Table of Contents

The Shannon Lecture	
<i>Typical Sequences and All That: Entropy, Pattern Matching and Data Compression</i> —Wyner, A. D.	1
Plenary Session Lectures	
<i>Linguistic and Visual Memory in Neural State Machines</i> —Aleksander, I.	2
<i>Universal Modeling</i> —Rissanen, J.	3
<i>Information and Control</i> —Åström, K. J.	4
<i>Magnetic Recording as a Communication Channel</i> —Wolf, J. K.	5
Session MOAM1 Universal Source Coding: Ziv-Lempel Methods	
<i>A Class of Noiseless Data Compression Algorithms Based on Lempel-Ziv Parsing Trees</i> —Kieffer, J., Finamore, W. A., and Nunes, P.	6
<i>On The OPTA Function For Lossless Compression Of Individual Sequences Via Recursive Sequential Codes</i> —Kieffer, J., and Yang, E.-h.	7
<i>The Redundancy and Distribution of the Phrase Lengths of the Fixed-Database Lempel-Ziv Algorithm</i> —Wyner, A. J.	8
<i>Improved Redundancy of a Version of the Lempel-Ziv Algorithm</i> —Wyner, A. D., and Wyner, A. J.	9
<i>Match-Length Functions for Data Compression</i> —Gavish, A., and Lempel, A.	10
<i>Another Look at Universal Data Compression</i> —Ziv, J., and Hershkovitz, Y.	11
<i>Context Allocation with an Application to Data Compression</i> —Frasaszek, P., Thomas, J., and Tsoucas, P.	12
<i>Exact Analysis of the Lempel-Ziv Algorithm for Unifilar Markov Source</i> —Kawabata, T.	13
<i>Adaptive Update Algorithms for Fixed Dictionary Lossless Data Compressors</i> —Shamoon, T., and Heegard, C.	14
Session MOAM2 Convolutional Codes: Algebraic Structure	
<i>Convolutional Encoding of Self-Dual Codes</i> —Solomon, G.	15
<i>Construction of Minimal Error Trellises for Convolutional Codes</i> —Ariel, M., and Snyders, J.	16
<i>A Generalization of the Predictable Degree Property to Rational Convolutional Encoding Matrices</i> —Johannesson, R., and Wan, Z.-x.	17
<i>Counting Minimal Generator Matrices</i> —Lumbard, K. E., and McEliece, R. J.	18
<i>Locally Invertible Rate-$1/n$ Convolutional Encoders</i> —Bitzer, D. L., Dholakia, A., Koorapaty, H., and Vouk, M. A.	19
<i>On the Determination of Catastrophic Convolutional Codes</i> —Lavoie, D., and Haccoun, D.	20
<i>Expansion Property of Feedforward Convolutional Encoders</i> —Khayrallah, A. S.	21
<i>Combinatorial Constructions of Cyclic Convolutional Self-Orthogonal Codes</i> —Chen, Z.	22
<i>Duality Analysis of 2D Convolutional Codes</i> —Fornasini, E., and Valcher, M. E.	23
<i>Diffuse Codes with Minimal Guard Space</i> —Svirid, Yu. V.	24
Session MOAM3 Performance of Trellis-Coded Diversity Receivers over Slowly Fading Channels	
<i>Performance Approximation for Trellis Coded Diversity Receivers over Slowly Fading Rayleigh Channels</i> —Rasmussen, L. K., and Wicker, S. B.	25
<i>Coset Codes on Constellations Matched to the Fading Channel</i> —Giraud, X., and Belfiore, J. C.	26
<i>An EM-Based Procedure for Iterative Maximum-Likelihood Decoding and Simultaneous Channel State Estimation on Slow-Fading Channels</i> —Park, K., and Modestino, J. W.	27
<i>Forward Error Correction Performance in Correlated Fading Channels</i> —Vojcic, B. R., Monk, A., Pickholtz, R. L., and Milstein, L. B.	28
<i>The Effect of Finite Interleaving Depth on the Performance of Convolutional Codes in Rician-Fading Channels</i> —Noneaker, D. L., and Frank, C.	29
<i>Error Probability Bounds for QAM Signaling over Correlated Rician-Fading Diversity Channels</i> —Noneaker, D. L., and Pursley, M. B.	30
<i>Channel Adaptive Coding Techniques through Application of Higher Order Moments</i> —Clarke, W. A., Fouché, L., Helberg, A. S. J., and Ferreira, H. C.	31
<i>Phase Shift Keying over Complex Non-Gaussian Fading Channels</i> —Biyari, K. H., and Lindsey, W. C.	32
<i>Error Correcting Codes on Periodically Disturbed Data Channels</i> —Lange, N.	33
Session MOAM4 Estimation	
<i>Universal Portfolios with Memory</i> —Cover, T. M.	34
<i>Density Estimation Consistent in Information Divergence</i> —Györfi, L., and van der Meulen, E. C.	35
<i>Bounds on Achievable Convergence Rates of Parameter Estimators via Universal Coding</i> —Mernav, N.	36
<i>On L_2 Convergence Rates of Radial Basis Function Networks and Kernel Regression Estimators</i> —Krzyzak, A., Xu, L., and Niemann, H.	37

<i>Asymptotically Optimal Function Estimation by Minimum Complexity Criteria</i> —Barron, A. R., Yang, Y., and Yu, B.	38
<i>Multiresolution Analysis, Wavelets, and Probability Density Estimation</i> —Masry, E.	39
<i>The Use of Wavelets for Spectral Density Estimation with Local Bandwidth Adaptation</i> —Moulin, P.	40
<i>Estimation by the Nearest Neighbor Rule Under Arbitrary Sampling</i> —Posner, S. E., and Kulkarni, S. R.	41
Session MOAM5 Cyclic Codes	
<i>On Computer Search for Good Quasi-Cyclic Codes</i> —Chen, Z.	42
<i>Bounds on the Minimum Distance of the Duals of BCH Codes</i> —Augot, D., and Levy-dit-Vehel, F.	43
<i>Weight Distribution of Binary Linear Codes Based on Hadamard Matrices</i> —Beth, T., Kalouti, H., and Lazic, D. E.	44
<i>Trace Description of q-Ary Linear Codes</i> —Zanotti, J.-P.	45
<i>Algebraic Characterization of Minimum Weight Codewords of Cyclic Codes</i> —Augot, D.	46
<i>Frequency Domain Description of Repeated-Root (Cyclic) Codes</i> —Mathys, P.	47
<i>Long Binary Narrow-Sense BCH Codes Are Normal</i> —Honkala, I., Kaipainen, Y., and Tietäväinen, A.	48
<i>Cyclic q-ary Images of Codes and Burst Correction</i> —Wafu, W., and Wolfmann, J.	49
<i>The Exact Minimum Distance of Some Cyclic Codes</i> —Moreno, O., Zinoviev, V. A., and Kumar, P. V.	50
<i>On Automorphism Groups of Binary Primitive BCH Codes</i> —Lu, C.-C., and Welch, L. R.	51
Session MOAM6 Multi-User Channels	
<i>The Capacity Region of Multiple-Rate Codes for Multiple-Access Channels</i> —Liu, Y.-S., and Hughes, B. L.	52
<i>Nonconvexity of the Capacity Region of the Multiple-Access Arbitrarily Varying Channel Subject to Constraints</i> —Gubner, J. A., and Hughes, B. L.	53
<i>Constraints on Capacity in a Multi-User Channel</i> —Hanly, S. V., and Whiting, P.	54
<i>On Single-User Decodable Codes for the Gaussian Multiple Access Channel</i> —Rimoldi, B., and Urbanke, R.	55
<i>On the Transmission over the T-User q-ary Multiple-Access Permutation Channel</i> —Wilhelmsson, L., and Zigangirov, K. Sh.	56
<i>A Multiuser System for the K User Union Channel</i> —Grant, A. J., and Schlegel, Ch.	57
<i>Multirate Achievability in Memoryless Multiaccess Channel</i> —Cheng, R. S.	58
<i>On a Standard Convexity Argument in Multi-User Information Theory</i> —Yeung, R. W.	59
<i>Asymptotic Capacity of Multi-Receiver Networks</i> —Hanly, S. V., and Whiting, P.	60
Session MOAM7 Synchronization	
<i>Bounds for Non-Binary Synchronization Error Correction Codes and Their Construction</i> —Mitsugi, J., Jinushi, H., and Sakaniwa, K.	61
<i>On Combined Synchronization and Error Control Coding</i> —Kabatianskii, G. A., Vinck, A. J. H., and Van Wijngaarden, A. J.	62
<i>Codes Capable of Correcting Bursts of Insertions and Deletions</i> —Bours, P. A. H.	63
<i>A Class of Block Codes and Their Decoding for Transmission without Synchronization</i> —Balakirsky, V. B.	64
<i>Trellis Assisted Block Synchronisation</i> —Honary, B., and Markarian, G.	65
<i>Differential Encoding/Decoding and Rotational Invariance of Block Modulation Codes</i> —Portugheis, J., and Hofmann, K. H.	66
<i>Multiple Insertion/Deletion Correcting Codes</i> —Helberg, A. S. J., Ferreira, H. C., and Clarke, W. A.	67
<i>Predictable Timestamp under Synchronized Clocks in a Network</i> —Kuo, G. S., and Lin, J.-P.	68
<i>Efficient Skew Codes Constructions</i> —Al-Bassam, S., and Bose, B.	69
Session MOPM1 CDMA Sequences: Properties and Design	
<i>An Upper Bound for Some Exponential Sums over Galois Rings and Applications</i> —Kumar, P. V., Helleseht, T., and Calderbank, A. R.	70
<i>Large Families of Quaternary Sequences with Low Correlation</i> —Kumar, P. V., Helleseht, T., Calderbank, A. R., and Hammons, R.	71
<i>Lower Bounds on the Cross-Correlation for Codes of a Given Size</i> —Levenshtein, V. I.	72
<i>On the Search and Construction of Good Invertible Binary Sequences</i> —Ruprecht, J., and Rupf, M.	73
<i>Polyphase Sequences with Good Periodic and Aperiodic Autocorrelations</i> —Fan, P. Z., Damell, M., and Honary, B.	74
<i>On McEliece's Open Problem on Minimax Aperiodic Correlation</i> —Mow, W. H.	75
<i>Correlation Properties of Chebyshev Binary/Bit Sequences</i> —Kohda, T., and Tsuneda, A.	76
Session MOPM2 Analysis of Optical Communication Systems	
<i>N-th Order Moment Generating Function for Optically Amplified Receivers with Application to Timing Recovery in Lightwave Communications</i> —Moura, L., and O'Reilly, J. J.	77
<i>Performance Bounds and Cutoff Rates of Quantum Limited OOK with Optical Amplification</i> —Ben-Eli, D., Dallal, Y. E., and Shamai (Shitz), S.	78
<i>Optimal And Suboptimal Frame Synchronizers For Optical Multi-Pulse PPM</i> —Velidi, R., and Georgiades, C. N.	79

