Preface

We present in this volume the collection of finally accepted papers for the ninth edition of the IWANN conference (“International Work-Conference on Artificial Neural Networks”). This biennial meeting focuses on the foundations, theory, models and applications of systems inspired by nature (neural networks, fuzzy logic and evolutionary systems).

Since the first edition of IWANN in Granada (LNCS 540, 1991), the computational intelligence community and the domain itself have matured and evolved. Under the computational intelligent banner we find a very heterogeneous scenario with a main interest and objective: to better understand nature and natural entities for the correct elaboration of theories, models and new algorithms. For scientifics, engineers and professionals working in the area, this is a very good way to get real, solid and competitive applications.

More and more, these new computational techniques are used in applications that try to bring a new situation of well-being to the user. The conjunction of a more and more miniaturized hardware together with the growing computational intelligence embodied in this hardware leads us towards fully integrated embedded systems-on-a-chip and opens the door for truly ubiquitous electronics.

In this IWANN edition we have tried to bring computational intelligence closer to the ambient one, looking for environments that are sensitive, adaptive and responsive to the presence of people and objects, where technology is embedded, hidden in the background; environments that augment activities through smart nonexplicit assistance; environments that preserve security, privacy and trustworthiness while utilizing information when needed and when appropriate (Fred Boekhorst, Philips, ISSCC02).

The above concepts were the main reason for choosing the subtitle of the IWANN 2007 edition: “*Computational and Ambient Intelligence*.” The call for papers addressed the following topics:

1. **Mathematical and theoretical methods in computational intelligence.** Complex and social systems. Evolutionary and genetic algorithms. Fuzzy logic. Mathematics for neural networks. RBF structures. Self-organizing networks and methods. Support vector machines.
2. **Neurocomputational formulations.** Single-neuron modelling. Perceptual modelling. System-level neural modelling. Spiking neurons. Models of biological learning.
3. **Learning and adaptation.** Adaptive systems. Imitation learning. Reconfigurable systems. Supervised, non-supervised, reinforcement and statistical algorithms.
4. **Emulation of cognitive functions.** Decision Making. Multi-agent systems. Sensor mesh. Natural language. Pattern recognition. Perceptual and motor function (visual, auditory, tactile, virtual reality, etc.). Robotics. Planning motor control.
5. **Bio-inspired systems and neuro-engineering.** Embedded intelligent systems. Evolvable computing. Evolving hardware. Microelectronics for neural,

fuzzy and bioinspired systems. Neural prostheses. Retinomorphic systems. Nanosystems. Nanocognitive Systems.

- 6. Applications.** Adaptive interfaces. Ambient intelligent. Biomimetic applications. Data analysis and pre-processing. Data mining. Economy and financial engineering. Fuzzy systems for control. Internet. Neural networks for control. Power systems. Signal processing. Telecommunication applications. Time series and prediction.

After a careful review process of the more than 260 submissions, 145 papers were accepted for publication, including the contribution of three invited speakers. In this edition a special emphasis was put on the organization of special sessions. A total of 7 special sessions containing 51 papers were accepted for presentation, covering specific aspects like neural-inspired architectures for nanoelectronics, kernel methods, nature-inspired intelligent methods and applications, assistive technologies and e-health, etc. The review and selection process was done with the help and cooperation of the Special Session organizers. We would like to thank them for their effort and good work.

The organization of this book does not follow the scheme and the order of the above-mentioned main topics, but is organized in a rational way according to the contents of the accepted papers, going from the more abstract concepts to the concrete and applicable questions and considerations. The result is a 20-chapters volume with the following main parts:

1. Theoretical concepts and neurocomputational formulations
2. Improving models and learning procedures
3. Self-organizing networks
4. Kernel methods
5. Evolutionary and genetic algorithms
6. Evolutionary learning
7. Fuzzy systems
8. Neuroengineering and hardware implementations
9. Data analysis
10. Signal processing
11. Speech processing
12. Image processing
13. Time series and prediction
14. Robotics and planning motor control
15. Power system applications
16. Internet and Web applications
17. Biomedical applications
18. Neural networks and other machine learning methods in cancer research
19. Assistive technologies and e-health
20. Other applications

The IWANN 2007 edition was organized by the Spanish Chapter of the IEEE Computational Intelligence Society, the Universidad de Granada, the Universidad de Málaga, and the Universidad Politécnica de Catalunya. The Universidad del País

Vasco was mainly engaged in the local organization. Sponsorship was obtained from the Spanish Ministerio de Educación y Ciencia, Universidad del Pais Vasco grants, the City Council of San Sebastián and the Basc Government.

We would like to express our gratitude to the members of the IWANN Organizing Committee, and to all the people who participated in the event (delegates, invited speakers, special session organizers). The editors would like to mention the people who helped in the review process as special or additional reviewers.

Finally, we would like to thank Springer, and especially Alfred Hoffman and Anna Kramer, for their continuous support and cooperative work from the very beginning of the IWANN conferences.

