Volume 14

Vorwort

Die Notwendigkeit der schnellen, zeitsparenden mündlichen Verständigung und der platzsparenden schriftlichen Information läßt die Zahl der Acronyme und Abkürzungen für häufig gebrauchte Gegenstände und Begriffe ständig anschwellen. Sie beherrschen die technisch-wissenschaftlichen Fachsprachen und Fachtexte und sind einem kleinen Kreis von Spezialisten, der ständig mit bestimmten Objekten und Termini umgeht, vollkommen verständlich. Kaum aber jemandem, der sich als Techniker, Wissenschaftler oder Fachübersetzer in ein neues Gebiet einarbeiten muß, oder aber wichtige fachwissenschaftliche Literatur in einer Fremdsprache verfolgen will.

In mehrjähriger Vorbereitung hat der Herausgeber mehr als 150.000 deutsche und anglo-amerikanische Abkürzungen aus dem technisch-wissenschaftlichen Bereich zusammengetragen. Davon kommen mehr als 60 % aus dem anglo-amerikanischen Sprachbereich, der für die Bildung von Abkürzungen schon immer besonders intensiv war. Wegen der hervorragenden Bedeutung der anglo-amerikanischen Fachliteratur aller Gebiete sind die mehr als 100.000 Auflösungen der Abkürzungen dieses Sprachbereichs gerade auch für alle jene Benutzer dieses Handbuchs von größter Wichtigkeit, für die Anglo-Amerikanisch als Fremdsprache gilt.

Die Quellen für die Abkürzungen sind mehr als 800 Zeitschriften, darunter wurden insbesondere laufend ausgewertet: *Die Technik* (DDR), *elektronische Rechenanlagen* eR (BRD), *IEEE Transactions* (US), *Japan Electronic Industries* JEI (Japan), *New Scientist* (GB), *Österreichische Ingenieur Zeitschrift* ÖIZ (Österreich), *Raumfahrtforschung* (BRD), *Schweizerische Technische Zeitschrift* STZ (Schweiz), *Science* (US), *Umwelt* (BRD) und *Wissenschaft und Fortschritt* (DDR), und zahlreiche neueste Standardwerke, besonders aber die Normenwerke: BS (British Standards), IS (Indian Standards), ANSY (American Standards), DIN (Deutsche Industrie Normen), TGL (Standards der DDR), ÖN (Österreichische Normen), (ein Quellenverzeichnis befindet sich am Schluß von Teil 3). Die laufende Auswertung garantiert den aktuellsten Stand für die Belege. Dies ist besonders wichtig für die ständig im Fortschritt befindlichen Gebiete wie elektronische Datenverarbeitung, Luft- und Raumfahrttechnik, Medizin, Erziehung oder militärische Technik.

Die aus zwei bzw. drei Sprachen zusammengestellten Abkürzungen lassen erkennen, daß die gleiche Form der Abkürzung sehr Verschiedenes bezeichnet, nur in seltenen Fällen ist dasselbe gemeint, wie z.B. al. = alcohol (anglo-amerikanisch), Al. = Alkohol (deutsch); dagegen bedeutet die Abkürzung BMR sowohl ‚Basal Metabolic Rate‘ als auch ‚Basal Metabolism Reading‘ und außerdem ‚Bildröhrenmeßregenerator‘ und ‚Bremsmotor mit Rippenkühlung‘.

Das Wörterbuch der *Anglo-amerikanischen und deutschen Abkürzungen in Wissenschaft und Technik* stellt die notwendige Ergänzung dar zum früher erschienenen *Internationalen Wörterbuch der Abkürzungen von Organisationen*. Diese beiden Nachschlagewerke zusammen mit den Spezialverzeichnissen *Abkürzungen in der Medizin* und *Abkürzungsverzeichnis zur französischen Rechts- und Verwaltungssprache* bieten eine der umfassendsten Informationsquellen im internationalen Bereich.