<i>Performance Analysis of Overlapping Multi-Pulse Pulse Position Modulation (OMPPM) in Noisy Photon Counting Channel—Ohtsuki, T., Sasase, I., and Mori, S.</i>	80
<i>Zero-Forcing Electrical Filters for Direct Detection Optical Systems—Li, P. C., and Humblet, P. A.</i>	81
<i>On Noncoherent Detection of Noisy-Phase On-Off-Keying Signals—Dallal, Y. E., Tal, N., and Shamaï (Shitz), S.</i>	82
<i>Optimum Detectors for PPM Signals in Airborne/Underwater Optical Communications—Ramezani, V. R., and Geraniotis, E.</i>	83
<i>All-Optical Linear Detection for Optical CDMA Communication Systems—Brandt-Pearce, M.</i>	84
Session MOPM3 Data Communication Systems	
<i>Performance Analysis of Frequency Domain Delay and Multiply Receivers for Spread Spectrum Modulated Signals—Bukofzer, D. C.</i>	85
<i>FSK-DPD with Pulse Shaping and Transmitter Filter in Satellite Mobile Channel—Korn, I., and Hankins, P.</i>	86
<i>Synchronization Performance for Direct-Carrier-Modulation at Low Data-Rates—Popken, L.</i>	87
<i>A Practical Demodulator for Continuous Phase Modulation—Costa, M. H. M.</i>	88
<i>New Closed-Form Expressions for Differentially Detected $p/4$ - DQPSK System Performance in AWGN and Rayleigh Fading—Miller, L. E., and Lee, J. S.</i>	89
<i>Relation between Bit and Symbol Error Probabilities for DPSK and FSK with Differential Phase Detection—Korn, I., and Hui, L. M.</i>	90
<i>Performance of a Square-Law Combiner for Reception of Nakagami Fading Orthogonal Signals in Spherically Invariant Noise—Izzo, L., Paura, L., and Tanda, M.</i>	91
<i>Semidynamic and Dynamic Transmission Algorithms for Multiplexing Voice with Data—Rozenbaum, Y., Burrell, A., Papantoni-Kazakos, P., and Kazakos, D.</i>	92
<i>Analysis of Partial Response Coded MPSK over Mobile Satellite Channels—Aygözü, U., and Panayirci, E.</i>	93
Session MOPM4a Decoding for Reed-Solomon and BCH Codes	
<i>Modified Berlekamp-Massey Algorithm for Decoding BCH Codes Defined over Rings—Interlando, J. C., and Palazzo, Jr., R.</i>	94
<i>Subfield-Level Decoding of Reed-Solomon Codes Based on Coordinate Codes—Ray-Chaudhuri, S., and Chan, A. H.</i>	95
<i>Fourier Transform Algorithm for a Prime Number Blocklength Reed-Solomon Code Can Be Computationally Efficient—Stasinski, R.</i>	96
<i>Fast Parallel Algorithms for Decoding Reed-Solomon Codes—Dabiri, D., and Blake, I. F.</i>	97
<i>Low Complexity Parallel Multipliers for Galois Fields $GF(2^n)^4$ Based on Special Types of Primitive Polynomials—Paar, Ch.</i>	98
Session MOPM4b Special Code Constructions and Their Decoding	
<i>Generation of Matrices for Determining Minimum Distance and Decoding of Cyclic Codes—Shen, K., Wang, C., Tzeng, K. K., and Shen, B.-Z.</i>	99
<i>(T, U) Mapping Matrices: Properties and Applications in Permutation Decoding—Jia, M., Benyamin-Seeyar, A., and Le-Ngoc, T.</i>	100
<i>The Construction and Decoding of Inhomogeneous Block Codes—Fleischmann, M.</i>	101
<i>Decoding Algorithm for Linear Binary Codes Based on the Interpolation Curve—Beth, T., Grassl, M., and Lazic, D. E.</i>	102
<i>Balanced Codes with Parallel Encoding/Decoding—Tallini, L., and Bose, B.</i>	103
Session MOPM5 Combinatorics (Designs, Tilings and Euclidean Space)	
<i>Applications of Error-Correcting Codes to Orthogonal Arrays and the Design of Experiments—Sloane, N. J. A.</i>	104
<i>On the Classification of the Tight Spherical Designs—Boyvalenkov, P.</i>	105
<i>A Coding Theoretic Approach to Extending Designs—Kennedy, G. T., and Pless, V.</i>	106
<i>Tilings of the Plane and Codes for Translational Combinatorial Metrics—Sidorenko, V.</i>	107
<i>Tiling with Polyominoes under Modular Arithmetic and Distance Criteria—Palazzo, Jr., R., and De Almeida, C.</i>	108
<i>How Many Points in Euclidean Space Can Have a Common Nearest Neighbor?—Zeger, K., and Gersho, A.</i>	109
<i>On the Number of Digital Convex Polygons—Ivic, A., Koplowitz, J., and Zunic, J.</i>	110
Session MOPM6 Pattern Recognition and Estimation	
<i>Classification Rules in the Unknown Mixture Parameter Case: Relative Value of Labeled and Unlabeled Samples—Castelli, V., and Cover, T. M.</i>	111
<i>Nonparametric Estimation Using Neural Networks—Lugosi, G., and Zeger, K.</i>	112
<i>Learning Decision Rules for Pattern Classification under a Family of Probability Measures—Kulkarni, S. R., and Vidyasagar, M.</i>	113
<i>Error Bound of Hypothesis Testing with Data Compression—Shimokawa, H., Han, T. S., and Aman, S.-H.</i>	114
<i>Estimation of Noisy Quantized Random Observation Coefficient AR Time-Series—Krishnamurthy, V., and Mareels, I.</i>	115
<i>Complexity-Constrained Least Squares Estimation for Sparse Systems—Brady, D., and Kocic, M.</i>	116

