To My Wife, Betty

Acknowledgments

This book would not have been possible without the help of many others. Many hours were spent discussing these issues with the members of the General Electric Aerospace Group Configuration Management Subcouncil: Miki Dekany, Gary Eagle, Kraig Lenius, Patricia Miglino, Warren Scofield, Jeff Stay, and Mark Whistler. Those dialogues illuminated many of the practical considerations I have attempted to replicate in this book.

Ron Berlack, Warren Scofield, Dave Schultz, Susan Dart, Bill Smith, and Mike Daniels spent many hours reading the drafts of this book to correct and clarify items contained therein. If their efforts did not completely succeed, the fault lies with me.

Finally, a special vote of thanks is due to Bert Stanleigh, who started this whole process off, and to Tom Cuff, Sal Lopresti, and Steve Montgomery, who helped me along the way.

The appearance of this book should not be construed to indicate that its contents state official General Electric policies or positions on the topics covered herein.

Contents

ILLUSTRATIONS	XV
TABLES	XVII
PREFACE	XIX
ACKNOWLEDGMENTS	XXI
1 INTRODUCTION	1
1.1 GOAL	1
1.2 INTENDED AUDIENCES	2
1.3 ORIENTATION	2
1.4 SCOPE	2
1.5 WHAT IS IT?	3
1.6 THE PURPOSE OF CONFIGURATION MANAGEMENT	4
1.7 INTRODUCTION TO THE REST OF THE BOOK	5
2 THE CONFIGURATION MANAGEMENT ENVIRONMENT	7
2.1 HARDWARE	7
2.1.1 The Hardware Production Process	7
2.1.2 The Hardware Development Process	9
2.1.3 Hardware Considerations	11
2.2 SOFTWARE	11
2.2.1 The Software Production Process	12

2.2.2 The Software Development Process	12
2.2.3 Software Considerations	13
2.3 FIRMWARE	14
2.3.1 The Firmware Production Process	14
2.3.2 The Firmware Development Process	15
2.3.3 Firmware Considerations	16
2.4 SUMMARY	16
 3 CONFIGURATION IDENTIFICATION	 17
 3.1 IDENTIFY THE BASELINES	 17
3.1.1 Functional Baseline	18
3.1.2 Allocated Baseline	20
3.1.3 Developmental Configuration	21
3.1.4 Product Baseline	21
3.2 IDENTIFY THE ITEMS TO BE CONTROLLED	22
3.2.1 System Engineering Inputs	22
3.2.1.1 Configuration Item List, 22	
3.2.1.2 Specification Tree, 23	
3.2.1.3 Equipment Planning Diagram, 24	
3.2.2 Inputs from the Integrated Logistics System	26
3.3 BASELINE VARIATIONS	27
3.4 SUMMARY	28
 4 HARDWARE IDENTIFICATION	 30
 4.1 INITIAL IDENTIFIERS	 30
4.2 ADDITIONAL IDENTIFIERS	31
4.3 THE "WHERE-USED" PROBLEM	32
4.4 PARTS IDENTIFICATION	33
4.4.1 Use of Exchangeable Items	33
4.4.1.1 Interchangeable Items, 34	
4.4.1.2 Substitute Items, 34	
4.4.1.3 Replacement Items, 35	
4.4.2 Cost-Effectiveness Considerations	35
4.4.2.1 Use of a Superseded Parts List, 36	
4.4.2.2 Identification of Substitute Parts, 36	
4.4.3 Identification of Screened Parts	37
4.4.4 Identification of Vendor "Better-Than" Parts	38
4.5 SUMMARY	40
 5 SOFTWARE IDENTIFICATION	 41
 5.1 COMPUTER PROGRAM IDENTIFICATION	 41
5.2 SOFTWARE FILE IDENTIFICATION	41
5.2.1 File Identifier Fields	42

