Toward New Opportunity of Industrial Design

2009 is the fourth year since the establishment of China Red Star Design Award and also a year in which the Award is progressing. With a jury of international experts, strict and impartial judging procedures, broad engagement range of enterprises, candidate products of high quality, magnificent award ceremony, worldwide promotion and mutual certification with Icsid, the Red Star Award is recognized as an international brand with high credibility.

In 2009, the Red Star Award totally collected 3821 products from 758 enterprises, extending its coverage to 74% of all the Chinese administrative regions. The numbers of enterprises and products increase by 34% and 21% respectively compared with last year. Therein, the category of candidate furniture increases by 146% than last year and the category of equipment by 100%. Companies running for the competition take 76% of the total candidate enterprises, including the consecutive participants like Lenovo, Haier, Vatti, Oulin, Midea, Qumei and Toread, and the design companies which have received Reddot Award like Leo Design, UI Design, Penpower Technology and Yoropen.

Over the past four years, 68 experts from 12 countries and regions like America, Britain, Germany, France, Japan, Korea, Australia, Chinese Taiwan and Hong Kong regions have been the jury members. They are from various fields such as design, science and technology, economy, media and marketing. The international and trans-disciplinary characteristics of the jury ensure the authoritativeness and fairness of the Red Star Award.

The Red Star Award focuses on promoting the brand value, being invited to 18 cities such as Hong Kong, Tianjin, Shanghai, Fuzhou, Xi'an, Nanjing, Qingdao and so on to carry out 28 tour exhibitions. We organized more than 20 interactivities between both domestic and overseas enterprises and local manufacturing factories. We organize promotion and marketing activities for awarded enterprises in tour exhibitions to increase their order numbers.

With the influence of the Red Star Award extending, its social response comes conspicuous. Almost one hundred awarded enterprises like Changhong, Skyworth, Konka and Aigo publicize their products with their being awarded by the Red Star Award as commercials, gaining more market proportion.

Through strict judging, a total of 191 products from 102 enterprises are awarded. In addition, in order to award the excellent designs in the public parade for the 60th anniversary of the new China, We specially adds a Special Prize for the 60th Anniversary for the excellent float design.

In 2009 which marks the 60th anniversary of the new China, every Chinese can touch the pulse of the rapid development of society and economy. When life comes relatively affluent, we begin to pursue "design life" of higher quality, thus design consumption becomes more dynamic. Confronting new opportunities and challenges, the Red Star Award has a long way to go.

The young Red Star Award just takes the first step of a long march. We are confident that the Red Star Award has a bright future; it will flourish in synchrony with China and grows to be an award with worldwide influence.

Red Star over China is innovative China.
