ANNUAL BOOK OF ASTM STANDARDS

Rubber

VOLUME
09.02

Rubber Products, Industrial—
Specifications and Related Test
Methods; Gaskets; Tires

Includes standards of the following committees:

D-11 on Rubber
F-3 on Gaskets
F-9 on Tires

Publication Code Number (PCN): 01-090296-20

Editorial Staff

Director, Editorial Services:

Roberta A. Storer

Manager, Standards Publications:

Joan L. Cornillot

Paula C. Fazio-Fluehr

Senior Indexer:

H. Joel Shupak

Foreword

Organized in 1898, ASTM has grown into one of the largest voluntary standards development systems in the world. ASTM is a not-for-profit organization which provides a forum for producers, users, ultimate consumers, and those having a general interest (representatives of government and academia) to meet on common ground and write standards for materials, products, systems, and services.

From the work of 132 standards-writing committees, ASTM publishes more than 9,800 standards each year. These standards and other related technical information are sold throughout the world.

ASTM Headquarters has no technical research or testing facilities; such work is done voluntarily by 35,000 technically qualified ASTM members located throughout the world. Membership in the Society is open to all concerned with the fields in which ASTM is active. A membership application may be found at the back of this volume. Additional information may be obtained from Member and Committee Services, ASTM, 100 Barr Harbor Drive, West Conshohocken, PA 19428; tel. (610) 832-9693.

1996 Annual Book of ASTM Standards

The 1996 *Annual Book of ASTM Standards* consists of 71 volumes, divided among 16 sections, of which this volume is one. It contains approved ASTM standards, provisional standards, and related material. These terms are defined as follows in the *Regulations Governing ASTM Technical Committees*:

Categories:

standard—as used in ASTM, a document that has been developed and established within the consensus principles of the Society and that meets the approval requirements of ASTM procedures and regulations.

Discussion—The term “standard” serves in ASTM as an adjective in the title of documents, such as test methods or specifications, to connote specified consensus and approval. The various types of standard documents are based on the needs and usages as prescribed by the technical committees of the Society.

provisional standard—a document published for a limited period of time by the Society to meet a demand for more rapid issuance of specific documents, such as an emergency situation, regulatory requirements, or other special circumstances.

Discussion—Provisional standards are not full consensus documents because they require subcommittee consensus only. (These documents replace emergency standards and proposals.)

Types:

The various types of ASTM documents are to provide a flexibility of form, communication, and usage for both the technical committees and the myriad users of ASTM documents. The type of ASTM document that is developed and titled is based on the technical content and intended use, not on the degree of consensus achieved. The two categories of ASTM documents (standard and provisional standard) can be of the following forms and types:

classification—a systematic arrangement or division of materials, products, systems, or services into groups based on similar characteristics such as origin, composition, properties, or use.

guide—a series of options or instructions that do not recommend a specific course of action.

Discussion—Whereas a practice prescribes a general usage principle, a guide only suggests an approach. The purpose of a guide is to offer guidance, based on a consensus of viewpoints, but not to establish a fixed procedure. A guide is intended to increase the awareness of the user to available techniques in a given subject area and to provide information from which subsequent evaluation and standardization can be derived.

practice—a definitive procedure for performing one or more specific operations or functions that does not produce a test result. (Compare *test method*.)

Discussion—A practice is not a downgraded test method. Examples of practices include procedures for conducting interlaboratory testing programs or other statistical procedures; for writing statements on sampling or precision and bias; and for selection, preparation, application, inspection, necessary precautions for use or disposal, installation, maintenance, and operation of testing equipment.

specification—a precise statement of a set of requirements to be satisfied by a material, product, system, or service that indicates the procedures for determining whether each of the requirements is satisfied.

Discussion—It is desirable to express the requirements numerically in terms of appropriate units together with their limits.

terminology—a document comprising definitions of terms; descriptions of terms; and explanations of symbols, abbreviations, or acronyms.

test method—a definitive procedure for the identification, measurement, and evaluation of one or more qualities, characteristics, or properties of a material, product, system, or service that produces a test result. (Compare *practice*.)

A new edition of the Book of Standards is published annually because of additions of new standards and significant revisions to existing standards. Approximately 30 % of each volume is new or revised. Each volume contains all actions approved by the Society at least six months before the publication date. New and revised standards approved by the Society between the annual editions of any given volume are made available as separate copies. Users are cautioned to follow the most current issue of a standard except when a specific edition of a standard is cited, for example, as in a contract.

Development and Use of ASTM Standards

ASTM believes that technically competent standards result when a full consensus of all concerned parties is achieved and rigorous due process procedures are followed. This philosophy and standards development system ensure technically competent standards having the highest credibility when critically examined and used as the basis for commercial, legal, or regulatory actions.

ASTM standards are developed voluntarily and used voluntarily. Standards become legally binding only when a government body references them in regulations, or when they are cited in a contract. Any item that is produced and marked as conforming to an ASTM standard must meet all applicable requirements of that standard.

ASTM standards are used by thousands of individuals, companies, and agencies. Purchasers and sellers incorporate standards into contracts; scientists and engineers use them in laboratories; architects and designers use them in plans; government agencies reference them in codes, regulations, and laws; and many others refer to standards for guidance.

Consideration of Comments on ASTM Standards

An ASTM standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of any standard or for additional standards and should be addressed to ASTM Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, 100 Barr Harbor Drive, West Conshohocken, PA 19428.

Using the Annual Book of ASTM Standards

The standards are assembled in each volume in alphanumeric sequence of their ASTM designation numbers except for Volumes 11.01, 11.02, and 05.04, which are assembled by subject matter. Volumes 03.06, 05.03, and 06.03 are assembled first by committee, then in alphanumeric sequence. Each volume has a table of contents, listing the standards in alphanumeric sequence by ASTM designation; and a list by subjects, categorizing the standards according to subject. A subject index of the standards in each volume appears at the back of each volume.

Availability of Individual Standards

Each ASTM standard is available as a separate copy from ASTM. Special quantity prices and discounts can be obtained from Customer Services. When ordering, provide the ASTM standard designation and year of issue, title, quantity desired, and shipping instructions.

Caveat Statements and Policies in Standards

ASTM caveat statements on Safety Hazards and Fire Hazards are required to appear in standards where appropriate. They are located in the scope section of applicable standards. The caveats on General Statement of ASTM Policy and Patents are contained in all standards and located at the end of each standard disclaimer. For more information on the caveats see Section F2 of the *Form and Style for ASTM Standards*.

