# Rotho Blaas Limited Company

Rotho Blaas有限公司

The "Rotho Blaas" office is a large-scale commercial operation specializing in assembling systems and power tools for the woodworking industry. Warehouse and commissioning are situated on the ground floor whereas administration, a meeting room and a showroom can be found on the upper floor. The aim of the project was to

create a compact building with a high level of recognition. The building acts as corporate identity of the enterprise—contemporary and representative company. This has led to a functional, compact structural shell, provided with a glass envelope. The main building material employed is wood in order to show the own products.

Rotho Blaas 办公楼是一个大型的商业场所，专门为木材加工行业提供集成系统和电动工具。仓库和调试车间位于建筑的一层，而行政办公室、会议室和陈列室则位于二层。该项目致力于打造一个具有高度标志性的紧凑建筑。办公楼为企业的形象标志——典型的现代公司。实用且紧凑的结构框架饰有玻璃外壳，主要建筑材料采用木材以展示其公司产品。

# Blaas General Partnership

## Blaas普通合作公司

The company Blaas in Bolzano is specialized in electro-mechanics. On the ground floor the building there is the sales division, on the first floor the exposition area and the repair shop. All administration offices are located on the second floor. The overall impression of the structure is a homogenous and closed building. Nevertheless, there exists a separation between the public and the private sector. The client can perceive this clear and formal internal division already from the outside.

The glass facade on the northern side provides a maximum of visibility and transparency to the exhibition and sales area. In order to establish an optimal relation between natural light, development and planning of spaces, there has been created a luminous entrance hall in the centre of the building with an inner courtyard. This green open spot permits the administrative sector of the second floor to receive ample natural light and at the same time it generates a protected, quiet recreation area for the staff.