München, im März 1976

Foreword

The need for quick, time-saving oral communication and for space-saving written information has caused the number of acronyms and abbreviations for terms and concepts in common use to grow continually. They dominate the specialist language and literature of science and technology and are completely understood only by a small circle of specialists, who work with them daily. This is however scarcely the case with those who have to work their way as technicians, scientists or scientific translators into a new field, or those who wish to keep up with important specialist literature in a foreign language.

Over a period of many years the editor has compiled more than 150,000 German and Anglo-American abbreviations from the field of science and technology. Of these more than 60 % are to be found in the Anglo-American sphere, which had always been specially active in creating abbreviations. On account of the predominant position that Anglo-American specialist literature in all fields holds, the more than 100,000 examples listed here are of paramount importance for all those who are coming to Anglo-American as a foreign language.

The sources for the abbreviations are more than 800 periodicals, of which the following were given special prominence: Die Technik (GDR), Elektronische Rechenanlagen eR (FRG), ILEE Transactions (US), Japan Electronic Industries JEI (Japan), New Scientist (GB), Österreichische Ingenieur Zeitschrift ÖIZ (Austria), Raumfahrtforschung (FRG), Schweizerische Technische Zeitschrift STZ (Switzerland), Science (US), Umwelt (FRG) and Wissenschaft und Fortschritt (GDR), and numerous standard works of recent publication, in particular: BS (British Standards), IS (Indian Standards), ANSY (American Standards), DIN (Deutsche Industrie Normen), TGL (Standards of the GDR), ÖN (Austrian standards) (an index of sources can be found at the back of part 3). This continual assessment guarantees that the entries are up-to-date, which is of special importance for those continually developing fields such as electronic data processing, aeronautic and space technology, medicine, education and military technology.

Where abbreviations are formed from two or even three languages it should be noted that the same form often has a very different meaning. Only in a few cases do they have the same meaning, as for example al. = alcohol (Anglo-American), Al. = Alkohol (German); however the abbreviation BMR can stand for "Basic Metabolic Rate" as also "Basal Metabolism Reading", likewise "Bildröhrenmeßregenerator" and "Bremsmotor mit Rippenkühlung".

The Dictionary of *Anglo-American and German Abbreviations in Science and Technology* is an important supplement to the *World Guide to Abbreviations of Organizations* already published. Both these works together with the specialist reference works *Abbreviations in Medicine and Abbreviations' Guide to French Forms in Justice and Administration* present one of the most comprehensive sources of information in the international sphere.

Munich, March 1976

The Publishers

Zeichenerklärung

[] eckige Klammer: die voll ausgeschriebene Form der Abkürzung variiert. Gebräuchlich ist sowohl der Wortlaut ohne Klammerinhalt als auch einschließlich Klammerinhalt.

Beispiel:

AL Amber [glow] Lamp
= Amber Lamp
 oder
 Amber glow Lamp

() runde Klammer: der Inhalt der Klammer erklärt die Verbreitung der Abkürzung innerhalb eines bestimmten geographischen, technischen oder sonstigen Bereichs.

Beispiel:

AL Albanien (Kfz)
= Länderkennzeichen bei Kraftfahrzeugen

Dokl. Phys. Chem. Doklady Physical Chemistry (journ.) (US)
= Code einer US-Zeitschrift

EIA Equine Infectious Anemia (US)
= in USA gebräuchliche Abkürzung

Explanation of symbols

[] square brackets: the fully written out form of abbreviation varies. Both wording with and without brackets is to be found.

For example:

AL Amber [glow] Lamp
= Amber Lamp
 or
 Amber glow Lamp

() round brackets: the content of the bracket explains the usage of the abbreviation within a particular geographical, technical or other field.

For example:

AL Albanien (Kfz)
= country identification symbol for motor vehicles

Dokl. Phys. Chem. Doklady Physical Chemistry (journ.) (US)
= Code of a US journal

EIA Equine Infectious Anemia (US)
= common form of abbreviation in USA
