PREFACE

While many books deal with computers, hardly any are just plain fun to read and use. This book does not explain the insides of computers or describe all possible ways to use them. Rather, it lets the reader do exciting things with the computer and see action unfold on the screen. It assumes no prior knowledge of computers or programming. The reader will learn about computers and enjoy doing it.

After introducing a few fundamentals, the book slowly leads the beginner through drawing pictures, aliens, spacecrafts, and monsters. Then we introduce sound, and the pictures are able to come to life. Spaceships, airplanes, tanks, and strange creatures can then make noises as they move, turn, fire, blink, and attack. We then introduce the idea of controlling the action from the keyboard. The reader now is able to create simple arcade games.

All the discussions and early programs are short. The reader will find it easy to use the examples to create new games. A significant fringe benefit of this fun is that you will actually be learning the skills needed for practical applications in business, education, engineering, management, and science.

This particular version of the book uses the popular Apple II computer (or a look-alike, such as the Franklin Ace). It assumes at least a 32K system with at least one disk drive. Although some programs use a printer, it is not essential. No special graphics equipment is necessary, since we draw all pictures with ordinary PRINT statements. The reader can simply enter a program and watch the action on the screen.

I hope this book provides many hours of enjoyment for its readers, both as a learning tool and as a reference. I hope it also encourages them to build a comfortable relationship with the computer, and thus free their imaginations for creative work. This is the key to obtaining the greatest benefit from today's amazing personal computers.

Tony Fabbri

CONTENTS

PREFACE

xiii

Chapter 1 INTRODUCTION 1

Chapter 2 SIMPLE PRINTING 9

Program 2-1	Print Animal Names	9
Program 2-2	Print DOG Twenty Times	12
Program 2-3	Print Your Name Ten Times	12
Program 2-4	Your Name in Columns	13
Program 2-5	Your Name Filling Screen	13
Program 2-6	Your Name Fancy	14
Program 2-7	Your Name on Paper	14
Program 2-8	Your Name in a Diagonal Pattern	15
Program 2-9	Friend's Name in a Diagonal Pattern	16
Program 2-10	Two Names in Crossing Pattern	17
Program 2-11	Crossing Pattern on Paper	18

Chapter 3 DRAWING PICTURES 19

Program 3-1	Face Moving Left to Right	19
Program 3-2	Creature Moving Left to Right	20
Program 3-3	Two Faces Moving Left to Right	21

Program 3-4	Monster Face Moving Right to Left	21
Program 3-5	Gorilla Moving Right to Left	22
Program 3-6	Car Moving Left to Right	22
Program 3-7	Airplane Moving Left to Right	23
Program 3-8	Sailboat Moving Right to Left	23
Program 3-9	Tank Moving Right to Left	23
Program 3-10	Alien Face Moving Back and Forth	24
Program 3-11	Bug Moving Back and Forth	24
Program 3-12	Cow's Face Moving Back and Forth Five Times	25
Program 3-13	Tank Moving Back and Forth Eight Times	25

Chapter 4

MAKING SOME THINGS MOVE WHILE OTHERS STAND STILL

27

Program 4-1	Small Rocket Moving Left to Right	27
Program 4-2	Tank Firing Rocket Left to Right	27
Program 4-3	Airplane Firing Rockets Left to Right	28
Program 4-4	Cannon Firing Rocket Left to Right	28
Program 4-5	Arrow Shot at Target	29
Program 4-6	Car Driving through Town	29
Program 4-7	Bee Flying to Flower, Right to Left	30
Program 4-8	Bee Flying to Flower, Left to Right	31

Chapter 5

MAKING ROCKETS FLY, BLAST OFF, AND CHASE ONE ANOTHER

32

Program 5-1	Rocket	32
Program 5-2	Rocket Flying Fast	32
Program 5-3	Enemy Rocket Chasing Three Rockets with Smoke	33
Program 5-4	Alien Spacecraft Flying with Smoke	34

Chapter 6

MAKING CREATURES WALK

36

Program 6-1	Moving Bug	37
Program 6-2	Moving Bug with Blinking Eyes and Open Mouth	37
Program 6-3	Figure Walking	38
Program 6-4	Funny, Moving Aliens	39