Listed by Section and Volume

Section 1—Iron and Steel Products

- Volume 01.01 Steel—Piping, Tubing, Fittings
- Volume 01.02 Ferrous Castings; Ferroalloys
- Volume 01.03 Steel—Plate, Sheet, Strip, Wire
- Volume 01.04 Steel—Structural, Reinforcing, Pressure Vessel, Railway
- Volume 01.05 Steel—Bars, Forgings, Bearing, Chain, Springs
- Volume 01.06 Coated Steel Products
- Volume 01.07 Shipbuilding

Section 2—Nonferrous Metal Products

- Volume 02.01 Copper and Copper Alloys
- Volume 02.02 Aluminum and Magnesium Alloys
- Volume 02.03 Electrical Conductors
- Volume 02.04 Nonferrous Metals—Nickel, Cobalt, Lead, Tin, Zinc, Cadmium, Precious, Reactive, Refractory Metals and Alloys
- Volume 02.05 Metallic and Inorganic Coatings; Metal Powders, Sintered P/M Structural Parts

Section 3—Metals Test Methods and Analytical Procedures

- Volume 03.01 Metals—Mechanical Testing; Elevated and Low-Temperature Tests; Metallography
- Volume 03.02 Wear and Erosion; Metal Corrosion
- Volume 03.03 Nondestructive Testing
- Volume 03.04 Magnetic Properties; Materials for Thermostats, Electrical Heating and Resistance, Contacts, and Connectors
- Volume 03.05 Analytical Chemistry for Metals, Ores, and Related Materials (I): C 571 to E 354
- Volume 03.06 Analytical Chemistry for Metals, Ores, and Related Materials (II): E 356 to latest; Molecular Spectroscopy; Surface Analysis

Section 4—Construction

- Volume 04.01 Cement; Lime; Gypsum
- Volume 04.02 Concrete and Aggregates
- Volume 04.03 Road and Paving Materials; Vehicle-Pavement Systems
- Volume 04.04 Roofing, Waterproofing, and Bituminous Materials
- Volume 04.05 Chemical-Resistant Materials; Vitrified Clay, Concrete, Fiber-Cement Products; Mortars; Masonry
- Volume 04.06 Thermal Insulation; Environmental Acoustics
- Volume 04.07 Building Seals and Sealants; Fire Standards; Building Constructions; Dimension Stone
- Volume 04.08 Soil and Rock (I): D 420–D 4914
- Volume 04.09 Soil and Rock (II): D 4943–latest; Geosynthetics
- Volume 04.10 Wood

Section 5—Petroleum Products, Lubricants, and Fossil Fuels

- Volume 05.01 Petroleum Products and Lubricants (I): D 56–D 2596
- Volume 05.02 Petroleum Products and Lubricants (II): D 2597–D 4629
- Volume 05.03 Petroleum Products and Lubricants (III): D 4636–latest; Catalysts
- Volume 05.04 Test Methods for Rating Motor, Diesel, and Aviation Fuels
- Volume 05.05 Gaseous Fuels; Coal and Coke

Section 6—Paints, Related Coatings, and Aromatics

- Volume 06.01 Paint—Tests for Chemical, Physical, and Optical Properties; Appearance
- Volume 06.02 Paint—Products and Applications; Protective Coatings; Pipeline Coatings
- Volume 06.03 Paint—Pigments, Drying Oils, Polymers, Resins, Naval Stores, Cellulosic Esters, and Ink Vehicles
- Volume 06.04 Paint—Solvents; Aromatic Hydrocarbons

LISTED BY SECTION AND VOLUME

Section 7—Textiles

- Volume 07.01 Textiles (I): D 76–D 3218
- Volume 07.02 Textiles (II): D 3333–latest

Section 8—Plastics

- Volume 08.01 Plastics (I): D 256–D 2343
- Volume 08.02 Plastics (II): D 2383–D 4322
- Volume 08.03 Plastics (III): D 4329–latest
- Volume 08.04 Plastic Pipe and Building Products

Section 9—Rubber

- Volume 09.01 Rubber, Natural and Synthetic—General Test Methods; Carbon Black
- Volume 09.02 Rubber Products, Industrial—Specifications and Related Test Methods; Gaskets; Tires

Section 10—Electrical Insulation and Electronics

- Volume 10.01 Electrical Insulation (I)—D 69–D 2484
- Volume 10.02 Electrical Insulation (II)—D 2518–latest
- Volume 10.03 Electrical Insulating Liquids and Gases; Electrical Protective Equipment
- Volume 10.04 Electronics (I)
- Volume 10.05 Electronics (II)

Section 11—Water and Environmental Technology

- Volume 11.01 Water (I)
- Volume 11.02 Water (II)
- Volume 11.03 Atmospheric Analysis; Occupational Health and Safety; Protective Clothing
- Volume 11.04 Environmental Assessment; Hazardous Substances and Oil Spill Response; Waste Management; Environmental Risk Management
- Volume 11.05 Biological Effects and Environmental Fate; Biotechnology; Pesticides

Section 12—Nuclear, Solar, and Geothermal Energy

- Volume 12.01 Nuclear Energy (I)
- Volume 12.02 Nuclear (II), Solar, and Geothermal Energy

Section 13—Medical Devices and Services

- Volume 13.01 Medical Devices; Emergency Medical Services

Section 14—General Methods and Instrumentation

- Volume 14.01 Health Care Informatics; Computerized Material and Chemical Property Databases
- Volume 14.02 General Test Methods, Nonmetal; Chromatography; Durability of Nonmetallic Materials; Forensic Sciences; Laboratory Apparatus; Statistical Methods
- Volume 14.03 Temperature Measurement

Section 15—General Products, Chemical Specialties, and End Use Products

- Volume 15.01 Refractories; Carbon and Graphite Products; Activated Carbon
- Volume 15.02 Glass; Ceramic Whitewares
- Volume 15.03 Space Simulation; Aerospace and Aircraft; High Modulus Fibers and Composites
- Volume 15.04 Soap; Polishes; Leather; Resilient Floor Coverings
- Volume 15.05 Engine Coolants; Halogenated Organic Solvents and Fire Extinguishing Agents; Industrial Chemicals
- Volume 15.06 Adhesives
- Volume 15.07 End Use Products
- Volume 15.08 Fasteners
- Volume 15.09 Paper; Packaging; Flexible Barrier Materials; Business Imaging Products

Section 00—Index

- Volume 00.01 Subject Index and Alphanumeric List

ANNUAL BOOK OF ASTM STANDARDS

Contents

1996 ANNUAL BOOK OF ASTM STANDARDS, VOLUMES 09.01 AND 09.02

RUBBER, NATURAL AND SYNTHETIC—TEST METHODS, RUBBER PRODUCTS, INDUSTRIAL—SPECIFICATIONS AND RELATED METHODS; CARBON BLACK; GASKETS; TIRES

A complete Subject Index begins on p. 449

This contents includes only those standards included in Volumes 09.01 and 09.02 and those standards that appeared previously which have been superceded or discontinued within the past three years. Since the standards in this book are arranged in alphanumeric sequence, no page numbers are given in this contents.

