Harriet, Imogen and Matthew*

Preface

This book is written for students of English and their teachers. Its aim is to introduce you, our readers, to the English language: to its sounds, its words, and its sentences. We have supposed that you know little about these topics but are willing to learn. We also suppose that the best way to learn is through a combination of listening and doing. We have made our exposition relatively simple, trying always to present the essential nature of the phenomena rather than getting too caught up in the details. This book may therefore be seen (and hopefully used) both as a stand-alone introduction or as precursor to more advanced treatments of linguistic phenomena elsewhere.

In order to help beginners in the study of language we have included extensive glossaries at the end of each section (that is, at the end of the Introduction, and Parts I, II and III) where students can use them for reference and for revision. Professional linguists might take issue with some of our definitions of specialist terms. Our excuse is that we have tried to keep our definitions as simple as possible so that students may go on later to come to a deeper understanding of the theories that lie behind the terms.

At the end of each of the three parts of the book we also provide some additional reading and references dealing with the areas we covered in that particular part.

A large part of this book consists of exercises, which we hope you will do, rather than skim over. We have put stop signs in the form of a row of asterisks at the end of many exercises to suggest that you do not go on until you have actually tried the exercise.

The exercises are of three kinds. The first are expository exercises, which ask questions so as to set the scene for an expository section. These are indicated in the text by a shaded box. The answers to these exercises often follow directly in the text. The second are practice exercises, which should be done at the point where they appear in the book so that some skill in analytic technique is acquired at the appropriate time. The third type are applied exercises, which enable you to use some of the material you have learned to explore texts. There are more of both the latter at the end of chapters. Most exercises other than open-ended ones have answers provided at the end of the book. Readers should, of course, work through the questions for themselves before

looking at our answers. A disagreement with our answer does not always mean that the student is wrong. Sometimes differences of opinion are the beginning of new understanding.

We wish also to justify creating a new textbook of this kind. It is our belief that a great many students of English around the world take introductory courses dealing with the English language. We have in mind a one-semester or full year course taken as a requirement or option for undergraduate students of English or trainee teachers. We believe that there are few purpose-built texts for such courses. Mostly students of English make do with books which are introductions to linguistics and which make use of data from languages other than English. Such books often include a variety of topics of interest to students of linguistics such as how children acquire languages and whether animals have languages. Although all these topics are of interest, we believe that such an approach is not the best one for students of English.

The courses for which this book is intended were in the past promoted as a way of learning to speak and write more effectively. It seems, however, that people learn to speak and write better not by studying the structure of the language they already speak, but by writing and speaking more and with appropriate audiences in mind and appropriate feedback.

This does not mean that there is no value in the study of a language by those who speak it or are learning to speak it. Students and teachers of English often need an informed way to talk about English. An agreed terminology and understanding of its use can be useful in pointing out particular problems in a student's writing, or in clarifying a complex passage. In addition, an ability to analyse language contributes significantly to the conscious appreciation of literary form and style. Since many students of English devote most of their studies to the reading and analysis of literature this seems a valuable ability to foster. Finally, and most importantly, an understanding of human language is essential to understanding what it means to be human. The acquisition of a human language is a major intellectual accomplishment, however effortlessly this acquisition comes about. So much else that we learn or accomplish throughout our lives depends on our ability to speak, write, read and understand a language.

We believe that this book aims clearly at these particular ends.

Both authors have developed the material in this book in the first-year courses in English which they teach at the Universities of Auckland and Canterbury. The students in these courses are usually correctly presumed to have little or no knowledge of the nature of the English language and its structure. The great majority of them take these courses as their only course in English language. We are grateful to them and their candid comments on our teaching material. This book is written therefore for students of English and their teachers in the hope that they find their language as interesting as we do.

It is impossible properly to acknowledge the help of all the very many people who have used and commented on this text and its precursors

through their long and variable geneses, among them John Andreae, Mary Clark, Derek Davy and Doug Haggio. To all the many friends, colleagues and students who have used and commented on this material, our profound thanks.

We are grateful to Harriet Allan, Alison Kuiper, Francesca Hickey, Linda Whybrew and the Macmillan editors for many helpful suggestions during the drafting of the final versions. For those errors and infelicities that remain we take sole responsibility.

