Preface

In all of recorded history, human social behavior has been scientifically studied for just one century—our century. Considering that we have barely begun, the results are gratifying. We have amassed significant insights into belief and illusion, love and hate, conformity and independence. Much about human behavior remains a mystery, yet social psychology can now offer partial answers to many intriguing questions: Will people act differently if we can first persuade them to adopt new attitudes? If so, how can we best persuade them? What leads people sometimes to hurt and sometimes to help one another? What kindles social conflict, and how can we transform closed fists into helping hands? Answering such questions expands our self-understanding and sensitizes us to the social forces at work upon us.

When first invited to write this book I envisioned a text that would be at once solidly scientific and warmly human, factually rigorous and intellectually provocative. It would reveal social psychology as an investigative reporter might, by providing an up-to-date summary of important social phenomena, and of how scientists uncover and explain such phenomena. It would be reasonably comprehensive, yet would also stimulate students' *thinking*—their readiness to inquire, to analyze, to relate principles to everyday happenings.

How does one select material for inclusion in a “reasonably comprehensive” introduction to the discipline? I have sought to present theories and findings that are neither too esoteric for the typical undergraduate nor better suited to other courses, such as developmental and personality psychology. I have chosen instead to emphasize material that casts social psychology in the intellectual tradition of the liberal arts. By the teaching of great literature, philosophy, and science, liberal education seeks to expand our thinking and awareness and to liberate us from the confines of the present. Social psychology can contribute to these goals. Many undergraduate social psychology students are not psychology majors; virtually all will enter other professions. By focusing on humanly significant issues, one can present the fundamental content that preprofessional psychology students need in ways that are stimulating and useful to all students.

The book opens with a single chapter that introduces our methods of inquiry. The chapter also warns students how findings can seem obvious—once you know them—and how social psychologists' own values permeate the discipline. The intent is to give students just enough to prepare them for what follows.

The book then unfolds around its definition of social psychology: the scientific study of how people *think about* (part one), *influence* (part two), and *relate* (part three) to one another.

Part One on *social thinking* examines how we view ourselves and others. It assesses the accuracy of our impressions, intuitions, and explanations.

Part Two explores *social influence*. By appreciating the cultural sources of our attitudes and by learning the nature of conformity, persuasion, and group influence, we can better recognize subtle social forces at work upon us.

Part Three considers the attitudinal and behavioral manifestations of both negative and positive *social relations*. It flows from prejudice to aggression, and from attraction to altruism, and concludes by exploring the dynamics of conflict and peacemaking.

Applications of social psychology are both interwoven throughout every chapter and highlighted in the applied chapters now clustered as modules, "Social Psychology in the Clinic" and "Social Psychology in Court."

This edition, like its predecessors, has a multicultural emphasis that can be seen in the treatment of cultural influences in chapter 6 and throughout the book in the inclusion of research from various cultural settings. The book's focus remains the fundamental principles of social thinking, social influence, and social relations as revealed by careful empirical research. But these principles are illustrated transnationally, thereby broadening our awareness of the whole human family.

This sixth edition offers thorough updating, with 550 new citations and dozens of fresh examples. Each chapter now concludes with a "personal postscript" in which I reflect on social psychology's human significance. There are also fresh and revised "Behind the Scenes" personal reflections by selected investigators worldwide. The pedagogical strategy breaks chapters into digestible modules: Typically three or four major sections begin with previews and end with section summaries that highlight the organization and key concepts.

Believing with Thoreau that "Anything living is easily and naturally expressed in popular language," I have sought, paragraph by paragraph, to craft the most engaging and effective book possible. A bright four-color design complements the text revisions and enhances the impact of the photos and figures. As before, definitions of key terms appear both in the margins and in the end-of-book Glossary.

Social Psychology, sixth edition, is accompanied by a comprehensive teaching-learning package. Martin Bolt's acclaimed *Teacher's Resource Manual* contains a wealth of classroom ideas, including dozens of ready-to-use demonstrations. For many students, the most helpful supplement to this text will be Bolt's *Study Guide*, which provides chapter objectives, chapter reviews, practice tests, and ideas and resources for papers. For this edition, Julia R. Jacks has prepared an extensive new test-item file of basic knowledge and application items. This test-item file is available in print form as well as on disk for Windows and Macintosh via the *MicroTest* computerized testing program.