In the serial designations prefixed to the following titles, the number following the dash indicates the year of adoption as standard or in the case of revision, the year of last revision. Thus, standards adopted or revised during the year 1996 have as their final number, 96. A letter following this number indicates more than one revision during that year, that is, 96a indicates the second revision in 1996, 96b the third revision, etc. Standards that have been reapproved without change are indicated by the year of last reapproval in parentheses as part of the designation number, for example, (1996). A superscript epsilon indicates an editorial change since the last revision or reapproval— $\epsilon 1$ for the first change, $\epsilon 2$ for the second change, etc.

Test Methods for Rubber Belting, Flat Type	09.02
Test Methods for Rubber Hose	09.02
Test Methods for Rubber Property—Compression Set	09.01
Test Methods for Vulcanized Rubber and Thermoplastic Rubbers and Thermoplastic Elastomers—Tension	09.01
Test Methods for Rubber Property—Adhesion to Flexible Substrate	09.01
Test Methods for Rubber Property—Adhesion to Rigid Substrates	09.01
Test Methods for Rubber Deterioration—Dynamic Fatigue	09.01
Test Method for Rubber Deterioration by Heat and Air Pressure	09.01
Test Method for Rubber Property—Effect of Liquids	09.01
Test Method for Rubber Deterioration—Surface Cracking	09.01
Test Method for Rubber Property—Pusey and Jones Indentation	09.01
Test Method for Rubber—Deterioration by Heat and Oxygen	09.01
Test Method for Rubber—Deterioration in an Air Oven	09.01
Test Methods for Rubber Properties in Compression	09.01
Test Methods for Rubber Hose for Automotive Air and Vacuum Brake System	09.02
Test Methods for Rubber Property—Heat Generation and Flexing Fatigue in Compression	09.01
Test Method for Tear Strength of Conventional Vulcanized Rubber and Thermoplastic Elastomers	09.01
Test Method for Rubber Deterioration in Carbon—Arc Weathering Apparatus	09.01
Test Methods for Coated Fabrics	09.02
Test Methods for Rubber Property—Young's Modulus at Normal and Subnormal Temperatures (Discontinued 1995†)	09.01
Test Method for Rubber Deterioration—Crack Growth	09.01
Test Method for Rubber Property—Vapor Transmission of Volatile Liquids	09.01
Test Methods for Rubber Cements	09.01
Practice for Rubber Conditioning for Low-Temperature Testing	09.01
Test Method for Rubber—Deterioration by Heating in Air (Test Tube Enclosure)	09.01
Test Methods for Rubber Property—Staining of Surfaces (Contact, Migration, and Diffusion)	09.01
Test Method for Rubber Property—Plasticity and Recovery (Parallel Plate Method)	09.01
Test Methods for Rubber Properties in Compression or Shear (Mechanical Oscillograph)	09.01
Test Method for Rubber Property—Volume Resistivity of Electrically Conductive and Antistatic Products	09.01
Test Method for Measuring Rubber Deterioration—Cut Growth Using Ross Flexing Apparatus	09.01

§ Approved for use by agencies of the Department of Defense and, if indicated on the standard, replaces corresponding Federal or Military document. Consult the DoD Index of Specifications and Standards for the specific year of issue which has been adopted by the Department of Defense.

† Although this standard has been officially withdrawn from Society approval, a brief description is included for information only.