Table of Contents

Theoretical Concepts and Neuro Computational Formulations

Generating Random Deviates Consistent with the Long Term Behavior of Stochastic Search Processes in Global Optimization	1
<i>Arturo Berrones</i>	
Dynamics of Neural Networks - Some Qualitative Properties.....	8
<i>Daniela Danciu and Vladimir Rășvan</i>	
A Comparative Study of PCA, ICA and Class-Conditional ICA for Naïve Bayes Classifier	16
<i>Liwei Fan and Kim Leng Poh</i>	
Effect of Increasing Inhibitory Inputs on Information Processing Within a Small Network of Spiking Neurons.....	23
<i>Roberta Sirovich, Laura Sacerdote, and Alessandro E.P. Villa</i>	
An Efficient VAD Based on a Hang-Over Scheme and a Likelihood Ratio Test	31
<i>O. Pernía, J.M. Górriz, J. Ramírez, C.G. Puntonet, and I. Turias</i>	
Analysis of Hebbian Models with Lateral Weight Connections	39
<i>Pedro J. Zufiria and J. Andrés Berzal</i>	
Power Quality Event Identification Using Higher-Order Statistics and Neural Classifiers	47
<i>Juan-José González de-la-Rosa, Carlos G. Puntonet, and Antonio Moreno Muñoz</i>	
Bio-inspired Memory Generation by Recurrent Neural Networks	55
<i>Manuel G. Bedia, Juan M. Corchado, and Luis F. Castillo</i>	
Non-parametric Residual Variance Estimation in Supervised Learning.....	63
<i>Elia Litiäinen, Amaury Lendasse, and Francesco Corona</i>	
A Study on the Use of Statistical Tests for Experimentation with Neural Networks	72
<i>Julián Luengo, Salvador García, and Francisco Herrera</i>	

Improving Models and Learning Procedures

Unified Analysis and Design of ART/SOM Neural Networks and Fuzzy Inference Systems Based on Lattice Theory	80
<i>Vassilis G. Kaburlasos</i>	
A Comparison Between ANN Generation and Training Methods and Their Development by Means of Graph Evolution: 2 Sample Problems	94
<i>Daniel Rivero, Julián Dorado, Juan R. Rabuñal, and Marcos Gestal</i>	
Robust LTS Backpropagation Learning Algorithm.....	102
<i>Andrzej Rusiecki</i>	
Heuristic Search Based Exploration in Reinforcement Learning	110
<i>Ngo Anh Vien, Nguyen Hoang Viet, SeungGwan Lee, and TaeChoong Chung</i>	
Improving Adaptive Boosting with a Relaxed Equation to Update the Sampling Distribution	119
<i>Joaquín Torres-Sospedra, Carlos Hernández-Espinosa, and Mercedes Fernández-Redondo</i>	
Automatic Model Selection for Probabilistic PCA	127
<i>Ezequiel López-Rubio, Juan Miguel Ortiz-de-Lazcano-Lobato, Domingo López-Rodríguez, and María del Carmen Vargas-González</i>	
Probabilistic Aggregation of Classifiers for Incremental Learning	135
<i>Patricia Trejo, Ricardo Nanculef, Héctor Allende, and Claudio Moraga</i>	
Behaviour-Based Clustering of Neural Networks Applied to Document Enhancement.....	144
<i>F. Zamora-Martínez, S. España-Boquera, and M.J. Castro-Bleda</i>	
Building Automated Negotiation Strategies Enhanced by MLP and GR Neural Networks for Opponent Agent Behaviour Prognosis	152
<i>Ioanna Roussaki, Ioannis Papaioannou, and Miltiades Anagnostou</i>	
Improving the Performance of the RBF Neural Networks Trained with Imbalanced Samples.....	162
<i>R. Alejo, V. García, J.M. Sotoca, R.A. Mollineda, and J.S. Sánchez</i>	
Surface Modelling with Radial Basis Functions Neural Networks Using Virtual Environments	170
<i>Miguel Ángel López, Héctor Pomares, Miguel Damas, Antonio Díaz-Estrella, Alberto Prieto, Francisco Pelayo, and Eva María de la Plaza Hernández</i>	

A New Learning Strategy for Classification Problems with Different Training and Test Distributions	178
<i>Óscar Pérez and Manuel Sánchez-Montañés</i>	

Gaussian Fitting Based FDA for Chemometrics	186
<i>Tuomas Kärnä and Amaury Lendasse</i>	

Two Pages Graph Layout Via Recurrent Multivalued Neural Networks	194
<i>Domingo López-Rodríguez, Enrique Mérida-Casermeyro, Juan M. Ortíz-de-Lazcano-Lobato, and Gloria Galán-Marín</i>	

Self-organizing Networks

Speeding Up the Dissimilarity Self-Organizing Maps by Branch and Bound	203
<i>Brieuc Conan-Guez and Fabrice Rossi</i>	

Self-organization of Probabilistic PCA Models	211
<i>Ezequiel López-Rubio, Juan Miguel Ortiz-de-Lazcano-Lobato, Domingo López-Rodríguez, and María del Carmen Vargas-González</i>	

A New Adaptation of Self-Organizing Map for Dissimilarity Data	219
<i>Tien Ho-Phuoc and Anne Guérin-Dugué</i>	

Fusion of Self Organizing Maps	227
<i>Carolina Saavedra, Rodrigo Salas, Sebastián Moreno, and Héctor Allende</i>	

ViSOM Ensembles for Visualization and Classification	235
<i>Bruno Baruque, Emilio Corchado, and Hujun Yin</i>	

Adaptive Representation of Objects Topology Deformations with Growing Neural Gas	244
<i>José García-Rodríguez, Francisco Flórez-Revuelta, and Juan Manuel García-Chamizo</i>	

Kernel Methods

Kernel Machines for Non-vectorial Data	252
<i>F.J. Ruiz, C. Angulo, N. Agell, and A. Català</i>	

An EA Multi-model Selection for SVM Multiclass Schemes	260
<i>G. Lebrun, O. Lezoray, C. Charrier, and H. Cardot</i>	

Classifier Complexity Reduction by Support Vector Pruning in Kernel Matrix Learning	268
<i>V. Vijaya Saradhi and Harish Karnick</i>