Both authors are grateful to their respective institutions for a period of study-leave during which this book went through its last revisions. The first author also gratefully acknowledges the assistance of the Research Institute for Language and Speech of Utrecht University and the Netherlands Scientific Organisation (NWO).

We would both value any comments and suggestions for the book's future improvement.

Acknowledgements

Section 6 of Chapter 1 draws on D. Crystal and D. Davy, *Investigating English Style* (London: Longman, 1969).

The section dealing with phonological differences between dialects in Chapter 2 draws on J. D. O'Connor, *Phonetics* (Harmondsworth: Pelican, 1973), and I. C. Wells, *Accents of English* (Cambridge: Cambridge University Press, 1982).

The model of syllable structure in Chapter 2 is taken from that introduced in R. Lass, *Phonology: An Introduction to Basic Concepts* (Cambridge: Cambridge University Press, 1984). The discussion of stress placement is based on that found in P. Roach, *English Phonetics and Phonology: A Practical Course* (Cambridge: Cambridge University Press, 1983).

The terms *tone*, *tone group*, *tonic* relating to intonation are taken from D. Crystal, *The English Tone of Voice* (London: Edward Arnold, 1975), and M. A. K. Halliday, *A Course in Spoken English Intonation* (Oxford: Oxford University Press, 1970).

The authors and publishers wish to thank the following who have kindly given permission for the use of copyright material:

Curtis Brown (Aust.) Pty Ltd, on behalf of the author, for the extracts from 'Conversation' from *Inside us the Dead* (Longman Paul, 1976);

Faber and Faber Ltd, for the extract from W. H. Auden, 'Night Mail' in *Collected Poems*, edited by Edward Mendelson (1976);

the International Phonetic Association, for the International Phonetic Alphabet chart;

W. W. Norton & Company Ltd, for the extract from e. e. cummings, 'love is more thicker than forget' from *Complete Poems, 1904–1962*, edited by George J. Firmage; copyright © 1939, 1967, 1991 by the Trustees for the e. e. cummings Trust;

Oxford University Press, for the dictionary entries from the *Pocket Oxford Dictionary*, 8th edn (1992), the *Concise Oxford Dictionary*, 8th edn (1990), and the *Oxford English Dictionary*, 2nd edn (1989);

Laurence Pollinger Ltd, on behalf of the Estate of Frieda Lawrence Ravagli and Viking Penguin, a division of Penguin Books USA Inc., for the extracts from D. H. Lawrence, 'Gipsy' and 'A White Blossom' from *The Complete Poems of D. H. Lawrence*, edited by V. de Sola Pinto and F. W. Roberts (1964); copyright © 1964, 1971 by Angelo Ravagli and C. M. Weekly, executors of the Estate of Freida Lawrence Ravagli;

A. P. Watt Ltd, on behalf of Michael Yeats, for the extract from W. B. Yeats, 'The Moods' in *Collected Poems* (Macmillan, 1950);

Every effort has been made to trace all copyright holders but if any have been inadvertently overlooked, the publishers will be pleased to make the necessary arrangements at the first opportunity.

Abbreviations and symbols

#	word boundary
*	indicates that the following is an ungrammatical form
/ /	slash brackets surrounding phonemic symbols
[]	brackets surrounding phonetic symbols or constituents of complex structures in morphology and syntax
A	adjective, adverb, numeral
ADJ	adjective
AP	adjective phrase, adverb phrase
AuxV	auxiliary verb
C	consonant
CD	compact disc
CD ROM	compact disc read-only memory
Co	coda
CONJ	conjunction
cons	consonantal
cont	continuant
cor	coronal
DEG	degree adverb
DET	determiner
IPA	International Phonetic Alphabet
LexV	lexical verb
N	noun
NP	noun phrase
Nu	nucleus
<i>OED</i>	<i>Oxford English Dictionary</i>

On	onset
P	preposition
POSS	possessive phrase
PP	prepositional phrase
PRON	pronoun
Rh	rhyme
S	clause or sentence
S'	embedded clause
Σ	syllable
strid	strident
V	vowel
V	verb
voi	voice
VP	verb phrase
	tone unit boundary