CONTENTS, VOLUMES 09.01 AND 09.02

§D 1053 – 92a	Test Methods for Rubber Property—Stiffening at Low Temperatures: Flexible Polymers and Coated Fabrics	09.01
D 1054 – 91	Test Method for Rubber Property—Resilience Using a Rebound Pendulum	09.01
D 1076 – 88	Specification for Rubber—Concentrated, Ammonia Preserved, Creamed, and Centrifuged Natural Latex	09.01
D 1148 – 95	Test Method for Rubber Deterioration—Heat and Ultraviolet Light Discoloration of Light-Colored Surfaces	09.01
§D 1149 – 91	Test Method for Rubber Deterioration—Surface Ozone Cracking in a Chamber	09.01
D 1171 – 94	Test Method for Rubber Deterioration—Surface Ozone Cracking Outdoors or Chamber (Triangular Specimens)	09.01
§D 1229 – 87 (1992)	Test Method for Rubber Property—Compression Set at Low Temperatures	09.01
D 1278 – 91a	Test Methods for Rubber from Natural Sources—Chemical Analysis	09.01
§D 1329 – 88 (1993) ^{ε1}	Test Method for Evaluating Rubber Property—Retraction at Lower Temperatures (TR Test)	09.01
§D 1330 – 85 (1995) ^{ε1}	Specification for Rubber Sheet Gaskets	09.02
§D 1349 – 87 (1992) ^{ε1}	Practice for Rubber—Standard Temperatures for Testing	09.01
§D 1414 – 94	Test Methods for Rubber O-Rings	09.02
§D 1415 – 88 (1994)	Test Method for Rubber Property—International Hardness	09.01
§D 1416 – 89	Test Methods for Rubber From Synthetic Sources—Chemical Analysis	09.01
D 1417 – 96	Test Methods for Rubber Latices—Synthetic	09.01
D 1418 – 95	Practice for Rubber and Rubber Latices—Nomenclature	09.01
§D 1456 – 86 (1991) ^{ε1}	Test Method for Rubber Property—Elongation at Specific Stress	09.01
D 1460 – 86 (1991) ^{ε1}	Test Method for Rubber Property—Change in Length During Liquid Immersion	09.01
D 1485 – 86 (1993)	Test Methods for Rubber From Natural Sources—Sampling and Sample Preparation	09.01
§D 1506 – 95	Test Methods for Carbon Black—Ash Content	09.01
D 1508 – 93	Test Method for Carbon Black, Pelleted—Fines Content	09.01
§D 1509 – 95	Test Methods for Carbon Black—Heating Loss	09.01
D 1510 – 96	Test Method for Carbon Black—Iodine Adsorption Number	09.01
D 1511 – 96	Test Method for Carbon Black—Pellet Size Distribution	09.01
§D 1512 – 95	Test Methods for Carbon Black—pH Value	09.01
D 1513 – 95	Test Method for Carbon Black, Pelleted—Pour Density	09.01
D 1514 – 95a	Test Method for Carbon Black—Sieve Residue	09.01
D 1519 – 95	Test Method for Rubber Chemicals—Melting Range	09.01
D 1566 – 95a ^{ε1}	Terminology Relating to Rubber	09.01
D 1618 – 95a	Test Method for Carbon Black Extractables—Toluene Discoloration	09.01
§D 1619 – 94 ^{ε1}	Test Methods for Carbon Black—Sulfur Content	09.01
§D 1630 – 94	Test Method for Rubber Property—Abrasion Resistance (Footwear Abrader)	09.01
§D 1646 – 96	Test Methods for Rubber—Viscosity, Stress Relaxation, and Pre-vulcanization Characteristics (Mooney Viscometer)	09.01
D 1764 – 62 (1991)	Specification for Rubber Latex Products for Automotive Applications	09.02
D 1765 – 96	Classification System for Carbon Blacks Used in Rubber Products	09.01
D 1766 – 96	Test Method for Rubber Chemicals—Solubility	09.01
D 1799 – 93	Practice for Carbon Black—Sampling Packaged Shipments	09.01
D 1817 – 96	Test Method for Rubber Chemicals—Density	09.01
§D 1869 – 95	Specification for Rubber Rings for Asbestos-Cement Pipe	09.02
D 1900 – 94	Practice for Carbon Black—Sampling Bulk Shipments	09.01
§D 1917 – 92	Test Methods for Rubber Property—Shrinkage of Raw and Compounded Hot-Polymerized Styrene-Butadiene Rubber (SBR)	09.01
D 1937 – 95	Test Method for Carbon Black, Pelleted—Mass Strength	09.01
D 1991 – 91	Test Method for Rubber Chemicals—2-Mercaptobenzothiazole (MBT)—Assay	09.01
D 1992 – 91	Guide for Testing Synthetic Plasticizers Used in Rubber	09.01
D 1993 – 91	Test Method for Precipitated Silica—Surface Area by Multipoint BET Nitrogen Adsorption	09.01
§D 2000 – 95	Classification System for Rubber Products in Automotive Applications	09.02
§D 2084 – 95	Test Method for Rubber Property—Vulcanization Using Oscillating Disk Cure Meter	09.01
§D 2136 – 94	Test Method for Coated Fabrics—Low-Temperature Bend Test	09.01
§D 2137 – 94	Test Methods for Rubber Property—Brittleness Point of Flexible Polymers and Coated Fabrics	09.01
D 2226 – 93	Classification for Various Types of Petroleum Oils for Rubber Compounding Use	09.01
D 2227 – 90	Specification for Natural Rubber (NR) Technical Grades	09.01
D 2228 – 88 (1994) ^{ε1}	Test Method for Rubber Property—Abrasion Resistance (Pico Abrader)	09.01
D 2230 – 90	Test Method for Rubber Property—Extrudability of Unvulcanized Compounds	09.01
D 2231 – 94	Practice for Rubber Properties in Forced Vibration	09.01
§D 2240 – 95	Test Method for Rubber Property—Durometer Hardness	09.01
D 2414 – 96	Test Method for Carbon Black— <i>n</i> -Dibutyl Phthalate Absorption Number	09.01
D 2433 – 93	Test Methods for Rubber Thread	09.02
D 2449 – 88 (1995) ^{ε1}	Specification for Rubber Bales from Natural Sources—Limit on Coating	09.01
D 2527 – 83 (1992)	Specification for Rubber Seals—Splice Strength	09.02
§D 2632 – 92	Test Method for Rubber Property—Resilience by Vertical Rebound	09.01
D 2663 – 95a	Test Methods for Carbon Black—Dispersion in Rubber	09.01
§D 2702 – 94	Practice for Rubber Chemicals—Determination of Infrared Absorption Characteristics	09.01
D 2703 – 95	Practice for Rubber Chemicals—Determination of Ultraviolet Absorption Characteristics	09.01
D 2934 – 89	Practice for Rubber Seals—Compatibility With Service Fluids (Discontinued 1994†)	09.02

