## Foreword

This English-Japanese pictorial dictionary is based on the *Oxford-Duden Pictorial German-English Dictionary* published in 1980. The English text was produced by the German Section of the Oxford University Press Dictionary Department in cooperation with the Dudenredaktion of the Bibliographisches Institut, Mannheim, and with the assistance of various British companies, institutions, and specialists. Numerous modifications of the text and illustrations of the original work have been carried out, especially regarding the depiction of everyday objects and situations, in order to allow greater scope for the treatment of these objects and situations in the context of English-speaking countries. The Japanese text was prepared by the English Language Teaching Department of Oxford University Press, Tokyo, with the assistance of Japanese specialists, whose names appear overleaf.

There are certain kinds of information which can be conveyed more readily and clearly by pictures than by definitions and explanations alone: an illustration will complement the simple translation by helping the reader to visualize the object denoted by the word and to form an impression of the way in which objects function in their own technical field or in the everyday life of English-speaking countries. The layout of the illustrations and the text will be particularly useful to the learner. Each double page of the dictionary contains a list of the vocabulary of a subject together with a picture illustrating this vocabulary. This arrangement, and the presence of alphabetical indexes in English and Japanese, allows the book to be used in two ways: either as a key to the vocabulary of a subject or as an alphabetical bilingual dictionary in which the reader is referred to the section or sections in which the word is illustrated. This, together with the wide range of vocabulary, including a large proportion of specialized words and technical terms, makes the *Oxford-Duden Pictorial English-Japanese Dictionary* an indispensable supplement to any English-Japanese or Japanese-English dictionary.
