About the Authors

Ronald B. Adler lives in Santa Barbara, California, and is professor of communication at Santa Barbara City College. His professional time is divided between writing, teaching, and consulting—especially helping professionals and business executives to improve their communication skills at work. Among his numerous books are *Looking Out/Looking In* (with Neil Towne), now in its seventh edition, *Interplay: The Process of Interpersonal Communication* (with Lawrence Rosenfeld and Neil Towne), now in its fifth edition, and *Communicating at Work: Principles and Practices for Business and the Professions*, now in its fourth edition.

George Rodman is professor of communication at Brooklyn College, City University of New York. He is the author of *Public Speaking* (now in its third edition from Holt, Rinehart and Winston), and the editor of *Mass Media Issues* (now in its fourth edition), which was nominated for the 1993 McGannon Communication Research Center Award. He has also written a taped self-study course titled “Professionally Speaking.” Professor Rodman has written for television, film, journals, magazines, and newspapers, and is listed in both *Who’s Who in Education* and *Who’s Who in Entertainment*.

About the Cover Artist

Synthia Saint James, a self-taught Los Angeles artist, has been painting for more than twenty-five years. Her Cherokee, African, and Haitian cultural heritage is evident in her art—as is her love of travel, custom, and traditions. Her award-winning work can be seen in museum and gallery exhibitions, as well as gracing posters, greeting cards, and the covers of books (such as this one). The painting reproduced here, “10-K Walk,” celebrates the uniting of people to save the children of the world.

Although the title *Understanding Human Communication* has survived for five editions, the name says both too much and too little about this book. On one hand, it's presumptuous to claim that any textbook can enable students to completely understand the complex phenomenon of human communication. On the other, the word *understanding* doesn't describe everything we hope this book will do for its readers. Along with expanding student knowledge, *Understanding Human Communication* aims to help readers improve their communication *behavior*. If we've done our job (and if professors and students do theirs), people who use this book should recognize an improvement in their own face-to-face behavior with others.

Basic Approach

Understanding Human Communication is aimed at two audiences: nonmajors, for whom this book may be the only systematic look they take at the subject, and students who are using the course as an overview for more detailed study in future courses.

Like its predecessors, this edition refuses to take sides in the theory *vs.* skills debate that rages endlessly within the communication discipline. Instead, it shows how theory and research help students operate more effectively in everyday life, and how everyday behavior illustrates the value of scholarship. This balanced approach means that students can expect to finish the basic course well equipped both to talk in an informed manner about communication and to talk more effectively with the people who are important to them.

This edition retains the features that have been received so well in the past: clear explanations presented in a user-friendly writing style, a visually inviting design, and a wealth of supplementary epigrams, sidebars, cartoons, and photos.

Changes in This Edition

Longtime users will recognize some important changes in this edition:

Improved design Besides its handsome new look, this edition of *Understanding Human Communication* has been designed to make the information it contains clearer and easier to use. Exercises now appear at the end of sections to improve the flow of text. Headings have been redesigned to clarify their level and relative importance.

Emphasis on core concepts The book still contains only fifteen chapters, recognizing that time is a precious commodity in the basic course. Careful editing has kept the overall length of the book manageable, despite the inclusion of new material described below. At the suggestion of many users, the fundamentals of interpersonal communication now occupy two chapters of manageable length (Chapters 6 and 7) instead a single, extremely long one. Chapter 8 now focuses exclusively on interviewing, covering the topic in both job-related and personal contexts.

Increased number and variety of student exercises At the request of many reviewers, the new edition of *Understanding Human Communication* contains an increased number of activities, which are clearly identified by learning goal:

- **Invitation to Insight** Probes that increase the reader's awareness of principles introduced in the text.

- **Skill Builder** Activities that give students practice in communication skills.
- **Ethical Challenge** Thought-provoking questions and case studies that invite students to ponder the ethical issues raised explicitly or implicitly in the text.
- **Critical Thinking Probe** Activities that encourage readers to question topics they otherwise might accept without careful evaluation.

Recommended resources at the end of each chapter. These are suggestions for readers who want to explore topics further. The suggestions fall into two categories:

- **Print resources** Carefully chosen scholarly books and articles, as well as trade books and magazine articles, that expand upon material from the text.
- **Films** Feature films that demonstrate how principles and skills from the text operate in settings beyond the classroom.

New appendix on mass communication A new appendix, “Understanding Mass Communication,” addresses the importance of mass media, milestones in mass communication history, social effects of media, and ethical and legal issues. The appendix makes this information available to users who want a comprehensive introduction to all communication contexts, without distracting those who want to focus on face-to-face interaction.

Comprehensive, integrated treatment of culture and gender. We believe that the influences of culture and gender on human communication deserve special attention. Because they operate in every context, we have deliberately integrated them throughout the book. For example, Chapter 2 contains a new section on the influence of culture on the self-concept. Major sections of Chapter 3 show how both gender and cultural factors affect speech in ways far more subtle and powerful than many readers might suspect. New material in Chapter 7 discusses how gender and culture influence conflict style. Chapter 9 describes how group members’ cultural backgrounds influence their interaction—a topic not treated in any other survey texts.