CONTENTS, VOLUMES 09.01 AND 09.02

§D 3037 – 93	Test Methods for Carbon Black—Surface Area by Nitrogen Adsorption	09.01
D 3053 – 96	Terminology Relating to Carbon Black	09.01
§D 3137 – 81 (1994)	Test Method for Rubber Property—Hydrolytic Stability	09.01
D 3156 – 90	Practice for Rubber—Chromatographic Analysis of Antidegradants (Stabilizers, Antioxidants, and Antiozonants)	09.01
D 3157 – 84 (1995) [¶]	Test Method for Rubber from Natural Sources—Color	09.01
§D 3182 – 89 (1994)	Practice for Rubber—Materials, Equipment, and Procedures for Mixing Standard Compounds and Preparing Standard Vulcanized Sheets	09.01
§D 3183 – 84 (1992)	Practice for Rubber—Preparation of Pieces for Test Purposes from Products	09.01
D 3184 – 89 (1995) [¶]	Test Methods for Rubber—Evaluation of NR (Natural Rubber)	09.01
D 3185 – 88 (1994)	Test Methods for Rubber—Evaluation of SBR (Styrene-Butadiene Rubber) Including Mixtures With Oil	09.01
D 3186 – 95	Test Methods for Rubber—Evaluation of SBR (Styrene-Butadiene Rubber) Mixed With Carbon Black or Carbon Black and Oil	09.01
D 3187 – 95 [¶]	Test Methods for Rubber—Evaluation of NBR (Acrylonitrile-Butadiene Rubber)	09.01
D 3188 – 95	Test Methods for Rubber—Evaluation of IIR (Isobutene-Isoprene Rubber)	09.01
D 3189 – 94	Test Methods for Rubber—Evaluation of Solution BR (Polybutadiene Rubber)	09.01
D 3190 – 95	Test Methods for Rubber—Evaluation of Chloroprene Rubber (CR)	09.01
D 3191 – 96	Test Methods for Carbon Black in SBR (Styrene-Butadiene Rubber)—Recipe and Evaluation Procedures	09.01
D 3192 – 96	Test Methods for Carbon Black Evaluation in NR (Natural Rubber)	09.01
D 3194 – 94	Test Method for Rubber from Natural Sources—Plasticity Retention Index (PRI)	09.01
D 3265 – 96	Test Method for Carbon Black—Tint Strength	09.01
D 3313 – 95	Test Method for Carbon Black—Individual Pellet Crush Strength	09.01
D 3314 – 92	Test Method for Rubber—Chemical Analysis for Polystyrene Blocks in SBR (Styrene-Butadiene Rubber) and Styrene-Reinforced Latexes	09.01
D 3324 – 95a	Practice for Carbon Black—Improving Test Reproducibility Using ASTM Reference Blacks	09.01
D 3346 – 90 (1995) [¶]	Test Methods for Rubber Property—Processability of SBR (Styrene-Butadiene Rubber) with the Mooney Viscometer	09.01
D 3389 – 94	Test Method for Coated Fabrics Abrasion Resistance (Rotary Platform, Double-Head Abrader)	09.02
D 3393 – 91	Specification for Coated Fabrics—Waterproofness	09.02
D 3395 – 86 (1991)	Test Methods for Rubber Deterioration—Dynamic Ozone Cracking in a Chamber	09.01
D 3403 – 94a	Test Methods for Rubber—Evaluation of IR (Isoprene Rubber)	09.01
D 3452 – 93	Practice for Rubber—Identification by Pyrolysis-Gas Chromatography	09.01
D 3484 – 87 (1994)	Test Methods for Rubber—Evaluation of Oil-Extended Solution BR (Polybutadiene Rubber)	09.01
D 3486 – 85	Practice for Installation of Vulcanizable Rubber Tank Linings and Pipe Linings (Discontinued 1995†)	09.02
D 3491 – 92	Test Methods for Vulcanizable Rubber Tank and Pipe Lining	09.02
§D 3492 – 96	Specification for Rubber Contraceptives (Male Condoms)	09.02
D 3493 – 96	Test Method for Carbon Black— <i>n</i> -Dibutyl Phthalate Absorption Number of Compressed Sample	09.01
D 3533 – 90 (1995)	Test Method for Rubber—Nitrogen Content	09.01
D 3566 – 90 (1995) [¶]	Practice for Rubber—Determination of Bromine in the Presence of Chlorine by Oxygen Combustion	09.01
D 3568 – 95	Test Methods for Rubber—Evaluation of EPDM (Ethylene Propylene Diene Terpolymers) Including Mixtures With Oil	09.01
D 3571 – 86 (1991) [¶]	Specification for Household Laundry and Dishwasher Water Inlet Hose, Consumer Product	09.02
D 3572 – 86 (1991) [¶]	Specification for Household Laundry and Dishwasher Drain Hose, Consumer Product	09.02
D 3573 – 86 (1991) [¶]	Specification for Sink Spray Hose, Consumer Product	09.02
§D 3577 – 91	Specification for Rubber Surgical Gloves	09.02
§D 3578 – 95	Specification for Rubber Examination Gloves	09.02
§D 3579 – 77 (1993) [¶]	Specification for Rubber Surgical Drainage Tubes, Penrose-Type	09.02
D 3616 – 95	Test Method for Rubber, Raw—Determination of Gel, Swelling Index, and Dilute Solution Viscosity	09.01
D 3629 – 94	Test Method for Rubber Property—Cut Growth Resistance	09.01
D 3667 – 85 (1995) [¶]	Specification for Rubber Seals Used in Flat-Plate Solar Collectors	09.02
D 3674 – 89 (1993) [¶]	Test Method for Carbon Black—Relative Extrusion Mass	09.01
§D 3677 – 90 (1995) [¶]	Test Methods for Rubber—Identification by Infrared Spectrophotometry	09.01
§D 3738 – 84 (1995) [¶]	Specification for Rubber-Coated Cloth Hospital Sheeting	09.02
D 3765 – 95	Test Method for Carbon Black—CTAB (Cetyltrimethylammonium Bromide) Surface Area	09.01
§D 3767 – 84 (1992)	Practice for Rubber—Measurement of Dimensions	09.01
D 3771 – 85 (1995) [¶]	Specification for Rubber Seals Used in Concentrating Solar Collectors	09.02
D 3772 – 86 (1991) [¶]	Specification for Rubber Finger Cots	09.02
D 3832 – 79 (1992)	Specification for Rubber Seals Contacting Liquids in Solar Energy Systems	09.02
D 3847 – 91	Practice for Rubber—Directions for Achieving Subnormal Test Temperatures	09.01
D 3848 – 94	Test Methods for Rubber—Evaluation of NBR (Acrylonitrile-Butadiene Copolymers) Mixed With Carbon Black	09.01
D 3849 – 95a	Test Method for Carbon Black—Primary Aggregate Dimensions from Electron Microscope Image Analysis	09.01