Program 6-5	Stationary Creature Making Faces	39
Program 6-6	Horse Grazing	40

Chapter 7 **POSITIONING FIGURES ON THE SCREEN** 41

Program 7-1	Moving Face with TABs	41
Program 7-2	Moving Face with VTAB and HTAB	42
Program 7-3	Rearranged Version of Moving Face, with VTABs and HTABs	43
Program 7-4	Names All Over	43
Program 7-5	Space Station Firing a Bullet	44
Program 7-6	Space Station Firing a Missile	45

Chapter 8 **ERASING OLD PICTURES AND DOING THINGS AT RANDOM** 46

Program 8-1	Moving Ball, without Erasure	47
Program 8-2	Moving Ball, with Erasure	47
Program 8-3	Game of Catch	48
Program 8-4	Asterisks at Random Positions	50
Program 8-5	Asterisks Appear and Disappear at Random Positions	50
Program 8-6	Faces Appear and Disappear at Random Positions	51
Program 8-7	Fireworks	53

Chapter 9 **ENTERING NAMES AND DRAWING GREETING CARDS** 54

Program 9-1	Printing Your Name Twenty Times	55
Program 9-2	Your Name Moving Right	55
Program 9-3	Input Names in Crossing Pattern	56
Program 9-4	Input Names around the Screen	56
Program 9-5	Valentine's Day Card	57
Program 9-6	Valentine's Day Card on Paper	58
Program 9-7	Christmas Card	59
Program 9-8	New Year's Card	59
Program 9-9	Birthday Card	60
Program 9-10	Another Birthday Card	60
Program 9-11	Halloween Card	61
Program 9-12	Mother's Day Card on Paper	61
Program 9-13	Easter Card	62

Chapter 10**STORIES AND QUIZZES****63**

Program 10-1	Short Story with One Name	63
Program 10-2	Short Story with Two Names	64
Program 10-3	Short Story with Three Names	64
Program 10-4	History and Geography Questions	65
Program 10-5	Simple History Quiz	65
Program 10-6	History Quiz with Three Questions	66
Program 10-7	Geography Quiz with One Alphabetic Question	67
Program 10-8	Geography Quiz with Four Alphabetic Questions	67

Chapter 11**CONTROLLING ACTION FROM THE KEYBOARD****68**

Program 11-1	Space Station Firing Missile under Keyboard Control	69
Program 11-2	Eye Creatures Moving Left to Right	70
Program 11-3	Target Practice	70

Chapter 12**MAKING NOISE****72**

Program 12-1	Constant Hum	72
Program 12-2	Complex Sound	72
Program 12-3	Rocket Launch with Sound	73
Program 12-4	Eyes Making Noises	73
Program 12-5	Blinking Eye Creatures Making Noises	74
Program 12-6	Print Hello Slowly	74
Program 12-7	Three Blinking Eye Creatures Talking	75
Program 12-8	Moving Eye Creature Making Sounds	75
Program 12-9	Moving Alien Making Noise	76
Program 12-10	Police Car with Siren	76
Program 12-11	Alien Spacecraft with Sound	77
Program 12-12	Blinking Eye Creatures Making More Noise	77
Program 12-13	Tank Command	78

Chapter 13**PRODUCING FALLING OBJECTS****79**

Program 13-1	Falling Asterisk without Erasure	79
Program 13-2	Falling Asterisk with Erasure	80
Program 13-3	Falling Spider	80

Program 13-4	Falling Alien	81
Program 13-5	Blinking, Falling Alien	81
Program 13-6	Blinking, Falling Alien (Shortcut)	82
Program 13-7	Blinking, Falling, Screeching Alien	82
Program 13-8	Race Car Moving Down the Screen	83
Program 13-9	Race Car Moving Around the Screen	85
Program 13-10	Falling Bug	86
Program 13-11	Falling Bug in Random Column	87
Program 13-12	Bug Moving Up and Down	88
Program 13-13	Paratrooper Landing	89

Chapter 14

MAKING A BOMBING GAME

90

Program 14-1	Falling Bomb	91
Program 14-2	Bomb Falling to Ground, with Noise	91
Program 14-3	Small Bomb Falling, with Noise	92
Program 14-4	Bombing under Keyboard Control	92
Program 14-5	Moving a Bomb Right and Left and Dropping It	93
Program 14-6	Bombs Away Game	95
Program 14-7	Enemy Bomber Dropping Bombs	97
Program 14-8	Enemy Bomber Bombing Ground, with Explosion	98