<i>Improved Bellini-Tartara Lower Bound for Parameter Estimation</i> —Bell, K. L., Ephraim, Y., Steinberg, Y., and Van Trees, H. L.	117
<i>Two Quantum Analogues of the Large Deviation Cramer-Rao Inequality</i> —Nagaoka, H.	118
<i>An SNR Estimation Algorithm Using Fourth-Order Moments</i> —Matzner, R., and Englberger, F.	119
<i>Hebbian Classification in and around the Unit Cube</i> —Baram, Y.	120
Session MOPM7 Signal Processing Techniques	
<i>A Progressive, Recursive, Fast Discrete Cosine Transform</i> —Costa, M. H. M.	121
<i>Entropy-Constrained Code-Excited Linear Predictive (EC-CELP) Quantization</i> —Foodei, M., and Dubois, E.	122
<i>Kalman-Like Filtering and Smoothing for Reciprocal Sequences</i> —Baccarelli, E., Cusani, R., and Di Blasio, G.	123
<i>Nonlinear System Identification with Nonparametric Deconvolution</i> —Greblicki, W., and Pawlak, M.	124
<i>Efficacy of Adaptive Signal Processing Algorithms</i> —Moustakides, G. V.	125
<i>Some Results on Biorthogonal-Like Functions for Generalized Gabor Expansions</i> —Morris, J. M., and Lu, Y.	126
<i>On Restoration of Band-Limited Signals from Noisy Observations</i> —Rafajlowicz, E., Krzyzak, A., and Pawlak, M.	127
<i>Lower Bound on the Mean Squared Error in Oversampled Quantization of Periodic Signals</i> —Thao, N. T., and Vetterli, M.	128
<i>Reduced-State Sequence Estimation of Digital Sequence in the Presence of Intersymbol Interference Using State Partitioning</i> —Kamel, R. E., and Bar-Ness, Y.	129
<i>On Orthogonal Wavelets with Oversampling Property</i> —Xia, X.-G., and Zhang, Z.	130
<i>Bayesian Techniques for Deconvolution</i> —Lee, G.-k., Gelfand, S. B., and Fitz, M. P.	131
Session TUAM1 Multi-User Detection Techniques for Direct-Sequence CDMA	
<i>Dynamically Coordinated Reception of Multiple Signals in Correlated Noise</i> —Huber, J., and Fischer, R.	132
<i>Robust/Lossy Discretization in CDMA Systems</i> —Tarköy, F.	133
<i>Soft-Decision Interference Cancellation for AWGN Multi-User Channels</i> —Nelson, L. B., and Poor, H. V.	134
<i>An Adaptive Multiuser Interference Rejection Algorithm for Direct-Sequence Code Division Multiple Access</i> —Mandayam, N. B., and Aazhang, B.	135
<i>Synchronous DS-SSMA with Improved Decorrelating Decision-Feedback Multiuser Detection</i> —Wei, L., and Schlegel, Ch.	136
<i>Adaptive Decision Aided Techniques for Interference Minimization in Asynchronous CDMA Systems</i> —Rapajic, P. B., and Vucetic, B. S.	137
<i>Subspace-Based Delay Estimation for CDMA Communication Systems</i> —Bensley, S. E., and Aazhang, B.	138
<i>Adaptive Rate Multiple Access (ARMA) for Wireless Multimedia Communications</i> —Hui, J. Y., and Gaurav, G.	139
<i>A New Approach to Direct-Sequence Spread-Spectrum Multiple Access Communication Systems</i> —Yang, G.-C.	140
<i>Acquisition Based Capacity of a Synchronous Direct Sequence Spread Spectrum Multiple Access Technique</i> —Dabak, A. G.	141
Session TUAM2 Recording Channels I	
<i>A Construction Method for Bounded-Delay Encodable Modulation Codes</i> —Hollmann, H. D. L.	142
<i>On the Decoding Delay of Encoders for Input-Constrained Channels</i> —Ashley, J. J., Marcus, B. H., and Roth, R. M.	143
<i>Runlength-Limited Block Codes with Small Error Propagation</i> —Imrink, K. A. S.	144
<i>A New Construction for n-track (d, k) Codes with Redundancy</i> —Ke, L., and Marcellin, M. W.	145
<i>M-ary Runlength Limited Codes for High Density Optical Recording</i> —McLaughlin, S. W., Earman, A. M., and Gerpheide, J. M.	146
<i>Trellis Decoding Technique for the Block RLL/ECC Codes</i> —Markarian, G., and Honary, B.	147
<i>The Performance of Different Concatenated Coding Schemes for the Noisy $(1, 7)$ Constrained Channel</i> —Abdel-Ghaffar, K. A. S., Blaum, M., and Weber, J. H.	148
<i>RLL (d, k) Coding Using Structured Vector Quantization</i> —Siala, M., and Kawas Kaleh, G.	149
<i>Two-track Codes for Magnetic Recording Channels</i> —Soljanin, E., and Georgiades, C. N.	150
Session TUAM3 Algebraic-Geometric Codes	
<i>Efficient Generalized Minimum Distance Decoding of Algebraic Geometric Codes</i> —Kötter, R.	151
<i>Improved Geometric Goppa Codes</i> —Feng, G.-L., Rao, T. R. N., and Welch, L. R.	152
<i>Generalized Berlekamp-Massey Decoding of Algebraic Geometry Codes up to Half the Feng-Rao Bound</i> —Sakata, S., Jensen, H. E., and Høholdt, T.	153
<i>Decoding Goppa Codes via Rutishauser's Quotient-Difference Algorithm</i> —Faybusovich, L.	154
<i>Decoding Geometric Goppa Codes up to Designed Minimum Distance by Solving a Key Equation in a Ring</i> —Shen, B.-Z., and Tzeng, K. K.	155
<i>Decoding Algebraic-Geometric Codes Using Gröbner Bases</i> —Saints, K., Rubio, I., and Heegard, C.	156
<i>On Algebraic Geometric Codes from Singular Projective Curves over $GF(2^m)$</i> —Moreno, O., Zinoviev, V. A., Zinoviev, D. V., and Polemi, D.	157
<i>Encoding of Codes on Curves</i> —Blahut, R. E.	158

<i>Decoding of Hermitian Code for Burst Errors</i> —Ren, J., and Xiao, G.-Z.	159
Session TUAM4 Convolutional Coding I	
<i>Convolutional Codes from a Dynamical System Point of View</i> —Wittenmark, E., and Wan, Z.-x.	160
<i>On the Symmetries and Structure of Trellis Codes</i> —Rossin, E. J., Rowe, D. J., and Heegard, C.	161
<i>Real Convolutional Codes, Time-Varying Errors and Kalman Error-Correction for Fault Tolerance and Communication Systems Applications</i> —Redinbo, R.	162
<i>On the Construction of Real Number Trellis Codes</i> —Levy, Y., and Costello, Jr., D. J.	163
<i>Decoding "Turbo"-Codes with the Soft Output Viterbi Algorithm (SOVA)</i> —Hagenauer, J., and Papke, L.	164
<i>Source-Controlled Channel Decoding</i> —Hagenauer, J.	165
<i>A Connectivity Based, Table-Driven Decoder for Convolutional Codes</i> —Bégin, G., and Thibeault, C.	166
<i>On Viterbi Decoding of High Rate Convolutional Codes</i> —Fjelltveit, M., and Ytrehus, Ø.	167
<i>Reduction of the Numerical Range of the State Metrics in a Viterbi Decoder</i> —Hekstra, A. P.	168
<i>An Ideal Theoretic Approach for Classifying High Rate Convolutional Codes</i> —Rosenthal, J., and York, E. V.	169
Session TUAM5a Novel Applications of Information Theory	
<i>Information Retrieval from Databases</i> —Coffey, J. T., and Sechrest, S.	170
<i>Comparing Multiple File Copies Using Minimal Communication</i> —Abdel-Ghaffar, K. A. S., and El Abbadi, A.	171
<i>Several Information Theoretic Approaches to Signature Analysis Problems in Fault-Tolerant Computing</i> —Aoyama, K., and Iwadare, Y.	172
<i>Two-Pattern Classification and Feature Extraction Based on Minimum Error Decision Boundary Using Neural Networks</i> —Lee, L. L.	173
Session TUAM5b Variable Receiver Complexity	
<i>An Optimization Algorithm for Estimating the Storage Requirement of a Reduced-Search Decoder</i> —Anderson, J. B., and Said, A.	174
<i>Tunable Complexity RSSE Decoding of TCM Signals</i> —Marino, G., Raheli, R., and Picchi, G.	175
<i>Performance of the Lattice Sequence Estimator</i> —Mow, W. H.	176
<i>Which Sub-Optimum Receiver Is Optimum?</i> —Bobrowski, R., and Holubowicz, W.	177
<i>Dynamic Threshold Detection for Maximum Likelihood Sequence Estimation</i> —Fossorier, M. P. C.	178
Session TUAM6 Entropy and Coding of Random Processes and Fields	
<i>Entropy and Recurrence Rates for Stationary Random Fields</i> —Ornstein, D., and Weiss, B.	179
<i>Almost Sure Waiting Time Results for Weak and Very Weak Bernoulli Processes</i> —Marton, K., and Shields, P. C.	180
<i>Universal Redundancy Rates for B-Processes Do Not Exist</i> —Shields, P. C., and Weiss, B.	181
<i>Redundancy Rates for Renewal and Other Processes</i> —Csiszár, I., and Shields, P. C.	182
<i>On the Distribution of Waiting Time for Runs of Given Length</i> —Vámos, P.	183
<i>Gambling for the Mnemonically Impaired</i> —Roche, J. R.	184
<i>Source Coding Theorem for Random Fields</i> —Janzura, M.	185
<i>On Lattice Quantization Noise</i> —Zamir, R., and Feder, M.	186
<i>Further Convergence Results for Entropies of Random Branching Processes</i> —O'Sullivan, J. A.	187
Session TUAM7 Source Coding	
<i>Improvement of Upper Bound to the Optimal Average Cost of the Variable Length Code</i> —Kawabata, T., and Kobayashi, K.	188
<i>Variable-to-Fixed Length Codes for Sources with Memory</i> —Savari, S. A., and Gallager, R. G.	189
<i>Entropy Rate of the Form Source</i> —Stasevich, S. I., and Koshelev, V. N.	190
<i>Topological Stochastic Grammars</i> —Alder, M., deSilva, C., and McLaughlin, R.	191
<i>Formulating a Source Coding of Sentences with {0, 1}-Truth Values</i> —Suzuki, H., and Arimoto, S.	192
<i>An Adaptive Universal Variable-to-Fixed Lossless Coding Scheme</i> —Nissenbaum, B., and Feder, M.	193
<i>Prefixes and the Entropy Rate for Long-Range Sources</i> —Kontoyiannis, I., and Suhov, Y. M.	194
<i>Using Shannon Entropy and Kolmogorov Complexity to Study the Language and Intelligence of Ants</i> —Reznikova, J., and Ryabko, B.	195
<i>APCM Performance Improvement by Means of Entropy Coding</i> —Pilipchouk, N. I., and Nadezhkina, G. R.	196
Session TUPM1 Source Coding and Entropy Theory	
<i>Multiple Description Source Coding with Excess Rate</i> —Zhang, Z., and Berger, T.	197
<i>When Does the Source-Channel Separation Theorem Hold?</i> —Vembu, S., Verdú, S., and Steinberg, Y.	198
<i>Distortion-Complexity and Rate-Distortion Function</i> —Muramatsu, J., and Kanaya, F.	199
<i>On Interactive Communication</i> —Ahlsvede, R., Cai, N., and Zhang, Z.	200
<i>On the CEO Problem</i> —Berger, T., and Zhang, Z.	201
<i>Averaging Entropy</i> —Campbell, L. L.	202

