2011年5月，教育部启动了由清华大学牵头，50所高校参加的“高等学校继续教育示范基地建设”项目，该项目取得了丰硕的理论和实践成果。这批成果理论创新突出，实践效果显著，示范意义明显。由清华大学出版社出版的“高等学校继续教育示范基地建设成果丛书”将陆续展示示范基地建设理论和实践成果。

本书收集了2011年以来50所示范高校的老师们撰写的233篇优秀论文，集中反映了新时期示范建设项目高校在继续教育发展理念、品牌战略、运行机制、人才培养、校企合作、项目课程研发、质量管理与评价等方面的创新、思考与探索，对于丰富继续教育理论体系，更好地总结继续教育科研成果，启发继续教育工作思路，推进继续教育综合改革和实践创新具有积极的推动作用。

Hybrid Learning in Lifelong Learning Implementation^①

Hou Jianjun Lu Haidi

Abstract: Based on the concept and practice of lifelong learning this paper, explores hybrid learning model as an effective and efficient way to meet individual's lifelong learning needs. The study focuses on the concept and framework of lifelong hybrid learning. And practice of lifelong hybrid learning provided by colleges and universities is investigated.

Keywords: lifelong learning hybrid learning lifelong hybrid learning colleges and universities

1 Lifelong Learning

In recent years lifelong learning has been an important concept in an individual's life. Lifelong learning occurs throughout life, which is a life-span endeavor by an individual with the aim of improving knowledge, skills and competences.

Lifelong learning is of public value rather than for just the individual good. For it brings about economic progress and development, and seeks to bring about personal development and fulfillment, lifelong learning has become a fundamental element of many educational policy strategies aimed at achieving the goal of socio-economic development (EC, 2001) in many countries.

Since the beginning of the 1990s China has expressed the concept of

^① This paper is funded by Beijing Science of Education Eleventh Five-Year Planed Project (No. AJA09134), Year 2009. 6-2011. 6, titled by Study on Construction and Application of Network Education Resources for Beijing Learning City Construction.

lifelong learning and learning society in many policy documents and showed supports for its development. On Sixteenth CPC National Congress which took place in Nov. 2002 and Seventeenth CPC National Congress, which took place in Oct. 2007, China made it clear that distance learning and continuing education will be promoted to make learning society in which every citizen is committed to learning and pursues lifelong learning.

What should be the effective and efficient lifelong learning? This paper explores a hybrid learning model for lifelong learning to gain the aim effectively and efficiently.

2 Lifelong Hybrid Learning

2.1 Lifelong Hybrid Learning Model

Lifelong learning takes place in formal, non-formal and informal learning situations. Individuals take different aims at achieving specific goals such as improving knowledge, skills and competences. With the core of aim, the three components of formal, non-formal and informal learning are framed around the purpose of lifelong hybrid learning (Fig. 1 Lifelong hybrid learning model).

Formal learning is planned learning with the aid of guiding institutions, and informal learning is planned learning by oneself. Informal learning takes unplanned. The lifelong hybrid learning model stresses on the interdependency and complex interconnection between three learning situations. It therefore should be a process of integrated continuous learning that goes throughout life.

2.2 Elements of Lifelong Hybrid Learning

Learners who engage in learning play core roles of lifelong hybrid learning. Institutions provide educational resources and/or activities to make contribution to learning models (Fig. 2 Elements of lifelong hybrid learning). Learners choose appropriate opportunities. In formal learning situation, individuals learn by the aid of institutions' educational resources and educational activities. In non-formal learning situation, individuals implement self-directed learning based on instructed materials and no educational activities. Learners perform informal learning by oneself without institutions'

instructions of recourse and activities.

Learning Resources		Formal learning	Non-formal learning	Informal learning
Learners	Learners' Engagement	Instructed learning	Self-directed learning based on institutions' instructed materials	Self-directed learning
Institutions	Educational Resources	YES	YES	NO
	Educational Activities	YES	NO	NO

Fig. 2 Elements of lifelong hybrid learning

3 Practice of Hybrid Learning Provided by Colleges and Universities

In the new era, China will build a complete lifelong education system with the focus on making education more equitable and with improving educational quality as the core, so that all the people can enjoy their rights to education, make progress and apply what they have learned to practice.

Putting this in the context of colleges and universities, lifelong learning is pursued to respond to the new realities and forces guiding the evolving information age and of learning society. In this context lifelong learning is viewed as involving all strategies that are put in place to created opportunities for people to learn throughout life. (Abdulai Abukari, 2005)

Colleges and universities serve as the main base of learning providers with advantages of a wide range of disciplines, good teachers, abundant resources and good atmosphere of study. They should play an important role to support the construction of modern national education system and lifelong education system. Services for lifelong learning have become the new mission of continuing higher education. Colleges and universities should take great measures to promote the development of higher education reform.

Lifelong learning makes an important link between teaching, research and society. Colleges and universities make full use of special features and advantages of university's disciplines and specialties; give priority to train talented people through many types of lifelong learning: training classes, special training, professional education, job training certificates, professional qualification training, visiting scholars, research studies and lifelong learning for diploma.