CONTENTS, VOLUMES 09.01 AND 09.02

D 3853 – 96	Terminology Relating to Rubber and Rubber Latices—Abbreviations for Chemicals Used in Compounding	09.01
D 3854 – 90 (1995) ^{€1}	Test Method for Rubber Thread—Resistance to Dry Heat	09.02
D 3855 – 84 (1995) ^{€1}	Test Method for Rubber Thread—Deterioration Due to Standard Washing Solution Treatment	09.02
D 3896 – 85 (1995) ^{€1}	Practice for Rubber from Synthetic Sources—Sampling	09.01
D 3899 – 93	Specification for Rubber Contraceptives—Vaginal Diaphragms	09.02
D 3900 – 95	Test Methods for Rubber, Raw—Determination of Ethylene Units in EPM (Ethylene-Propylene Copolymers) and EPDM (Ethylene-Propylene-Diene Terpolymers)	09.01
D 3901 – 90	Specification for Garden Hose, Consumer Product	09.02
D 3902 – 90	Test Method for Rubber Hose for Gas Diffusion of Liquefied Petroleum Gas	09.02
D 3903 – 85 (1990)	Specification for Rubber Seals Used in Air-Heat Transport of Solar Energy Systems	09.02
D 3952 – 87 (1993)	Specification for Rubber Hose Used in Solar Energy Systems	09.02
D 3958 – 95	Test Methods for Rubber—Evaluation of BIIR and CIIR (Halogenated Isobutene-Isoprene Rubber)	09.01
D 3959 – 91	Test Method for Rubber- and Plastic-Coated Fabrics—Discoloration Sensitivity to Tobacco Smoke	09.02
§D 4004 – 93	Test Methods for Rubber—Determination of Metal Content by Flame Atomic Absorption (AAS) Analysis	09.01
D 4005 – 92	Test Method for Plastic-Coated Fabrics—Completeness of Fusion of PVC Dispersion Coatings	09.02
D 4026 – 87 (1992)	Test Method for Rubber Latex—Styrene-Butadiene Copolymer—Determination of Residual Styrene	09.01
§D 4075 – 87 (1992)	Test Methods for Compounding Materials—Flame Atomic Absorption Technique—Determination of Metals	09.01
D 4122 – 96	Practice for Carbon Black—Evaluation of an Industry Reference Black	09.01
D 4237 – 90	Test Methods for Rubber Hose Used for Steam Applications	09.02
D 4264 – 90	Test Method for Pressure Testing of Assemblies of Rubber-Lined Fire Hose and Rubber Booster Hose in Service on Interior Standpipes	09.02
D 4295 – 89 (1994)	Classification for Rubber Compounding Materials—Zinc Oxide	09.01
D 4315 – 94	Test Methods for Rubber Compounding Material—Zinc Oxide	09.01
D 4316 – 95	Specification for Rubber Water Bottles	09.02
D 4324 – 95b	Test Method for Carbon Black, Pelleted—Pellet Attrition	09.01
D 4482 – 85 (1994)	Test Method for Rubber Property—Extension Cycling Fatigue	09.01
D 4483 – 95	Practice for Determining Precision for Test Method Standards in the Rubber and Carbon Black Industries	09.01
D 4527 – 93a	Test Methods for Carbon Black—Solvent Extractables	09.01
D 4528 – 88 (1993) ^{€1}	Classification for Rubber Compounding Materials: Sulfur	09.01
D 4569 – 89 (1994) ^{€1}	Test Method for Rubber Chemicals—Determination of Acidity in Sulfur	09.01
D 4570 – 86 (1993) ^{€1}	Test Method for Rubber Chemicals—Determination of Particle Size of Sulfur by Sieving (Dry)	09.01
D 4571 – 94	Test Methods for Rubber Chemicals—Determination of Volatile Material	09.01
D 4572 – 89 (1994) ^{€1}	Test Method for Rubber Chemicals—Wet Sieve Analysis of Sulfur	09.01
D 4573 – 95	Test Method for Rubber Chemicals—Determination of Oil Content in Oil-Treated Sulfur	09.01
D 4574 – 94	Test Methods for Rubber Chemicals—Determination of Ash Content	09.01
D 4575 – 86 (1991) ^{€1}	Test Methods for Rubber Deterioration—Reference and Alternative Method(s) for Determining Ozone Level in Laboratory Test Chambers	09.01
D 4578 – 89 (1994) ^{€1}	Test Methods for Rubber Chemicals—Determination of Percent Insoluble Sulfur by Solvent Extraction	09.01
D 4583 – 95	Practice for Carbon Black—Calculation of Process Indexes From an Analysis of Process Control Data	09.01
D 4620 – 86 (1993) ^{€1}	Test Method for Evaluating the Effective Surface Area of Zinc Oxide in Rubber	09.01
D 4676 – 94	Classification for Rubber Compounding Materials—Antidegradants	09.01
D 4677 – 87 (1993) ^{€1}	Classification for Rubber Compounding Materials—Titanium Dioxide	09.01
D 4678 – 94	Practice for Rubber—Preparation, Testing, Acceptance, Documentation, and Use of Reference Materials (IRM)	09.01
D 4679 – 93	Specification for Rubber Household or Beautician Gloves	09.02
D 4817 – 88 (1994)	Classification for Rubber Compounding Materials—Stearic Acid	09.01
D 4818 – 89 (1994)	Classification for Rubber Compounding Materials—Vulcanization Accelerators	09.01
D 4820 – 95	Test Method for Carbon Black—Surface Area by Multipoint B.E.T. Nitrogen Adsorption	09.01
D 4821 – 95a	Guide for Carbon Black—Validation of Test Method Precision and Bias	09.01
D 4924 – 89 (1994)	Classification for Petroleum Waxes for Use in Rubber Compounding	09.01
D 4934 – 94	Test Method for Rubber Compounding Materials 2-Benzothiazyl Sulfenamide Accelerators—Insolubles	09.01
D 4936 – 91	Test Method for Mercaptobenzothiazole Sulfenamide Assay by Reduction/Titration	09.01
D 4937 – 91	Test Method for <i>p</i> -Phenylenediamine Antidegradants Purity by Gas Chromatography	09.01
D 5044 – 90 (1995) ^{€1}	Test Method for Rubber Chemicals—Free 2-Mercaptobenzothiazole (MBT) in Benzothiazyl Disulfide (MBTS)	09.01
D 5051 – 90 (1995) ^{€1}	Test Method for Rubber Chemicals—Benzothiazyl Disulfide (MBTS)—Assay	09.01
D 5054 – 90 (1995) ^{€1}	Test Method for Rubber Chemicals—Diphenyl Guanidine (DPG) and Di- <i>o</i> -tolyl-Guanidine (DOTG) Assay	09.01