A Lower Bound on the Expected Length of One-to-One Codes—Alon, N., and Orlitsky, A.	203
Guessing and Entropy—Massey, J. L.	204
Session TUPM2 Recording Channels II	
High-Order Spectral-Null Codes: Constructions and Bounds—Roth, R. M., Siegel, P. H., and Vardy, A.	205
A Two-Track Matched Spectral-Null Code with Rate $3/4$ for the Binary Dicode Channel—Siala, M., and Kawas Kaleh, G.	206
Upper Bounds and Hamming Spheres under the DC-Constraint—Waldman, H., and Nisenbaum, E.	207
Two Techniques for Constructing DC-Free Codes with Minimum Distance 4—Popplewell, A., and O'Reilly, J. J.	208
Spectral Shaping Codes—Waldman, H., and Pingarilho, C. A. M.	209
Sequence Estimation Algorithms for the Digital Compact Cassette (DCC)—Braun, V., Immink, K. A. S., Ribeiro, M. A., and van der Enden, G.	210
Convolutional Codes for the High Density $(1 - D)(1 + D)^n$ Magnetic Recording Channel—Uchoa Filho, B. F., and Herro, M. A.	211
Some Optimal Codes for Partial Response Channels and Their Performance for Magnetic Recording—Murad, A. H., and Fuja, T. E.	212
A Modulation Coding Scheme for Multi-Channel PRML—Guzeloglu, T., and Proakis, J. G.	213
A Reliable Signal Detection Method for the Combination of PRML Method and Ternary Recording Code—Tazaki, S., Takashima, T., Tsuzuki, S., and Yamada, Y.	214
Session TUPM3 Theory of Neural Information Processing	
A Statistical Analysis of Neural Computation—Cortese, J. A., and Goodman, R. M.	215
On Approximations of Functions by Depth-Two Neural Networks—Venkatesh, S. S.	216
Neural Processing of Information—Fry, R. L.	217
A Class of Neyman-Pearson and Bayes Learning Algorithms for Neural Classification—Pados, D., and Papantoni-Kazakos, P.	218
A Rigorous Analysis of Linsker's Hebbian Learning Network—Feng, J., Pan, H., and Roychowdhury, V. P.	219
Tracking Concept Drift in a Single Neuron—Kuh, A.	220
Application of Coding Theory to Neural Net Capacity—Al-Mashouq, Kh. A.	221
Capacity of Associative Memory—Kuo, I.-c., and Zhang, Z.	222
Session TUPM4 Coding Techniques for Multiple-Access Communications	
Coding, Processing Gain And Modulation in Frequency-Hopped Multiple Access Communications: Tradeoff Considerations—Kim, S. W.	223
Time and Frequency Acquisition of Frequency-Hopped Signals with Random Data—Blanco, M. A.	224
Overlay Coding Technique for Supporting High Data Rates for DS-CDMA Systems—Zehavi, E.	225
Optimal PN Codes in a DS/SS Wireless LAN System—Kim, H. S., and Lee, J. K.	226
An Efficient Soft-Decision Decoding Algorithm for Synchronous CDMA Communications with Error-Control Coding—Nasiri-Kenari, M., and Rushforth, C. K.	227
Finite Precision Decorrelating Receivers for Multi-User CDMA Communication Systems—Paris, B.-P.	228
Dynamic Channel Resource Allocation in Frequency Hopped Wireless Communication Systems—Wang, C. C., and Pottie, G. J.	229
Comparison of Multiuser Detectors for Synchronous Flat Rayleigh Fading CDMA Channels—Wu, H.-Y., and Duel-Hallen, A.	230
Power and Bandwidth Optimization for Personal Communications Mobility Tracking—Madhow, U.	231
Session TUPM5 Quantization Techniques	
Two-Stage Vector Quantization—Lattice Vector Quantization—Pan, J., and Fischer, T. R.	232
Arithmetic And Trellis Coded Quantization—Joshi, R. L., Fischer, T. R., Marcellin, M. W., and Kasner, J. H.	233
Design of Entropy-Constrained Quantizers Based on Coset Codes—Lee, C.-C., and Farvardin, N.	234
Scalar Quantization of Memoryless Sources over Memoryless Channels Using Rate-One Convolutional Codes—Phamdo, N., and Farvardin, N.	235
Methods of Channel-Optimised Trellis Source Coding for the AWGN Channel—Secker, P., and Ogunbona, P.	236
Composite Permutation Codes for Vector Quantization—Lu, L., Cohen, G., and Godlewski, Ph.	237
Modulation Organized Vector Quantization, MOR-VQ—Sknemmoen, H.	238
Conditional Entropy-Constrained Vector Quantization: High-Rate Theory and Design Algorithms—de Garrido, D. P., and Pearlman, W. A.	239
A Prediction Strategy for Efficient Entropy Coding of VQ Addresses—Fioravanti, S., and Giusto, D. D.	240
Design Methods for VQ by Linear Mappings of Block Codes—Hagen, R., and Hedelin, P.	241
Session TUPM6a Decoding Performance Estimation	
On Massey's Bound on the Worst-Case Probability of Undetected Error—Kløve, T.	242