McGraw-Hill offers a variety of multimedia supplements to accompany *Social Psychology*, sixth edition. The powerpoint slide presentation software contains approximately 100 slides that follow the chapter organization of the text. The overhead transparency package for the Social Psychology course offers a comprehensive set of four-color images that have been formatted for enhanced classroom presentation. McGraw-Hill's *Presentation Manager* CD-ROM is also available to faculty to help organize and custom design their lectures. This product offers a variety of supplementary materials to choose from including videos, instructor manual materials, powerpoint slides, and images. The *Social Psychology* Web site offers both text specific and general resources, including an outline of the text features, available supplements, and student and instructor resource areas complete with exercises and links. Finally, instructors can take advantage of the *McGraw-Hill Learning*

Architecture (MHLA), and innovative system through which instructors can administer their course and deliver educational content over networked environments. MHLA allows for an integrated virtual classroom by providing content creation and management capabilities, built-in e-mail, on-line quizzing and testing, and customization of text resources for both the instructor and the student. See your McGraw-Hill sales representative for more details.

In collaboration with Martin Bolt, McGraw-Hill also now offers a videodisc of classic social psychology experiments. These 4- to 8-minute clips (also available on videotape) are drawn from social psychology archives and arranged to complement the text. A second videodisc (or videotape), edited and produced by Philip Zimbardo and Allen Funt, offers 3- to 5-minute clips from the original Candid Camera show. These too follow the text organization and can enrich and stimulate class discussion.

In appreciation

Although only one person's name appears on this book's cover, the truth is that a whole community of scholars has invested itself in it. Although none of these people should be held responsible for what I have written—nor do any of them fully agree with everything said—their suggestions made this a better book than it could otherwise have been.

This new edition still retains many of the improvements contributed by consultants and reviewers on the first five editions. To the following esteemed colleagues I therefore remain indebted:

Robert Arkin, Ohio State University	Stephen Fugita, Santa Clara University
Susan Beers, Sweet Briar College	David A. Gershaw, Arizona Western College
George Bishop, National University of Singapore	Mary Alice Gordon, Southern Methodist University
Galen V. Bodenhausen, Michigan State University	Ranald Hansen, Oakland University
Martin Bolt, Calvin College	Allen Hart, University of Iowa
Dorothea Braginsky, Fairfield University at Fredonia	Elaine Hatfield, University of Hawaii
David Buss, University of Texas	James L. Hilton, University of Michigan
Russell Clark, North Texas State University	Bert Hodges, Gordon College
Cynthia Crown, Xavier University	William Ickes, University of Texas at Arlington
Jack Croxton, State University of New York at Fredonia	Marita Inglehart, University of Michigan
Anthony Doob, University of Toronto	Chester Insko, University of North Carolina
Philip Finney, Southeast Missouri State University	Edward Jones, Princeton University [deceased]
William Froming, Pacific Graduate School of Psychology	Judi Jones, Georgia Southern College

Martin Kaplan, Northern Illinois University
Janice Kelly, Purdue University
Douglas Kenrick, Arizona State University
Norbert Kerr, Michigan State University
Charles Kiesler, University of Missouri
Marjorie Krebs, Gannon University
David McMillen, Mississippi State University
Robert Millard, Vassar College
Arthur Miller, Miami University
Teru Morton, Vanderbilt University
Darren Newton, University of Virginia
Chris O'Sullivan, Bucknell University
Paul Paulus, University of Texas at Arlington
Scott Plous, Wesleyan University
Nicholas Reuterman, Southern Illinois University of Edwardsville
Robert D. Ridge, Brigham Young University
Linda Silka, University of Lowell
Royce Singleton, Jr., College of the Holy Cross
Stephen Slane, Cleveland State University

Richard A. Smith, University of Kentucky
Mark Snyder, University of Minnesota
Sheldon Solomon, Skidmore College
Garold Stasser, Miami University
Homer Stavely, Keene State College
Elizabeth Tanke, University of Santa Clara
William Titus, Brainerd College
Tom Tyler, University of California, Berkeley
Rhoda Unger, Montclair State College
Billy Van Jones, Abilene Christian College
Mary Stewart Van Leeuwen, Calvin College
Ann L. Weber, University of North Carolina at Asheville
Daniel M. Wegner, University of Virginia
Gary Wells, Iowa State University
Bernard Whitley, Ball State University
Kipling Williams, University of New South Wales
Midge Wilson, DePaul University.

