percent increase in profits on its Chicago to Seattle route.

31. What's the author's purpose in writing this passage?

- A) To show the inability of trains to compete with planes with respect to speed and convenience.
- B) To stress the influence of the automobile on America's standard of convenience.
- C) To emphasize the function of travel agencies in market promotion.
- D) To illustrate the important role of persuasive communication in changing consumer attitudes.

32. It can be inferred from the passage that the drop in Amtrak ridership was due to the fact that _____.

- A) trains were not suitable for short distance passenger transportation
- B) trains were not the fastest and most convenient form of transportation
- C) trains were not as fast and convenient as they used to be
- D) trains could not compete with planes in terms of luxury and convenience

33. To encourage consumers to travel by train, DDB Needham emphasized _____.

- A) the freedom and convenience provided on trains
- B) the practical aspects of train travel
- C) the adventurous aspects of train trips
- D) the safety and cleanliness of train trips

34. The train ads were placed among family-oriented TV programs involving nature and America because _____.

- A) they could focus on meaningful travel experiences
- B) they could increase the effectiveness of the TV programs
- C) their profits could be increased by some 15 percent
- D) most travel-lovers and nervous fliers were believed to be among the audiences

35. According to the passage, the Empire Builder enjoyed an increase in ridership and profits because _____.

- A) the attractiveness of its name and route was effectively advertised
- B) it provided an exciting travel experience
- C) its passengers could enjoy the great western outdoors
- D) it was widely advertised in newspapers and magazines in Chicago and Seattle

Passage Four

Questions 36 to 40 are based on the following passage:

Why does cream go bad faster than butter? Some researchers think they have the answer, and it comes down to the structure of the food, not its chemical composition — a finding that could help rid some processed foods of chemical preservatives.

Cream and butter contain pretty much the same substances, so why cream should sour much faster has been a mystery. Both are emulsions — tiny *globules* (小球体) of one liquid evenly distributed throughout another. The difference lies in what's in the globules and what's in the surrounding liquid, says Brocklehurst, who led the investigation.

In cream, fatty globules drift about in a sea of water. In butter, globules of a watery solution are locked away in a sea of fat. The bacteria which make the food go bad prefer to live in the watery regions of the mixture. "This means that in cream, the bacteria are free to grow throughout the mixture," he says.

When the situation is reversed, the bacteria are locked away in *compartments* (隔仓室) buried deep in the sea of fat. Trapped in this way, individual colonies cannot spread and rapidly run out of *nutrients* (养料). They also slowly poison themselves with their waste products. "In butter, you get a self-limiting system which stops the bacteria growing," says Brocklehurst.

The researchers are already working with food companies keen to see if their products can be made resistant to bacterial attack through alterations to the food's structure. Brocklehurst believes it will be possible to make the emulsions used in salad cream, for instance, more like that in butter. The key will be to do this while keeping the salad cream liquid and not turning it into a solid lump.

36. The significance of Brocklehurst's research is that _____.
A) it suggested a way to keep some foods fresh without preservatives
B) it discovered tiny globules in both cream and butter
C) it revealed the secret of how bacteria multiply in cream and butter
D) it found that cream and butter share the same chemical composition
37. According to the researchers, cream sours faster than butter because bacteria _____.
A) are more evenly distributed in cream
B) multiply more easily in cream than in butter
C) live on less fat in cream than in butter
D) produce less waste in cream than in butter
38. According to Brocklehurst, we can keep cream fresh by _____.
A) removing its fat C) reducing its water content
B) killing the bacteria D) altering its structure
39. The word "colonies" (Line 2, Para. 4) refers to _____.
A) tiny globules C) bacteria communities
B) watery regions D) little compartments
40. Commercial application of the research finding will be possible if salad cream can be made resistant to bacterial attack _____.
A) by varying its chemical composition
B) by turning it into a solid lump
C) while keeping its structure unchanged
D) while retaining its liquid form

Part II Vocabulary and Structure (20 minutes)

Directions: There are 30 incomplete sentences in this part. For each sentence there are four choices marked A), B), C) and D). Choose the ONE answer that best completes the sentence. Then mark the corresponding letter on the Answer Sheet with a single line through the centre.

41. She ought to stop work; she has a headache because she _____ too long.

A) has been reading C) is reading

- B) had read D) read

试 卷 二

Part V Writing(30 minutes)

Directions: For this part, you are allowed thirty minutes to write a composition on the topic **How I Finance My College Education**. You should write at least 100 words, and base your composition on the outline (given in Chinese) below:

1. 上大学的费用(tuition and fees)可以通过多种途径解决
2. 哪种途径适合于我(说明理由)

How I Finance My College Education

2000 年 6 月大学英语四级考试试题

试 卷 一

Part I Listening Comprehension (20 minutes)

Section A

Directions: In this section, you will hear 10 short conversations. At the end of each conversation, a question will be asked about what was said. Both the conversation and the question will be spoken only once. After each question there will be a pause. During the pause, you must read the four choices marked A), B), C) and D), and decide which is the best answer. Then mark the corresponding letter on the Answer Sheet with a single line through the centre.

Example: You will hear:

You will read: A) At the office.

C) At the airport.

B) In the waiting room.

D) In a restaurant.

From the conversation we know that the two were talking about some work they had to finish in the evening. This is most likely to have taken place at the office. Therefore, A) "At the office" is the best answer. You should choose [A] on the Answer Sheet and mark it with a single line through the centre.

Sample Answer [A] [B] [C] [D]
