PREFACE

When I suggested to my colleagues William Bowman and Stephen Thesleff that we organize a Symposium dedicated to aminopyridines and related compounds, they were immediately enthusiastic in supporting my proposal. We all three agreed indeed that such derivatives have provided an ever increasing interest in neurophysiology and neuropharmacology in the last twenty five years. Fortunately our project rapidly received support from all of the colleagues we contacted in order to deliver lectures.

Many scientists all round the world have published papers using aminopyridines as tools for investigating ionic channel properties and the mechanisms involved in neurotransmission at different levels: neuromuscular junction, as well as central and autonomic synapses. Moreover was it not a wonder to have such a simple chemical with such a powerful activity, therefore so very tempting for all those engaged in structure-activity relationship studies? Some new therapeutic perspectives have also been opened by these derivatives. It seemed therefore useful to have a meeting where workers, old pioneers as well as young researchers, could present their results and discuss all together. The two-and-a-half day Symposium that took place in Paris in July 1981 seems to have achieved this aim. Like all scientific meetings of limited size, it enabled its one hundred participants to have personal contacts and lay fundations for future fruitful collaboration between laboratories. The contributions of participants from 25 countries comprised an up-to-date review of present knowledge and hopefully served to stimulate future research.

The present Proceedings have been organized in eight sections according to the original Scientific Programme. They include the full papers of invited Lectures, Abstracts of oral Communications and Posters presented. The available discussions have been added after the respective scientific sessions. In order to achieve a rapid publication of these Proceedings, the texts have been prepared directly by the authors which are fully responsible for their camera-ready typescripts.

Finally, it is a pleasure to acknowledge my indebtedness to my collaborators Drs. Madeleine Lemeignan and Jordi Molgo for their untiring efforts in preparing the meeting as well as these Proceedings. I wish also to thank the technicians and secretary of my laboratory Mrs. Chantal Angeli, Mrs. Jeanine Josso, Mrs. Nicole Lettéron and Miss Annic Rodallec for their valuable assistance in preparing the meeting and during the scientific sessions.

Let me hope that the reading of these Proceedings will provide the best justification for this Symposium, opening the way to another one in a few years...

PAUL LECHAT

ACKNOWLEDGEMENTS

The Organizers wish to express their gratitude for donations received from the pharmaceutical firms listed below:

Allard, Boots-Dacour, Bristol-Meyers, Pharmuka,
Merck-Sharp & Dohme-Chibret, Rhône Poulenc Santé.

Anphar-Rolland, Ciba-Geigy, Delagrange,
Pierre Fabre S.A., Fournier S.A., Ipsen-Beaufour, "Produits Roche S.A.",
Riker, Sandoz, Sanofi, Searle, Servier, Unicet, Winthrop.

Bayer-Pharma, Beecham-Sévigné, Clin-Midi,
Janssen-Le Brun, Manceau S.A., Synthélabo S.A., Innothéra, Théramex.

LIST OF PARTICIPANTS

- AGOSTON Sandor, Department of Anaesthesiology, University Hospital, Oostersingel 59, 9700 RB Groningen, The Netherlands.
- BALL A. Peter, Infectious Diseases Unit, Cameron Hospital, Windygates, Fife, KY8 5RR, United Kingdom.
- BARNARD Eric A., Department of Biochemistry, Imperial College of Sciences and Technology, London SW 7, United Kingdom.
- BARNARD Penelope J., Department of Biochemistry, Imperial College of Sciences and Technology, London SW 7, U.K.
- BERGMAN Claude, Laboratoire de Neurobiologie, Ecole Normale Supérieure, 46, rue d'Ulm, 75230 Paris Cedex 05, France.

AMINOPYRIDINES AND SKELETAL, SMOOTH AND CARDIAC MUSCLE

Lectures

- Effects of 4-aminopyridine on contractile properties of skeletal muscle 249
K.A.P. EDMAN and A.R. KHAN

- Effects of 4-aminopyridine on cardiac muscle 261
T. YANAGISAWA and N. TAIKA

Oral communications

- Effects of 4-aminopyridine on isometric force - $[Ca^{++}]$ - relations in mammalian slow and fast twitch skinned muscle fibres 275
R. FINK and D.G. STEPHENSON

- 4-aminopyridine and outward membrane currents in rat uterine smooth muscle at various stages of pregnancy 276
J.P. SAVINEAU, J. MIRONNEAU and Ch. MIRONNEAU

- Effects of 4-aminopyridine on membrane currents in the pace-maker voltage range of sheep cardiac Purkinje fibres 277
P.P. Van BOGAERT

- Is the cardiotonic effect of aminopyridines and aminopyrimidines *in vitro* a consequence of increased extracellular pH? 278
M. SHAHID and I.W. RODGER

Discussion 279

CLINICAL APPLICATIONS OF AMINOPYRIDINES

Lectures

- Therapeutic applications of aminopyridines in diseases of neuromuscular transmission 287
H. LUNDH

- Use of 4-aminopyridine in human botulism 297
A.P. BALL, M. SNOW and R. PAUL

- Therapeutic applications of 4-aminopyridine in anaesthesia 303
S. AGOSTON, D.R.A. UGES and R.L. SIA

Oral communications

- Effects of 3,4-diaminopyridine in Cynomolgus monkeys poisoned with type A botulinum toxin 313
G.E. LEWIS and R.M. WOOD

Discussion 315

FURTHER MISCELLANEOUS ACTIONS OF AMINOPYRIDINES AND RELATED COMPOUNDS: SHORT COMMUNICATIONS

Oral communications

Potassium channel block by S-methylthiouronium, a pharmacological analogue of 4-aminopyridine <i>F.N. FASTIER, M. PELHATE and B. HUE</i>	321
Differences in actions of 4-aminopyridine and 4-methyl-2-aminopyridine <i>W.E. GLOVER</i>	322
Effects of aminopyridines in avian muscular dystrophy <i>P.J. BARNARD, E.A. BARNARD and E.S. ALLAN</i>	323
Comparison of the actions of dendrotoxin, a facilitatory neurotoxin, and 3,4-diaminopyridine on neuromuscular transmission <i>A.L. HARVEY</i>	324
Effects of aminopyridines on parasympathetic neuroeffector transmission in the heart <i>W. WEIDE, R. LINDMAR and K. LÖFFELHOLZ</i>	325
Effects of 4-aminopyridine on endocrine cells <i>O. SAND, K. HOVE, S. OZAWA, K. GAUTVIK and E. HAUG</i>	326
An electroencephalographic study of 4-aminopyridine in conscious volunteers <i>R.L. SIA, S. BOONSTRA, P. WESTRA, H.T.M. HAENEN and H. WESSELING</i>	327
<u>Discussion</u>	329
Conclusions <i>W.C. BOWMAN</i>	335