CONSONANTS (PULMONIC)

	Bilabial	Labiodental	Dental	Alveolar	Postalveolar	Retroflex	Palatal	Velar	Uvular	Pharyngeal	Glottal
Plosive	p b			t d		ʈ ɖ	c ɟ	k ɡ	q ɢ		ʔ
Nasal	m	ɱ		n		ɳ	ɲ	ŋ	ɴ		
Trill	ʙ			ʀ					ʀ		
Tap or Flap				ɾ		ɽ					
Fricative	ɸ β	f v	θ ð	s z	ʃ ʒ	ʂ ʐ	ç ʝ	x ɣ	χ ʁ	ħ ʕ	h ɦ
Lateral fricative				ɬ ɮ							
Approximant		ʋ		ɹ		ɻ	j	ɰ			
Lateral approximant				l		ɭ	ʎ	ʟ			

Where symbols appear in pairs, the one to the right represents a voiced consonant. Shaded areas denote articulations judged impossible.

CONSONANTS (NON-PULMONIC)

Clicks	Voiced implosives	Ejectives
◌ ʘ	ɓ Bilabial	ʼ as in:
	ɗ Dental/alveolar	ɓ' Bilabial
! (Post)alveolar	ɠ Palatal	ɗ' Dental/alveolar
≠ Palatoalveolar	ɠ Velar	k' Velar
Alveolar lateral	ʄ Uvular	s' Alveolar fricative

SUPRASEGMENTALS

	TONES & WORD ACCENTS
ˈ Primary stress	LEVEL
ˌ Secondary stress	ˈ or ˉ Extra high
ː Long	é ˈ High
ˑ Half-long	ē ˉ Mid
ˑ̈ Extra-short	è ˉ Low
ˑ̈̈ Syllable break	è̈ ˉ Extra low
Minor (foot) group	ˑ̈̈̈ Downstep
Major (intonation) group	ˑ̈̈̈̈ Upstep
˘ Linking (absence of a break)	↗ Global rise etc.
	↘ Global fall

VOWELS

Where symbols appear in pairs, the one to the right represents a rounded vowel.

OTHER SYMBOLS

ɱ Voiceless labial-velar fricative	ç ʒ Alveolo-palatal fricatives
ʋ Voiced labial-velar approximant	ɭ Alveolar lateral flap
ɰ Voiced labial-palatal approximant	ɥ Simultaneous ʃ and x
ħ Voiceless epiglottal fricative	Affricates and double articulations can be represented by two symbols joined by a tie bar if necessary.
ʕ Voiced epiglottal fricative	
ʡ Epiglottal plosive	kp̣ tṣ

DIACRITICS

Diacritics may be placed above a symbol with a descender, e.g. ɳ̥̊

◌̥ Voiceless	◌̤ Breathy voiced	◌̦ Dental
◌̇ Voiced	◌̣ Creaky voiced	◌̨ Apical
◌ ^h Aspirated	◌̱ Linguolabial	◌̩ Laminal
◌̹ More rounded	◌ ^w Labialized	◌̃ Nasalized
◌̥ Less rounded	◌ ^j Palatalized	◌ ⁿ Nasal release
◌ ⁺ Advanced	◌ ^ɣ Velarized	◌ ^l Lateral release
◌̠ Retracted	◌̠ Pharyngealized	◌̚ No audible release
◌̠ Centralized	◌̠ Velarized or pharyngealized	◌̠
◌̠ Mid-centralized	◌̠ Raised	◌̠ (ɹ̠ = voiced alveolar fricative)
◌̠ Syllabic	◌̠ Lowered	◌̠ (β̠ = voiced bilabial approximant)
◌̠ Non-syllabic	◌̠ Advanced Tongue Root	◌̠
◌̠ Rhoticity	◌̠ Retracted Tongue Root	◌̠