Many new topics Besides updating research citations throughout the book, the new edition introduces a variety of new topics, including:

- A new section on *communication competence* (Chapter 1) introduces this important concept early, establishing a clear framework for learning communication skills throughout the book.
- Chapter 2 has been reorganized to show more clearly that perception operates in two dimensions: perception of self and of others. A new section on impression management establishes clear link between self-concept and communication behavior.
- A new section on “Troublesome Language” (Chapter 3) goes beyond discussing misunderstandings. It also highlights language considered by some to be “unnecessarily disruptive” and discusses the pros and cons of such strategies as euphemism and equivocation.
- Material on listening (Chapter 4) has a more positive emphasis. The chapter still discusses the extent and costs of poor listening, but the focus is now on how to listen more effectively. Expanded sections on informational, critical, and empathic listening develop skills in each of these areas.
- In Chapter 7, indirect communication is distinguished from passive aggression as a direct conflict style. This chapter now offers detailed information on how to construct and deliver assertive messages.
- An expanded discussion of *leadership* (Chapter 10) clarifies this important concept in both leaderless groups and those with a designated head.

- Coverage of persuasive speaking (Chapter 15) has been expanded to emphasize the importance of building credibility. This chapter also provides advice for addressing indifferent and hostile audiences.

Ancillary Instructional Aids

Professors and students can benefit from several instructional aids that will make teaching more efficient and learning more effective.

- **Instructor's Manual** This comprehensive manual, prepared by Mary Bozik, has been expanded and revised to offer even more teaching suggestions and clearer examination questions.
- **Subscription to the *Speech Communication Teacher*** Adopters of *Understanding Human Communication* will receive a complementary subscription to the *Speech Communication Teacher* newsletter, published by the Speech Communication Association. This periodical provides a wealth of classroom-tested activities developed by communication professionals.
- **Transparency Masters** The Instructor's Manual contains masters for overhead transparencies that can be used in lectures and discussions to highlight key concepts in the textbook.
- **Videotapes** A new videotape is available without charge to adopters of the textbook. The videotape shows how communication principles introduced in this edition of *Understanding Human Communication* operate in everyday life. Three additional videotapes, by Sharon Ratliffe and David Hudson, cover interpersonal, group, and public communication, making this package among the most complete in the field.

Acknowledgments

A book as comprehensive as *Understanding Human Communication* is not the product of its authors alone. We are grateful to our colleagues from around the country whose suggestions have made this edition more accurate and effective:

Brad Atchison, University of Alaska; Mary Bozik, University of Northern Iowa; Steven Bruning, Capital University; Lee Buxton, Highline Community College; Pam Cilek, St. Charles County Community College; Elizabeth Coughlin, Northern Virginia Community College—Alexandria; Stanley Crane, Hartnell College; Blanton Croft, Northern Virginia Community College—Woodbridge; Robert Dixon, St. Louis Community College at Meramec; Bud Hazel, Gonzaga University; Patricia Hoatson, St. Petersburg Junior College; Bobbie Klopp, Kirkwood Community College; Mildred McBride, Yakima Valley Community College; Rita Miller, Keene State College; Susan Miskelly, Bridgewater State College; Donald Nobles, Auburn University; Mary Osentowski, Richland College; David Raybourn, Boise State University; Richard Rea, University of Arkansas; Robert Rudd, Boise State University; David Still, Cape Cod Community College; Edwina Stoll, DeAnza College; Eric Trumbull, Northern Virginia Community College—Woodbridge; David Wallace, Jacksonville State University; Alan Wenzel, Highland Community College; Doris Werkman, Portland Community College; and Paul Westbrook, Northeastern State University.

We continue to feel gratitude for the suggestions of reviewers from previous editions of *Understanding Human Communication*. Their ideas continue to be useful:

Richard Arthur, Montana State University; Martha Atkins, Iowa State University; Ruth Aurelius, Des Moines Area Community College; Alice Bante, St. Louis Community College at Meramec; Ann E. Busse, Northern Illinois University; Daniel Canary, Portland Community College; Dan Chandler, New York City College/SUNY; Susan Coffey,

Central Virginia Community College; Carley Dodd, Abilene Christian University; Judy Goldberg, Arapahoe Community College; Suzanne Hagen, University of Wisconsin at River Falls; Diane Harney, Florida State University; Janet Hartman, Kirkwood Community College; David Hough, Vincennes University; Albert Katz, University of Wisconsin-Superior; Melba Kop, Chaminade University of Honolulu; Paul D. Krivonos, California State University-Northridge; Judith Litterst, St. Cloud State University; Don Morlan, University of Dayton; Kaye J. Nubel, Saddleback College; Gwenn D. Schultz, Portland State University; John P. Sprowl, University of Connecticut; Jo Young Switzer, Purdue University; Charlotte Toguchi, Kapiolani Community College; and Barbara Willard, Florida State University.

We also wish to extend thanks to the following members of our focus group from St. Louis Community College at Meramec: Alice Bante, Linda Bianca, Dianne Breitwieser, Chris Carenza, Marilyn Davis, Bob Dixon, Jim Greer, Phil Hanson, Jan Mirikitani, Ray Sikes, and Sue Stanton.

Finally, we owe a tremendous debt to the professionals at Harcourt Brace College Publishers whose unflagging attention have helped *Understanding Human Communication* to achieve its full potential: Janet Wilhite, Barbara Rosenberg, Laurie Runion, Kathleen Ferguson, David A. Day, John Ritland, Karen Bolin, and Clifford Crouch. Marco Ruiz created the line drawings illustrating this edition, while the artwork gracing the cover is the creation of Synthia Saint James. We are also grateful to our photo researcher and text designer, Janet Bollow, whose creativity continues to enhance the content of *Understanding Human Communication*.

Ronald B. Adler