<i>Improved Error Probability Bounds for Block Codes on the Gaussian Channel</i> —Dolinar, S., Ekroot, L., and Pollara, F.	243
<i>Further Results on the Performance of Erasure-and-Error Decoding Rules</i> —Hashimoto, T.	244
<i>Polynomial of Correctable Patterns of Product Codes</i> —Sendrier, N.	245
<i>A Direct Geometrical Method for Bounding the Error Exponent for Families of Trellis Channel Codes</i> —Senk, V., Lazic, D. E., and Drajić, D. B.	246
Session TUPM6b Coding for Partially Known Channel Errors	
<i>Correcting a Specified Set of Likely Error Patterns</i> —Tan, N. L., Welch, L. R., and Scholtz, R. A.	247
<i>A Class of Error Locating Codes - SEC - Se/bEL Codes</i> —Kitakami, M., and Fujiwara, E.	248
<i>Codes Correcting Localized Errors of Known Value</i> —Kabatienskii, G. A.	249
<i>Asymptotically Optimal Rate for Codes Correcting Partially Localized Burst Errors</i> —Larsson, P., and Weber, J. H.	250
<i>Location-Correcting Codes</i> —Roth, R. M., and Seroussi, G.	251
Session TUPM7 Detection	
<i>Threshold Detection in Correlated Non-Gaussian Noise Fields</i> —Middleton, D.	252
<i>Locally Optimum Distributed Detection of Dependent Random Signals Based on Ranks</i> —Blum, R. S.	253
<i>Necessary Conditions for Optimum Distributed Sensor Detectors under the Neyman-Pearson Criterion</i> —Blum, R. S.	254
<i>Optimal Detection Based on Adaptive Array Antenna in Spatial and Temporal Domains</i> —Kohno, R., Nagatsuka, M., and Imai, H.	255
<i>Sequential Multihypothesis Testing and Nonuniform Costs with Applications in Hybrid Serial Search</i> —Baum, C., and Veeravalli, V.	256
<i>Maximizing Signal-to-Noise Ratio Does Not Guarantee Optimum Performance</i> —Middleton, D.	257
<i>On Robust Quickest Detection Procedures</i> —Crow, R., and Schwartz, S.	258
<i>Nonparametric Channel Characterization and Signal Detection in Nongaussian Interference</i> —Zabin, S. M., and Wright, G. A.	259
<i>Likelihood-Ratio Detection</i> —Nayebi, M. M., and Aref, M. R.	260
<i>Sequential Decision Making Using Expert Advice</i> —Chung, T. H.	261
Session WEAM1 Rate-Distortion Theory	
<i>An On-Line Universal Lossy Data Compression Algorithm by Continuous Codebook Refinement</i> —Zhang, Z., and Wei, V. K.	262
<i>On the Cost of Universality of Block Codes for Individual Sequences</i> —Merhav, N., and Feder, M.	263
<i>Asymptotic Properties of Algorithms of Data Compression with Fidelity Criterion Based on String Matching</i> —Koga, H., and Arimoto, S.	264
<i>Universal Source Coding with a Fidelity Criterion</i> —Kurtas, E., and Salehi, M.	265
<i>Variable-Rate Source Coding Theorems for Stationary Nonergodic Sources</i> —Elffros, M., Chou, P. A., and Gray, R. M.	266
<i>Variable-Rate Lossy Compression of Markov Sources under Buffer Constraints</i> —Tse, D. N. C., Gallager, R. G., and Tsitsiklis, J.	267
<i>Bounds on $R(D)$ for an $AR(1)$ Gaussian Source with Parameter Uncertainty</i> —Duchesne, J., and Gibson, J. D.	268
Session WEAM2 Convolutional Coding II	
<i>Critical Lengths of Error Events in Convolutional Code</i> —Justesen, J.	269
<i>New Bounds on Convolutional Code Performance over Fading Channels</i> —Cideciyan, R. D., and Eleftheriou, E.	270
<i>New Results on Estimations of the Burst and Bit Error Probabilities for Fixed Convolutional Codes</i> —Balakirsky, V. B., Johannesson, R., and Zigangirov, K. Sh.	271
<i>On the Asymptotic Performance of the Generalized Viterbi Algorithm</i> —Hashimoto, T.	272
<i>Sequential Decoding on Channels with Memory under the P_g Criterion</i> —Markman, I., and Anderson, J. B.	273
<i>A Bound on the Unequal Error Protection Capabilities of Rate k/n Convolutional Codes</i> —Mills, D. G., and Costello, Jr., D. J.	274
<i>Construction of Unequal Error Protecting Convolutional Codes from Low Rate Convolutional Codes</i> —Yamaguchi, K., and Imai, H.	275
<i>Bounds for the Computation of the Free Distance of Codes Based on Convolution</i> —Said, A., and Anderson, J. B.	276
<i>Search Methods for Rate $1/N$ Convolutional Codes Used in Concatenated Systems</i> —Paaske, E., and Jensen, O. R.	277
<i>Search Procedures for Very Low Rate Quasi-Optimal Convolutional Codes</i> —Lefrançois, S., and Haccoun, D.	278
Session WEAM3a CDMA Sequence Design	
<i>Design of Signals with Favorable Correlation Properties</i> —Golomb, S.W.	279
<i>Large Sets of Code-Sequences with Good Correlation Properties Derived from Character Products</i> —Schotten, H. D., and Berg, G.	280
<i>"Linear" Families of Code-Sequence with Optimum Correlation Properties</i> —Schotten, H. D., and Liesentfeld, B.	281
<i>There Are Only Finitely Many Perfect Auto-Correlation Polyphase Sequences of Prime Length</i> —Gabidulin, E. M.	282

Session WEAM3b Superimposed Codes and Protocol Sequences	
<i>A Construction of Superimposed Codes for the Euclidean Channel</i> —Anderson, P.-O.	283
<i>Constructions for Optimal Constant Weight Cyclically Permutable Codes and Difference Families</i> —Bitan, S., and Etzion, T.	284
<i>On the Construction of Constant Weight Cyclically Permutable Codes using Cyclic Codes</i> —Lundqvist, A.	285
Session WEAM4 Multiple and Random Accessing	
<i>Combining Queueing Theory and Information Theory for Multi-Access</i> —Telatar, I. E., and Gallager, R. G.	286
<i>A Constructive Code Reaching Capacity 1 for the Multiple-Access Collision Channel with Multiplicity Feedback</i> —Ruszkinkó, M., and Vanroose, P.	287
<i>Optimal-Strategy Packet Output Time for Conflicts of Multiplicity 2 and 3</i> —Tsybakov, B. S.	288
<i>Throughput Performance of Multiuser Detection in Unslotted Contention Channels</i> —Brady, D., and Merakos, L.	289
<i>Two-Sided Bounds on the Decoding Error Probability for Structured Hopping, a Single Common Sequence and a Poisson Population</i> —Csibi, S.	290
<i>On the ALOHA Multiple Access System with Coding</i> —Al-Rumaih, R. M., and Mathys, P.	291
<i>Short Coding for the Collision Channel without Feedback</i> —Lauter, S., and Snyders, J.	292
<i>Random-Access Systems for Mixed Voice and Data Packets</i> —Mathys, P., and Vvedenskaya, N. D.	293
<i>Performance Analysis of Multiple Access Protocols in Multihop Networks</i> —Wu, L., and Varshney, P. K.	294
Session WEAM5 Approximation of Information Sources	
<i>Stationary Processes Having the Blowing-Up Property</i> —Marton, K.	295
<i>Finite-Precision Source Resolvability</i> —Steinberg, Y., and Verdú, S.	296
<i>A Stochastic Realization Approach to AR Model Order Determination Using Partial Autocorrelation Coefficients</i> —Biron, M., and Davis, M. H. A.	297
<i>An Interpretation of the Measured Spectra of Non-Stationary Integrated Processes</i> —Lo Presti, L., and Olmo, G.	298
<i>Periodically and Almost Periodically UBLS Processes</i> —Houdré, C. H., and Hurd, H. L.	299
<i>MAP Detection of Binary Sources over Discrete Markov Channels</i> —Alajaji, F., Phamdo, N., Farvardin, N., and Fuja, T. E.	300
<i>Stationary Random Functions and Periodic Clock Changes</i> —Lacaze, B., and Aakvaag, N.	301
<i>Second Order Stationary Models for 1/f Processes</i> —Yazici, B., and Kashyap, R. L.	302
Session WEAM6 Properties of Codes	
<i>Parents, Children, Neighbors and the Shadow</i> —Pless, V.	303
<i>New Upper Bounds on the Covering Radius of Codes with Known Dual Distance</i> —Litsyn, S., Solé, P., and Tietäväinen, A.	304
<i>Weighted Coverings and Packings</i> —Cohen, G., Honkala, I., Litsyn, S., and Mattson, Jr., H. F.	305
<i>Generalized Hamming Weights for Z_4-Linear Codes</i> —Ashikhmin, A. E.	306
<i>On the Error-Correcting Capabilities of Cycle Codes of Graphs</i> —Decreusefond, L., and Zémor, G.	307
<i>The Weight Hierarchy of the Kasami Codes</i> —Helleseth, T., and Kumar, P. V.	308
<i>On Generalized Distances</i> —Cohen, G., Litsyn, S., and Zémor, G.	309
<i>An Improved and Simplified Binary Ax Theorem</i> —Moreno, O., Cáceres, A., and Alonso, M.	310
<i>The Virtues of Defective Codes</i> —Mattson, Jr., H. F.	311
Session WEAM7 Combinatorics (Extremal Problems, Sequences)	
<i>On the Extremal Combinatorics of the Hamming Space</i> —Körner, J.	312
<i>Entropy Splitting Hypergraphs</i> —Simonyi, G.	313
<i>An Improved Graph-Entropy Bound for Perfect Hashing</i> —Arikan, E.	314
<i>Repeated Communication and Ramsey Graphs</i> —Alon, N., and Orlitsky, A.	315
<i>Traveling Salesman Problem in the Space of Binary Vectors</i> —Levitin, L. B., and Karpovsky, M. G.	316
<i>Decoding of a Cartesian Product Set with a Constraint on an Additive Cost; Fixed-Rate Entropy-Coded Vector Quantization</i> —Khandani, A. K.	317
<i>Enumeration of Permutations Classified by Length of Longest Monotone Subsequences</i> —Kobayashi, K., Morita, H., and Hoshi, M.	318
<i>Combinatorial Source Encoding and Perfect Hashing</i> —Krichevskii, R. E., and Potapov, V. N.	319
Session THAM1 Special Channels	
<i>Information Rates by Over-Sampling the Sign of a Bandlimited Process</i> —Shamai (Shitz), S.	320
<i>The Gilbert-Elliott Channel: Equivalent Models and Bounds on the Capacity</i> —Kalveram, H.	321
<i>Capacity, Mutual Information and Coding for Finite-State Markov Channels</i> —Goldsmith, A., and Varaiya, P.	322
<i>On the Generalized Symmetric Cut-Off Rate for Finite State Channels</i> —Shamai (Shitz), S., and Raghavan, S. A.	323
<i>On Band-Limited Additive Gaussian Noise Channels in the Presence of Sampling Jitter</i> —Baggen, C. P. M. J., and Wolf, J. K.	324

