## About the Authors

**William A. Raabe**, Ph.D., CPA, teaches graduate tax courses at the Fisher College of Business of The Ohio State University. He is a leader among business school tax faculty in incorporating developments in technology into curricula for the educational development of tax professionals.

Dr. Raabe's teaching and research interests focus on multijurisdictional taxation and financial planning, and he is recognized as the leader among business school academics in the fields of state and local income, sales, and property taxation. Dr. Raabe is the author or editor of approximately twenty book titles, including *West Federal Taxation*, and the *Multistate Corporate Tax Guide*. He has received university-wide recognition as the winner of the AMOCO Foundation Award for Teaching Excellence, and the Wisconsin Institute of CPAs named him the Educator of the Year.

**Gerald E. Whittenburg**, Ph.D., CPA, EA, is a Professor in the School of Accountancy at San Diego State University. A graduate of the University of Houston, Dr. Whittenburg's teaching and research interests include individual and corporate taxation, pension plans, and tax research methodology.

Dr. Whittenburg is also an author of *Income Tax Fundamentals*. In addition, he has published articles in journals such as *Advances in Taxation*, *Practical Tax Strategies*, *Taxes—The Tax Magazine*, *Journal of Taxation of Investments*, *Journal of Taxation of Employee Benefits*, *Journal of Taxation of Financial Institutions*, *Valuation Strategies*, *Journal of Small Business Strategy*, *The Tax Adviser*, and *Journal of Accounting Education*. Professor Whittenburg's professional designations include Certified Public Accountant (CPA) and Enrolled Agent (EA). He has received numerous teaching awards, including the Trustee's Outstanding Faculty Award for the entire California State University System. Recently, Dr. Whittenburg spent a sabbatical at the University of Adelaide in Australia. In his picture, he is shown with "Pumpkin" the koala.

**Debra L. Sanders**, Ph.D., CPA, is a professor in the Washington State University School of Accounting, Information Systems and Business Law. She has received numerous awards for outstanding teaching, research, and service including the Boeing Distinguished Faculty Research Award, the Shell Corporation Outstanding Teacher Award, and the College of Business and Economics Outstanding Service Award.

Dr. Sanders, a graduate of Arizona State University, publishes in both academic and professional journals. Her work has appeared in the academic journals *Behavioral Research in Accounting*, *National Tax Journal*, *The Journal of the American Taxation Association*, *Advances in Taxation*, and *The International Journal of Accounting*. Professional journals that have published her articles include *Taxation for Accountants*, *Taxation for Lawyers*, *The Review of Taxation of Individuals*, *Taxes*, *The Tax Adviser*, and *Journal of Financial Planning*.

# Preface

The Seventh Edition of *Federal Tax Research* reflects the increasing importance of online research databases in tax research practices. More than ever before, our text is *the* essential learning tool for tax research, both online and using standard library materials. From its new complete chapter on state and local tax research, to its *free* RIA Checkpoint® Student Edition tax database with each new copy, to its host of new and valuable tax links and up-to-date online tax news, *Federal Tax Research* 7e remains justifiably the market leader among tax research texts.

This popular book has been prepared as a comprehensive, stand-alone reference tool for the user who wishes to become proficient in Federal tax research. It is written for readers who are familiar with the fundamentals of the Federal income and transfer tax law, at a level that typically is achieved on the completion of two comprehensive introductory courses in taxation in either (1) the accounting program in a business school or (2) second- or third-year courses in a law school.

Nearly every accounting, tax, and tax law student can benefit from the strategies found in this book. The text is most appropriate for:

- Upper-level accounting students in a business school (i.e., seniors in a four-year program or those in the fifth year of a 150-hour program) who desire additional information concerning the practice of taxation.
- Those who are enrolled in a nontax graduate program in business administration (e.g., an MBA or MS—management program) and would like further practical training in the functions of taxation in today's business environment.
- Second- or third-year law school students, especially those who desire a more detailed and pragmatic introduction to a specialized tax practice.
- Those who are commencing a graduate degree program in taxation, in either a business school or a law school, and require a varied and sophisticated introduction to the procedures of tax research and to the routine functions and implications of a tax practice.
- Practicing accountants and attorneys who need an introduction, updating, or refresher relative to tax practice and research as an element of their career paths.

## STRUCTURE AND PEDAGOGY

---

Too often, existing textbooks ignore the detailed, pragmatic approach that students require in developing effective and efficient tax research skills.

That is why we have included an unprecedented degree of **hands-on tax research analysis** throughout the text. This book does not simply discuss tax research procedures or the sources of the Federal tax law; nor does it provide a mere sample of the pertinent tax reference material. Rather, the Seventh Edition reflects our conviction that readers learn best by **active learning** and **real-world experience** with the most important elements of the Federal tax law. We have applied this conviction to the many important features of the Seventh Edition:

- **NEW:** A full chapter on **state and local tax research opportunities** reflects the importance of this type of tax work in today's practice.
- **NEW exercises, problems, and research cases** are included throughout that help students learn using actual online research tools and methods discussed in the text.
- **NEW Spotlight on Taxation** boxes in every chapter provide additional research tips, tax information, news, background, and factors to consider in developing a tax research solution.
- An **introduction to tax practice** continues to provide details on such valuable topics as preparer penalties, statutes of limitation, interest conventions, and return selection for IRS audits.
- The book's continuing focus on **tax planning** fits perfectly with this growing trend in tax practice.
- The text has been **thoroughly updated** with developments that affect those who conduct tax research, including **revisions to codes of ethics, IRS organizational structure and enforcement functions**, and other principles that control tax practice.
- Hundreds of **exercises and discussion questions** allow the reader to learn by exploring the reference materials in a well-developed tax library in their research strategies.
- Assignments allow students to **construct case briefs, file memos, client letters, and other elements of a comprehensive client file**—vital skills they will need in practice.
- Hundreds of pages of **reproductions and illustrations** have been excerpted from the most important tax reference materials and expose students to the real world of tax research.
- **Summary charts, diagrams, and other study aids** are integrated throughout the text that summarize the elements of primary and secondary sources of Federal tax law and encourage students to develop their own research routines and techniques.