<i>The International Phonetic Alphabet</i>	xviii
Chapter 1 Introduction: what is a language?	1
1.1 Properties of human language	1
1.1.1 Language is a code	2
1.1.2 Linguistic symbols have function and form	3
1.1.3 Linguistic units are constructed according to rules	6
1.1.4 Language is specifically human	8
1.1.5 Language use is creative	9
1.1.6 Language use is constrained	10
<i>Glossary</i>	13
<i>Further reading</i>	15
PART I SOUNDS	17
Chapter 2 Speech sounds	19
2.1 Sounds and spelling	20
2.1.1 The International Phonetic Alphabet	23
2.2 Articulatory phonetics	27
2.2.1 Organs of speech	27
2.2.2 Speech production	29
2.2.3 Vowels	39
<i>Further exercises</i>	45
Chapter 3 The phonology of English	48
Introduction – Sounds: same vs different	48
3.1 Identification of phonemes	51
3.1.1 Complementary distribution	53
3.1.2 Defective distribution	53
3.1.3 Parallel distribution	54
3.1.4 Free variation	59
3.1.5 Variation and dialects	59

3.2	Phonemes and allophones revisited	61
3.3	Phonemic analysis	62
3.3.1	The phonemic system	62
3.3.2	Phonotactics	63
3.3.3	Allophonic rules	66
3.4	Allophonic processes	68
3.4.1	Aspiration	68
3.4.2	Assimilation	70
3.4.3	Elision	74
3.4.4	Insertion	75
3.5	Allophones	75
3.5.1	Stops	75
3.5.2	Voiced fricatives	77
3.5.3	Sonorants	77
3.5.4	Vowels	78
3.6	Derivations	78
3.7	Features	79
3.7.1	The necessity of features	79
3.7.2	A set of distinctive features for English	81
3.7.3	Classificatory features	82
3.7.4	Nasals	83
3.7.5	Place of articulation features	83
3.7.6	Tongue body features	84
3.7.7	Further articulatory features	85
3.7.8	Manner features	86
3.7.9	Source features	86
3.7.10	Feature matrices and redundancy	87
3.7.11	Natural classes	88
3.7.12	The plural revisited	90
	<i>Further exercises</i>	93
 Chapter 4 Syllables and suprasegmentals		95
4.1	Syllables	95
4.1.1	Syllable boundaries and phonotactics	96
4.1.2	Syllable structure	97
4.1.3	Nucleus, rhyme, onset and coda	97
4.2	Suprasegmental features of English	101
4.2.1	Pitch	101
4.2.2	Intonation	102
4.3	Stress	109
4.3.1	Levels of stress	110
4.3.2	Stress in connected speech – rhythm	110

PART II WORDS	127
Chapter 5 The form and function of words	129
Introduction: dictionaries and lexemes	129
5.1 Words and their grammatical categories:	
syntactic categories and inflection	131
5.1.1 Introduction	131
5.1.2 Nouns	132
5.1.3 Adjectives	135
5.1.4 Verbs	138
5.1.5 Adverbs	140
5.1.6 Prepositions	141
5.2 Word formation	142
5.2.1 Compounding	143
5.2.2 Derivational affixation	146
5.2.3 Conversion	150
5.3 Kinds of morphemes	150
5.3.1 Bound and free morphemes	150
5.3.2 Stems and affixes	151
5.3.3 More on inflectional morphemes	152
5.4 Morphological properties	154
5.4.1 Existing and non-existing, possible and impossible words	154
5.4.2 Productivity	154
5.4.3 Diagramming word structure	156
<i>Further exercises</i>	160
Chapter 6 Word meanings and vocabularies	163
6.1 The meaning of words	163
6.1.1 Sameness and difference of sense	164
6.1.2 Oppositeness of sense	167
6.1.3 Sense components	169
6.1.4 Metaphor	173
6.1.5 Word meanings in context	175
6.1.6 Reference	178
6.1.7 Word associations and connotations	178
6.2 Vocabularies	180
6.2.1 Adding to vocabularies	181
6.2.2 Coining new words	185
6.2.3 Change through time	186
6.2.4 Reduced usage, archaism and loss	188
6.2.5 Word histories	190
6.2.6 Dialect vocabularies	190
6.2.7 Specialist vocabularies	194
6.2.8 Formality and vocabulary	195
6.2.9 Dictionaries	196