<i>Semi-Feedback for the Binary Multiplying Channel</i> —Schalkwijk, J. P. M., and Meeuwissen, H. B.	325
<i>Localized Random and Arbitrary Errors in the Light of Arbitrarily Varying Channel Theory</i> —Ahlsvede, R., Bassalygo, L. A., and Pinsker, M. S.	326
<i>Channels with Insertion and/or Deletion and Their Capacity</i> —Al-Jabri, A. Kh., and Al-Mashouq, Kh. A.	327
Session THAM2 Coding and Modulation	
<i>Coding for ISI Channels – Combined Coding and Precoding</i> —Laroia, R.	328
<i>On the Performance of Coded/Shaped Modulation</i> —Wang, F.-Q., Perez, L. C., and Costello, Jr., D. J.	329
<i>Constellation Shaping as a Geometrical Approach to Solving a Constrained Optimization Problem</i> —Khandani, A. K.	330
<i>A New Block Shaping Scheme</i> —Deliot, E., Tait, D. J., and Williams, R. G. C.	331
<i>Noncoherent Reception of Multi-H Signals</i> —Podemski, R., Holubowicz, W., and Yongacoglu, A.	332
<i>On the Properties of CPM Schemes with Matched Convolutional Encoding</i> —Tyczka, P., and Holubowicz, W.	333
<i>Sequential Sequence Estimation for CPM</i> —Kramer, G., and Shwedyk, E.	334
<i>A Posteriori Probabilities and Performance Evaluation of Trellis Codes</i> —Loeliger, H.-A.	335
<i>Performance Evaluation Method for Trellis Modulation Code without Uniformity</i> —Ogiwara, H., and Oohira, K.	336
Session THAM3 Trellis Decoding for Block Codes	
<i>On the Trellis Structure of Block Codes</i> —Kschischang, F. R., and Sorokine, V.	337
<i>On the Trellis Complexity of Composite-Length Cyclic Codes</i> —Berger, Y., and Be'ery, Y.	338
<i>Density/Length Profiles and Trellis Complexity of Linear Block Codes and Lattices</i> —Forney, Jr., G. D.	339
<i>Low-Complexity Trellis Decoding of Linear Block Codes</i> —Honary, B., Markarian, G., and Darnell, M.	340
<i>The Viterbi Decoding Complexity of Linear Block Codes</i> —McEliece, R. J.	341
<i>Further Results on Decoding Linear Block Codes Using a Generalized Dijkstra's Algorithm</i> —Han, Y. S., Hartmann, C. R. P., and Mehrotra, K. G.	342
<i>Constant-Time Neural Decoders for Some BCH Codes</i> —Tseng, Y.-H., and Wu, J.-L.	343
<i>Enhanced Decoding for the Galileo Low-Gain Antenna Mission</i> —Dolinar, S., and Belongie, M.	344
<i>On Noncatastrophic Binary (d, k) Trellis Codes with Large Free Distance</i> —Lyu, L.-T., and Lin, M.-C.	345
Session THAM4 Cryptosystems and Wire-Tap Channels	
<i>A Secret-Key Cipher Based on Linear Complementary Codes</i> —da Rocha, Jr., V. C.	346
<i>Minimal Cryptosystems and Defining Subliminal-Freeness</i> —Desmedt, Y., and Yung, M.	347
<i>Feedback with Carry Shift Registers: 2-Adic Models and Summation Combiners</i> —Klapper, A., and Goresky, M.	348
<i>Rate-Distortion Theory for the Shannon Cipher System</i> —Yamamoto, H.	349
<i>Generalized Privacy Amplification</i> —Bennett, C. H., Brassard, G., Crépeau, C., and Maurer, U. M.	350
<i>On the Secret-Key Rate of Binary Random Variables</i> —Gander, M. J., and Maurer, U. M.	351
<i>Identification via Wiretap Channels</i> —Ahlsvede, R., and Zhang, Z.	352
<i>On Degeneration of Correlation-Immune Functions</i> —Wu, C.-K., Xiao, G.-Z., and Wang, X.-M.	353
Session THAM5 Channel Equalization	
<i>Blind Equalization of IIR Channels Using Hidden Markov Models</i> —Krishnamurthy, V., Dey, S., and LeBlanc, J. P.	354
<i>Convergence Analysis of Sato Blind Equalizer with Discrete Channel Input</i> —Gu, Y.-M., Seo, B.-S., and Lee, C.-W.	355
<i>Error Probability Calculations for Decision Feedback Equalizers</i> —Willink, T. J., Wittke, P. H., and Campbell, L. L.	356
<i>Performance of Adaptive MLSE Equalization on Multipath Fading Channels with Imperfect Channel Estimates</i> —Chiu, M.-C., and Chao, C.-c.	357
<i>Subsequence Detection</i> —Varanasi, M. K.	358
<i>Application of Recurrent Neural Networks to Channel Equalization</i> —Coelho, P. H. G.	359
<i>Performance Analysis of Adaptive Filters Using the Sign Algorithm</i> —Masry, E., and Bullo, F.	360
Session THAM6 Sequences and Arrays	
<i>On Periodicity Properties of Costas Arrays and a Conjecture on Permutation Polynomials</i> —Golomb, S. W., and Moreno, O.	361
<i>Two-Dimensional Patterns with Optimal Auto- and Cross-Correlation Functions</i> —Song, H. Y., and Golomb, S. W.	362
<i>Symmetry Properties of De Bruijn Sequences</i> —Hauge, E. R., and Mykkeltveit, J.	363
<i>On Quadratic M-Sequences</i> —Chan, A. H., Games, R. A., and Rushanan, J. J.	364
<i>Canonical M-Sequences and Dual Basis Generation</i> —Komo, J. J., and Reid, III, W. J.	365
<i>GF(q) Sequences of Period $q^n - 1$ with Maximum Linear Complexity and Maximum Order Complexities for Minimum Changes of m-Sequences</i> —Imamura, K., Uehara, S., and Monuchi, T.	366
<i>A Coding Theoretic Approach to Attack Certain Stream Ciphers</i> —Chepyzhov, V., and Smeets, B.	367
<i>On Representation of Chaotic and Non-Chaotic Sequences of the Iterated Logistic Map</i> —Morns, J. M., and Azari, A.	368
<i>Ambiguity of Integer Sequences and Application</i> —Boumon, L.	369
<i>Constructions of Complex Hadamard Matrices</i> —Matsufuji, S., and Suehiro, N.	370

Session THAM7a Queueing Analysis

<i>Bits through Queues</i> —Anantharam, V., and Verdú, S.	371
<i>A Simple Derivation of Queueing Delay in a Tree Network of Discrete-Time Queues with Deterministic Service Times</i> —Modiano, E., Wieselthier, J. E., and Ephremides, A.	372
<i>Matrix Product-Form Solutions with Application to Queueing Theory</i> —Sengupta, B., and Yeung, R. W.	373
<i>Exact Computations for Queueing Network Performance Using Piecewise-Deterministic Markov Models</i> —Davis, M. H. A., and Howl, J. M.	374

