This fable is inspired by

一只蟋蟀上蹦下跳的,看起来很不安。一只黑猩猩很想吃蟋蟀这种高蛋白的食物,并且很想知道蟋蟀被抓住后会想些什么,他害怕成为灵长类动物的食物吗?"我亲爱的蟋蟀,"猩猩调侃道,"你知道吗?你可是我营养美味的大餐噢。"

A cricket is running up and down looking very worried.

A chimpanzee, keen on eating this concentrated form of protein, wonders what idea the cricket has got hold of now. Could it be that it is scared to form part of a primate's diet?

"So, my dear cricket," teases the chimp, "are you aware that you are a really rich, nutritious dinner for me?"

你可是营养美味的大餐噢

You are a rich putritious dipper

大家都应该吃昆虫

Everyone should be esting insects

"我知道,似乎到处都在流传说,大家都应该用吃昆虫代替吃肉。" "人类现在才知道这一点,真令人惊讶。我们早就知道你富含蛋白质了。"

"是的,但至少两条腿行走的人类现在已 经清楚认识到,他们不能继续通过吃 动物来填饱肚子了。"

"I know, it seems that
the buzz has gone around
- that instead of eating meat,
everyone should be eating insects."

"It is surprising that people only figured this one out now. We have known for years that you are a protein bomb."

"Ses, but at least those walking on two legs are now well aware that they can't continue to eat animals to fill their empty stomachs."

"蟋蟀是

最富含蛋白质的食物来源之

一。如果你和你的兄弟姐妹同意被吃掉,可以挽救 许多动物的生命。"

"这不公平。难道只有付出我的生命,才能挽救他们的生命吗?"

"嗯,你和你的家族成员繁殖很快,还吃别人不吃的食物,所以你们是食物链的关键部分。如果你们能一直存在,每个人都可以有足够的食物来源。"

"Crickets
are one of the richest
sources of protein. If you,
and your brothers and sisters, will
agree to be eaten, it could save the
lives of many animals."

"That is not fair. I have to pay with my life so they can have theirs?"

"Well, you and your families can reproduce so fast and eat what no one else will eat, so you are a key part of the food chain. If you play along, everyone could finally have enough to live on."

你繁殖很快

You can reproduce so fast

我愿意成为大家的点心

I will agree to be turned into a snack

"你说得对,我们确实繁殖得非常快,如果能让我的孩子们生活得更幸福,我愿意成为大家的点心。"

"我们很钦佩你能有这种生命循环的想法!"

"You are right, we do reproduce very fast, and I will agree to be turned into a snack if it means my kids would live more happily."

"We appreciate that you have such a circular vision of life!"

"我想知道,为什么人们 要从原来四条腿行走变成两条腿站立行走?用 四条腿跑得更快啊!"

"是的,四条腿行走会更稳一些,还有助于 提高在地面的移动速度。但如果你用两 条腿行走,一个优势是你可以腾出 两只胳膊携带食物了。"

"I wonder why people, who could once run on four legs, decided to stand up and walk on two.
You can run faster on four!"
"Ses, running with four legs is more stable, and gives better ground speed.
But there is one advantage: if you run on two legs then you have two arms free to carry food."

如果用两条腿行走你可以携带食物

18 you run on two legs you can carry food