5.2.2 Source File Identification	43
5.2.3 Object File Identification	43
5.2.4 Executable File Identification	44
5.2.5 Patch Identification	44
5.3 SOFTWARE CATEGORIES	45
5.4 FILE IDENTIFICATION RESPONSIBILITIES	47
5.5 FILE IDENTIFICATION SCHEMES	48
5.6 ASSOCIATED TOPICS	48
5.6.1 Erasable Electronic Media Identification	48
5.6.2 Electronic Media Labels	49
5.6.3 Version Description Documents	49
5.6.4 Database Concerns	51
5.7 SUMMARY	51
6 FIRMWARE IDENTIFICATION	53
6.1 IMAGE FILE CONSIDERATIONS	54
6.2 FIRMWARE TYPES	54
6.2.1 Type 1 Programmable Parts	54
6.2.2 Type 2 Programmable Parts	55
6.2.3 Type 3 Programmable Parts	55
6.2.4 Type 4 Programmable Parts	56
6.2.5 Type 5 Programmable Parts	56
6.3 DRAWING REQUIREMENTS	56
6.4 EQUIPMENT IDENTIFICATION	57
6.5 SUMMARY	57
7 IDENTIFICATION OF DRAWINGS AND OTHER DOCUMENTS	58
7.1 DRAWINGS AND ASSOCIATED LISTS	58
7.1.1 Identification	59
7.1.2 Drawing Classifications	59
7.1.3 Drawing Types	60
7.1.4 Caution	60
7.2 DOCUMENTS	62
7.2.1 Document Identification	62
7.2.2 Document Source File Names	64
7.2.3 Document Formats	64
7.3 SUMMARY	66
8 CONFIGURATION CONTROL	67
8.1 CONFIGURATION CONTROL OVERVIEW	67
8.1.1 Baseline Control	68
8.1.2 Double Baselining	70

8.2 THE CONFIGURATION CONTROL PROCESS	73
8.2.1 Identify the Problem	73
8.2.1.1 Document the Occurrence, 73	
8.2.1.2 Review the Problem Report, 76	
8.2.1.3 Determine the Cause of the Failure, 76	
8.2.2 Determine the Corrective Action	76
8.2.3 Implement the Change	77
8.3 AN EXAMPLE DEVELOPMENT PHASE CHANGE PROCESS	77
8.4 CONFIGURATION CONTROL BOARDS	82
8.5 EXPEDITED ACTIONS	85
8.6 IMPLEMENTATION OF AN AUTOMATED PROBLEM-REPORTING SYSTEM	85
8.7 CONFIGURATION CONTROL FEARS	86
8.8 SUMMARY	87
 9 CONFIGURATION CONTROL OF HARDWARE	 89
9.1 NONCONFORMING MATERIAL IN PRODUCTION	89
9.2 RETROFITS	91
9.3 SUMMARY	92
 10 CONFIGURATION CONTROL OF SOFTWARE	 93
10.1 SOFTWARE CONTROL IMPLEMENTATIONS	93
10.1.1 Product Software	94
10.1.2 Vendor Software	94
10.1.3 Test Software	96
10.1.4 Product Support Software	96
10.1.5 Reusable Software	96
10.2 IMPLEMENTING A CONFIGURATION MANAGEMENT LIBRARY	97
10.2.1 An Initial Approach	97
10.2.2 Use of a Check-Out/Check-In Facility	98
10.2.3 A More Sophisticated Approach	101
10.2.4 Software Tools Considerations	103
10.2.5 Ada Complications	103
10.3 IMPLEMENTING A STANDARDS-CHECKING PROGRAM	104
10.4 SUMMARY	105
 11 CONFIGURATION CONTROL DOCUMENTATION	 106
11.1 CHANGES TO BASELINED ITEMS	106
11.1.1 Changes to Hardware	107