CONTENTS, VOLUMES 09.01 AND 09.02

D 5099 - 93	Test Methods for Rubber—Measurement of Processing Properties Using Capillary Rheometry	09.01
D 5151 - 92	Test Method for Detection of Holes in Medical Gloves	09.02
D 5193/D 5193M - 93	Test Method for Coated Fabrics—Air Retention	09.02
D 5230 - 96a	Test Method for Carbon Black—Automated Individual Pellet Crush Strength	09.01
D 5250 - 92	Specification for Poly(Vinyl Chloride) Gloves for Medical Application	09.02
D 5289 - 95	Test Method for Rubber Property—Vulcanization Using Rotorless Cure Meters	09.01
D 5297 - 95	Test Methods for Rubber Chemical Accelerator—Purity by High Performance Liquid Chromatography	09.01
D 5376 - 93	Test Method for Rubber Chemicals—Determination of the Percent Nitrogen in Rubber Antioxidant: Polymerized TMQ	09.01
D 5377 - 93	Classification for Rubber Compounding Materials—Ground Coal	09.01
D 5406 - 93	Practice for Rubber—Calculation of Producer's Process Performance Indexes	09.01
D 5460 - 93	Test Method for Rubber Compounding Materials—Water in Rubber Additives	09.01
D 5461 - 93	Test Method for Rubber Additives—Wet Sieve Analysis of Powdered Rubber Chemicals	09.01
D 5538 - 94	Practice for Thermoplastic Elastomers—Terminology and Abbreviations	09.01
D 5603 - 95	Classification for Rubber Compounding Materials—Vulcanized Particulate Rubber	09.01
D 5604 - 94	Test Method for Precipitated Silica—Surface Area by Single Point B.E.T. Nitrogen Adsorption	09.01
D 5605 - 94	Practice for Styrene-Butadiene Rubber (SBR)—Establishing Raw Mooney Viscosity Target Values	09.01
D 5644 - 94	Test Methods for Rubber Compounding Materials—Determination of Particle Size Distribution of Vulcanized Particulate Rubber Products	09.01
D 5666 - 95	Test Method for <i>P</i> -Phenylenediamine Antidegradants—Purity by High Performance Liquid Chromatography	09.01
D 5667 - 95	Test Method for Rubber from Synthetic Sources—Total and Water Soluble Ash	09.01
D 5668 - 95	Test Method for Rubber from Synthetic Sources—Volatile Matter	09.01
D 5669 - 95	Test Method for Rubber—Evaluation of Residual Unsaturation in Hydrogenated Nitrile Rubber (HNBR) by Curemeter Testing	09.01
D 5670 - 95	Test Method for Rubber—Determination of Residual Unsaturation in Hydrogenated Nitrile Rubber (HNBR) by Infrared Spectrophotometry	09.01
D 5712 - 95	Test Method for the Analysis of Protein in Natural Rubber and Its Products	09.02
D 5774 - 95	Test Methods for Rubber from Synthetic Sources—Chemical Analysis of Extractables	09.01
D 5775 - 95	Test Method for Rubber from Synthetic Sources—Bound Styrene in SBR	09.01
D 5805 - 95	Test Method for Rubber from Synthetic Sources—Carbon Black in Masterbatches	09.01
D 5816 - 95	Test Methods for Carbon Black—External Surface Area by Multipoint Nitrogen Adsorption	09.01
D 5817 - 96	Practice for Carbon Black, Pelleted—Reduction and Blending of Gross Samples	09.01
D 5899 - 96	Classification System for Rubber Compounding Materials for Use in Computer Material Management Systems	09.01
D 5900 - 96	Specification for Physical and Chemical Properties of Industry Reference Materials (IRM)	09.01
D 5902 - 96	Test Method for Rubber—Determination of Residual Unsaturation in Hydrogenated Nitrile Rubber (HNBR) by Iodine Value	09.01
§F 36 - 95	Test Method for Compressibility and Recovery of Gasket Materials	09.02
§F 37 - 95 ^{ei}	Test Methods for Sealability of Gasket Materials	09.02
§F 38 - 95	Test Methods for Creep Relaxation of a Gasket Material	09.02
§F 104 - 95	Classification System for Nonmetallic Gasket Materials	09.02

§F 147 - 87 (1993) ^{ei}	Test Method for Flexibility of Non-Metallic Gasket Materials	09.02
F 148 - 95	Test Method for Binder Durability of Cork Composition Gasket Materials	09.02
§F 152 - 95	Test Methods for Tension Testing of Nonmetallic Gasket Materials	09.02
F 336 - 92	Practice for Design and Construction of Nonmetallic Enveloped Gaskets for Corrosive Service	09.02
F 363 - 89 (1994) ^{ei}	Test Method for Corrosion Testing of Gaskets	09.02
F 376/F 376M - 89	Test Methods for Tires for Wet Traction Performance in Cornering (Discontinued 1994†)	09.02
F 377 - 94a	Method for Calibration of Braking Force for Testing of Pneumatic Tires	09.02
F 403 - 86 (1993)	Test Method for Tires for Wet Traction in Straight-Ahead Braking, Using Highway Vehicles	09.02
F 408 - 94a	Test Method for Tires for Wet Traction in Straight-Ahead Braking, Using a Towed Trailer	09.02
F 414 - 88	Test Method for Energy Absorbed by a Tire When Deformed by a Slow-Moving Plunger	09.02
F 421 - 95b	Test Method for Measuring Groove and Void Depth in Passenger Car Tires	09.02
F 424 - 86 (1993)	Test Method for Tires for Wet Driving Traction in Straight-Ahead Motion Using Highway Vehicles	09.02
F 433 - 77 (1993) ^{ei}	Practice for Evaluating Thermal Conductivity of Gasket Materials	09.02
F 434 - 93	Test Method for Blow-Out Testing of Preformed Gaskets	09.02
F 457 - 94	Test Method for Speed and Distance Calibration of a Fifth Wheel Equipped With Either Analog or Digital Instrumentation	09.02
§F 495 - 88 (1993)	Test Method for Weight Loss of Gasket Materials Upon Exposure to Elevated Temperatures	09.02
F 538 - 95 ^{ei}	Terminology Relating to the Characteristics and Performance of Tires	09.02