Session THAM7b ARQ Systems

<i>Performance of ARQ Protocols in Bursty Channel Errors</i> —Lu, D.-L., and Chang, J.-F.	375
<i>On Block-Coded ARQ Schemes Cumulating the Rejected Sequences</i> —Niinomi, T., Matsushima, T., and Hirasawa, S.	376
<i>An Adaptive Hybrid ARQ Scheme Based on Exponentially Weighted Moving Averages for Slowly Time-Varying Communication Channels</i> —Memisoglu, A. T., and Bilgen, S.	377

Session THPM1 Single-User Channels I

<i>Channel Capacity for a Given Decoding Metric</i> —Csiszár, I., and Narayan, P.	378
<i>New Exponential Upper Bounds to Error and Erasure Probabilities</i> —Telatar, I. E., and Gallager, R. G.	379
<i>Erasure, List and Detection Zero-Error Capacities for Low Noise and a Relation to Identification</i> —Ahlsvede, R., Cai, N., and Zhang, Z.	380
<i>Worst-Case Power-Constrained Noise for Binary-Input Channels with Varying Amplitude Signals</i> —Klimesh, M., and Stark, W. E.	381

<i>Mismatched Decoding and the Multiple Access Channel</i> —Lapidoth, A.	382
<i>A Simple Dynamic Jamming Game</i> —Mallik, R. K., Scholtz, R. A., and Papavassilopoulos, G.	383

Session THPM2 Universal Source Coding, Stochastic Complexity

<i>Optimal Sequential Probability Assignment for Individual Sequences</i> —Weinberger, M. J., Merhav, N., and Feder, M.	384
<i>On the Interaction between Universal Context Modeling and Prediction</i> —Weinberger, M. J., and Seroussi, G.	385
<i>A Bayes Coding Algorithm Using Context Tree</i> —Matsushima, T., and Hirasawa, S.	386
<i>Extensions to the Context Tree Weighting Method</i> —Willems, F. M. J.	387
<i>Tighter Bounds on Universal Noiseless Coding for Finite Sequences</i> —Suzuki, J.	388
<i>A Stochastic Model for Image Segmentation Involving Constrained Least Squares Estimation</i> —Kaup, A., and Aach, T.	389
<i>Clustering and Quantization of Binary Vectors with Stochastic Complexity</i> —Gyllenberg, M., Koski, T., and Verlaan, M.	390
<i>Histogram Classification Using Vector Quantization</i> —Nobel, A., and Lugosi, G.	391
<i>Inferring Probabilistic Acyclic Automata Using the Minimum Description Length Principle</i> —Singer, Y., and Tishby, N.	392
<i>Selecting the Optimal Number of Components for a Gaussian Mixture Model</i> —McKenzie, P., and Alder, M.	393

Session THPM3 Soft-Decision Decoding

<i>Optimal Covering Polynomial Sets and Soft-Decision Error-Trapping Decoding</i> —Sung, W., and Coffey, J. T.	394
<i>Soft Decision Decoding of Linear Block Codes Based on Ordered Statistics</i> —Fossorier, M. P. C., and Lin, S.	395
<i>Partitioning Algorithms for Soft Decision Decoding for Block Codes</i> —Eiguren, J., Dumer, I. I., and Farrell, P. G.	396
<i>Soft Decision Decoding of Linear Block Codes using Genetic Algorithms</i> —Maini, H., Mehrotra, K., Mohan, C., and Ranka, S.	397
<i>Fast Soft Decoding of Some Binary Block Codes Using Constrained Designs</i> —Ran, M., and Snyders, J.	398
<i>More Efficient Bounded-Distance Decoding of the Golay Code and Leech Lattice</i> —Sun, F.-W., and van Tilborg, H. C. A.	399
<i>Efficient Bounded-Distance Decoding of the Hexacode and Associated Decoders for the Leech Lattice and the Golay Code</i> —Amrani, O., and Be'ery, Y.	400

<i>A Soft Decoder Vector Quantizer for a Noisy Channel</i> —Skoglund, M., and Hedelin, P.	401
<i>Decoding Algorithms with Maximum Error Correction</i> —Stark, W. E., and Hassan, A. A.	402
<i>Soft-Decision Decoding Implementation with Reduced Complexity for Binary Block Codes</i> —Yu, J. p., and Wang, X.-M.	403

Session THPM4 Data Networks

<i>On the Delay in a Multiple Access System with Large Propagation Delay</i> —Hajek, B., and Weller, T.	404
<i>Generalized Processor Sharing Networks with Exponentially Bounded Burstiness Arrivals</i> —Yaron, O., and Sidi, M.	405
<i>Scheduling Multi-Rate Traffic in a Time-Multiplex Switch</i> —Naraghi-Pour, M., Hegde, M. V., and Suresh, S.	406
<i>On the Problems of Data-Delay Evaluation and Minimization in Wireless Integrated Voice/Data Networks</i> —Wieselthier, J. E., Barnhart, C. M., and Ephremides, A.	407
<i>An Asymptotic Result for Large Capacity Circuit-Switched Networks</i> —Karasan, E., and Hui, J. Y.	408
<i>Shared Buffering in Nonblocking Copy Networks</i> —Hegde, M. V., Min, P. S., Chandra, A., and Saidi, H.	409
<i>Message-Optimal Protocols for Reliable Broadcasts in Networks with Crash Failures</i> —Tzeng, H.-Y., and Siu, K.-Y.	410
<i>Robust Multi-Priority Topology-Independent Transmission Schedules for Packet Radio Networks</i> —Boztas, S., and Symons, F. J. W.	411