I have additionally benefited from reviews of the previous edition that helped guide the creation of this new sixth edition. My sincere thanks to the following:

Jerome M. Chertkoff, Indiana University
Donald Granberg, University of Missouri
John W. McHoskey, University of Evansville

Ellen E. Pastorino, Gainesville College
JoNell Strough, West Virginia University.

Finally, a number of teacher-scholars reviewed these new chapters, rescuing me from occasional mistakes and offering constructive suggestions (and encouragement):

Mike Aamodt, Radord University

Fred B. Bryant, Loyola University

Shawn Meghan Burn, California Polytechnic State University

Karen A. Couture, Notre Dame College

Carrie B. Fried, Indiana University, South Bend

Todd D. Nelson, California State University

Sandra Sims Patterson, Spelman College

Wesley Schultz, California State University, San Marcos

Chistine M. Smith, Grand Valley State University.

I am indebted to each of these colleagues.

Hope College, Michigan, and the University of St. Andrews, Scotland, have been wonderfully supportive of these successive editions. Both the people and the environment provided by these two institutions have helped make the gestation of *Social Psychology* a pleasure. At Hope College, poet Jack Ridl helped shape the voice you will hear in these pages, and Kathy Adamski has again contributed her good cheer and secretarial support. Phyllis and Rick Vandervelde prepared each of the successive drafts with remarkable skill and efficiency. Gretchen Rumohr-Voskuil contributed library research, proofreading, and paperwork management. She also painstakingly created the name index and page-referenced bibliography.

Were it not for the inspiration of Nelson Black of McGraw-Hill, it never would have occurred to me to write a textbook. Alison Meersschaert guided and encouraged the formative first edition. Psychology editor Mickey Cox helped envision the plan for this sixth edition and its teaching supplements. Developmental editor Jeannine Ciliotta gently nurtured this new edition, suggesting numerous revisions and offering countless ideas and editorial touches along the way. As editorial coordinator, Stephanie Cappiello has overseen the development of both the manuscript and the teaching supplements. And Marilyn Rothenberger has patiently guided the process of converting the manuscript into finished book.

To all in this supporting cast, I am indebted. Working with all these people has made the creation of this book a stimulating, gratifying experience.

About the author

david G. Myers is the John Dirk Werkman Professor of Psychology at Michigan's Hope College, where he has been voted "Outstanding Professor" by students. Myers' love of teaching psychology is evident in his writing for the lay public. He has written for many magazines, including *Scientific American* and *Today's Education*. His ten books include texts for Introductory and Social Psychology, and *The Pursuit of Happiness: Who Is Happy—and Why*.

Also an award-winning researcher, Dr. Myers received the Gordon Allport Prize from Division 9 of the American Psychological Association for his work on group polarization. His scientific articles have appeared in more than two dozen journals, including *Science*, *American Scientist*, *Psychological Bulletin*, and *Psychological Science*. He has served his discipline as consulting editor to the *Journal of Experimental Social Psychology* and the *Journal of Personality and Social Psychology*.

In his spare time he has chaired his city's Human Relations Commission, helped found a Community Action Center that assists poverty-level families, and spoken to numerous collegiate and religious groups. David and Carol Myers are parents of two sons and a daughter.

Brief contents

Preface

chapter 1 Introducing Social Psychology

Part One Social Thinking

chapter 2 The Self in a Social World

chapter 3 Social Beliefs and Judgments

chapter 4 Behavior and Attitudes

Part Two Social Influence

chapter 5 Genes, Culture, and Gender

chapter 6 Conformity

chapter 7 Persuasion

chapter 8 Group Influence

Part Three Social Relations

chapter 9 Prejudice: Disliking Others

chapter 10 Aggression: Hurting Others

chapter 11 Attraction and Intimacy: Liking and Loving Others

chapter 12 Altruism: Helping Others

chapter 13 Conflict and Peacemaking

Modules Social Psychology Applied

module A Social Psychology in the Clinic

module B Social Psychology in Court