CONTENTS, VOLUMES 09.01 AND 09.02

F 551 – 89 (1995) ^{ε1}	Practice for Using a Nominal 67.23-in. (1.707-m) Diameter Laboratory Test Roadwheel in Testing Tires	09.02
F 559 – 95	Test Method for Measuring Length of Road Test Courses Using a Fifth Wheel	09.02
F 586 – 79 (1989) ^{ε1}	Test Method for Leak Rates Versus γ Stresses and m Factors for Gaskets	09.02
§F 607 – 90	Test Method for Adhesion of Gasket Materials to Metal Surfaces	09.02
F 709 – 81 (1986) ^{ε1}	Specification for Gasket—Asbestos Metallic Cloth Material (Discontinued 1993†)	09.02
F 724 – 94a	Test Method for Outdoor Evaluation of Tire Sidewall Component Cracking Resistance	09.02
F 762 – 94	Test Method for Determining Change in Groove (or Void) Depth with Distance Traveled for Passenger Car Tires	09.02
F 806 – 93	Test Method for Compressibility and Recovery of Laminated Composite Gasket Materials	09.02
F 811 – 89	Practice for Accelerometer Use in Vehicles for Tire Testing	09.02
F 868 – 91	Classification for Laminated Composite Gasket Materials	09.02
F 870 – 94	Practice for Tread Footprints of Passenger Car Tires Groove Area Fraction and Dimensional Measurements	09.02
F 1016 – 93	Practice for Linear Tire Treadwear Data Analysis	09.02
F 1035 – 91	Practice for Use of Rubber-Cord Pie Disk to Demonstrate the Discernment Capability of a Tire X-ray Imaging System	09.02
F 1046 – 93	Guide for Preparing Artificially Worn Passenger and Light Truck Tires for Testing	09.02
F 1082 – 93	Practice for Tires—Determining Precision for Test Method Standards	09.02
F 1087 – 88 (1993) ^{ε1}	Test Method for Linear Dimensional Stability of a Gasket Material to Moisture	09.02
F 1112 – 95	Test Method for Static Testing of Tubeless Pneumatic Tires for Rate of Loss of Inflation Pressure	09.02
F 1276 – 92	Test Method for Creep Relaxation of Laminated Composite Gasket Materials	09.02
F 1277 – 95	Test Method for Determination of Leachable Chloride in Packing and Gasketing Materials by Ion-Selective Electrode Technique	09.02
F 1315 – 90	Test Method for Density of a Sheet Gasket Material	09.02
F 1364 – 92	Practice for Use of a Calibration Device to Demonstrate the Inspection Capability of an Interferometric Laser Imaging Nondestructive Tire Inspection System	09.02
F 1426 – 94	Practice for Identifying and Describing Tire Tread Surface Irregular Wear Patterns Resulting from Tire Use	09.02
F 1502 – 94	Test Method for Static Measurements on Tires for Passenger Cars, Light Trucks, and Medium Duty Vehicles	09.02
F 1572 – 94	Test Methods for Tire Performance Testing on Snow and Ice Surfaces	09.02
F 1574 – 95	Test Method for Compressive Strength of Gaskets at Elevated Temperatures	09.02
F 1649 – 95	Test Methods for Evaluating Wet Braking Traction Performance of Passenger Car Tires on Vehicles Equipped with Anti-Lock Braking Systems	09.02
F 1650 – 95	Practice for Evaluating Tire Traction Performance Data Under Varying Test Conditions	09.02
ES 27 – 94	Emergency Standard Practice for Rubber—Establishing Replacement Immersion Reference Oils for ASTM No. 2 and No. 3 Immersion Oils as Used in Test Method D 471	09.01

1996 ANNUAL BOOK OF ASTM STANDARDS, VOLUME 09.02

RUBBER PRODUCTS, INDUSTRIAL—SPECIFICATIONS AND RELATED TEST METHODS; GASKETS; TIRES

A complete Subject Index begins on p. 449

Since the standards in this book are arranged in alphanumerical sequence, no page numbers are given in the list. The standards listed in *italics* are related documents included for information only and do not appear in this volume.

RUBBER AND RUBBER-LIKE MATERIALS

Automotive and Aeronautical Rubber

Classification System for:

§D 2000 – 95 Rubber Products in Automotive Applications

Specification for:

D 1764 – 62 (1991) Rubber Latex Products for Automotive Applications

Test Methods for:

- §F 36 – 95 Compressibility and Recovery of Gasket Materials
§F 38 – 95 Creep Relaxation of a Gasket Material
F 1276 – 92 Creep Relaxation of Laminated Composite Gasket Materials
F 1277 – 90 Determination of Leachable Chloride in Packing and Gasketing Materials by the Ion-Selective Electrode Technique
§D 3574 – 95 Flexible Cellular Materials—Slab, Bonded, and Molded Urethane Foams
§D 380 – 94 Rubber Hose
§D 622 – 86 (1991)^{§1} Rubber Hose for Automotive Air and Vacuum Brake System
§D 1414 – 94 Rubber O-Rings
D 885 – 94 *Tire Cords, Tire Cord Fabrics, and Industrial Filament Yarns Made from Man-Made Organic-Base Fibers (see Vol 07.01)*
D 885M – 94 *Tire Cords, Tire Cord Fabrics, and Industrial Filament Yarns Made from Man-Made Organic-Base Fibers [Metric] (see Vol 07.01)*

Practices for:

- F 870 – 94 Tread Footprints of Passenger Car Tires Groove Area Fraction and Dimensional Measurements
E 104 – 85 (1991) *Maintaining Constant Relative Humidity by Means of Aqueous Solutions (see Vol 11.03)*

Packing, Seals, and Gasket Materials

Classification System for:

§F 104 – 93 Nonmetallic Gasket Materials

Specifications for:

- §D 1869 – 95 Rubber Rings for Asbestos-Cement Pipe
D 3832 – 79 (1992) Rubber Seals Contacting Liquids in Solar Energy Systems
D 2527 – 83 (1992) Rubber Seals—Splice Strength
D 3903 – 85 (1990) Rubber Seals Used in Air-Heat Transport of Solar Energy Systems
D 3771 – 85 (1995)^{§1} Rubber Seals Used in Concentrating Solar Collectors
D 3667 – 85 (1995)^{§1} Rubber Seals Used in Flat-Plate Solar Collectors
§D 1330 – 85 (1995)^{§1} Rubber Sheet Gaskets
C 443 – 94 *Joints for Circular Concrete Sewer and Culvert Pipe, Using Rubber Gaskets (see Vol 04.05)*
C 505 – 94 *Nonreinforced Concrete Irrigation Pipe with Rubber Gasket Joints (see Vol 04.05)*
C 505M – 94 *Nonreinforced Concrete Irrigation Pipe with Rubber Gasket Joints [Metric] (see Vol 04.05)*
D 994 – 94 *Preformed Expansion Joint Filler for Concrete (Bituminous Type) (see Vol 04.03)*
D 1751 – 83 (1991) *Preformed Expansion Joint Fillers for Concrete Paving and Structural Construction (Nonextruding and Resilient Bituminous Types) (see Vol 04.03)*
D 1752 – 84 (1992) *Preformed Sponge Rubber and Cork Expansion Joint Fillers for Concrete Paving and Structural Construction (see Vol 04.03)*

§ Approved for use by agencies of the Department of Defense and, if indicated on the standard, replaces corresponding Federal or Military documents. Consult the DoD Index of Specifications and Standards for the specific year of issue which has been adopted by the Department of Defense.