Education is a public good. Colleges and universities should open resources to the society and actively promote the sharing and services of lifelong learning (Fig. 3 Roles of colleges and universities in lifelong leaning provision).

Colleges and universities should take measures to make the lifelong learning effective and efficient.

- Concentrate on educational resources and educational activity.
- Provide many types of learning routines: training classes, special

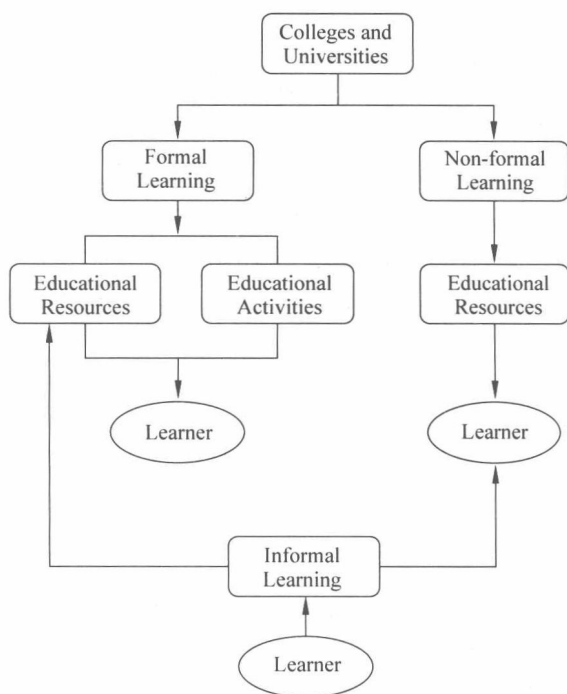

Fig. 3 Roles of colleges and universities in lifelong learning provision

training, professional education, job training certificates, professional qualification training, visiting scholars, research studies and continuing education for diploma.

- Coordinate the development of scale, structure, quality and efficiency.
- Follow the guidelines of active development, standardize management, deepen the content, quality improvement.
- Make positive, steady, healthy, high-quality development.
- Innovate lifelong learning and training content and methods.
- Establish lifelong learning quality management system and implement it.
- Manage and supervise quality standards for teacher appointment, courses development, teaching process, learning support services, faculty management, resources provision, technology support and management.
- Put forward a system of learning and its supportive service, which

facilitates the working people to enjoy the distance self-study and a life-long learning anytime and anywhere.

- Improve quality and establish higher lifelong learning quality assurance system. Lifelong learning should meet the standards for personnel training improve the quality. Institutions study literacy competency standards for all kinds of talents and build personnel training objectives cored with quality, knowledge and ability.
- Establish internal quality control mechanisms, implement quality audit and assessment, make continuous quality improvement.
- Establish quality assessment and monitoring mechanisms by school, students, teachers, businesses and the community together.

4 Conclusions

Lifelong learning is also the cause of the whole society. Colleges and universities would further strengthen the cooperation with the community. Government departments, universities, research institutes, enterprises and social groups would cooperate with each other, participate in and coordinate the work under environment for healthy development of lifelong learning.

高等网络教育毕业生学习需求调查研究

——以“网上人大”毕业生服务工程为例

岳俊芳 孙道金 张艳 陈碧蕾

摘 要：作者在文中以“网上人大”201209 届毕业生为调查对象，开展了网络毕业生的学习需求调查研究，评估了毕业生对“毕业生服务工程”各项目的需求水平，进行了“毕业生服务工程”的用户群体细分，并探讨了不同细分群体与学习需求的关系，分析了“毕业生服务工程”有效的传播方式与途径，最后提出了“毕业生服务工程”的实施改进建议。

关键词：网络教育 毕业生 学习需求 调查研究

截至 2010 年，全国已累计招收网络本专科生 1000 多万人，毕业学生 600 多万人^[1]。截至目前，中国人民大学网络教育（以下简称“网上人大”）的毕业生也已接近 8 万人。对于多数网络教育毕业生而言，伴随着学历教育的终结，他们将如何开展继续学习成为值得探讨的问题。为了更好地构建终身学习的社会氛围，为我国社会经济建设提供持续的人力资源保障，“网上人大”于 2011 年 2 月开启了“毕业生服务工程”的项目运作，陆续向毕业生开放了多项优质学习资源，并定期开展了毕业生回访、毕业生活动组织等工作，初步奠定了向毕业生提供终身学习支持服务的坚实基础。为了向毕业生提供更加有针对性的学习资源与支持服务、进一步扩展其学习视野以利于毕业生的职业提升，“毕业生服务工程”项目组开展了毕业生学习需求调查。本次调查基于毕业生自身的职业与学习现状，探究他们对网络学历教育后继续学习的认知和需求，为“毕业生服务工程”的开展提供参考依据。

一、研究概述

所谓需求，是指个体对内外环境客观要求的反映，是个体的一种缺失状态，表现为个体的倾向性。需求的对象和内容可能是人体生理所需的某种基本物