<i>Analysis of a Multiple Access Protocol for Wireless Data Networks with Bi-Directional Traffic</i> —Sobrinho, J. L., and Brazio, J. M.	412
<i>Tracking Strategies in Wireless Networks</i> —Bar-Noy, A., Kessler, I., and Sidi, M.	413
Session THPM5 Image Coding	
<i>UVLC2 - A New Universal VLC Scheme for Video Coding</i> —Delogne, P., Cuvelier, L., and Maison, B.	414
<i>Lossy Lempel-Ziv on Subband Coding of Images</i> —Finamore, W. A., and De Carvalho, M. B.	415
<i>An Algorithm for Noiseless Image Coding with Application to a Smooth Approximation of 3-Dimensional Surfaces</i> —Itoh, S.	416
<i>On TB-SVQ Based Subband Coding of Videoconference Sequences</i> —Laroia, R., Shahri, H., and Alonso, T.	417
<i>Permutation Coding of Images Using Cosine Transform</i> —Ji, Z., Tanaka, K., and Kitamura, S.	418
<i>Rate-Distortion Efficiency of Subband Coding with Integer Coefficient Filters</i> —Pollara, F., and Chen, T.	419
<i>A Perceptually Tuned Subband Image Coder Based on the Measure of Just-Noticeable-Distortion Profile</i> —Chou, C.-H.	420
<i>A Multi-Input/Multi-Output Systems Approach for VQ-Based Image Coding</i> —Li, W., and Zhang, Y.-Q.	421
<i>Medical Images Compression Using Statistical Model for Transmission and Archiving</i> —Eude, Th., Cherifi, H., and Debie, R.	422
Session THPM6 Esoteric Code Constructions	
<i>The Linear Programming Bound For Ternary Linear Codes</i> —Daskalov, R. N.	423
<i>On Linear Z_4-Linear Codes</i> —Encheva, S., Jensen, H. E., and Høholdt, T.	424
<i>Linear Codes over Cyclic Groups</i> —Caire, G., and Biglieri, E.	425
<i>On the Automorphism Groups of Affine-Invariant Codes</i> —Berger, Th. P.	426
<i>On Near-MDS Codes</i> —Dodunekov, S. M., and Landgev, I. N.	427
<i>On the Formal Duals of Kerdock Codes</i> —Carlet, C.	428
<i>Algebraic Construction of Cyclic Codes over Z_g with a Good Euclidean Minimum Distance</i> —Piret, Ph.	429
<i>Subspace Subcodes of Reed-Solomon Codes</i> —Hattori, M., McEliece, R. J., and Lin, W.	430
<i>On Maximum Distance Separable Codes over Alphabets of Arbitrary Size</i> —Tolhuizen, L. M. G. M.	431
<i>Four Non-Existence Results for Ternary Linear Codes</i> —van Eupen, M.	432
Session THPM7 Statistical Analysis of Stationary Sources	
<i>Self-Adaptive Maximum-Likelihood Sequence Estimation</i> —Paris, B.-P.	433
<i>The Accuracy of Estimating the Parameters of Stationary Processes</i> —Francos, J. M., and Friedlander, B.	434
<i>Some Properties of the Log-Likelihood Difference of Mismatched Maximum Likelihood Sequential Estimation</i> —Grythe, K.	435
<i>Approximate ML-Estimates of Random Processes</i> —Vajda, I.	436
<i>An Algorithm for Nonparametric Forecasting for Ergodic, Stationary Time Series</i> —Yakowitz, S., Györfi, L., and Morvai, G.	437
<i>On Parameter Estimation for Quantum Processes</i> —Holevo, A. S.	438
<i>On the Memoryless Robust Estimation of the Autocorrelation Coefficients</i> —Batalama, S. N., and Kazakos, D.	439
<i>What is the Interpretation of Spectral Entropy?</i> —Gibson, J. D.	440
<i>Coherent-State Representations for the Functionals of Wiener Process and Poisson Process</i> —Ogura, H.	441
<i>Characterization of Array Output Processes</i> —Baker, C. R.	442
Session FRAM1 Trellis-Coded Modulation	
<i>New Rotationally Invariant Trellis Codes with Multidimensional Signal Constellations</i> —Wang, F.-Q., and Costello, Jr., D. J.	443
<i>A Unified Approach for Construction of Rotational Invariant TCM</i> —Bobrek, P., and Jain, V. K.	444
<i>Hybrid MPSK-TCM Codes with Fractional Spectral Efficiency</i> —Mayr, B. J., and Weinrichter, H.	445
<i>Analysis of a Class of Geometrically Designed Trellis Codes for M-PSK</i> —Zetterberg, L. H.	446
<i>Code Search for MQAM TCM on Independent 2-D Fading Channels</i> —Cardinal, C., Gagnon, F., and Mainardis, F.	447
<i>P^2 Codes: Pragmatic Trellis Codes Utilizing Punctured Convolutional Codes</i> —Zehavi, E., and Wolf, J. K.	448
<i>New Trellis Coded Modulation Code for Rayleigh Fading Channel</i> —Ogiwara, H., and Lumanto, R.	449
<i>Multidimensional MPSK Trellis Codes for Fading Channels</i> —Zhang, L., Leonardo, E., and Vucetic, B. S.	450
<i>MPSK Coded Modulations for the Rayleigh Fading Channel</i> —Lin, S., Rajpal, S., and Rhee, D. J.	451
<i>Quadrature Partial Response Trellis Coded Modulation (QPR-TCM) on Fading Mobile Satellite Channel</i> —Uçan, O. N.	452
Session FRAM2 Vector Quantization	
<i>Fixed Rate Universal Lossy Source Coding for Memoryless Sources and Rates of Convergence</i> —Linder, T., Lugosi, G., and Zeger, K.	453
<i>Rates of Convergence in the Source Coding Theorem, in Empirical Quantizer Design, and in Universal Lossy Source Coding</i> —Linder, T., Lugosi, G., and Zeger, K.	454
<i>Continuity and Consistency of Greedy Growing for Tree Structured Vector Quantizers</i> —Nobel, A., and Olshen, R.	455

<i>Rates of Convergence in Adaptive Universal Vector Quantization</i> —Effros, M., Chou, P. A., and Gray, R. M.	456
<i>The Distortion of Vector Quantizers Trained on n Vectors Decreases to the Optimum as $O_p(1/n)$</i> —Chou, P. A.	457
<i>Multiple-Description Transform Codes with an Application to Packetized Speech</i> —Batllo, J.-C., and Vaishampayan, V. A.	458
<i>Design and Asymptotic Performance of a Structured Multiple Description Vector Quantizer</i> —Buzi, L., Vaishampayan, V. A., and Laroia, R.	459
<i>Design and Analysis of a DPCM System with a Switched Quantizer</i> —Huang, S. J., and Davisson, L. D.	460
<i>Asymptotic Analysis of Optimum Uniform Scalar Quantizers for Generalized Gaussian Distributions</i> —Hui, D., and Neuhoft, D. L.	461
<i>Asymptotic Quantization Analysis of High Order Gauss-Markov Process</i> —Bist, A.	462
Session FRAM3 Single-User Channels II	
<i>The Resolvability and the Capacity of AWGN Channels Are Equal</i> —Han, T. S., and Verdú, S.	463
<i>Effect of Feedback on the Capacity of Discrete Additive Channels with Memory</i> —Alajaji, F., and Fuja, T. E.	464
<i>On Error Exponents, Coding and Feedback for Decoding Delay Constrained Communication Systems</i> —Kaplan, G., and Shamai (Shitz), S.	465
<i>Capacity Achieving Strategies for Discrete Memoryless Channels with Feedback</i> —Veugen, T.	466
<i>A Class of Optimal Coding Schemes for Moving Average Additive Gaussian Noise Channels with Feedback</i> — Ordentlich, E.	467
<i>On Weak Convergence of Probability Measures and Channel Capacity with Applications to Code Division Spread-Spectrum Systems</i> —Schwarte, H.	468
<i>Convexity of Error Probability in Binary Scalar Detection</i> —Azizoglu, M.	469
Session FRAM4 Concatenated Codes	
<i>Multilevel Block Construction Using Modified Reed-Muller Codes</i> —Zhang, L., and Vucetic, B. S.	470
<i>The State Complexity of Trellis Diagrams for a Class of Generalized Concatenated Codes</i> —Fujiwara, T., Kasami, T., Morelos-Zaragoza, R. H., and Lin, S.	471
<i>Decoding Algorithms for Block Codes over Two-Dimensional Signal-Constellations</i> —Huber, K.	472
<i>Soft-Decision Multistage Decoding of Multilevel-Coded Quaternary Partial-Response Signals</i> —Ölçer, S.	473
<i>On Error Performance Analysis of Closest Coset Decoding</i> —Takata, T., Tomita, K., Kasami, T., and Lin, S.	474
<i>Several Classes of Generalized Concatenated Codes for Byte Error-Control</i> —Saitoh, Y., and Imai, H.	475
<i>Concatenated Codes with Fixed Inner Code, and the Outer Code Randomly Selected</i> —Barg, A., Justesen, J., and Thommesen, C.	476
<i>Implementation of a Multi-D Trellis Decoder for a 155 Mbit/s Concatenated Codec</i> —Pietrobon, S. S., Kasparian, J. J., and Gray, P. K.	477
<i>A Concatenated Coding System with 3 Codes</i> —Fang, J., and Sehier, Ph.	478
Session FRAM5 Group Codes	
<i>A Lower Bound on the Probability of Erasure for an Anti-Jamming Code When Used on the Binary OR-Channel</i> — Hedby, G.	479
<i>Anti-Jamming on the OR-Channel</i> —Jönsson, C. C.	480
<i>Decomposition and Construction of Group Codes</i> —Mittelholzer, T.	481
<i>Dual Codes of Linear Block Codes over Abelian Groups</i> —Rajan, B. S., and Zain, A. A.	482
<i>Group Codes Defined on Posets</i> —Wan, Z.-x.	483
<i>Weakly-Matched Groups to Signal Constellations</i> —Massey, P., and Mathys, P.	484
<i>Symbolic Dynamic Techniques for Trellis Group Codes</i> —Sindhushayana, N. T., and Heegard, C.	485
<i>A New Decoding Algorithm for Trellis Codes over Groups</i> —Benedetto, S., and Montorsi, G.	486
<i>Construction of Multilevel Group Codes</i> —Benedetto, S., and Garelio, R.	487
<i>Construction of Signal Sets Matched to Abelian and Non-Abelian Groups</i> —Palazzo, Jr., R., Interlando, J. C., and De Almeida, C.	488
Session FRAM6 Secret Sharing, Authentication and Key Distribution	
<i>On the Information Rate of Perfect Secret Sharing Schemes</i> —van Dijk, M.	489
<i>Subliminal-Free Sharing Schemes</i> —Desmedt, Y.	490
<i>Lower Bounds in Secret Sharing Schemes</i> —Blundo, C., De Santis, A., Gaggia, A. G., and Vaccaro, U.	491
<i>A2-Codes and Codes for the Rank Metric</i> —Johansson, T.	492
<i>Long Message Authentication Using Pseudo-Random Functions</i> —Gehrmann, C.	493
<i>Susceptibility of Digital Signature Schemes Based on Error-Correcting Codes to Universal Forgery</i> —Alabbadi, M., and Wicker, S. B.	494
<i>Security Certified Simple Identity-Based Non-Interactive Key Sharing</i> —Tanaka, H.	495
<i>Key Distribution Schemes</i> —Blundo, C., Cresti, A., and Vaccaro, U.	496