11.1.2 Changes to Software	107
11.1.3 Changes to Firmware	109
11.1.4 Changes to Documents	109
11.1.5 Changes to Drawings	110
11.2 CONFIGURATION CONTROL DOCUMENTS	110
11.2.1 Engineering Change Notice	110
11.2.2 Engineering Change Proposal	111
11.2.2.1 Classes and Types, 111	
11.2.2.2 Content, 113	
11.2.3 Installation Completion Notice	114
11.2.4 Notice of Revision	114
11.2.5 Problem Report	114
11.2.6 Request for Deviation	117
11.2.7 Request for Waiver	117
11.2.8 Specification Change Notice	117
11.2.8.1 Types, 117	
11.2.8.2 Content of Proposed Specification Change Notices, 117	
11.2.8.3 Content of Approved Specification Change Notices, 118	
11.2.9 Specification Change Pages	118
11.2.9.1 Content of Proposed Specification Change Pages 118	
11.2.9.2 Content of Approved Specification Change Pages, 120	
11.2.10 Specification Revisions	120
11.3 PROCESS IMPROVEMENT	120
11.3.1 Automating the Production of Documents	120
11.3.2 Automating the Engineering Drawing System	121
11.3.2.1 The Digital Engineering Process, 121	
11.3.2.2 An Implementation Approach, 122	
11.4 SUMMARY	123
 12 CONFIGURATION STATUS ACCOUNTING	 124
12.1 IDENTIFY THE REPORTING REQUIREMENTS	125
12.1.1 Contract	125
12.1.2 Company Policies	126
12.1.3 Reports	127
12.2 ESTABLISH THE CONFIGURATION MANAGEMENT FACILITY	128
12.2.1 Establish the Requirements	128
12.2.1.1 Functional Requirements, 128	
12.2.1.1.1 Documents, 128	
12.2.1.1.2 Drawings and technical data packages, 130	
12.2.1.1.3 Change documentation, 130	

12.2.1.1.4	Software configuration items, 131	
12.2.1.1.5	Other considerations, 131	
12.2.1.2	System Attributes, 131	
12.2.1.3	Performance Requirements, 132	
12.2.1.4	External Interface Requirements, 132	
12.2.1.5	Design Constraints, 133	
12.2.2	Acquire the Resources	133
12.2.2.1	Multiple-Source Solicitations, 133	
12.2.2.1.1	Request for proposal, 134	
12.2.2.1.2	Statement of work, 134	
12.2.2.1.3	Contract data requirements list, 134	
12.2.2.1.4	Evaluation Plan, 135	
12.2.2.2	Hardware, 135	
12.2.2.3	Software, 135	
12.2.2.4	Communications, 135	
12.2.2.5	Space, 136	
12.2.2.6	People, 136	
12.2.3	Implement the System	136
12.3	ESTABLISH/UPDATE THE CONFIGURATION MANAGEMENT DATABASE	137
12.4	PRODUCE THE CONFIGURATION STATUS ACCOUNTING REPORTS	137
12.5	SUMMARY	138
13	CONFIGURATION AUDITS	139
13.1	TYPES OF CONFIGURATION AUDITS	139
13.1.1	Functional Configuration Audits	139
13.1.2	Physical Configuration Audits	140
13.1.3	In-Process Audits	141
13.2	COMMON AUDIT ACTIONS	142
13.2.1	Pre-Audit Actions	142
13.2.2	Audit Actions	144
13.2.3	Post-Audit Actions	145
13.3	MAJOR CONCERN: SOFTWARE PHYSICAL CONFIGURATION AUDITS	145
13.3.1	Background	146
13.3.2	Physical Configuration Audit Input: The Design Documentation	147
13.3.3	The Physical Configuration Audit Process	147
13.3.4	The Usefulness of the Physical Configuration Audit Product	150
13.3.5	Recommendation	150
13.4	SUMMARY	151

14 ADDITIONAL IMPLEMENTATION TOPICS	152
14.1 WRITING A CONFIGURATION MANAGEMENT PLAN	152
14.1.1 Format Considerations	153
14.1.2 Contents	154
14.1.2.1 Introduction, 154	
14.1.2.2 Organization, 155	
14.1.2.3 Tasks, 155	
14.1.2.4 Schedules, 156	
14.1.2.5 Resources, 157	
14.2 TRAINING	158
14.3 METRICS	159
14.3.1 Configuration Management Metrics	160
14.3.2 Project Metrics	160
14.4 SUMMARY	163
APPENDIX A DEFINITIONS	164
APPENDIX B ACRONYMS AND ABBREVIATIONS	193
APPENDIX C REFERENCES	198
APPENDIX D CONFIGURATION MANAGEMENT PLAN EXAMPLE	205
INDEX AND FURTHER REFERENCES	233