Chapter 15

MOVING THINGS DIAGONALLY

100

Program 15-1	Creature Moving Diagonally, with Shadow	100
Program 15-2	Creature Moving Diagonally, without Shadow	101
Program 15-3	Alien Moving Diagonally	102
Program 15-4	Asterisk Moving Diagonally from Column 15	103
Program 15-5	Alien Moving Diagonally Left to Right	103
Program 15-6	Alien Moving to Bottom Diagonally, Then Up	104
Program 15-7	Alien Hop	106
Program 15-8	Eye Creature Moving Diagonally, Right to Left, from Bottom	108
Program 15-9	Eye Creature Moving Diagonally, Right to Left, from Top	110
Program 15-10	Alien Moving Diagonally, Right to Left, from Top	110

Chapter 16	COMBINING PROGRAMS	111
Program 16-1	Moving the Master Spaceship	112
Program 16-2	Drawing a Miniship	113
Program 16-3	Moving a Miniship	114
Program 16-4	Master Alien Spaceship Attacking, with Miniships	114
Chapter 17	CONTROLLING MOTION IN ALL DIRECTIONS	116
Program 17-1	Bomb Drop Game	117
Program 17-2	Rocket Moving Anywhere	118
Program 17-3	Scattering Objects for Rocket to Hunt	121
Program 17-4	Rocket Attacks Objects	121
Program 17-5	Rocket Game	123
Chapter 18	SCREEN CONTROL—FLASH AND INVERSE	126
Program 18-1	Blinking Name at Random Positions	126
Program 18-2	Bright Aliens at Random Positions	127
Program 18-3	Blimp with Blinking Message	127
Program 18-4	Christmas Tree with Blinking Lights	128
Program 18-5	Haunted House with Bats, Cat, and Spider	129
Program 18-6	Large, Blinking, Walking Bugs	132
Chapter 19	TARGET PRACTICE	133
Program 19-1	Asterisk Moving Up Diagonally	134
Program 19-2	Asterisk Moving Down Diagonally	135
Program 19-3	Missile Destroys Target	135
Program 19-4	Tank Shoot	136
Program 19-5	Tank Shooting at Alien Ship	137
Program 19-6	Jet Firing Missile at Alien Ship	138
Chapter 20	MOVING TWO THINGS AT ONCE	140
Program 20-1	Ship and Submarine Moving in Different Directions	140
Program 20-2	Ship, Submarine, Ocean, and Birds	141
Program 20-3	Keyboard Control of Missile Launch	144

Chapter 21	ANIMATION	146
	Program 21-1 Stationary Swimmer	147
	Program 21-2 Swimmer Moving Left to Right	149
	Program 21-3 Shark and Swimmer in Water	151
Chapter 22	RACE CAR GAME	153
	Program 22-1 Race Track	153
	Program 22-2 Car Racing around Track	154
	Program 22-3 Car Race on Advanced Race Track	156
Chapter 23	AIRPLANE GAME	158
	Program 23-1 Stationary Airplane at Bottom	158
	Program 23-2 Airplane Moving along Bottom	159
	Program 23-3 Airplane Moving along Bottom, without Shadow	160
	Program 23-4 Airplane Firing Laser Blast	161
CHAPTER 24	SHOOTING AT A MOVING TARGET	163
	Program 24-1 Bouncing Target	163
	Program 24-2 Artillery Gun Firing Bullet	164
	Program 24-3 Artillery Gun Firing under Keyboard Control	165
	Program 24-4 Target Practice with Moving Target	166
CHAPTER 25	BASE SHIP GAME	168
	Program 25-1 Moving Base Ship Left and Right	168
	Program 25-2 Base Ship with Boundaries	169
	Program 25-3 Base Ship with Falling Objects	170
	Program 25-4 Base Ship Game	172
	INDEX	174

INTRODUCTION

The Apple II is one of the most popular personal computers. Although it is only the size of a typewriter (with a television set perched on top or at the side), it is as powerful as computers of the 1960s that occupied entire rooms and cost hundreds of thousands of dollars. What can you do with an Apple II? Among its many uses are:

1. Word processing (electronic production of letters, reports, and books without erasures, misspellings, and typing errors).
2. Business calculations, such as figuring interest rates, loan payments, rates of return, and cost of capital.
3. Mailing lists (maintaining them and printing sets of labels).
4. Producing club directories, team rosters, indexes, bibliographies, and other collections of information.
5. Handling the accounting, sales records, payroll, and inventory for a small business.
6. Producing tax returns and figuring ways to reduce taxes.
7. Billing for doctors, dentists, attorneys, accountants, and other professionals.
8. Computer-aided instruction from grade school through college, and in special education as well.
9. Creating charts, graphs, slides, and visual aids.
10. Scheduling parts of projects, such as the construction of a building or the development of a new product.
11. Teaching games, such as chess, bridge, and blackjack.
12. Keeping track of client records and accounts for insurance agents, realtors, brokers, salespeople, contractors, and architects.
13. Playing space, adventure, sports, and mathematical games.