## **FOCUS ON ONLINE AND COMPUTERIZED RESEARCH**

The use of online databases and computerized research has become indispensable in tax practice, and the previous edition was at the forefront of coverage of these innovative tools. For the Seventh Edition, however, we focus the majority of our coverage on online and computerized research. Presenting and discussing these new tools, strategies, and research tactics now eclipses our discussions of traditional paper-based resources. We reviewed

every internet and CD-ROM based research tool available, and the text now includes such new online coverage as:

- **RIA's Checkpoint® Student Edition Online Tax Research Database.** Each *new* textbook contains an RIA Checkpoint® Student Edition access code, good for six months of free access to content from the research database most widely used by tax professionals. As students use Checkpoint® to complete problems within the text, they build research skills and familiarity with the database—valuable preparation both for the CPA Exam and their professional future.
- **Tutorial for RIA's Checkpoint®.** This self-paced tutorial from RIA orients students to Checkpoint® and keeps instructors from having to use valuable lecture time to explain the same information. The tutorial walks through the application of RIA research techniques using sample problems similar to those on the CPA Exam.
- **Tax Tutor** online tutorials and interactive quizzes under the Student Resources page at the book's web site reinforce the tax research coverage in each chapter.
- **Ongoing news and updates to the tax law** are available at the text's web site: <http://raabe.swlearning.com>.
- The Instructors Manual, the Instructor Resource CD, and the instructors portion of the web site for the text <http://raabe.swlearning.com> include suggested solutions for assigned material, a generous test bank, multiple quizzes for each chapter, and lecture notes. The web site also offers templates for commonly used research documents, and sample syllabi so that the instructor can share in the learning approaches used by the text's many adopters.

As a result, we believe that the Seventh Edition is indispensable to learning and performing real-world online and computerized tax research.

## NEW! TURBOTAX® BUSINESS

The market leading software for tax preparation comes free with all **new** texts, and provides access for all your tax preparation homework. **TurboTax® Business** software, the highest rated and best-selling tax software, is designed specifically for corporations, S-corporations, partnerships of up to 100 partners, and LLCs, as well as estates and trusts. It covers corporation, partnership, and fiduciary income texts and gives you practical, hands-on tax experience in tax preparation.

**ACCESS AND DISCOUNT INCLUDED! Online Access to TaxBrain® Tax Preparation Software:** TaxBrain® online individual tax preparation software is used by more than 2,500 tax professionals every year. You can use TaxBrain® to work the income tax form problems in the text with a real-world application, developing your skills as you master course information. To access, log on to [www.taxbrain.com](http://www.taxbrain.com). Take advantage of a 20% discount when filing your 2004 return with TaxBrain®—enter promotional code **SWL947**.

## USING THE TEXT

The text's exercises, cases, and advanced cases offer enough variety in both difficulty and subject matter that they may be assigned to individual readers, or to student groups of two or three, for their optimal use. The instructor also should consider giving each student in the course a different research case to complete, thereby both discouraging joint work and reducing the strain on the pertinent library resources.

Given both the nature of the tax research process and the limited tax library resources that are available to most firms and universities, the instructor must take care (1) to assign discussion materials for which the necessary resources are available and (2) to work through the assignment him- or herself, to ascertain that one's target solution to the assignment reflects the very latest in the development of the Federal tax law.

The instructor may want to defer the assigning of certain research cases until a specific electronic research service is discussed, which will provide additional illustrations. Alternatively, the reader could be encouraged to rework a previous assignment once the computerized tax reference tools have been introduced.

Instructors should see the online Instructor's Resource Guide for a list of resources.

## ACKNOWLEDGMENTS

We are grateful to the reviewers of the Sixth Edition who provided valuable comments and insights, which guided us in the development of the Seventh Edition:

Adrian Allen, Shaw University  
 Rose Bailey, Gardner-Webb University  
 David R. Connelly, Western Illinois University  
 Patti Davis, Keystone College  
 Andrew Lafond, Philadelphia University  
 Tom Largay, Thomas College  
 Ernest Larkins, Georgia State University  
 Margaret Reed, University of Cincinnati  
 Robert Ricketts, Texas Tech University  
 Lee A. Sartori, Walsh College  
 James Trebby, Marquette University  
 Thomas C. Pearson, University of Hawaii at Manoa  
 Donald Williamson, American University

We wish to thank the **over 280 tax instructors** who participated in an e-survey on tax research and provided their detailed feedback. Without your responses our efforts would have been greatly diminished in scope. Any errors, of course, are the sole responsibility of the authors.

We welcome your comments and suggestions for further improvements to this text. Please feel free to use the following addresses to convey these remarks.