14. Keeping track of stocks, bonds, real estate, and other investments. The Apple II can even obtain the latest financial news over the telephone.
15. Designing circuits, buildings, bridges, vehicles, and mechanisms.

These are only a few of the Apple II's many applications. Thousands of people use Apple IIs every day in the arts, business, education, engineering, finance, government, and science, as well as for recreation.

COMPONENTS OF AN APPLE II

The Apple II (see Figure 1-1) consists of three distinct pieces of equipment (we call these, collectively, the *hardware*):

1. The computer itself, a box with a sloping front that has keys like those of a typewriter.
2. A modified television set (called a *monitor*) with an on/off switch and knobs to adjust contrast and brightness.
3. One or two small boxes with rectangular slits in the front. These are the *disk drives*.

Figure 1-1 Photograph of Apple II Computer System (Photo compliments of Apple Computer, Inc.)

THE COMPUTER

First, let us discuss the computer. The on/off switch is located in the back; it is placed out of the way since you seldom want to turn the computer on and off. The keys that resemble those of a typewriter are used to enter data and instructions. What happened to the typing mechanism? Well, the Apple II uses the television or video display instead.

The small box with a rectangular slit in the front is a disk drive. This is like a record player, except that it plays thin, flexible disks (hence the name *floppy disk*). The disks used with the Apple II are 5 1/4" in diameter and are called diskettes, minidisks, or minifloppies. We will call them *diskettes*.

That is all you can see of the computer. The electrical parts are inside the cabinet and are organized much like the nervous system of a person. There is:

1. A brain, generally called the *central processing unit*, or CPU.
2. Memory. Its only notable feature is that it forgets everything when you turn the power off. That's why you don't want to turn the power off very often. When you quit for the day, you save anything you might need on a diskette.
3. Connections to the outside world, generally called *interfaces*. These are like the body's nerves and muscles, which provide information to the brain and translate its commands into actions.

VIDEO DISPLAY

The monitor or video display is like a television set except that it shows computer output rather than television programs. The screen can hold 24 lines of 40 symbols or *characters*. We can think of this as a grid (see Figure 1-2), consisting of 24 lines or rows and 40 columns. We shall refer to the rows as #1 through #24 (from top to bottom, with #1 at the top), and to the columns as #1 through #40 (from left to right). This arrangement will seem upside-down if you are used to drawing on graph paper. You should make copies of the grid in Figure 1-2, since we will use it to draw things and position them on the screen.

Having results printed on a screen rather than on paper may seem strange at first. It is nice because it is much easier to change or erase things on a screen than on paper. In fact, if you work with a screen for a while, using a printer will seem like writing with a nonerasable pen. But there's a problem with the screen: you don't get a permanent record (or *hard copy*) of your work. What if you want to see something you did an hour ago or yesterday? Besides, you can't send someone your screen in an envelope. So it's still nice to have a printer. We will explain how to use a printer, but we won't spend much time on it.

Figure 1-2 Screen Layout

KEYBOARD

The keyboard (see Figure 1-3) resembles that of a portable typewriter. However, it differs from that of a typewriter in the following ways:

1. No lower-case (small) letters. The Apple II prints all letters as capitals.
2. No lock for the SHIFT keys. These keys are used to type upper-case symbols (the upper markings on keys that show two characters). You must press a SHIFT key each time you want an upper-case symbol; the best approach is to hold SHIFT down while you press the other key.
3. The RETURN key (at the far right) not only concludes a line but also enters it into the computer. Thus it acts more like an ENTER key than like a carriage return. In fact, if you type a line that is more than 40 characters long, the Apple will automatically continue it on the next line of the screen. This is still a single line as far as the computer is concerned; you must end it by pressing RETURN.
4. Two arrow keys, one pointing left and the other right, just below RETURN. These are the backspace and forward keys. They let you move the *cursor* (the blinking object that indicates where you are working) right or left. If you backspace, be sure to move to the end of the line before pressing RETURN; the computer saves the line only up to where the cursor is.
